Science and engineering research of crucial importance to new reactor designs is dependent on the particular reactor application being explored. Examples include, but are not limited to, basic material degradation and corrosion sciences impacting both operation and applications; increased understanding of the behavior of fluid systems at elevated temperatures; modern high-temperature materials for reactor structural components; innovative non-destructive evaluation methods for system and component monitoring; development and application of risk-based design tools for pre-deployment predictions of performance and reliability; modern computational and modeling methods; incorporation of inherent safety features; automation of reactor system operation; radiation damage and metallurgy of long-lived fuels and other components; science and engineering effort to support alternative energy conversion methods.

Advanced Nuclear Fuels

Research and development is needed to provide measurable improvements in the understanding and performance of nuclear fuel with respect to safety, waste production, proliferation resistance, and economics to enhance the long-term viability of nuclear energy systems. Appropriate topics include, but are not limited to: innovative concepts for material preparation and production of nuclear fuels; enhanced fuel design safety; innovation in fuel composition or other attributes that maximize energy production, optimize fissile material utilization, or reduce production costs.

Applications are solicited in scientific and engineering research that encompass an evaluation over the entire nuclear fuel cycle utilizing knowledge gained over the past several decades on the technical characteristics of recycling systems, as well as in monitoring and controlling fissionable materials, but not being bound by technologies and facilities currently available. This work is basic to innovative reactor concepts, proliferation resistance, and advanced fuels. Results are expected to define gaps in current knowledge and hence identify areas requiring further work.

New Technologies for Management of Nuclear Waste

Paramount to public acceptance of nuclear technology is development of concepts and supporting knowledge required for reliable approaches to management and storage of spent fuels and associated wastes. Appropriate research topics include, but are not limited to, new concepts for on-site or interim surface storage; chemistry and materials science to develop understanding of the behavior of spent fuel for time periods consistent with on-site surface storage requirements; strategies for reduction in high level waste volume; research in surface chemistry and physics to understand and ameliorate corrosion processes at all pertinent interfaces; engineering research to support beneficial use of spent fuel and associated wastes.

Applications in this area are expected to complement, and not duplicate, research activities supported by the Offices of Civilian Radioactive Waste and Environmental Management. Abstracts of work supported under the Environmental Management Science Program (EMSP) can be found at *http://www.doe.gov/em52/science-grants.html*, while information on the Civilian Radioactive Waste program and related efforts can be found at *http://www.rw.doe.gov/links.htm*.

Fundamental Science and Technology

This element features research and development in science and new technologies that support one or more applications in the nuclear energy field, including but not limited to those identified for the preceding program elements. The proposed work should be based in part on a consideration of the value or benefits of this work to potential future applications that satisfy the program objectives. Scientific and engineering research is solicited in pertinent areas of materials and chemical sciences, automation engineering and computational sciences, thermodynamics, health physics, systems engineering and safety, human factors research to improve the man/machine interface, and other areas which addresses problems common to the technology topics described above.

Applications should identify the prospective technical areas associated with the proposed work, and the expected benefits from successful completion of this work.

Designation of Field(s) of Proposed Work

To facilitate the merit review, preapplications and applications should identify the nuclear technology areas and the related engineering research and/or basic science field(s) that most closely apply to the proposed research work. The nuclear technology areas include proliferation resistant reactor and fuel, reactors with higher performance/efficiency, low output reactors, advanced nuclear fuels, management of nuclear waste, and fundamental science and technology. The engineering research category would include such fields as reactors; system and component design development; fuel systems development; instrumentation and control systems development; radioactive waste; and other nuclear engineering fields of research. The basic science categories would include such fields as materials science, chemical science, computational sciences (including development of algorithms and software technology), and engineering sciences (including basic research on instrumentation and control systems, diagnostics and transport processes).

The requested identification of applicable fields of work is not intended to constrain or otherwise influence the proposed work in any way.

Collaborative Applications

Collaboration between science and engineering researchers is encouraged. U.S. universities, DOE national laboratories, private industry and R&D and non-profit organizations are encouraged to submit collaborative applications. Collaborative applications should identify a lead organization, and the work scope responsibilities and cost for each participating organization. The lead organization should submit a single application, which integrates the portion of the overall project work scope assigned to each participant.

For successful applications, DOE will award grants or cooperative agreements, as applicable, to the lead organizations. The lead organization will fund other non-federal participants by a subcontract arrangement. Any participating DOE national laboratories will be separately funded directly by DOE. The private sector or academic organization must include a Standard Face Page (Form 424) and Budget Pages for its portion of the project in the application. Separate Budget Pages must be included for the DOE national laboratory portion. The joint application must be submitted as one package.

Where a DOE national laboratory is the lead organization, the application should be prepared in response to Program Announcement LAB NE–99–1.

Collaboration with international organizations is acceptable provided the collaboration is mutually beneficial and the lead organization is a U.S. based organization, and all DOE and other domestic funding is used for work performed in the U.S. Such collaborative arrangements are subject to approval by DOE and must comply with any Federal restrictions on foreign participation, and with any current DOE memoranda of understanding or other general agreements between DOE and the participating foreign entity.

Preapplications

The submittal of preapplications prior to submission of full applications is encouraged. The purpose of submitting a preapplication is to receive a preliminary DOE opinion regarding the significance of the proposed work in meeting program objectives. Preapplications should include a cover sheet and a brief (up to 3 pages) project description. The cover sheet should identify the name, telephone, fax and e-mail address for the project manager or principal investigator and for the organization(s) submitting the application, title of the project, and the field of R&D. A narrative project description should be included indicating the objectives, work to be accomplished and importance of successful completion, resources needed, and estimated cost. In the case of collaborative projects, the preapplicant should identify the work to be performed by each participating organization and the estimated cost to be borne by each party. The original and five copies of the preapplication should be submitted. DOE will review preapplications for technical and scientific merit and relevance of the proposed project to program objectives and respond to the applicants. This preliminary review neither prevents submittal of a full application nor indicates the likelihood of an award.

Format and Information to be Included in the Application

Applicants are expected to use the following format. Applications must be written in English with all budgets in U.S. dollars. The applications should clearly present the objectives, activities or tasks to be performed, schedule and costs, and the importance/significance of the proposed project. Where collaborative efforts are proposed, the individual responsibilities of participating organizations should be identified. As a minimum, the following information should be included:

• Standard face page (DOE Form 424).
• Table of Contents.
• Project Abstract including identification of the fields of R&D for the proposed project (1 +page).
• Project Description—narrative description of the proposed project including objectives, R&D plan including preliminary studies, research design and tasks, and the significance or benefits of proposed project (no more than 20 pages; multi-investigator collaborative projects may use up to 40 pages).
• Project schedule information.
• Organization & Qualifications—identification of the project organization, and qualifications and responsibilities of the participating organizations. Biographical sketches of project manager/principal investigator and other key project personnel (no more than 2 pages each).
• Collaborative R&D (if applicable)—description of the collaborative arrangements defining responsibilities and tasks assigned to each participating organization (up to 2 pages).
• Facilities & Resources—information on the experience of the applicant organization and the adequacy of required facilities and resources (no more than 5 pages).
• Budget for each year and a summary budget page for the entire project period (using DOE F.4620.1)
• Budget explanation for each participating organization.

• Budget and budget justification for each collaborative subproject, if any.

• Additional information the applicant deems relevant may be included, subject to the page limitation.

In addition to providing an original and seven copies of each application, applicants are required to also provide a 3.5-inch write protected diskette containing the application in electronic format. The label on the diskette must clearly identify the institution, principal investigator, title of application, and the computer system and program used to prepare the document. Unsuccessful applications will not be returned to the applicant.

Application Evaluation

All valid applications will be evaluated in accordance with the requirements of Title 10 Code of Federal Regulations, Part 600.13:

• DOE will perform an initial review for conformance with the technical and administrative requirements stated in this solicitation, for funding availability, and for general relevance to NERI program objectives.

• For those applications that successfully complete the initial review, an objective merit review (peer review) will be performed to evaluate technical and/or scientific merit, and cost aspects of the applications, exclusive of NE programmatic and policy factors. This review will be in accordance with the evaluation criteria stated below. For this purpose, a group comprised of three or more professionally and technically qualified persons will be selected in such a manner as to assure the highest degree of independence and objectivity. The reviewers may include any mix of federal and non-federal experts, except those persons involved in approving/disapproving the applications. Reviewers must comply with the requirements for avoiding conflict of interest as stated in 10 CFR 600.14.

• Following the objective merit review, a relevance review will be performed by DOE on those applications judged to be of the highest merit. The applications will be evaluated with respect to NE programmatic and policy factors, including relevance of the proposed work to the NERI program objectives, and the balance among program elements to be supported.

The following evaluation criteria apply to the objective merit review:

• Technical quality of the application and proposed work:

—Contribution to the state of knowledge in the scientific/technology fields;

—Importance of the proposed work in meeting program objectives;

—Completeness and clarity of the technical application;

—Appropriateness/adequacy of the proposed methodology or approach;

• Extent to which proposed work is new, unique or innovative;

• Reasonableness of the proposed project cost and schedule including allocations among multiple participating organizations where applicable.

• Capabilities and qualifications of principal investigator/project manager and key personnel; adequacy of resources and facilities applied by participating organizations.

Intellectual Property Rights

With respect to intellectual property, the patent and data provisions set forth in 10 CFR Part 600.27 and 48 CFR 927 shall be used in any financial assistance awards funded under this program. Any application or preapplication materials which contain proprietary technical or confidential commercial data should be submitted with the Notice contained at 10 CFR 600.15 (b)(1).

Regulatory Information

No funding will be available under the DOE Minority Economic Impact Act (MEI) loan program, 10 CFR Part 800, to finance the cost of preparing a financial assistance application.

Review under E.O. 12372, "Intergovernmental Review of Federal Programs" is not required.

Statutory and Regulatory Authority

The Nuclear Energy Research Initiative will be conducted under the authority of the Energy and Water Development Appropriations Act of 1999, Pub. L. 105–245; the Catalog of Federal Domestic Assistance (CFDA) number 81.092; and the applicable DOE Financial Assistance Regulations at 10 CFR Part 600. The regulations and guidance documents can be accessed on the DOE Financial Assistance Home Page at: "http://www.pr.doe.gov/fahome.html".

Solicitation Questions & Answers

DOE does not intend to hold a preapplication conference. You may submit your written questions via e-mail to denise.berry@oak.doe.gov by November 13, 1998. Responses to questions will be periodically placed on the Oakland Operations Web Site: "http://www.oak.doe.gov/financial/sol_page.html".

Information

Information about the development, submission of applications, eligibility, limitations, the selection process, and other policies and procedures may be found on "http://www.oak.doe.gov/financial/sol_page.html"2.

Certifications

Lobbying Restrictions (Department of Interior & Related Agencies Appropriations Act, 1998)

The contractor or awardee agrees that none of the funds obligated on the award shall be made available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete. This restriction is in addition to those prescribed elsewhere in statute and regulation.

Notice Regarding the Purchase of American-Made Equipment and Products—Sense of Congress

It is the sense of Congress that, to the greatest extent practicable, all equipment and products purchased with funds made available under this award should be American-made.

Simpson-Craig Amendment

Applicant organizations which are described in section 501(c)(4) of the Internal Revenue Code of 1986 and engage in lobbying activities after December 31, 1995 shall not be eligible for the receipt of Federal funds constituting an award, grant, or loan. Section 501(c)(4) of the Internal Revenue Code of 1986 covers:

> Civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare, or local associations of employees, the membership of which and the net earnings of which are devoted exclusively to charitable, educational, or recreational purposes.

As set forth in section 3 of the Lobbying Disclosure Act of 1995, as amended, (2 U.S.C. 1602), lobbying activities are defined broadly to include among other things, contacts on behalf of an organization with specified employees of the Executive Branch and Congress with regard to Federal legislative regulatory, and program administrative matters. Applicants qualifying as described in section 501(c)(4) of the Internal Revenue Code of 1986 must fill out representation.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP99–39–000]

Granite State Gas Transmission, Inc.; Notice of Application

November 2, 1998.

Take notice that on October 27, 1998, Granite State Gas Transmission, Inc. (Granite State), 300 Friberg Parkway, Westborough, Massachusetts 01581, filed an application, pursuant to Sections 7(b) and 7(c) of the Natural Gas Act and Part 157 of the Commission's Regulations. Granite State seeks to acquire and operate as an integral component of its main transmission system approximately 5,300 feet of 8 and 12-inch lateral pipeline now owned and operated by Northern Utilities, Inc. (Northern Utilities). The pipe is currently part of Northern Utilities natural gas distribution system in the Town of Newington (Rockingham County), New Hampshire. As a consequence of the acquisition, Granite State needs to abandon a transportation service delivery point to Northern Utilities on its main line and establish three new delivery points to Northern Utilities along the lateral. The details of Granite State's proposal are more fully set forth in the application which is on file with the Commission and open to public inspection.

Granite State says that the Commission has certificated a new interstate pipeline in Docket No. CP97–238–000 which will be jointly owned and operated by the Portland Natural Gas Transmission System (PNGTS) and Maritimes and Northeast Pipeline L.L.C. (Maritimes). According to Granite State, PNGTS-Maritimes have been authorized to construct and operate an interconnection with Granite State in the Town of Newington at which point Granite State will receive natural gas deliveries from the jointly owned pipeline. Granite State will receive such deliveries for further transportation on its system, most notably on behalf of, Northern Utilities. Granite State further says that Northern Utilities will be a significant shipper on PNGTS–Maritimes, but will not be directly connected to the jointly owned pipeline facility. Granite State says that the only route by which Northern Utilities can receive gas shipped for its account on PNGTS-Maritimes is via Granite State's authorized interconnections with the jointly owned pipeline.

Granite State further says that it has no existing directly connecting pipeline between the planned and authorized Newington interconnection with PNGTS–Maritimes. However, Granite State says that Northern Utilities has a distribution lateral consisting of 5,324 feet of 8 and 12-inch pipeline (the Gosling Road Lateral) which extends from Granite State's main line to the site of the Newington interconnection. Granite State proposes in its application to acquire and operate the lateral as an integral component of its main transmission system. The acquisition cost will be the depreciated book cost on the date of transfer, which is estimated to be $372,035.12 on December 31, 1998.

Granite State also says that, in connection with the acquisition, it will abandon the present delivery point to Northern Utilities at the point where the Gosling Road Lateral connects with Granite State's main line and it will establish three delivery points to Northern Utilities at existing points on the lateral where gas now flows into Northern Utilities' local distribution system. Granite State says that no construction of new facilities is required to implement its proposed acquisition and no existing service will be terminated or abandoned.

Any person desiring to be heard or to make any protest with reference to said application should on or before November 23, 1998, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the Protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed acquisition are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Granite State to appear or be represented at the hearing.

David P. Boergers,

Secretary.

[FR Doc. 98–29764 Filed 11–5–98; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2777]

Idaho Power Company; Notice of Authorization for Continued Project Operation

November 2, 1998.

On December 20, 1995, Idaho Power Company, licensee for the Upper Salmon Falls Project No. 2777, filed an application for a new or subsequent license pursuant to the Federal Power Act (FPA) and the Commission's regulations thereunder. Project No. 2777 is located on the Snake River in Gooding and Twin Falls Counties, Idaho.

The license for Project No. 2777 was issued for a period ending October 31, 1998. Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year to year an annual license to the then licensee under the terms and conditions of the

prior license until a new license is issued, or the project is otherwise disposed of as provided in Section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of Section 15 of the FPA, then, based on Section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at CFR 16.21(a); if the licensee of such project has filed an application of a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to the 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to Section 15 of the FPA, notice is hereby given that an annual license for Project No. 2777 is issued to Idaho Power Company for a period effective November 1, 1998, through October 31, 1999, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first. If issuance of a new license (or other disposition) does not take place on or before October 31, 1999, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under Section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise.

If the project is not subject to Section 15 of the FPA, notice is hereby given that Idaho Power Company is authorized to continue operation of the Upper Salmon Falls Project No. 2777 until such time as the Commission acts on its application for subsequent license.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2169, TN]

Tapoco, Inc.; Notice of Tapoco, Inc's Request To Use Alternative Procedures in Preparing a License Application

November 2, 1998.

This notice supersedes the NOTICE OF TAPOCO, INC'S REQUEST TO USE ALTERNATIVE PROCEDURES IN PREPARING A LICENSE APPLICATION, dated October 28, 1998.

On October 1, 1998, the existing licensee, Tapoco, Inc. (Tapoco), filed a request to use alternative procedures for submitting an application for new license for the existing Tapoco Project No. 2169.[1] Tapoco has demonstrated that they have made an effort to contact resource agencies, Indian tribes, nongovernmental organization (NGOs), and others affected by their proposal, and that a consensus exists that the use of an alternative procedure is appropriate in this case.

The purpose of this notice is to invite comments on Tapoco request to use the alternative procedure, pursuant to Section 4.34(i) of the Commission's regulations.[2] Additional notices seeking comments on the specific project proposal, interventions and protests, and recommended terms and conditions will be issued at a later date.

The alternative procedures being requested here combine the prefiling consultation process with the environmental review process, allowing the applicant to complete and file an environmental document (NEPA document) in lieu of Exhibit E of the license application. This differs from the traditional process, in which the applicant consults with agencies, Indian tribes, and NGOs during preparation of the application for the license and before filing it, but the Commission staff performs the environmental review after the application is filed. The alternative procedures are intended to simplify and expedite the licensing process by combining the prefiling consultation and environmental review processes into a single process, to facilitate greater participation, and to improve communication and cooperation among the participants.

[1] The 326.5-megawatt Tapoco (originally known as the Tallasee project) project is located on the Little Tennessee and its tributary, the Cheoah River, in Blount and Monroe Counties, Tennessee, and Graham and Swain Counties, North Carolina. The project consists of four development: Chilhowee, Cheoah, Santeetlah, and Calderwood.

[2] Order No. 596, Regulations for the Licensing of Hydroelectric Projects, 81 FERC ¶ 61,103 (1997).

Comments

Interested parties have 30 days from the date of this notice to file with the Commission, any comments on Tapoco's proposal to use the alternative procedures to prepare an application to relicense the Tapoco Project.

Filing Requirements

The comments must be filed by providing an original and 8 copies as required by the Commission's regulations to: Federal Energy Regulatory Commission, Office of the Secretary, Dockets—Room 1A, 888 First Street, NE, Washington, DC 20426.

All comment filings must bear the heading "Comments on the Alternative Procedure," and include the project name and number (Tapoco Project, No. 2169).

For further information, please contact Ronald McKitrick of the Federal Energy Regulatory Commission at 770–452–2363 ext. 44 or E-mail at ronald.mckitrick@FERC.Fed.US.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP99–28–000]

Tennessee Gas Pipeline Company; Notice of Application for Section 3 Authorization and Request for a Presidential Permit

November 2, 1998.

Take notice that on October 20, 1998, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed an application pursuant to Section 3 of the Natural Gas Act (NGA), and Subpart B of Part 153 of the Federal Energy Regulatory Commission's (Commission) Regulations under the NGA, for an order authorizing the siting, construction, and operation of pipeline facilities and the place of entry and exit for import and export of natural gas at the International Boundary between the United States and Mexico in Hidalgo County, Texas.

Additionally, Tennessee requests, pursuant to Subpart C of Part 153 of the Commission's Regulations under the NGA and in compliance with Executive Order 10485, as amended by Executive Order 12038, issuance of a Presidential Permit for the construction, operation, maintenance, and connection of pipeline facilities for the import and export of natural gas at the International Boundary between the United States and Mexico in Hidalgo County, Texas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Pemex Gas y Petroquímica Básica (PGPB) has requested that Tennessee provide transportation service for PGPB to an interconnect with PGPB's existing meter station in Reynosa, Mexico.[1] In order for Tennessee to provide the requested transportation service for PGPB, Tennessee will construct new facilities consisting of (1) approximately 9.3 miles of 24-inch diameter lateral pipeline commencing from Side Valve No. 409A–401 of Tennessee's existing Donna Lateral line 409A–100 located at Mile Post 9.02 located in Hidalgo County, Texas, (2) a meter station, and (3) approximately 1,500 feet of 24-inch diameter pipe (Border Crossing Facilities) ending at an interconnect with an existing PGPB meter station located in Reynosa, Mexico. These facilities are the subject of a prior notice filing in Docket No. CP99–29–000.

In order to provide for the importation and exportation of natural gas at the International Boundary between the United States and Mexico in Reynosa, Mexico, Tennessee proposes to construct the Border Crossing Facilities. Of this approximately 1,500 foot pipeline segment, Tennessee will construct approximately 486 feet of 24-inch diameter pipe from the terminus of the 9.3 mile lateral to a point which represents the midpoint of the Rio Grande/Rio Bravo River at the International Boundary. From the Mexican side of the midpoint of the Rio Grande/Rio Bravo River, Tennessee will cause the construction on PGPB's behalf of approximately 951 feet of 24-inch diameter pipeline, with appurtenances, which shall extend to PGPB's meter station. Tennessee will own, operate and maintain the Border Crossing Facilities on the U.S. side of the International Boundary. PGPB will own, operate and maintain the facilities extending from the Mexican side of the International Boundary to its meter station.

Tennessee and PGPB have entered into a Transportation Service Agreement (TSA) dated September 30, 1998, which provides for the firm transportation of up to 185,000 dekatherms per day of natural gas by Tennessee for PGPB between specified points of interconnection on Tennessee's mainline facilities and the proposed interconnection point.

Any person desiring to be heard or to make any protest with reference to said document should, on or before, November 23, 1998, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426 a protest or motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Commission by Section 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this document if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the motion is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Tennessee to appear or be represented at the hearing.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–M

[1] PGPB is a wholly-owned subsidiary of Petroleos Mexicanos, the Mexican national oil company. PGPB operates Mexico's interstate natural gas pipeline network and is responsible for Mexican and international natural gas, LNG and crude oil marketing.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP99–29–000]

Tennessee Gas Pipeline Company; Notice of Request Under Blanket Authorization

November 2, 1998.

Take notice that on October 20, 1998, Tennessee Gas Pipeline Company (Tennessee), a Delaware Corporation, P.O. Box 2511, Houston, Texas 77252, tendered filing a request in Docket No. CP99–29–000, pursuant to Sections 157.205, 157.208 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 18 CFR 157.208, and 18 CFR 157.212), for authorization to construct and operate a meter, a lateral and a bi-directional point to provide transportation service to Pemex Gas y Petroquímica Básica (PGPB), under Tennessee's blanket certificate authority granted September 1, 1982, in Docket No. CP82–413–000, pursuant to Section 7(c) of the Natural Gas Act (NGA), all as more fully set forth in the request on file with the Commission and open for public inspection.

Tennessee proposes to construct and operate an approximately 9.3 mile 24-inch outside diameter lateral with a proposed MAOP of 1000 psi extending from Side Valve No. 409A–401 of Tennessee's Donna Lateral Line at Mile Post 9.02 in Hidalgo County, Texas, to the proposed Border Crossing Facilities that are the subject of a Section 3 and Presidential Permit application that Tennessee filed contemporaneously in Docket No. CP99–28–000. In addition, Tennessee will install a bi-directional 12-inch ultrasonic meter at the Donna Lateral take-off (the intersection of the Donna Lateral and the 9.3-mile lateral). Further, Tennessee proposes to construct approximately 1500 feet of 24-inch pipe which constitutes the aforementioned Border Crossing Facilities. Of the total amount of the Border Crossing Facilities, 486 feet will be on the U.S. side of the International Boundary. The remaining amount, approximately 951 feet will be constructed from the International Boundary to a PGPB meter station in Reynosa, Mexico. PGPB will own, operate, and maintain the Border Crossing Facilities in Mexico. The total estimated cost of Tennessee's facilities, including the 486 feet of Border Crossing Facilities in the U.S., is $9.35 million.

Tennessee will use the meter as the back-up for custody transfer measurements at PGPB's meter station in Reynosa, Mexico. The proposed bi-directional point will be designated as the midpoint of the Rio Grande/Rio Bravo River at the International Boundary. Tennessee proposes to operate this point as a delivery point on its system and make it available for use by its customers on a firm and interruptible basis. In addition, Tennessee proposes to operate this point as a receipt point pursuant to the automatic authorization provisions of 18 CFR 157.208.

Tennessee states that (i) the total quantities to be received and/or delivered at the delivery point after it is installed will not exceed previously authorized total quantities; (ii) that the proposed modification is not prohibited by its tariff; and (iii) that it has sufficient capacity to accomplish receipt and/or deliveries at the proposed point without detriment or disadvantage to Tennessee's other customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file, pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.234), a motion to intervene or notice of intervention and, pursuant to Section 157.205 of the regulations under the Natural Gas Act (18 CFR 157.205), a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a request. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

David P. Boergers,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP99–34–000]

Williams Gas Pipelines Central, Inc.; Notice of Request Under Blanket Authorization

November 2, 1998.

Take notice that on October 23, 1998, Williams Gas Pipelines Central, Inc. (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP99–34–000 a request pursuant to Sections 157.205, 157.212 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212 and 157.216) for authorization (1) to replace the Missouri Gas Energy (MGE), a division of Southern Union Company, Anderson town border meter setting and appurtenant facilities and relocate it to the site of the existing high pressure regulator, and (2) to abandon in place by sale to MGE approximately 1.05 miles of the Anderson 3-inch lateral pipeline (Line HR–2) located in McDonald County, Missouri, under Williams's blanket authorization issued in Docket No. CP82–479–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

The project cost according to Williams is estimated at $12,957. Williams states that the change is not prohibited by its existing tariff and that it has sufficient capacity to accomplish deliveries without detriment or disadvantages to other customers. The proposed changes will not have an effect on Williams' peak day and annual deliveries and the total volumes delivered will not exceed total volumes authorized prior to this request.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Federal Energy Regulatory Commission

[Docket No. ER98–3169–001, et al.]

Consolidated Edison Company of New York, Inc., et al.; Electric Rate and Corporate Regulation Filings

October 27, 1998.

Take notice that the following filings have been made with the Commission:

1. Consolidated Edison Company of New York, Inc.

[Docket No. ER98–3169–001]

Take notice that on October 22, 1998, Consolidated Edison Company of New York, Inc., made its compliance filing as required under the Commission's order of September 22, 1998.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. American Power Exchange, Inc., Power Providers Inc., Energy Resource Management Corporation, TexPar Energy, Inc., Vitol Gas & Electric LLC, The Cleveland Electric Illuminating Company, The Toledo Edison Company

[Docket No. ER94–1578–016, Docket No. ER96–2303–009, Docket No. ER96–358–009, Docket No. ER95–62–015, Docket No. ER94–155–023, Docket No. ER99–264–000, Docket No. ER99–265–000]

Take notice that the following informational filings have been made with the Commission and are available for public inspection and copying in the Commission's Public Reference Room:

On October 19, 1998, American Power Exchange, Inc. filed certain information as required by the Commission's October 19, 1994 order in Docket No. ER94–1578–000.

On October 20, 1998, Power Providers Inc. filed certain information as required by the Commission's September 3, 1996 order in Docket No. ER96–2303–000.

On October 20, 1998, Energy Resource Management Corporation filed certain information as required by the Commission's December 20, 1995 order in Docket No. ER96–358–000.

On October 20, 1998, TexPar Energy, Inc. filed certain information as required by the Commission's December 27, 1994 order in Docket No. ER95–62–000.

On October 20, 1998, Vitol Gas & Electric LLC filed certain information as required by the Commission's January 14, 1994 order in Docket No. ER94–155–000.

On October 20, 1998, the Cleveland Electric Illuminating Company filed certain information as required by the Commission's September 27, 1996 order in Docket No. ER96–371–000.

On October 20, 1998, the Toledo Edison Company filed certain information as required by the Commission's January 10, 1997 order in Docket No. ER97–455–000.

On October 19, 1998, HQ Energy Services (U.S.) Inc. filed certain information as required by the Commission's November 12, 1998 order in Docket No. ER97–851–001.

On October 19, 1998, Kincaid Generation LLC filed certain information as required by the Commission's January 30, 1997 order in Docket No. ER97–30–000.

On October 19, 1998, WPS Energy Services, Inc. filed certain information as required by the Commission's April 16, 1996 order in Docket No. ER96–1088–000.

On October 19, 1998, Old Dominion Electric Cooperative filed certain information as required by the Commission's October 17, 1997 order in Docket No. ER97–4314–000.

On October 19, 1998, Watt Works, LLC filed certain information as required by the Commission's June 24, 1997 order in Docket No. ER97–2592–000.

On October 19, 1998, Texas-New Mexico Power Company filed certain information as required by the Commission's October 15, 1997 order in Docket No. ER97–4185–000.

On October 19, 1998, Delmarva Power & Light Company filed certain information as required by the Commission's July 31, 1996 order in Docket No. ER96–501–000.

4. Boston Edison Company

[Docket No. ER99–35–000]

Take notice that on October 22, 1998, Boston Edison Company (Boston Edison), tendered for filing a Standstill agreement with Wellesley Municipal Light Department.

Boston Edison states that copies of this filing have been posted and served upon the customers involved in Docket No. ER99–35–000, and the Massachusetts Department of Telecommunications and Energy.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. Southern Indiana Gas and Electric Company, PacifiCorp, Preferred Energy Services, Inc., Superior Electric Power Corporation, Phibro Inc., Tractebel Energy Marketing, Inc.

[Docket No. ER99–225–000, Docket No. ER99–216–000, Docket No. ER96–2141–009, Docket No. ER95–1747–012, Docket No. ER95–430–017, Docket No. ER94–142–020]

Take notice that the following informational filings have been made with the Commission and are available for public inspection and copying in the Commission's Public Reference Room:

On October 16, 1998, Southern Indiana Gas and Electric Company filed certain information as required by the Commission's October 15, 1996 order in Docket No. ER96–2734–000.

On October 16, 1998, PacifiCorp filed certain information as required by the Commission's June 26, 1997 order in Docket No. ER97–2801–000.

On October 16, 1998, Preferred Energy Services, Inc. filed certain information as required by the Commission's August 13, 1996 order in Docket No. ER96–2141–000.

On October 16, 1998, Superior Electric Power Corporation filed certain information as required by the Commission's October 23, 1995 order in Docket No. ER95–1747–000.

On October 16, 1998, Phibro Inc. filed certain information as required by the Commission's June 9, 1995 order in Docket No. ER95–430–000.

On October 16, 1998, Tractebel Energy Marketing, Inc. filed certain information as required by the Commission's December 30, 1993 order in Docket No. ER94–142–000.

6. Consolidated Edison Company Of New York, Inc.

[Docket No. ER99–267–000]

Take notice that on October 22, 1998, Consolidated Edison Company of New York, Inc. (Con Edison), tendered for filing a Supplement to its Rate Schedule, Con Edison Rate Schedule FERC No. 129, a facilities agreement with Orange and Rockland Utilities, Inc., (O&R). The Supplement provides for an increase in the monthly carrying charges.

Con Edison states that a copy of this filing has been served by mail upon O&R.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. Consolidated Edison Company Of New York, Inc.

[Docket No. ER99–268–000]

Take notice that on October 22, 1998, Consolidated Edison Company of New

York, Inc. (Con Edison), tendered for filing a Supplement to its Rate Schedule, Con Edison Rate Schedule FERC No. 2, a facilities agreement with Central Hudson Gas and Electric Corporation (CH). The Supplement provides for a decrease in the monthly carrying charges.

Con Edison has requested that this decrease take effect as of October 1, 1998.

Con Edison states that a copy of this filing has been served by mail upon CH.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Kansas City Power & Light Company

[Docket No. ER99–269–000]

Take notice that on October 22, 1998, Kansas City Power & Light Company (KCPL), tendered for filing a Service Agreement dated October 2, 1998, between KCPL and TransAlta Energy Marketing (U.S.) Inc. This Agreement provides for the rates and charges for Short-term Firm Transmission Service. In its filing, KCPL states that the rates included in the above-mentioned Service Agreement are KCPL's rates and charges in the compliance filing to FERC Order 888–A in Docket No. OA97–636–000.

KCPL proposes an effective date of October 13, 1998 and requests a waiver of the Commission's notice requirement to allow the requested effective date.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Kansas City Power & Light Company

[Docket No. ER99–270–000]

Take notice that on October 22, 1998, Kansas City Power & Light Company (KCPL), tendered for filing a Service Agreement dated October 2, 1998, between KCPL and TransAlta Energy Marketing (U.S.) Inc. This Agreement provides for the rates and charges for Non-Firm Transmission Service. In its filing, KCPL states that the rates included in the above-mentioned Service Agreement are KCPL's rates and charges in the compliance filing to FERC Order No. 888–A in Docket No. OA97–636.

KCPL proposes an effective date of October 13, 1998, and requests waiver of the Commission's notice requirement.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. Wisconsin Electric Power Company

[Docket No. ER99–271–000]

Take notice that on October 22, 1998, Wisconsin Electric Power Company (Wisconsin Electric), tendered for filing an electric service agreement under its Market Rate Sales Tariff (FERC Electric Tariff, Original Volume No. 8) with NorAm Energy Services, Inc., (NorAm).

Wisconsin Electric respectfully requests an effective date of October 21, 1998, to allow for economic transactions.

Copies of the filing have been served on NorAm, the Michigan Public Service Commission, and the Public Service Commission of Wisconsin.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. Wisconsin Electric Power Company

[Docket No. ER99–272–000]

Take notice that on October 22, 1998, Wisconsin Electric Power Company (Wisconsin Electric), tendered for filing an electric service agreement under its Market Rate Sales Tariff (FERC Electric Tariff, Original Volume No. 8) with MidAmerican Energy Co., (MidAmerican).

Wisconsin Electric respectfully requests an effective date of October 21, 1998, to allow for economic transactions.

Copies of the filing have been served on MidAmerican, the Michigan Public Service Commission, and the Public Service Commission of Wisconsin.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Kentucky Utilities Company

[Docket No. ER99–273–000]

Take notice that on October 22, 1998, Kentucky Utilities Company (KU), tendered for filing an unexecuted Power Services Agreement between KU and El Paso Power Services Company under KU's Power Services Tariff, Rate PS.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. Kentucky Utilities Company

[Docket No. ER99–274–000]

Take notice that on October 22, 1998, Kentucky Utilities Company (KU), tendered for filing an unexecuted Power Services Agreement between KU and PP&L, Inc., under KU's Power Services Tariff, Rate PS.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Commonwealth Electric Company, Cambridge Electric Light Company

[Docket No. ER99–275–000]

Take notice that on October 22, 1998, Commonwealth Electric Company (Commonwealth) and Cambridge Electric Light Company (Cambridge), collectively referred to as the Companies, tendered for filing with the Federal Energy Regulatory Commission executed Service Agreements between the Companies and Southern Company Energy Marketing L.P.

These Service Agreements specify that the Customer has signed on to and has agreed to the terms and conditions of the Companies' Market-Based Power Sales Tariffs designated as Commonwealth's Market-Based Power Sales Tariff (FERC Electric Tariff Original Volume No. 7) and Cambridge's Market-Based Power Sales Tariff (FERC Electric Tariff Original Volume No. 9). These Tariffs, accepted by the FERC on February 27, 1997, and which have an effective date of February 28, 1997, will allow the Companies and the Customer to enter into separately scheduled short-term transactions under which the Companies will sell to the Customer capacity and/or energy as the parties may mutually agree.

The Companies request an effective date as specified on each Service Agreement.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. Kentucky Utilities Company

[Docket No. ER99–276–000]

Take notice that on October 22, 1998, Kentucky Utilities Company (KU), tendered for filing an unexecuted Power Services Agreement between KU and Associated Electric Cooperative, Inc., under KU's Power Services Tariff, Rate PS.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. ONEOK Power Marketing Company, Inc.

[Docket No. ER99–295–000]

Take notice that on October 22, 1998, ONEOK Power Marketing Company, Inc., tendered for filing a letter from the Executive Committee of the Western Systems Power Pool (WSPP), indicating that ONEOK Power Marketing Company, Inc., had completed all of the steps for pool membership. ONEOK Power Marketing Company, Inc., requests that the Commission amend the WSPP Agreement to include it as a member.

ONEOK Power Marketing Company, Inc., requests an effective date of November 1, 1998 for the proposed amendment. Accordingly, ONEOK Power Marketing Company, Inc., requests waiver of the Commission's notice requirements for good cause shown.

Copies of the filing were served upon the WSPP Executive Committee and WSPP's General Counsel.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

FEDERAL ENERGY REGULATORY COMMISSION

[Docket No. EC99–6–000, et al.]

Lake Benton Power Partners L.L.C., et al.; Electric Rate and Corporate Regulation Filings

October 28, 1998.

Take notice that the following filings have been made with the Commission:

1. Lake Benton Power Partners L.L.C.

[Docket No. EC99–6–000]

Take notice that on October 26, 1998, Lake Benton Power Partners L.L.C. (Lake Benton) filed a Notification of Changed Facts to reflect GECC Windco's intention to acquire a member interest in Lake Benton.

Comment date: November 25, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. ECK Generating, s.r.o.

[Docket No. EG99–14–000]

On October 23, 1998, ECK Generating, s.r.o. (Applicant), with its principal offices at Kladno, Dubska, Teplarna 272 03, filed with the Federal Energy Regulatory Commission (Commission) an Application for Determination of Exempt Wholesale Generator Status pursuant to Part 365 of the Commission's regulations. Applicant states that it will be engaged directly, or indirectly through one or more affiliates, as defined in Section 2(a)(11)(B) of PUHCA, and exclusively in the business of owning and or/operating, an undivided interest in an eligible facility and selling electric energy at wholesale and making permitted foreign retail electric sales.

Applicant is a limited liability company organized under the laws of the Czech Republic that will own a portion of and lease a portion of a 344 MW generating plant near the City of Kladno in the Czech Republic.

Comment date: November 18, 1998, in accordance with Standard Paragraph E at the end of this notice. The Commission will limit its consideration of comments to those that concern the adequacy or accuracy of the application.

3. Sigma Energy et. al.

[Docket Nos. ER97–4145–001, ER98–3433–001, ER96–1–012, ER91–195–027 thru 033, ER99–266–000, ER94–1061–018, ER95–1441–015, ER97–4116–002]

Take notice that the following informational filings have been made with the Commission and are available for public inspection and copying in the Commission's Public Reference room:

On October 21, 1998, Sigma Energy filed certain information as required by the Commission's October 8, 1997 order in Docket No. ER97–4145–000.

On October 21, 1998, JMF Power Marketing filed certain information as required by the Commission's July 17, 1998 order in Docket No. ER98–3433–000.

On October 21, 1998, PowerTec International, LLC filed certain information as required by the Commission's December 1, 1995 order in Docket No. ER96–1–000.

On October 21, 1998, Western Systems Power Pool filed certain information as required by the Commission's June 1, 1992 and May 13, 1993 orders as well as a deficiency letter dated September 22, 1998 from FERC's Division of Rate Applications, in Docket No. ER91–195–000.

On October 21, 1998, Wisconsin Electric Power Company filed certain information as required by the Commission's January 29, 1998 in Docket No. ER98–855–000.

On October 21, 1998, Rainbow Energy Marketing Corporation filed certain information as required by the Commission's June 10, 1994 letter order in Docket No. ER94–1061–000.

On October 21, 1998, Dupont Power Marketing Inc. filed certain information as required by the Commission's August 30, 1995 letter order in Docket No. ER95–1441–000.

On October 21, 1998, Inventory Management and Distribution Company, Inc. filed certain information as required by the Commission's September 25, 1997 order in Docket No. ER97–4116–000.

4. Boralex Stratton Energy, Inc.

[Docket No. ER98–4652–000]

Take notice that on October 23, 1998, Boralex Stratton Energy, Inc. (Boralex Stratton), petitioned the Commission for acceptance of Boralex Stratton Rate Schedule FERC No. 1; the granting of certain blanket approvals, including the authority to sell electricity at market-based rates; and the waiver of certain Commission regulations.

Boralex Stratton intends to engage in the wholesale sale of electric power from a 47 MW small power production facility, fueled by biomass, which it is acquiring in the United States. Boralex Stratton is a wholly-owned subsidiary of Boralex Industries Inc., which is a wholly-owned subsidiary of Boralex Inc., a Canadian corporation which has registered as a Foreign Utility Company with the Securities & Exchange Commission. Boralex Inc., owns in whole or in part eight hydroelectric facilities and one gas-fired cogeneration facilities located in Canada, with an aggregate generation capacity of 61.4 MW. None of the electricity generated by Boralex Inc., is sold in or transmitted to the United States.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. Boston Edison Company

[Docket No. ER99–35–000]

Take notice that on October 23, 1998, Boston Edison Company (Boston Edison), filed an executed Standstill Agreement with Wellesley Municipal Light Department in the above-captioned proceeding.

Boston Edison states that copies of this filing have been posted and served upon the customers involved in Docket No. ER99-35–000 and the Massachusetts Department of Telecommunications and Energy.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. New York State Electric & Gas Corporation

[Docket No. ER99–277–000]

Take notice that on October 23, 1998, New York State Electric & Gas

Corporation (NYSEG), tendered for filing executed Network Service and Network Operating Agreements between NYSEG and National Fuel Resources, Inc. These Agreements specify that the Transmission Customer has agreed to the rates, terms and conditions of NYSEG's currently effective open access transmission tariff and other revisions to the OATT applicable to all customers who take service under its retail access program.

NYSEG requests waiver of the Commission's 60-day notice requirements and an effective date of September 23, 1998, for the Service Agreements.

NYSEG has served copies of the filing on the New York State Public Service Commission and the Transmission Customer.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. PacifiCorp

[Docket No. ER99–278–000]

Take notice that on October 23, 1998, PacifiCorp tendered for filing in accordance with 18 CFR 35 of the Commission's Rules and Regulations, a Letter Agreement between PacifiCorp and Eugene Water & Electric Board (EWEB).

Copies of this filing were supplied to EWEB, the Washington Utilities and Transportation Commission and the Public Utility Commission of Oregon.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Consolidated Edison Company of New York, Inc.

[Docket No. ER99–279–000]

Take notice that on October 23, 1998, Consolidated Edison Company of New York, Inc. (Con Edison), tendered for filing a service agreement to provide firm transmission service pursuant to its Open Access Transmission Tariff to the New York Power Authority (NYPA).

Con Edison states that a copy of this filing has been served by mail upon NYPA.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Consolidated Edison Company of New York, Inc.

[Docket No. ER99–280–000]

Take notice that on October 23, 1998, Consolidated Edison Company of New York, Inc. (Con Edison), tendered for filing a service agreement to provide firm transmission service pursuant to its Open Access Transmission Tariff to the New York Power Authority (NYPA).

Con Edison states that a copy of this filing has been served by mail upon NYPA.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. Columbus Southern Power Company

[Docket No. ER99–281–000]

Take notice that on October 21, 1998, Columbus Southern Power Company (CSP), tendered for filing with the Commission a Facilities, Operations, Maintenance and Repair Agreement (Agreement) dated September 21, 1998, between CSP and South Central Power Company (hereinafter called SCP) and Buckeye Power, Inc., (hereinafter called Buckeye).

Buckeye has requested CSP provide a delivery point, pursuant to provisions of the Power Delivery Agreement between CSP, Buckeye Power, Inc. (hereinafter called Buckeye), The Cincinnati Gas & Electric Company, The Dayton Power and Light Company, Monongahela Power Company, Ohio Power Company and Toledo Edison Company, dated January 1, 1968.

CSP requests an effective date of January 15, 1999, for the tendered agreements.

CSP states that copies of its filing were served upon South Central Power Company, Buckeye Power, Inc., and the Public Utilities Commission of Ohio.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. PacifiCorp

[Docket No. ER99–282–000]

Take notice that on October 23, 1998, PacifiCorp, tendered for filing in accordance with 18 CFR 35 of the Commission's Rules and Regulations, a Mutual Netting/Closeout Agreements between PacifiCorp and British Columbia Power Exchange Corporation, City of Glendale, City of Idaho Falls, The Montana Power Trading & Marketing Company, Tucson Electric Power Company and Silicon Valley Power.

Copies of this filing were supplied the Washington Utilities and Transportation Commission and the Public Utility Commission of Oregon.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. The Dayton Power and Light Company

[Docket No. ER99–283–000]

Take notice that on October 23, 1998, The Dayton Power and Light Company (Dayton), submitted service agreements establishing Coral Power L.L.C., as customers under the terms of Dayton's Open Access Transmission Tariff.

Dayton requests an effective date of one day subsequent to this filing for the service agreements. Accordingly, Dayton requests waiver of the Commission's notice requirements.

Copies of the this filing were served and Coral Power, L.L.C., and the Public Utilities Commission of Ohio.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. The Dayton Power and Light Company

[Docket No. ER99–284–000]

Take notice that on October 23, 1998, The Dayton Power and Light Company (Dayton), tendered for filing a service agreements establishing with Coral Power, L.L.C., as customers under the terms of Dayton's Open Access Transmission Tariff.

Dayton requests an effective date of one day subsequent to this filing for the service agreements. Accordingly, Dayton requests waiver of the Commission's notice requirements.

Copies of the this filing were served upon with Coral Power, L.L.C., and the Public Utilities Commission of Ohio.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Tucson Electric Power Company

[Docket No. ER99–286–000, ER99–290–000, ER95–692–015, ER96–2408–010, ER97–3888–005, ER97–4240–001, ER99–287–000, ER99–288–000, ER97–2517–005, ER97–2517–006, ER94–1475–014, ER96–105–012 and ER99–289–000]

Take notice that the following informational filings have been made with the Commission and are available for public inspection and copying in the Commission's Public Reference Room:

On October 22, 1998, Tucson Electric Power Company filed certain information as required by the Commission's February 13, 1998 order in Docket No. ER98–1150–000.

On October 22, 1998, Commonwealth Electric Company and Cambridge Electric Light Company filed certain information as required by the Commission's February 27, 1997 order in Docket No. ER97–1068–000.

On October 22, 1998, TransCanada Power filed certain information as required by the Commission's June 9, 1995 order in Docket No. ER95–692–000.

On October 22, 1998, Avista Energy, Inc. filed certain information as required by the Commission's September 12, 1996 letter order in Docket No. ER96–2408–000.

On October 22, 1998, The Green Power Connection, Inc. filed certain information as required by the Commission's July 1, 1996 order in Docket No. ER97–3888–000.

On October 22, 1998, Granger Energy, L.L.C. filed certain information as required by the Commission's September 29, 1997 order in Docket No. ER97–4240–000.

On October 22, 1998, Tucson Electric Power Company filed certain information as required by the Commission's October 31, 1997 order in Docket No. ER97–4514–000.

On October 22, 1998, Central Illinois Light Company filed certain information as required by the Commission's June 2, 1998 order in Docket No. ER98–2440–000.

On October 22, 1998, Xenergy Inc. filed certain information as required by the Commission's June 9, 1997 order in Docket No. ER97–2517–000.

On October 22, 1998, Xenergy Inc. filed certain information as required by the Commission's June 9, 1997 order in Docket No. ER97–2517–000.

On October 22, 1998, Illinova Energy Partners, Inc. filed certain information as required by the Commission's May 18, 1995 order in Docket No. ER94–1475–000.

On October 22, 1998, U. S. Power & Light, Inc. filed certain information as required by the Commission's December 6, 1995 letter order in Docket No. ER96–105–000.

On October 22, 1998, Wisconsin Public Service Corporation filed certain information as required by the Commission's April 30, 1996 order in Docket No. ER96–780–000.

15. Wisconsin Power and Light Company

[Docket No. ER99–292–000]

Take notice that on October 23, 1998, Wisconsin Power and Light Company (WP&L), tendered for filing a signed Service Agreement under WP&L's Bulk Power Tariff between itself and Merchant Energy Group of the Americas, Inc.

WP&L respectfully requests a waiver of the Commission's notice requirements, and an effective date of October 9, 1998.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. Niagara Mohawk Power Corporation

[Docket No. ER99–293–000]

Take notice that on October 23, 1998, Niagara Mohawk Power Corporation (NMPC), tendered for filing with the Federal Energy Regulatory Commission an executed Transmission Service Agreement between NMPC and Amerada Hess Corporation. This Transmission Service Agreement specifies that Amerada Hess Corporation has signed on to and has agreed to the terms and conditions of NMPC's Open Access Transmission Tariff as filed in Docket No. OA96–194–000. This Tariff, filed with FERC on July 9, 1996, will allow NMPC and Amerada Hess Corporation to enter into separately scheduled transactions under which NMPC will provide transmission service for Amerada Hess Corporation as the parties may mutually agree.

NMPC requests an effective date of October 15, 1998. NMPC has requested waiver of the notice requirements for good cause shown.

NMPC has served copies of the filing upon the New York State Public Service Commission and Amerada Hess Corporation.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

17. California Independent System Operator Corporation

[Docket No. ER99–294–000]

Take notice that on October 23, 1998, the California Independent System Operator Corporation (ISO), tendered for filing an amendment to Appendix A, to the Responsible Participating Transmission Owner Agreement between the ISO and the Pacific Gas and Electric Company (PG&E). The ISO states that the amendment revises the Appendix to clarify an agreement listed under the Existing Contracts for a number of Existing Right holders and adds an agreement to the list of Existing Contracts for the City of Santa Clara.

The ISO states that this filing has been served on all parties listed on the Restricted Service List in the above-referenced dockets.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

18. Commonwealth Edison Company

[Docket No. ER99–296–000]

Take notice that on October 23, 1998, Commonwealth Edison Company (ComEd), tendered for filing a Short-Term Firm Service Agreement with PECO Energy (PECO), under the terms of ComEd's Open Access Transmission Tariff (OATT).

ComEd requests an effective date of September 30, 1998, for the service agreements, and accordingly, seeks waiver of the Commission's notice requirements.

Copies of this filing were served on PECO and the Illinois Commerce Commission.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

19. Public Service Company of New Mexico

[Docket No. ER99–298–000]

Take notice that on October 23, 1998, Public Service Company of New Mexico (PNM), submitted for filing an executed service agreement with PacifiCorp Power Marketing, Inc., dated October 21, 1998, for non-firm point-to-point transmission service under the terms of PNM's Open Access Transmission Tariff. PNM's filing is available for public inspection at its offices in Albuquerque, New Mexico.

Comment date: November 12, 1998, in accordance with Standard Paragraph E at the end of this notice.

20. Carolina Power & Light Company

[Docket No. ER99–299–000]

Take notice that on October 23, 1998, Carolina Power & Light Company tendered for filing a power purchase agreement with the South Carolina Public Service Authority. The sale will be made pursuant to CP&L Market Based Rate Tariff.

Copies of the filing were served upon the North Carolina Utilities Commission, the South Carolina Public Service Commission and the South Carolina Public Service Authority.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

21. Michael E. Rescoe and Bruce R. Worthington

[Docket No. ID–3247–000 and ID–3248–000]

Take notice that on October 23, 1998, Michael E. Rescoe and Bruce R. Worthington (Applicants) tendered for filing an application under Section 305(b) of the Federal Power Act to hold the following positions:

Director—PG&E Power Services Company

Director—PG&E Energy Trading Power Holdings Corporation

Comment date: November 23, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of

Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

[Project No. 1759]

Wisconsin Electric Power Company; Notice of Availability of Draft Application and Preliminary Draft Environmental Assessment (DEA)

November 2, 1998.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* New Major License.

b. *Project No.:* 1759.[1]

c. *Applicant:* Wisconsin Electric Power Company.

d. *Name of Project:* Peavy Falls Hydroelectric Project.

e. *Location:* Michigamme River near Crystal Falls, Iron Mountain, and Kingsford, in Iron County, Michigan.

f. *Applicant Contact:* Ms. Rita L. Hayen, P.E., Wisconsin Electric Power Company, 333 W. Everett Street, P.O. Box 2046, Milwaukee, WI 53201–2046.

g. *FERC Contact:* Patti Leppert-Slack, (202) 219–2767.

h. Wisconsin Electric Power Company (Wisconsin Electric) mailed a copy of the Draft License Application and Preliminary DEA to all entities on October 20, 1998. The Commission received a copy of the Draft License Application and Preliminary DEA on October 22, 1998. Copies of these documents, as well as the resource study reports previously distributed for review and comment, are available for review at Wisconsin Electric's Office, 800 Industrial Park Drive, Iron Mountain, Michigan.

Copies are also available at the following libraries: Crystal Falls District Community Library, 401 Superior Ave., Crystal Falls, Michigan; Dickinson County Library, 401 Iron Mountain St., Iron Mountain, Michigan; and Dickinson County Library-Norway Branch, 620 Section St., Norway, Michigan.

i. As discussed in the Commission's June 14, 1996, letter to all parties, with this notice we are soliciting preliminary terms, conditions, and recommendations on the Draft License Application and Preliminary DEA.

j. All comments on the Draft License Application and Preliminary DEA should be sent to the address noted above in Item (f), with an original and five copies filed with the Commission at the following address: Federal Energy Regulatory Commission, Office of the Secretary, 888 First Street, NE, Dockets—Room 1A, Washington, DC 20426.

All comments must include the project name and number, and bear the heading "Preliminary Comments," "Preliminary Recommendations," "Preliminary Terms and Conditions," or "Preliminary Prescriptions." Any party interested in commenting must do so on or before January 22, 1999.

Notice of Application Filed With the Commission

November 2, 1998.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Transfer of License.

b. *Project No.:* 11243–015.

c. *Date Filed:* September 21, 1998.

d. *Applicant:* Whitewater Engineering Corporation, Cordova Electric Cooperative, Inc.

e. *Name of Project:* Power Creek Hydroelectric.

f. *Location:* On Power Creek, near the town of Cordova, in southeast Alaska.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. §§ 791(a)–825(r).

h. *Applicant Contact:* Thom A. Fischer, Whitewater Engineering Corporation, 625 Cornwall Avenue, Bellingham, WA 98225, (360) 733–3008.

i. *FERC Contact:* Regina Saizan, (202) 219–2673.

j. *Comment Date:* December 14, 1998.

k. *Description of the Request:* Whitewater Engineering Corporation and Cordova Electric Cooperative, Inc. jointly request that the license be transferred to Cordova Electric Cooperative, Inc. to facilitate the development and financing of project activities.

l. *This notice also consists of the following standard paragraphs:* B, C1, and D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 C.F.R. sections 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "PROTEST" or "MOTION TO INTERVENE," as

applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and 8 copies to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Motions to intervene must also be served upon each representative of the applicant specified in the particular application.

D2. Agency Comments—The Commission invites federal, state, and local agencies to file comments on the described application. (Agencies may obtain a copy of the application directly from the applicant.) If an agency does not file comments within the time specified for filing comments, the Commission will presume that the agency has none. One copy of an agency's comments must also be sent to the applicant's representatives.

David P. Boergers,

Secretary.

Federal Energy Regulatory Commission

Sunshine Act Meeting

November 3, 1998

The following notice of meeting is published pursuant to section 3(A) of the Government in the Sunshine Act (Pub. L. No. 94–409), 5 U.S.C. 552B:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

DATE AND TIME: November 10, 1998, 10:00 A.M.

PLACE: Room 2C, 888 First Street, N.E., Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note: Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: David P. Boergers, Secretary Telephone (202) 208–0400 For A Recording Listing Items Stricken From or Added to the Meeting, Call (202) 208–1627.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the reference and information center.

DEPARTMENT OF ENERGY

Southeastern Power Administration

Notice of Rate Order, Correction

AGENCY: Southeastern Power Administration, DOE.

ACTION: Notice; Correction.

SUMMARY: The Southeastern Power Administration published a document in the **Federal Register** of October 5, 1998, containing notice of interim approval of new rate schedules for Southeastern's Georgia-Alabama-South Carolina System. The document omitted the new rate schedules.

FOR FURTHER INFORMATION CONTACT: Leon Jourolmon, Assistant Administrator, Finance & Marketing, Southeastern Power Administration, Samuel Elbert Building, 2 South Public Square, Elberton, GA 30635.

Dated: October 29, 1998.

Timothy J. Meeks,

Assistant Administrator for Power Marketing Liaison.

Wholesale Power Rate Schedule SOCO–1

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in Georgia, Alabama, Mississippi, and Florida to whom power may be transmitted and scheduled pursuant to contracts between the Government and Southern Company Services, Incorporated (hereinafter called the Company) and the Customer. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on the Company's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Transmission

$1.71 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial transmission charge will be the Customer's ratable share of the Transmission and Distribution Charges paid by the Government. The initial monthly transmission demand charge

shall be determined by multiplying the Government's Load Ratio Share time one twelfth (1/12) of Southern Companies' Annual Transmission Costs as specified in Schedule 1 of the Government-Company Contract. The transmission charges are governed by and subject to refund based upon the determination in proceedings before the Federal Energy Regulatory Commission (FERC) involving Southern Companies' Open Access Transmission Tariff (OAT). The distribution charges may be modified by FERC pursuant to application by the Company under Section 205 of the Federal Power Act or the Government under Section 206 of the Federal Power Act.

Proceedings before FERC involving the OAT or the Distribution charge may result in the separation of charges currently included in the transmission rate. In this event, the Government may charge the Customer for any and all separate transmission and distribution charges paid by the Government in behalf of the Customer.

Scheduling, System Control and Dispatch Service:
$0.07658 × (1154/1464) Per kilowatt of total contract demand per month.
Reactive Supply and Voltage Control from Generation Sources Service:
$0.16627 Per kilowatt of total contract demand per month.
Regulation and Frequency Response Service:
$0.24714 Per kilowatt of total contract demand per month.

Transmission, System Control, Reactive, and Regulation Services

The charges for Transmission, System Control, Reactive, and Regulation Services shall be governed by and subject to refund based upon the determination in the proceeding involving Southern Companies' Open Access Transmission Tariff.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Company's system. Applicable energy losses are as follows:
Transmission facilities: 3.0%
Distribution Substations: 0.9%
Distribution Lines: 2.25%

These losses shall be effective until modified by the Federal Energy Regulatory Commission, pursuant to application by Southern Companies under Section 205 of the Federal Power Act or SEPA under Section 206 of the Federal Power Act or otherwise.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule SOCO–2

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in Georgia, Alabama, Mississippi, and Florida to whom power may be transmitted pursuant to contracts between the Government and Southern Company Services, Incorporated (hereinafter called the Company) and the Customer. The Customer is responsible for providing a scheduling arrangement with the Government. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on the Company's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:
Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Transmission

$1.71 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial transmission charge will be the Customer's ratable share of the Transmission and Distribution Charges paid by the Government. The initial monthly transmission demand charge shall be determined by multiplying the Government's Load Ratio Share time one twelfth (1/12) of Southern Companies' Annual Transmission Costs as specified in Schedule 1 of the Government-Company Contract. The transmission charges are governed by and subject to refund based upon the determination in proceedings before the Federal Energy Regulatory Commission (FERC) involving Southern Companies' Open Access Transmission Tariff (OAT). The distribution charges may be modified by FERC pursuant to application by the Company under Section 205 of the Federal Power Act or the Government under Section 206 of the Federal Power Act.

Proceedings before FERC involving the OAT or the Distribution charge may result in the separation of charges currently included in the transmission rate. In this event, the Government may charge the Customer for any and all separate transmission and distribution charges paid by the Government in behalf of the Customer.

Scheduling, System Control and Dispatch Service:
$0.07658 X (1154/1464) Per kilowatt of total contract demand per month.
Reactive Supply and Voltage Control from Generation Sources Service:
$0.16627 Per kilowatt of total contract demand per month.

Transmission, System Control, Reactive, and Regulation Services

The charges for Transmission, System Control, Reactive, and Regulation Services shall be governed by and subject to refund based upon the determination in the proceeding involving Southern Companies' Open Access Transmission Tariff.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Company's system. Applicable energy losses are as follows:
Transmission facilities: 3.0%
Distribution Substations: 0.9%
Distribution Lines: 2.25%

These losses shall be effective until modified by the Federal Energy Regulatory Commission, pursuant to application by Southern Companies under Section 205 of the Federal Power Act or SEPA under Section 206 of the Federal Power Act or otherwise.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule SOCO–3

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in Georgia, Alabama, Mississippi, and Florida to whom power may be scheduled pursuant to contracts between the Government and Southern Company Services, Incorporated (hereinafter called the Company) and the Customer. The Customer is responsible for providing a transmission arrangement. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects (hereinafter referred to collectively as the Projects) and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:
Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.
Scheduling, System Control and Dispatch Service:
$0.07658 X (1154/1464) Per kilowatt of total contract demand per month.
Regulation and Frequency Response Service:
$0.24714 Per kilowatt of total contract demand per month.

Transmission, System Control, Reactive, and Regulation Services

The charges for Transmission, System Control, Reactive, and Regulation Services shall be governed by and subject to refund based upon the determination in the proceeding involving Southern Companies' Open Access Transmission Tariff.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses). The Customer's contract demand and accompanying energy will be allocated proportionately to the individual delivery points served from the Company's system. Applicable energy losses are as follows:
Transmission facilities: 3.0%
Distribution Substations: 0.9%
Distribution Lines: 2.25%

These losses shall be effective until modified by the Federal Energy Regulatory Commission, pursuant to application by Southern Companies under Section 205 of the Federal Power Act or SEPA under Section 206 of the Federal Power Act or otherwise.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule SOCO–4

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in Georgia, Alabama, Mississippi, and Florida served through the transmission facilities of Southern Company Services, Inc. (hereinafter called the Company) or the Georgia Integrated Transmission System. The Customer is responsible for providing a scheduling arrangement with the Government and for providing a transmission arrangement. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects (hereinafter referred to collectively as the Projects) and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:
Capacity Charge
$2.66 Per kilowatt of total contract demand per month.
Energy Charge
7.21 Mills per kilowatt-hour.
Generation Services
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Scheduling, System Control and Dispatch Service
$0.07658 X (1154/1464) Per kilowatt of total contract demand per month.

Transmission, System Control, Reactive, and Regulation Services

The charges for Transmission, System Control, Reactive, and Regulation Services shall be governed by and subject to refund based upon the determination in the proceeding involving Southern Companies' Open Access Transmission Tariff.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses).

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule ALA–1-I

Availability

This rate schedule shall be available to the Alabama Electric Cooperative, Incorporated (hereinafter called the Cooperative).

Applicability

This rate schedule shall be applicable to power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters, and Richard B. Russell Projects and sold under contract between the Cooperative and the Government. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be three-phase alternating current at a nominal frequency of 60 Hertz and shall be delivered at the Walter F. George, West Point, and Robert F. Henry Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Southern Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Scheduling, System Control and Dispatch Service
$0.07658 x (1154/1464) Per kilowatt of total contract demand per month.

Transmission, System Control, Reactive, and Regulation Services

The charges for Transmission, System Control, Reactive, and Regulation Services shall be governed by and subject to refund based upon the determination in the proceeding involving Southern Companies' Open Access Transmission Tariff.

Energy to be Furnished by the Government

The Government will sell to the Cooperative and the Cooperative will purchase from the Government those quantities of energy specified by contract as available to the Cooperative for scheduling on a weekly basis.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule MISS–1–I

Availability

This rate schedule shall be available to the South Mississippi Electric Power Association (hereinafter called the Customer) to whom power may be wheeled pursuant to contracts between the Government and Alabama Electric Cooperative, Inc. (hereinafter called AEC).

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be three-phase alternating current at a nominal frequency of 60 Hertz delivered at the delivery points of the Customer on AEC's transmission and distribution system. The voltage of delivery will be maintained within the limits established by the state regulatory commission.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Transmission

$1.83 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

This rate is subject to annual adjustment on January 1, and will be computed subject to the Appendix A attached to the Government-AEC contract.

Scheduling, System Control and Dispatch Service:
$0.07658 × (1154/1464) Per kilowatt of total contract demand per month.

Transmission, System Control, Reactive, and Regulation Services

The charges for Transmission, System Control, Reactive, and Regulation Services shall be governed by and subject to refund based upon the determination in the proceeding involving Southern Companies' Open Access Transmission Tariff.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Cooperative and the Cooperative will purchase from the Government those quantities of energy specified by contract as available to the Cooperative for scheduling on a weekly basis.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule Duke–1

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in North Carolina and South Carolina to whom power may be transmitted and scheduled pursuant to contracts between the Government and Duke Power Company (hereinafter called the Company) and the Customer. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedules does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on the Company's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Transmission

$1.15 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial transmission charge will be the Customer's ratable share of the Transmission Distribution Charges paid by the Government. The initial monthly transmission demand charge shall reflect the Government's Load Ratio Share Responsibility. The Load Ratio Share shall be computed each month and shall be the ratio of the Network Load to the average of the Company's Transmission System load for each of the 12 preceding months. The Company's Transmission System Load shall be the load as determined in Section 34.3 of the Company's Pro Forma Open Access Transmission Tariff (the Tariff). The Government shall pay a monthly demand charge which shall be determined by multiplying its Load Ratio Share by 1/12 of the Annual Transmission Revenue Requirement set forth in Attachment H of the Company's Tariff.

Proceedings before FERC involving the Tariff may result in the separation of charges currently included in the transmission rate. In this event, the Government may charge the Customer for any and all separate transmission and distribution charges paid by the Government in behalf of the Customer.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses of three per cent (3%)). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Company's system. These losses shall be effective until modified by the Federal Energy Regulatory Commission, pursuant to application by the Company under Section 205 of the Federal Power Act or SEPA under Section 206 of the Federal Power Act or otherwise.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule Duke–2

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in North Carolina and South Carolina to whom power may be transmitted pursuant to contracts between the Government and Duke Power Company (hereinafter called the Company) and the Customer. The Customer is responsible for providing a scheduling arrangement with the Government. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on

the Company's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Transmission

$1.15 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial transmission charge will be the Customer's ratable share of the Transmission Distribution Charges paid by the Government. The initial monthly transmission demand charge shall reflect the Government's Load Ratio Share Responsibility. The Load Ratio Share shall be computed each month and shall be the ratio of the Network Load to the average of the Company's Transmission System load for each of the 12 preceding months. The Company's Transmission System Load shall be the load as determined in Section 34.3 of the Company's Pro Forma Open Access Transmission Tariff (the Tariff). The Government shall pay a monthly demand charge which shall be determined by multiplying its Load Ratio Share by 1/12 of the Annual Transmission Revenue Requirement set forth in Attachment H of the Company's Tariff.

Proceedings before FERC involving the Tariff may result in the separation of charges currently included in the transmission rate. In this event, the Government may charge the Customer for any and all the separate transmission and distribution charges paid by the Government in behalf of the Customer.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses of three per cent *3%)). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Company's system. These losses shall be effective until modified by the Federal Energy Regulatory Commission, pursuant to application by the Company under Section 205 of the Federal Power Act or SEPA under Section 206 of the Federal Power Act or otherwise.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule Duke-3

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in North Carolina and South Carolina to whom power may be scheduled pursuant to contracts between the Government and Duke Power Company (hereinafter called the Company) and the Customer. The Customer is responsible for providing a transmission arrangement. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the Savannah River Projects.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses).

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale power Rate Schedule Duke-4

Availability

This rate schedule shall be available to public goodies and cooperatives (any one of whom is hereinafter called the Customer) in North Carolina and South Carolina served through the transmission facilities of Duke Power Company (hereinafter called the Company) and the Customer. The Customer is responsible for providing a scheduling arrangement with the Government and for providing a transmission arrangement with the Company. Nothing in this rate schedule shall preclude modifications to the aforementioned contracts to allow an eligible customer to elect service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell projects and sold under appropriate contracts between the Government and the customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the Savannah River Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Further adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses).

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Wholesale Power Rate Schedule Santee-1

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in South Carolina to whom power may be wheeled and scheduled pursuant to contracts between the Government and South Carolina Public Service Authority (hereinafter called the Authority). Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on the Authority's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Authority. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Authority's rate.

Transmission

$1.53 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial transmission rate is subject to annual adjustment on July 1 of each year, and will be computed subject to the formula contained in Appendix A to the Government-Authority Contract.

Proceedings before the Federal Energy Regulatory Commission involving the Authority's Open Access Transmission Tariff may result in the separation of charges currently included in the transmission rate. In this event, the Government may charge the Customer for any and all separate transmission and distribution charges paid by the Government in behalf of the Customer.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contact which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the Authority (less applicable losses of two per cent (2%)). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Authority's system.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Service Interruption

When energy delivery to the Customer's system for the account of the Government is reduced or interrupted, and such reduction or interruption is not due to conditions on the Customer's system, the demand charge for the month shall be appropriately reduced as to kilowatts of such capacity which have been interrupted or reduced for each day in accordance with the following formula:

$$\text{Number of kilowatts unavailable for at least 12 hours in any calendar day} \times \frac{\text{Monthly Capacity Charge}}{\text{Number of days in billing month}}$$

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter call the Customer) in South Carolina to whom power may be wheeled pursuant to contracts between the Government and South Carolina Public Service Authority (hereinafter called the Authority). The customer is responsible for providing a scheduling arrangement with the Government. Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, Westpoint, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on the Authority's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:

$2.66 Per kilowatt of total contact demand per month.

Energy Charge:

7.21 Mills per kilowatt-hour.

Generation Services:

$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Authority. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Authority's rate.

Transmission

$1.53 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial transmission rate is subject to annual adjustment on July 1 of each year, and will be computed subject to the formula contained in Appendix A to the Government-Authority Contract.

Proceedings before the Federal Energy Regulatory Commission involving the Authority's Open Access Transmission Tariff may result in the separation of charges currently included in the transmission rate. In this event, the Government pay charge the Customer . for any and all separate transmission and distribution charges paid by the Government in behalf of the Customer.

Wholesale Rate Schedule Santee-2

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive. Energy to be Furnished by the Government:

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the Authority (less applicable losses of two per cent (2%)). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Authority's system.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Service Interruption

When energy delivery to the Customer's system for the account of the Government is reduced or interrupted, and such reduction or interruption is not due to conditions on the Customer's system, the demand charge for the month shall be appropriately reduced as to kilowatts of such capacity which have been interrupted or reduced for each day in accordance with the following formula:

Wholesale Power Rate Schedule Santee-3

$$\text{Number of kilowatts unavailable for at least 12 hours in any calendar day} \times \frac{\text{Monthly Capacity Charge}}{\text{Number of days in billing month}}$$

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in South Carolina to whom power may be scheduled pursuant to contracts between the Government and South Carolina Public Service Authority (hereinafter called the Authority). The customer is responsible for providing a transmission arrangement. Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Choracter of Service

The electric capacity and energy supplied hereunder will be delivered at the Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:

$2.66 Per kilowatt of total contract demand per month.

Energy Charge:

7.21 Mills per kilowatt-hour.

Generation Services:

$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Authority. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Authority's rate.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the Authority (less applicable losses).

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Service Interruption

When energy delivery to the Customer's system for the account of the Government is reduced or interrupted, and such reduction or interruption is not due to conditions on the Customer's system, the demand charge for the month shall be appropriately reduced as to kilowatts of such capacity which have been interrupted or reduced for each day in accordance with the following formula:

Wholesale Power Rate Schedule Santee-4

$$\text{Number of kilowatts unavailable for at least 12 hours in any calendar day} \times \frac{\text{Monthly Capacity Charge}}{\text{Number of days in billing month}}$$

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in South Carolina served through the transmission facilities of South Carolina Public Service Authority (hereinafter called the Authority). The customer is responsible for providing a scheduling arrangement with the Government and for providing a transmission arrangement. Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:

$2.66 Per kilowatt of total contract demand per month.

Energy Charge:

7.21 Mills per kilowatt-hour.

Generation Services:

$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Authority. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Authority's rate.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the Authority (less applicable losses).

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Service Interruption

When energy delivery to the Customer's system for the account of the Government is reduced or interrupted, and such reduction or interruption is not due to conditions on the Customer's system, the demand charge for the month shall be appropriately reduced as to kilowatts of such capacity which have been interrupted or reduced for each day in accordance with the following formula:

Wholesale Power Rate Schedule SCE&G–1

$$\text{Number of kilowatts unavailable for at least 12 hours in any calendar day} \times \frac{\text{Monthly Capacity Charge}}{\text{Number of days in billing month}}$$

Availability

This rate schedule shall be available public bodies and cooperatives (any one of which is hereinafter called the Customer) in South Carolina to whom power may be wheeled and scheduled pursuant to contracts between the Government and the South Carolina Electric & Gas Company (hereinafter called the Company). Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping

operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on the Company's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Transmission

$2.22 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial rate will be subject to annual adjustment on June 1 of each year and will be computed subject to the formula in Appendix A attached to the Government-Company contract.

Proceedings before the Federal Energy Regulatory Commission involving the Company's Open Access Transmission Tariff may result in the separation of charges currently included in the transmission rate. In this event, the Government may charge the Customer for any and all separate transmission and distribution charges paid by the Government in behalf of the Customer.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less five and one-half (5.5) percent losses). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Company's system.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Conditions of Service

The Customer shall at its own expense provide, install, and maintain on its side of each delivery point the equipment necessary to protect and control its own system. In so doing, the installation, adjustment, and setting of all such control and protective equipment at or near the point of delivery shall be coordinated with that which is installed by and at the expense of the Company on its side of the delivery point.

Wholesale Power Rate Schedule SCE&G–2

Availability

This rate schedule shall be available public bodies and cooperatives (any one of which is hereinafter called the Customer) in South Carolina to whom power may be wheeled pursuant to contracts between the Government and the South Carolina Electric & Gas Company (hereinafter called the Company). The customer is responsible for providing a scheduling arrangement with the Government. Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the delivery points of the Customer on the Company's transmission and distribution system.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Transmission

$2.22 Per kilowatt of total contract demand per month as of February 1998 is presented for illustrative purposes.

The initial rate will be subject to annual adjustment on June 1 of each year and will be computed subject to the formula in Appendix A attached to the Government-Company contract.

Proceedings before the Federal Energy Regulatory Commission involving the Company's Open Access Transmission Tariff may result in the separation of charges currently included in the transmission rate. In this event, the Government may charge the Customer for any and all separate transmission and distribution charges paid by the Government in behalf of the Customer.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less five and one-half (5.5) percent losses). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Company's system.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Conditions of Service

The Customer shall at its own expense provide, install, and maintain on its side of each delivery point the equipment necessary to protect and control its own system. In so doing, the installation, adjustment, and setting of all such control and protective equipment at or near the point of delivery shall be coordinated with that which is installed by and at the expense of the Company on its side of the delivery point.

Wholesale Power Rate Schedule SCE&G–3

Availability

This rate schedule shall be available public bodies and cooperatives (any one of which is hereinafter called the Customer) in South Carolina to whom power may be scheduled pursuant to contracts between the Government and the South Carolina Electric & Gas Company (hereinafter called the Company). The customer is responsible for providing a transmission arrangement. Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month.
Energy Charge:
7.21 Mills per kilowatt-hour.
Generation Services:
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses).

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Conditions of Service

The Customer shall at its own expense provide, install, and maintain on its side of each delivery point the equipment necessary to protect and control its own system. In so doing, the installation, adjustment, and setting of all such control and protective equipment at or near the point of delivery shall be coordinated with that which is installed by and at the expense of the Company on its side of the delivery point.

Wholesale Power Rate Schedule SCE&G–4

Availability

This rate schedule shall be available public bodies and cooperatives (any one of which is hereinafter called the Customer) in South Carolina served through the transmission facilities of South Carolina Electric & Gas Company (hereinafter called the Company). The customer is responsible for providing a scheduling arrangement with the Government and for providing a transmission arrangement. Nothing in this rate schedule shall preclude an eligible customer from electing service under another rate schedule.

Applicability

This rate schedule shall be applicable to the sale at wholesale of power and accompanying energy generated at the Allatoona, Buford, J. Strom Thurmond, Walter F. George, Hartwell, Millers Ferry, West Point, Robert F. Henry, Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer. This rate schedule does not apply to energy from pumping operations at the Carters and Richard B. Russell Projects.

Character of Service

The electric capacity and energy supplied hereunder will be delivered at the Projects.

Monthly Rate

The monthly rate for capacity, energy, and generation services provided under this rate schedule for the period specified shall be:

Capacity Charge:
$2.66 Per kilowatt of total contract demand per month
Energy Charge:
7.21 Mills per kilowatt-hour
Generation Services
$0.03 Per kilowatt of total contract demand per month.

Additional rates for Transmission, System Control, Reactive, and Regulation Services provided under this rate schedule shall be the rates charged Southeastern Power Administration by the Company. Future adjustments to these rates will become effective upon acceptance for filing by the Federal Energy Regulatory Commission of the Company's rate.

Contract Demand

The contract demand is the amount of capacity in kilowatts stated in the contract which the Government is obligated to supply and the Customer is entitled to receive.

Energy to be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the company (less applicable losses).

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

Conditions of Service

The Customer shall at its own expense provide, install, and maintain on its side of each delivery point the equipment necessary to protect and

control its own system. In so doing, the installation, adjustment, and setting of all such control and protective equipment at or near the point of delivery shall be coordinated with that which is installed by and at the expense of the Company on its side of the delivery point.

Wholesale Power Rate Schedule Pump-1

Availability

This rate schedule shall be available to public bodies and cooperatives (any one of whom is hereinafter called the Customer) in Georgia, Alabama, Mississippi, Florida, South Carolina, or North Carolina to whom power is provided pursuant to contracts between the Government and the customer.

Applicability

This rate schedule shall be applicable to the sale at wholesale energy generated from pumping operations at the Carters and Richard B. Russell Projects and sold under appropriate contracts between the Government and the Customer.

Character of Service

The energy supplied hereunder will be delivered at the delivery points provided for under appropriate contracts between the Government and the Customer.

Monthly Rate

The rate for energy sold under this rate schedule for the months specified shall be:

$$\text{Energy Rate} = \left(C_{wav} + F_{wav}\right) \div \left(1 - L_d\right)$$

[computed to the nearest $.00001 (1/100 mill) per kwh]

(The weighted average cost of energy for pumping divided by the energy conversion factor, quantity divided by one minus losses for delivery.)

Where:

$$C_{wav} = C_T + E_t$$

(The weighted average cost of energy for pumping is equal to the total cost of energy for pumping divided by the total energy for pumping.)

$$C_T = C_p + C_s$$

(Total cost of energy for pumping is equal to the energy purchased, after losses, plus the energy for pumping in storage as of the end of the month preceding the specified month.)

$$C_s = C_{wav}^{t-1} \times E_s^{t-1}$$

(Cost of energy in storage is equal to the weighted average cost of energy for pumping for the month preceding the specified month times the energy for pumping in storage at the end of the month preceding the specified month.)

C_p

=Dollars cost of energy purchased for pumping during the specified month, including all direct costs to deliver energy to the project.

E_p

=Kilowatt-hours of energy purchased for pumping during the specified month.

L_p

=Energy loss factor for transmission on energy purchased for pumping (Expected to be .03 or three percent.)

E_s^{t-1}

=Kilowatt-hours of energy in storage as of the end of the month immediately preceding the specified month.

C_{wav}^{t-1}

=Weighted average cost of energy for pumping for the month immediately preceding the specified month.

$$F_{wav} = E_G + E_T$$

(Weighted average energy conversion factor is equal to the energy generated from pumping divided by the total energy for pumping)

E_G

=Energy generated from pumping.

L_d

=Weighted average energy loss factor on energy delivered by the facilitator to the customer. (This value will be a constant, currently estimated to be .01 or 1.0 percent.)

Energy To Be Furnished by the Government

The Government will sell to the Customer and the Customer will purchase from the Government energy each billing month equivalent to a percentage specified by contract of the energy made available to the Facilitator (less any losses required by the Facilitator). The Customer's contract demand and accompanying energy will be allocated proportionately to its individual delivery points served from the Facilitator's system.

Billing Month

The billing month for power sold under this schedule shall end at 12:00 midnight on the last day of each calendar month.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Western Area Power Administration

Notice of Availability of the Sutter Power Project Draft Environmental Impact Statement

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of Availability and Notice of Public Hearings.

SUMMARY: In accordance with Section 102(2) of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4332, the Western Area Power Administration (Western) announces that the Sutter Power Project (SPP) Draft Environmental Impact Statement (EIS) is available for public review and comment. Calpine Corporation (Calpine) has submitted an application to the California Energy Commission (CEC) for the development, construction, and operation of the SPP, a 500-megawatt (MW) gas fueled, combined cycle, electric generating facility located north of Sacramento, California. This project would involve the construction of additional transmission facilities, as well as new natural gas pipelines. Calpine has approached Western concerning an interconnection with Western's Keswick-Elverta and Olinda-Elverta double-circuit 230-kilovolt (kV) transmission lines.

Western and CEC are "joint lead agencies" for purposes of satisfying the requirements of NEPA and the California Environmental Quality Act (CEQA), respectively. Western and CEC prepared this joint Draft EIS/Final Staff Assessment (FSA) to satisfy the requirements of both agencies, and will hold joint public hearings to receive formal comments on the Draft EIS/FSA according to the schedule below. Western and CEC will accept written and oral comments during the public review period.

DATES: Written comments on the draft EIS/FSA should be sent to the Environmental Project Manager or CEC Project Manager by December 14, 1998, at the addresses provided below. Those wishing to make oral comments may do so at the scheduled public hearings. Western and CEC will respond to all comments, both written and oral, in Western's final EIS and CEC's Presiding Member Proposed Decision. The hearings will be held at the Veteran's Memorial Community Building, 425 Circle Drive, Yuba City, CA, on November 2, 10, 12, and 16, 1998. Each hearing will begin at 9:00 a.m., with the exception of an additional hearing to be held on November 10, at 6:30 p.m. at the same location.

ADDRESSES: Comments on the Draft EIS/FSA may be directed to the following persons. For Western, address comments to: Ms. Loreen McMahon, Environmental Project Manager, Sierra Nevada Customer Service Region, Western Area Power Administration, 114 Parkshore Drive, Folsom, CA 95630–4710, telephone (916) 353–4460, E-mail: mcmahon@wapa.gov. For CEC, address comments to Paul Richins, Project Manager, Energy Facilities Siting and Environmental Protection Division, California Energy Commission, 1516 Ninth Street, MS–15, Sacramento, CA 95814, Telephone: (916) 654–4074, E-mail: prichins@energy.state.ca.us.

FOR FURTHER INFORMATION CONTACT: For further information, to submit written comments, or to request a copy or summary of the Draft EIS, please call or write Western's Sierra Nevada Customer Service Regional Office or CEC at the addresses shown above. Additional information on the project and the CEC may be found on CEC's website at www.energy.ca.gov/sitingcases/sutterpower/index.html.

For general information on DOE's NEPA review process, please contact Ms. Carol Borgstrom, Director, NEPA Policy and Assistance, EH–42, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, D.C. 20585, telephone (202) 586–4600 or (800) 472–2756.

SUPPLEMENTARY INFORMATION: Calpine proposes to construct SPP in Sutter County, California, on a portion of a 77-acre parcel of land owned by Calpine, that also houses its Greenleaf 1 cogeneration plant. Yuba City, California, is approximately 7 miles to the northeast; Oswald, California, is approximately 3.5 miles to the east; and Sacramento, California, is approximately 36 miles to the southeast of the proposed project site. The land surrounding the project area is farmland used to grow rice, walnuts, almonds, and other orchard crops. The SPP project would consist of a nominal 500 MW net electrical output natural gas-fired, combined cycle generating facility, a 230–kV switching station, and a new 230–kV transmission line to connect with Western's Keswick-Elverta and Olinda-Elverta double-circuit 230–kV transmission lines at some point south and west of the plant. A new 12-mile natural gas pipeline would be constructed to provide fuel for the project. Potable water and cooling water would be provided by an on site well system that will be developed as part of the project. Sanitary waste will be treated on-site. The treated and other waste water generated in the operation of the plant would be discharged to an existing surface drainage system.

SPP would be a "merchant plant'; it would sell power on a short and midterm basis to customers, and on the spot market. Power purchases by customers would be voluntary, and all economic costs will be borne by Calpine. Calpine approached Western regarding an interconnection for the power produced by SPP. This interconnection would require Western to make facility additions to its existing system to incorporate additional power from new generation.

CEC, a regulatory agency of the State of California, has the statutory authority to license thermal powerplants of 50 MW or greater. CEC's review process ensures that needed energy facilities are authorized in an expeditious, safe, and environmentally acceptable manner. CEC prepares all environmental documentation by following CEQA, and maintains a staff of experts in more than 20 environmental and engineering disciplines to perform balanced, independent evaluations of complex projects. CEC has prepared this document in compliance with California Public Resources Code (Cal. Pub. Res. §§ 25500, *et seq.*); CEQA (Cal. Pub. Res. §§ 21000, *et seq.*) and its guidelines found at California Code of Regulations (Cal. Code Regs. tit. 14 §§ 15000, *et seq.*); and the regulations of CEC (Cal. Code Regs. tit. 20 §§ 1742.5, 1743, and 1744). The CEC process mirrors that of the Federal process; CEC's FSA document is equivalent to the Draft EIS.

Western, a power marketing agency of the U.S. Department of Energy (DOE), is responsible for the transmission and marketing of electric power in 15 western States through an extensive, complex, and integrated high-voltage power transmission system. Western has prepared this document in compliance with NEPA (42 U.S.C. 4321, *et seq.*), the Council on Environmental Quality regulations for implementing NEPA (40 CFR Parts 1500–1508), and the DOE regulations for compliance with NEPA (10 CFR Part 1021).

Because CEC has licensing responsibilities as well as responsibilities under CEQA, Western agreed to be a joint lead agency with CEC and to utilize CEC's expertise in siting issues. The review process was initiated when Calpine filed an Application for Certification (AFC) with CEC on December 15, 1997. On January 21, 1998, CEC accepted the AFC as complete which began CEC's 1-year review process. On February 13, 1998, Western published a Notice of Intent to Prepare an Environmental Impact Statement in the **Federal Register** (63 FR 7412–7413). A scoping meeting was held in Yuba City, California, on March 3, 1998. Additional public workshops that addressed various issues of concern were held on March 25, March 31, June 3, July 14, August 4, August 6, and August 12, 1998.

CEC maintains a mailing list of those interested in SPP. All persons and groups on that mailing list have been notified of the availability of the Draft EIS/FSA. A distribution has been made to various libraries and other repositories in the project area, as well as those agencies and persons that have already requested a copy. Copies of the Draft EIS/FSA are available for public review at the Sierra Nevada Customer Service Regional Office, Western Area Power Administration, 114 Parkshore Drive, Folsom, California; or at the Corporate Services Office, Western Area Power Administration, 1627 Cole Boulevard, Building 18, Golden, Colorado. This information is also available at the DOE Reading Room at the following address: U.S. Department of Energy Reading Room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. CEC maintains copies for review at the Energy Commission Library, 1516 9th Street, Sacramento, California. Copies for review are also available at the Sutter County Community Service Department, 1160 Civic Center Boulevard, Yuba City, California, and at the Main Branch of the Sutter County Library, 705 Forbs Avenue, Yuba City, California.

During this time, Western and CEC have coordinated closely with other Federal, State, and local agencies such as the U.S. Fish and Wildlife Service, the U.S. Army Corps of Engineers, the California State Department of Water Resources, the California State Department of Fish and Game, the Sacramento Municipal Utility District, the California Public Utilities

Commission, Pacific Gas and Electric Company, and several local authorities.

The results of these meetings have allowed Western and CEC to identify areas of concern raised by the public and other agencies. The visual and noise impacts of the plant and the new transmission line were a major concern of the people who live in the immediate area of the plant site. Other more general issues concerned water resources—the impact to nearby wells by a potential draw-down by SPP; water quality impacts to downstream users and fisheries; the use of surface ditches by the project; and potential impacts caused by localized flooding. Other concerns raised include air quality impacts, land use issues, impacts to agricultural operations, and the need for rezoning the site.

The Draft EIS/FSA presents analyses of the no action (no project) alternative, as well as four siting alternatives to the proposed site. These alternate sites were compared to the unmitigated impacts of the SPP proposed location. The potential impacts to each sensitive issue (water, air, natural resources, cultural resources, visual, noise, etc.) were analyzed and discussed in some detail in the Draft EIS/FSA. However, each of these alternate sites were found to have environmental problems. Alternatives to the proposed project, as well as individual mitigation measures, are proposed and applied where impacts approach a threshold of significance. Environmentally preferred options are detailed for each issue.

CEC will hold hearings on Calpine's proposal. These are held as evidentiary hearings with two commissioners present. All witnesses are sworn in and present information to the Commissioners. Each technical area will be discussed in this manner, so that the length of the hearing process depends on the amount of testimony that needs to be taken for each technical area. Following each portion of the hearing process, the public may comment on the evidence presented. A full transcript will be available following the hearings.

A decision on the proposed action will be made after considering comments on the Draft EIS/FSA, both written and those presented at the hearings announced above. The final EIS will present the full analysis of these comments and project alternatives that are proposed in the Draft EIS/FSA and present the final alternative that will be the subject of Western's and CEC's decisions on SPP.

Dated: October 20, 1998.

Michael S. Hacskaylo,

Administrator.

BILLING CODE 6560–50–U

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–5496–7]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared October 19, 1998 Through October 23, 1998 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564–7167. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 10, 1998 (62 FR 17856).

Draft EISs

ERP No. D–DOA–G36149–OK. Rating LO, Double Creek Watershed Plan, Implementation, Watershed Protection and Flood Prevention, National Economic Development (NED), Town of Ramona, Washington and Osage Counties, OK.

Summary: EPA had no objection to the selection of the lead agency's preferred alternative as described in the DEIS.

ERP No. D–FAA–E51046–NC. Rating EC2, Charlotte/Douglas International Airport, Construction and Operation, New Runway 17/35 (Future 18L/36R) Associated Taxiway Improvements, Master Plan Development, Approval Airport Layout Plan (ALP) and COE Section 404 Permit, Mecklenburg County, NC.

Summary: EPA's review found that the noise analysis was deficient and needs to be redone. Both general and transportation conformity criteria must be met for the project to go forward.

ERP No. D–FHW–L40209–WA. Rating EC2, WA–16/Union Avenue Vicinity to WA–302 Vicinity of Tacoma Improvements, Construction, Funding, Coast Guard Permit, COE Section 10 and 404 Permits, Pierce County, WA.

Summary: EPA had concerns with the likely increase of urban growth and the resulting impact. EPA requested that these issues be fully discussed in the final EIS.

ERP No. D–NOA–E39044–FL. Rating LO, Guana, Tolomato, Matanizas, Site Designation, National Estuarine Research Reserve, Management Plan, City of Jacksonville, St. Johns and Flagler Counties, FL.

Summary: EPA supports the proposed action.

ERP No. D–NOA–E39045–MS. Rating EC2, Grand Bay National Estuarine Research Reserve (NERR), Designation, To Conduct Research, Educational Project and Construction, East of the City of Biloxi, Jackson County, MS.

Summary: EPA requested additional information on phosphogypsum waste storage facility impacts on ground surface water quality. Comments were made on rock reed wastewater cell maintenance problems compared to conventional septic tank systems.

ERP No. DS–NOA–A64057–00. Rating EC2, Comprehensive Amendment Addressing Essential Fish Habitat in Fishery Management Plans for the South Atlantic Region for Shrimp, Red Drum, Coral, Coral Reefs and Live/Hard Bottom Habitat, Spiny Lobster, Snapper-Grouper, Coastal Migratory Pelagics and Golden Crab, South Atlantic Region.

Summary: EPA expressed environmental concerns that the Calico Scallop Fishery Management Plan contained data that was too old to fully assess impact of the fishery and collateral impacts threatened and endangered species. EPA requested that these issues be fully discussed in the next environmental document.

Final EISs

ERP No. F–BLM–G65021–00. Rio Grande Corridor Coordinated Resource Management Plan and Taos Management Plan Amendment, Activity-Level-Plans, Implementation, NM and CO.

Summary: Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F–DOE–L08053–00. Lower Valley Transmission Project, Construction of a New 115 kV Transmission Line from Swan Valley Substation near Swan Valley, Special-Use-Permits, Bonneville and Teton Counties, ID and Teton County, WY.

Summary: Review of the final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F–JUS–K80035–CA. Service Processing Center (SPC) for Detainees, Construction and Operation, Possible Sites, Stockton and Tracy Sites, San Joaquin Counties, CA.

Summary: Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

Dated: November 3, 1998.

William D. Dickerson,

Director, NEPA Compliance Division, Office of Federal Activities.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6183–4]

Extension of the Policy on Enforcement of RCRA Section 3004(j) Storage Prohibition at Facilities Generating Mixed Radioactive/Hazardous Waste

AGENCY: Environmental Protection Agency (EPA).

ACTION: Policy statement.

SUMMARY: EPA is announcing a limited extension of its policy (56 FR 42730, August 29, 1991) on the civil enforcement of the storage prohibition in sec. 3004(j) of the Resource Conservation and Recovery Act (RCRA) at facilities that generate "mixed waste" regulated under both the RCRA subtitle C hazardous waste program and the Atomic Energy Act of 1954, as amended (AEA). The policy affects only mixed wastes that are prohibited from land disposal under the RCRA land disposal restrictions (LDR) and for which there are no available options for treatment or disposal. EPA has determined that for a few of these mixed wastes, treatment technology and disposal capacity still is not commercially available. Based on this determination, EPA is hereby renewing for three years the August 1991 policy for those mixed wastes. For purposes of this policy statement, "available treatment technology and disposal capacity" means that a facility is commercially available to treat or dispose of a particular waste and the facility has either (1) a RCRA permit or interim status; (2) a research, development, and demonstration permit under 40 CFR 270.65; or (3) a land treatment permit under 40 CFR 270.63.

Pursuant to the terms of this policy, EPA will continue to treat violations of RCRA sec. 3004(j) as reduced priorities among EPA's potential civil enforcement actions. EPA's primary concerns are with mixed waste facilities (1) that are storing wastes for which treatment technology is commercially available, and (2) that are not managing their stored mixed waste in an environmentally responsible manner. Generators must regularly explore all treatment and disposal alternatives during the extension because new technologies may come on line at any time. If treatment technology or disposal capacity is available or becomes available, the generator must use it. EPA will employ RCRA enforcement authorities to ensure that this policy is not abused, with particular focus on ensuring that emerging treatment technologies are fully utilized and on confirming that those wastes for which no treatment exists are stored safely.

EFFECTIVE DATE: October 31, 1998.

FOR FURTHER INFORMATION CONTACT: Leslie Bell, Federal, State and Tribal Programs Branch, Office of Solid Waste; Telephone (703) 308–8888 or Mary Andrews, RCRA Enforcement Division, Office of Regulatory Enforcement; Telephone (202) 564–4011.

SUPPLEMENTARY INFORMATION:

I. Background

A. Mixed Waste and the LDR Storage Prohibition

"Mixed wastes" are wastes that contain both a hazardous waste component regulated under Subtitle C of RCRA and a radioactive component consisting of source, special nuclear, or byproduct material regulated under the AEA. On July 3, 1986, EPA clarified that RCRA applies to the hazardous component of these wastes (51 FR 24504). The hazardous component of mixed wastes is subject to the land disposal restrictions in 40 CFR Part 268. The LDR requires generators to treat hazardous wastes to specified treatment standards.

The aspect of the LDR affected by the policy extension set forth in this notice is the "storage prohibition" enacted in the Hazardous and Solid Waste Amendments (HSWA), RCRA section 3004(j), 42 U.S.C. 6924(j), and 40 CFR 268.50. This provision prohibits any storage of a waste prohibited from land disposal (including mixed waste) except "for the purpose of the accumulation of such quantities of hazardous waste as are necessary to facilitate proper recovery, treatment, or disposal." EPA has concluded that storage of a waste pending development of treatment technology does not constitute storage to accumulate sufficient quantities to facilitate proper treatment or disposal. This interpretation was upheld by the U.S. Court of Appeals for the District of Columbia Circuit in *Edison Electric Institute* v. *EPA*, 996 F.2d 326 (D.C. Cir. 1993).

However, treatment and disposal options are limited for some mixed wastes, both currently generated and generated in the past. Therefore, commercial generators may have no option but to store those wastes for which treatment technology or disposal capacity is not yet available.

B. Mixed Waste Treatment Technology and Disposal Capacity

In the past year, EPA has visited hospitals, laboratories, nuclear power plants, universities, and treatment and disposal facilities. The Agency has also conducted research on emerging mixed waste treatment technologies, and has employed RCRA information gathering authority to collect information from several facilities regarding the treatment and disposal of their mixed wastes. The purpose of these efforts was to determine the extent to which generators have utilized available treatment and disposal alternatives, to ascertain whether there are mixed wastes that can not be treated, and to confirm that those wastes for which no treatment exists are stored safely and in compliance with interim status or a RCRA storage permit. As a result of its investigation, EPA believes that (1) currently treatment is available for most low level mixed wastes, but treatment continues to be unavailable for a few wastes, such as mixed wastes containing dioxins, PCBs, and lead based paint solids, and wastes with very high levels of radioactivity; and (2) where treatment technology is available, there is excess capacity at the commercial mixed waste treatment facilities.

In an effort to help generators locate mixed waste treatment, storage, and disposal facilities, EPA has developed an Internet HomePage that lists some commercially available mixed waste treatment, storage, and disposal facilities based on information received from vendors. The EPA Mixed Waste HomePage can be found at "http://www.epa.gov/radiation/mixed-waste." This list should not be seen as complete or as a recommendation or endorsement of any of these facilities. This list only represents those companies that have expressed an interest in participating in EPA's Mixed Waste Internet HomePage. EPA does not endorse or promote technologies or companies that provide treatment, storage, or disposal capacity for any waste, including mixed waste. Companies that wish to participate should contact EPA's Office of Solid Waste at the number listed for this **Federal Register** notice.

II. Summary of Policy

A. Storage Prohibition Policy Extension

In this notice, EPA is announcing a limited extension of its policy (56 FR 42730, August 29, 1991) on civil enforcement of the storage prohibition in RCRA section 3004(j) at facilities that generate mixed wastes. This policy extension is limited to three years from October 31, 1998. Note that this extended policy applies only to those waste streams for which no treatment technology or disposal capacity is available. If treatment technology and disposal capacity are available, the generator must use it. This policy is not a final agency action, but is intended solely as guidance. This policy is not intended, nor can it be relied upon, to create any rights enforceable by any party in litigation with the United States. EPA officials may decide to follow the policy provided in this extension or to act at variance with the policy, based on an analysis of specific site circumstances. The Agency also reserves the right to change this policy at any time.

The intent of this policy is to explain how RCRA section 3004(j) storage violations involving mixed wastes fit within the Agency's civil enforcement priorities. For generators that are storing mixed wastes for which no viable treatment technology or disposal capacity exists, EPA considers the violations of RCRA section 3004(j) to be a relatively low priority among EPA's potential civil enforcement actions so long as the wastes are stored in accordance with a RCRA permit or interim status and are stored in an environmentally responsible manner. Any enforcement activity arising from violations of RCRA section 3004(j) will generally focus on those facilities that store mixed wastes for which treatment technology is commercially available or fail to manage any mixed waste in an environmentally responsible manner.

In addition, generators of the affected mixed waste must be following prudent waste management practices to store their mixed wastes in a manner that minimizes risk to public health and the environment. In determining the civil enforcement priority of RCRA section 3004(j) storage violations at particular mixed waste generator facilities, the Agency recognizes a variety of indicators of environmentally responsible operation. These factors are described in Section IV of this document.

EPA is currently developing an Advance Notice of Proposed Rulemaking that will request comment on several strategies to address overlapping regulatory requirements for mixed waste with low levels of radioactivity that is subject to both Nuclear Regulatory Commission and EPA oversight. The Agency expects to request comments on options for mixed waste storage and treatment, including storage for decay, and alternative suggestions for providing regulatory flexibility for mixed waste management.

B. Limitations on Scope

This policy affects only the priority placed on potential civil judicial and administrative enforcement actions that would arise from storing mixed wastes subject to the LDR in contravention of RCRA section 3004(j). This policy does not limit the Agency's enforcement authority, including its authority under RCRA section 7003 relating to imminent and substantial endangerment. The policy also is limited to those mixed waste streams for which treatment technology or disposal capacity is not commercially available. The mixed wastes covered by this policy must be mixed wastes when generated; a generator may not commingle radioactive waste streams with hazardous waste in order to come within the scope of this policy.

EPA intends that this policy apply both to mixed wastes generated during the term of the policy, and to existing inventories of mixed wastes already in storage. The policy does not cover other violations of RCRA storage requirements, such as the storage facility standards of Subparts I through L and DD of 40 CFR Parts 264 (permitted facility standards) or 265 (interim status facility standards), or their state equivalents. EPA emphasizes that this policy does not affect any requirement under RCRA to obtain a storage permit, which is generally required if mixed wastes are stored for greater than 90 days. The policy does not extend to potential criminal violations of RCRA, for which prosecutorial discretion rests solely with the United States Attorney General.

EPA intends to apply this policy to executive branch federal facilities, except facilities owned or operated by the Department of Energy (DOE) or by the joint Navy/DOE Naval Nuclear Propulsion Program (NNPP). The Federal Facilities Compliance Act of 1992 (FFCA), 42 U.S.C. 6912, 6939c and 6961, section 102(c)(3)(B) requires DOE and NNPP to be in compliance with (1) an approved plan to develop capacities and technologies to treat a facility's mixed waste; and (2) any order requiring compliance with such plan issued in accordance with RCRA section 3021(b), 42 U.S.C. 6939c. With respect to DOE and NNPP, EPA enforcement of RCRA section 3004(j) will be based on the terms contained in the plans and orders developed pursuant to RCRA section 3021, and not on the terms of this policy.

III. Applicability

Mixed waste is regulated by EPA in states that are not authorized for the RCRA base program. As of June 30, 1998, three states and four territories have not received RCRA base authorization. These states and territories are Alaska, American Samoa, Hawaii, Iowa, Northern Mariana Islands, Puerto Rico, and Virgin Islands. In these states and territories, EPA alone administers the RCRA program and therefore this policy applies in these states.

This policy is not applicable in states that are authorized for the RCRA "base" program but are not authorized for mixed waste because in these states, mixed waste is not subject to RCRA jurisdiction. As of June 30, 1998, those states are the District of Columbia, Maryland, Massachusetts, New Jersey, Pennsylvania, Rhode Island, Virginia, and West Virginia.

Mixed waste is regulated by EPA and the state in those states that are authorized for both the base program and for mixed waste. In states authorized for mixed waste that are not authorized to implement any or all of the LDR regulations, EPA implements the LDR provisions for all waste codes which the state has not yet been authorized. As of June 30, 1998, Indiana, Kentucky, Louisiana, Montana, Nebraska, New Hampshire, South Dakota, and Washington do not have authorization for a significant portion of the LDR program and thus this policy is applicable to many wastes generated in these states.

In states that are authorized for both mixed waste and portions of the LDR program, the state, as well as EPA, has authority to enforce those portions of the LDR program for which the state is authorized. This policy affects only the EPA enforcement programs. States that are authorized for both mixed waste and the LDR may choose to follow this federal policy, however, it is not binding on them. Therefore, generators should consult with their states for clarification of the state's policy with respect to storage of LDR prohibited mixed waste.

During the term of this policy, additional states may receive authorization for mixed waste or portions of the LDR program. Facility owners and operators should track the authorization status of their state programs in order to ascertain whether they are covered by this policy, or whether other restrictions based on state law might apply to mixed waste storage. Information on a state's authorization status for mixed waste can be found on the EPA Mixed Waste HomePage previously cited. EPA's State Authorization HomePage at "http://www.epa.gov/epaoswer/hazwaste/state/index.htm" also provides information on the status of authorization for mixed waste and LDR.

IV. Responsible Management of Mixed Waste

In order to demonstrate that they are pursuing environmentally responsible management of their mixed wastes (and therefore should be accorded a reduced civil enforcement priority for RCRA section 3004(j) violations), owners and operators of facilities generating and storing mixed wastes should undertake at least the following steps.

A. Inventory and Compliance Assessment of Storage Areas

RCRA regulations applicable to hazardous waste storage require facilities to maintain a record identifying each physical location or unit where mixed waste is stored and the method of storage, i.e., container or tank, see 40 CFR 264.73(b) or 265.73(b). The regulations also require regular inspection of these storage areas for compliance with applicable RCRA standards and permit requirements, including an assessment of compliance with the storage facility standards of 40 CFR Part 264 or Part 265, Subparts I–J and DD, or the state counterparts to these standards (see 40 CFR 264.15 or 265.15). Facilities must maintain records containing the results of the inspections as required by 40 CFR 264.73(b)(5) or 265.73(b)(5). EPA encourages facility owner/operators to take action promptly to correct any deficiencies, since EPA expects to focus its enforcement efforts regarding RCRA section 3004(j) violations on situations that indicate a disregard for compliance with the RCRA Subtitle C requirements.

B. Identification of Mixed Wastes

Facility owner/operators should maintain sufficient information to identify their mixed wastes. The identification should include the RCRA

waste codes for the hazardous components, the source of the hazardous constituents and discussion of how the waste was generated (if known), the generation rate and volumes of mixed wastes in storage, and any process information relied upon to identify mixed wastes or make determinations that wastes are subject to the LDR (see 40 CFR 264.73 or 265.73).

C. Waste Minimization Plans

EPA understands that many mixed waste generators have undertaken active measures to avoid the generation of mixed wastes. EPA continues to encourage mixed waste generators to develop a waste minimization plan (see 58 FR 31114, May 28, 1993, for guidance) to reduce or eliminate mixed wastes, to minimize the volume of regulated wastes generated, and to substitute non-hazardous materials.

D. Good Faith Efforts

This policy is limited in scope to those LDR-prohibited mixed wastes for which no treatment technology or disposal capacity is commercially available. Because additional treatment technology or disposal capacity may become available at any time in the future, facility owner/operators should be prepared to demonstrate ongoing good faith efforts to locate treatment technology and disposal capacity for each of their mixed wastes and to utilize any and all such treatment technology and disposal capacity.

Dated: October 31, 1998.

Timothy Fields, Jr.,

Acting Assistant Administrator, Office of Solid Waste and Emergency Response.

Sylvia Lowrance,

Acting Assistant Administrator, Office of Enforcement and Compliance Assurance.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6186–3]

National Advisory Council for Environmental Policy and Technology; Environmental Capital Markets Committee; Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: Under the Federal Advisory Committee Act, Public Law 92463, EPA gives notice of a meeting of the Environmental Capital Markets Committee of the National Advisory Council for Environmental Policy and Technology (NACEPT), which provides advice and recommendations to the Administrator of EPA on a broad range of environmental policy issues.

The Environmental Capital Markets Committee has been evaluating practical ways for the financial services industry to include the environmental performance of its clients as an integral part of its core credit, investment, and underwriting processes. Some of the major issues the Committee has been addressing are:

- The extent to which—and why—the financial services industry currently takes environmental factors into account in its credit, investment, and underwriting processes.
- The characteristics of current (and projected) environmental management systems (EMS) and practices that could help correlate environmental performance and financial performance.
- How information flowing from these EMSs/practices might be quantified in a manner that could be integrated into the financial service industry's credit, investment, and underwriting processes.

The ultimate goal of the Committee is to identify concrete actions that EPA, on its own or in cooperation with other Federal or state agencies, could take to help the financial services industry incorporate this environmental information into its core decision-making processes.

DATES: The Environmental Capital Markets Committee will hold a one day public meeting on Tuesday, December 1, 1998 from 9:00 a.m. to 6:00 p.m.

ADDRESSES: The meeting will be held at the Sheraton City Centre Hotel, 1143 New Hampshire Avenue N.W., Washington, D.C. Materials or written comments may be transmitted to the Committee through Mark Joyce, Designated Federal Officer, U.S. EPA, Office of Cooperative Environmental Management (1601F), 401 M Street S.W., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Mark Joyce, Designated Federal Officer, Environmental Capital Markets Committee, at 202–260–6889.

Dated: October 28, 1998.

Mark Joyce,

Designated Federal Officer.

BILLING CODE 6560–50–U

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6186–5]

National Advisory Council for Environmental Policy and Technology Reinvention Criteria Committee; Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: Under the Federal Advisory Committee Act, Public Law 92463, EPA gives notice of a meeting of the National Advisory Council for Environmental Policy and Technology's (NACEPT) Reinvention Criteria Committee. NACEPT provides advice and recommendations to the Administrator of EPA on a broad range of environmental policy issues.

The NACEPT Reinvention Criteria Committee(RCC) has been asked to help the Agency understand how incentives can be used most successfully to inspire firms, companies, communities, and individuals to go beyond mere compliance with existing regulations and to begin the process of addressing outstanding environmental problems. In particular, the committee is focusing on the following questions:

- What opportunities exist for EPA to use incentives to promote environmental stewardship in industry? In local communities? In the general public?
- How can EPA evaluate the effectiveness of incentives to encourage environmental stewardship that leads to improved environmental results? How can EPA measure the impact that incentives have on public confidence? What criteria should be used to decide whether the use of incentives is appropriate?
- How can the concept of performance ladders be used to tailor incentives most effectively?

This meeting is being held to provide the EPA with perspectives from representatives of state, local, and tribal governments, environmental organizations, academia, industry, and NGOs.

DATES: A two-day public meeting will be held Tuesday, December 8 and Wednesday, December 9, 1998 from 8:30 am to 5:00 pm.

ADDRESSES: The RCC will hold a two-day public meeting at the Embassy Suites Hotel, located at 1900 Diagonal Road in Alexandria,VA. Materials or written comments may be transmitted to the committee through Gwendolyn Whitt, Designated Federal Officer, NACEPT RCC, U.S. EPA, Office of Cooperative Environmental Management (1601F), 401 M Street, SW, Washington, D.C. 20460. There will also be an opportunity for the public to make comments directly to the committee during the first day of the meeting. Requests to make public comments must be submitted no later than November 18, 1998 to Gwendolyn Whitt, at the address above or faxed to (202)–260–6882.

FOR FURTHER INFORMATION CONTACT: Gwendolyn Whitt, Designated Federal Officer, NACEPT, at (202)–260–9484.

Dated: October 29, 1998.

[FRL–6186–4]

National Advisory Council for Environmental Policy and Technology: Full Council Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: Under the Federal Advisory Committee Act, Public Law 92–463, EPA gives notice of a one-day meeting of the National Advisory Council for Environmental Policy and Technology (NACEPT). NACEPT provides advice and recommendations to the Administrator of EPA on a broad range of environmental policy issues. This plenary meeting is being held to provide the EPA with perspectives from representatives of state, local, and tribal governments, environmental organizations, academia, industry and NGOs. The NACEPT Council will focus on strategic planning for the 1999 NACEPT agenda, discuss the preliminary results of the NACEPT Self Study, and obtain updates on the activities of the NACEPT committees.

DATES: The one-day public meeting will be held on Thursday, December 10, 1998, from 8:45 a.m. to 5:00 p.m.

ADDRESSES: The meeting will be held at the Embassy Suites Hotel, 1900 Diagonal Road, Alexandria, Virginia. Material or written comments may be transmitted to the Council through Gwendolyn Whitt, Designated Federal Officer, NACEPT, U.S. EPA, Office of Cooperative Environmental Management (1601–F), 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Gwendolyn Whitt at the address shown above and 202–260–9484.

Dated: October 29, 1998.

Oryzalin: Amendment to the Reregistration Eligibility Decision (RED)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Amendment to the Oryzalin Reregistration Eligibility Decision (RED) Document

SUMMARY: This notice amends the Oryzalin Reregistration Eligibility Decision (RED) Document, Case 0186, pursuant to section 4(g)(2) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) 7 U.S.C. 136 et seq. This amendment revises the Personal Protective Equipment (PPE) requirements established in the RED for handlers of oryzalin end-use products. All handlers loaders of oryzalin liquid formulations will be required to wear: chemical-resistant gloves, shoes, socks, long-sleeved shirt, and long pants. In addition, mixers and loaders of liquid formulations will be required to wear a chemical-resistant apron. PPE for all other non-homeowner use scenarios will be determined based on the toxicity of the end-use product, as per guidance provided by the Worker Protection Standard (WPS). This notice does not apply to the homeowner uses of oryzalin.

DATES: Written comments on the RED decisions must be submitted by December 7, 1998.

ADDRESSES: Submit three copies of written comments identified with the docket control number "OPP–34152" by mail to: Public Information and Records Integrity Branch, Information Resources and Services Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm 119, Crystal Mall 2 (CM #2), 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by following the instructions under "SUPPLEMENTARY INFORMATION" of this document. No Confidential Business Information (CBI) should be submitted through e-mail.

Information submitted as a comment in response to this notice may be claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public docket. Information not marked confidential will be included in the public docket without prior notice (including comments and data submitted electronically). The public docket and docket index, including printed paper versions of electronic comments that does not include any information claimed as CBI, will be available for public inspection in Rm. 119 at the address given above, from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

The Oryzalin RED and Fact Sheet are available from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Attn: Order Desk; Telephone No. (703) 487–4650. To obtain a copy of the Oryzalin RED, request publication number PB95–1791721; for the Oryzalin RED Fact Sheet request PB95–187670. This notice is also being forwarded to NTIS.

FOR FURTHER INFORMATION CONTACT: Carmelita White, Chemical Review Manager, Reregistration Branch III, Special Review and Reregistration Division (7508W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Washington, DC 20460. Office location and telephone number: Sixth floor, CM #2, 1921 Jefferson Davis Highway, Arlington, VA. (703) 308–7038.

SUPPLEMENTARY INFORMATION:

Electronic Availability: Electronic copies of this document and various support documents are available from the EPA home page at the Federal Register-Environmental Documents entry for this document under "Laws and Regulations" (http://www.epa.gov/fedrgstr/).

EPA published a notice in the **Federal Register** of on March 8, 1995, (60 FR 12763)(FRL–4940–6), announcing the availability of the Oryzalin RED. In the RED, EPA provided its regulatory position on the registered uses of oryzalin based on the information and data available at that time. The RED set forth specific requirements for product reregistration eligibility. The Agency required certain PPE (coveralls over long-sleeved shirt and long pants,

chemical-resistant gloves, chemical-resistant footwear and chemical-resistant headgear for overhead exposures) for all non-homeowner uses of oryzalin. The RED also required a chemical-resistant apron for mixers and loaders of all non-homeowner, end-use oryzalin liquid products. The additional PPE were required to mitigate exposure to oryzalin due to carcinogenicity concerns.

In the Oryzalin RED, the Agency used the Pesticide Handler Exposure Database (PHED), Version 1.0, to derive exposure estimates for mixers, loaders and applicators. In August 1995, DowElanco requested that the Agency reconsider the additional PPE requirements. In responding to this request, the Agency conducted a new risk and exposure assessment using an updated version of this same database (PHED 1.1) that contained more accurate information. The updated PHED database became available after the Oryzalin RED document had been published. The refined assessment indicated that the PPE requirements in the RED were overly restrictive, however, the refined risk estimates still showed that baseline PPE (i.e., long-sleeved shirt, long pants, socks and shoes) were not adequately protective of mixers and loaders of the liquid formulations and applicators using hand-held equipment.

For mixers and loaders of oryzalin liquids and applicators using hand-held equipment, the Agency is now requiring, chemical-resistant gloves, long-sleeved shirt, long pants, shoes, and socks. Additionally, for mixers and loaders of oryzalin liquids, a chemical-resistant apron is required. PPE for all other formulations will be determined based on the acute toxicity of the end-use product, as per guidance provided by the Worker Protection Standard (WPS).

For the low-pressure handwand use scenario, the refined oryzalin exposure and risk assessment used the high-pressure handwand data set rather than the low-pressure handwand data set. The Agency believes that the high-pressure handwand data set more closely approximates the type of spray equipment used to apply oryzalin to ornamentals and turfgrass. The risk estimates for applicators with the high-pressure handwand scenario were 3.5 x 10–5 with the baseline PPE and chemical-resistant gloves, which is in the acceptable range for applicators.

Electronic copies of the REDs and RED fact sheets can be downloaded from the Pesticide Special Review and Reregistration Information System at (703) 308–7224, and also can be reached on the Internet via EPA's website at: http//www.epa.gov/REDs/.

The official record for this notice, as well as the public version, has been established for this notice under docket control number "OPP–34152" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The official record is located at the address in "ADDRESSES" at the beginning of this document.

Electronic comments can be sent directly to EPA at:
opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comment and data will also be accepted on disks in WordPerfect 5.1 or 6.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket control number (OPP–34152). Electronic comments on this notice may be filed online at many Federal Depository Libraries.

Lead-Based Paint Activities in Target Housing and Child-Occupied Facilities; the State of Delaware's Authorization Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for comments and opportunity for public hearing.

SUMMARY: On August 27, 1998, the State of Delaware submitted an application for EPA approval to administer and enforce training and certification requirements, training program accreditation requirements, and work practice standards for lead-based paint activities in target housing and child-occupied facilities under section 402 of the Toxic Substances Control Act (TSCA). This notice announces the receipt of Delaware's application, provides a 45–day public comment period, and provides an opportunity to request a public hearing on the application.

DATES: Comments on the authorization application must be received on or before December 21, 1998. Public hearing requests must be received on or before December 7, 1998.

ADDRESSES: Submit all written comments and/or requests for a public hearing identified by docket control number "PB–402404–DE (in duplicate) to: U.S. Environmental Protection Agency, Region III, Waste and Chemicals Management Division, Toxics Programs and Enforcement Branch (3WC33), 1650 Arch St., Philadelphia, PA 19103-2029.

Comments, data, and requests for a public hearing may also be submitted electronically to: johnson.artencia@epa.gov. Follow the instructions under Unit IV. of this document. No information claimed to be Confidential Business Information (CBI) should be submitted through e-mail.

FOR FURTHER INFORMATION CONTACT: Artencia R. Johnson (3WC33), Waste and Chemicals Management Division, U.S. Environmental Protection Agency, Region III, 1650 Arch St., Philadelphia, PA 19103, Telephone: (215) 814–5754; e-mail: johnson.artencia@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On October 28, 1992, the Housing and Community Development Act of 1992, Pub. L. 102-550, became law. Title X of that statute was the Residential Lead-Based Paint Hazard Reduction Act of 1992. That Act amended TSCA (15 U.S.C. 2601 *et seq.*) by adding Title IV (15 U.S.C. 2681-92), entitled "Lead Exposure Reduction."

Section 402 of TSCA authorizes and directs EPA to promulgate final regulations governing lead-based paint activities in target housing, public and commercial buildings, bridges and other structures. Those regulations are to ensure that individuals engaged in such activities are properly trained, that training programs are accredited, and that individuals engaged in these activities are certified and follow documented work practice standards. Under section 404, a State may seek authorization from EPA to administer and enforce its own lead-based paint activities program.

On August 29, 1996 (61 FR 45777) (FRL-5389-9), EPA promulgated final TSCA section 402/404 regulations governing lead-based paint activities in target housing and child-occupied facilities (a subset of public buildings). Those regulations are codified at 40 CFR part 745, and allow both States and Indian Tribes to apply for program authorization. Pursuant to section 404(h) of TSCA, EPA is to establish the Federal program in any State or Tribal Nation without its own authorized program in place by August 31, 1998.

States and Tribes that choose to apply for program authorization must submit a complete application to the appropriate Regional EPA Office for review. Those applications will be reviewed by EPA within 180 days of receipt of the complete application. To receive EPA approval, a State or Tribe must demonstrate that its program is at least as protective of human health and the environment as the Federal program, and provides for adequate enforcement (section 404(b) of TSCA, 15 U.S.C. 2684(b)). EPA's regulations (40 CFR part 745, subpart Q) provide the detailed requirements a State or Tribal program must meet in order to obtain EPA approval.

A State may choose to certify that its lead-based paint activities program meets the requirements for EPA approval, by submitting a letter signed by the Governor or Attorney General stating that the program meets the requirements of section 404(b) of TSCA. Upon submission of such certification letter, the program is deemed authorized. This authorization becomes ineffective, however, if EPA disapproves the application.

Pursuant to section 404(b) of TSCA, EPA provides notice and an opportunity for a public hearing on a State or Tribal program application before authorizing the program. Therefore, by this notice EPA is soliciting public comment on whether Delaware's application meets the requirements for EPA approval. This notice also provides an opportunity to request a public hearing on the application. If a hearing is requested and granted, EPA will issue a **Federal Register** notice announcing the date, time, and place of the hearing. EPA's final decision on the application will be published in the **Federal Register**.

II. State Program Description Summary

The following summary of Delaware's proposed program has been provided by the applicant.

The State of Delaware, Department of Health and Social Services (DHSS), Division of Public Health (DPH), Office of Lead Poisoning Prevention (OLPP), under whose jurisdiction Delaware's childhood lead reduction initiatives reside, is the entity within State government that has promulgated the required regulations. The program will be at least as protective of human health and the environment as future Federal programs and will provide for adequate enforcement. The main thrust of Delaware's OLPP Program will be devoted to implement and enforce the required regulations based upon enacted legislation authorizing the establishment of a statewide lead prevention program. These required regulations, entitled "State of Delaware Regulations Governing Lead-Based Paint Hazards," became effective August 11, 1998. DPH's OLPP staff; Delaware State Housing Authority and other local housing authorities; Division of Professional Regulations; Department of Natural Resources and Environmental Control; City of Wilmington's Housing Inspections Department; private industry and industry trade associations (realtors, contractors, etc.); and other local and community-based outreach groups. The combined and coordinated efforts of these agencies will continue to play a vital role in the implementation of DPH's Office of Lead Poisoning Prevention Program.

Delaware has a total population of approximately 739,337 people located in three counties. The most heavily populated county is New Castle with a population of 478,068. The population of Kent County is 123,528 and of Sussex County 137,741. Wilmington is the largest city with a population of 71,517. Delaware's birth through 5–year old population is 60,284.

Universal screening legislation in Delaware, the Childhood Lead Poisoning Prevention Act, implemented in March 1995, requires private health care providers to order blood lead screening on all children at or around 12 months of age. All screening services are covered by third party insurance. Uninsured children and those without a medical home will continue to be screened at DPH Child Health Clinics. Environmental inspections and lead hazard reduction will occur at least in the homes of children with elevated blood lead levels >20 mcg/dL. In addition, targeted screening and investigations will occur in high risk neighborhoods, in day care centers, and the Head Start centers.

The lack of lead-safe housing is a problem in Delaware. Based on 1990 census information, it is estimated that approximately 144,000 owner and renter occupied homes in Delaware built prior to 1980 contain some level of lead-based paint. The DPH OLPP Program has been monitoring blood lead levels in children since 1975. Utilizing existing OLPP data and 1990 U.S. Census information, the DPH has identified target areas with the City of Wilmington. However, the existence of lead-based paint in these target areas has not been confirmed. In addition, there is insufficient data on housing in the remainder of the State to conclusively identify other high risk areas.

III. Federal Overfiling

TSCA section 404(b) makes it unlawful for any person to violate, or fail or refuse to comply with, any requirement of an approved State or Tribal program. Therefore, EPA reserves the right to exercise its enforcement authority under TSCA against a violation of, or a failure or refusal to comply with, any requirement of an authorized State or Tribal program.

IV. Public Record and Electronic Submissions

The official record for this action, as well as the public version, has been established under docket control number "PB–402404–DE." Copies of this notice, the State of Delaware's authorization application, and all comments received on the application are available for inspection in the Region III office, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The docket is located at U.S. Environmental Protection Agency, Region III, Waste and Chemicals Management Division, Toxics Programs and Enforcement Branch (3WC33), 1650 Arch St., Philadelphia, PA.

Electronic comments can be sent directly to EPA at:
johnson.artencia@epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1/6/1 or ASCII file format. All comments and data in electronic form must be identified by the docket control number "PB–402404–DE." Electronic comments on this document may be filed online at many Federal Depository Libraries. Information claimed as CBI should not be submitted electronically.

Commenters are encouraged to structure their comments so as not to contain information for which CBI claims would be made. However, any information claimed as CBI must be marked "confidential," "CBI," or with some other appropriate designation, and a commenters submitting such

information must also prepare a nonconfidential version (in duplicate) that can be placed in the public record. Any information so marked will be handled in accordance with the procedures contained in 40 CFR part 2. Comments and information not claimed as CBI at the time of submission will be placed in the public record.

V. Regulatory Assessment Requirements

A. Certain Acts and Executive Orders

EPA's actions on State or Tribal lead-based paint activities program applications are informal adjudications, not rules. Therefore, the requirements of the Regulatory Flexibility Act (RFA, 5 U.S.C. 601 *et seq.*), Executive Order 12866 ("Regulatory Planning and Review," 58 FR 51735, October 4, 1993), and Executive Order 13045 ("Protection of Children from Environmental Health Risks and Safety Risks," 62 FR 1985, April 23, 1997), do not apply to this action. This action does not contain any Federal mandates, and therefore is not subject to the requirements of the Unfunded Mandates Reform Act (2 U.S.C. 1531-1538). In addition, this action does not contain any information collection requirements and therefore does not require review or approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

B. Executive Order 12875

Under Executive Order 12875, entitled, "Enhancing Intergovernmental Partnerships" (58 FR 58093, October 28, 1993), EPA may not issue a regulation that is not required by statute and that creates a mandate upon a State, local or Tribal government, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by those governments. If the mandate is unfunded, EPA must provide to OMB a description of the extent of EPA's prior consultation with representative of affected State, local, and Tribal governments, the nature of their concerns, copies of any written communications from the governments and a statement supporting the need to issue the regulation. In addition, Executive Order 12875 requires EPA to develop an effective process permitting elected officials and other representatives of State, local, and Tribal governments "to provide meaningful and timely input in the development of regulatory proposals containing significant mandates."

Today's action does not create and unfunded Federal mandate on State, local, or Tribal governments. This action does not impose any enforceable duties on these entities. Accordingly, the requirements of section 1(a) of Executive Order 12875 do not apply to this action.

C. Executive Order 13984

Under Executive Order 13084, entitled, "Consultation and Coordination with Indian Tribal Governments" (63 FR 27655, May 19, 1998), EPA may not issue a regulation that is not required by statute and that significantly or uniquely effects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the Tribal governments. If the mandate is unfunded, EPA must provide OMB, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected Tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected and other representatives of Indian tribal governments to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities."

Today's action does not significantly or uniquely affect the communities of Indian tribal governments. This action does not involve or impose requirements that affect Indian Tribes. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this action.

Authority: 15 U.S.C 2682, 2684.

List of Subjects

Environmental protection, Hazardous substances, Lead, Reporting and recordkeeping requirements.

BILLING CODE 6560-50-F

ENVIRONMENTAL PROTECTION AGENCY

[PB-402404-MD; FRL-6037-4]

Lead-Based Paint Activities in Target Housing and Child-Occupied Facilities; The State of Maryland Authorization Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for comments and opportunity for public hearing.

SUMMARY: On July 31, 1998, the State of Maryland submitted an application for EPA approval to administer and enforce training and certification requirements, training program accreditation requirements, and work practice standards for lead-based paint activities in target housing and child-occupied facilities under section 402 of the Toxic Substances Control Act (TSCA). This notice announces the receipt of Maryland's application, provides a 45-day public comment period, and provides an opportunity to request a public hearing on the application.

DATES: Comments on the authorization application must be received on or before December 21, 1998. Public hearing requests must be received on or before December 7, 1998.

ADDRESSES: Submit all written comments and/or requests for a public hearing identified by docket control number "PB-402404-MD" (in duplicate) to: Environmental Protection Agency, Region III, Waste and Chemicals Management Division, Toxics Programs and Enforcement Branch (3WC33), 1650 Arch St., Philadelphia, PA 19103-2029. Comments, data, and requests for a public hearing may also be submitted electronically to: johnson.artencia@epa.gov. Follow the instructions under Unit IV. of this document. No information claimed to be Confidential Business Information (CBI) should be submitted through e-mail.

FOR FURTHER INFORMATION CONTACT: Artencia R. Johnson (3WC33), Waste and Chemicals Management Division, U.S. Environmental Protection Agency, Region III, 1650 Arch St., Philadelphia, PA 19103, Telephone: (215) 814-5754, e-mail address: johnson.artencia@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On October 28, 1992, the Housing and Community Development Act of 1992, Pub. L. 102-550, became law. Title X of that statute was the Residential Lead-Based Paint Hazard Reduction Act of 1992. That Act amended TSCA (15 U.S.C. 2601 *et seq.*) by adding Title IV (15 U.S.C. 2681-92), entitled "Lead Exposure Reduction."

Section 402 of TSCA authorizes and directs EPA to promulgate final regulations governing lead-based paint activities in target housing, public and commercial buildings, bridges and other structures. Those regulations are to ensure that individuals engaged in such activities are properly trained, that training programs are accredited, and that individuals engaged in these activities are certified and follow documented work practice standards. Under section 404, a State may seek authorization from EPA to administer and enforce its own lead-based paint activities program.

On August 29, 1996 (61 FR 45777) (FRL-5389-9), EPA promulgated final TSCA section 402/404 regulations governing lead-based paint activities in target housing and child-occupied facilities (a subset of public buildings). Those regulations are codified at 40 CFR part 745, and allow both States and Indian Tribes to apply for program authorization. Pursuant to section 404(h) of TSCA, EPA is to establish the Federal program in any State or Tribal Nation without its own authorized program in place by August 31, 1998.

States and Tribes that choose to apply for program authorization must submit a complete application to the appropriate Regional EPA Office for review. Those applications will be reviewed by EPA within 180 days of receipt of the complete application. To receive EPA approval, a State or Tribe must demonstrate that its program is at least as protective of human health and the environment as the Federal program, and provides for adequate enforcement (section 404(b) of TSCA, 15 U.S.C. 2684(b)). EPA's regulations (40 CFR part 745, subpart Q) provide the detailed requirements a State or Tribal program must meet in order to obtain EPA approval.

A State may choose to certify that its lead-based paint activities program meets the requirements for EPA approval, by submitting a letter signed by the Governor or Attorney General stating that the program meets the requirements of section 404(b) of TSCA. Upon submission of such certification letter, the program is deemed authorized. This authorization becomes ineffective, however, if EPA disapproves the application.

Pursuant to section 404(b) of TSCA, EPA provides notice and an opportunity for a public hearing on a State or Tribal program application before authorizing the program. Therefore, by this notice EPA is soliciting public comment on whether Maryland's application meets the requirements for EPA approval. This notice also provides an opportunity to request a public hearing on the application. If a hearing is requested and granted, EPA will issue a **Federal Register** notice announcing the date, time, and place of the hearing. EPA's final decision on the application will be published in the Federal Register.

II. State Program Description Summary

The following summary of Maryland's proposed program has been provided by the applicant.

During the past decade, Maryland has developed lead-based paint activities programs which anticipated the standards of 40 Code of Federal Regulations (CFR) part 745. The Maryland program, as incorporated in State laws and regulations, also covers a substantially broader scope of activities than the current Federal standards. This application clearly demonstrates that the Maryland program meets the conditions for accreditation of TSCA 404(b) in that "(1) the state program is at least as protective of human health and the environment as the Federal program under section 402. . . , and (2) such state program provides adequate enforcement." A letter certifying that the State program meets these criteria is included in the application package.

The Maryland Department of the Environment (MDE), Environmental Lead Division includes the equivalent elements and functions provided for in the model lead-based paint activities program of TSCA sections 402 and 404 and 40 CFR part 745. The Environmental Lead Division and the Lead Coordination Division are included in the Regulatory and Technical Assistance Program of the MDE Waste Management Administration.

Lead paint abatement regulations, adopted as COMAR 26.02.07 in 1988, anticipated many of the provisions of later Federal guidelines and regulations, such as the use of surface dust clearance standards; prohibition of open flame burning and uncontained abrasive paint removal methods; containment and cleanup of dust and debris; occupant protection; and worker training.

From the inception of the Maryland program in 1995, there has been a continuing effort to link procedures and standards to current research. Maryland regulations were the first to incorporate surface dust clearance standards. The federally funded lead-in-soil study was the largest research project in which MDE was directly engaged. MDE has also participated in smaller scale projects involving, for example, evaluation of encapsulant coatings and other alternative abatement methodologies.

MDE implemented new training and accreditation standards in 1996. In the absence of promulgated federal standards, Maryland adopted standards based on program experience as well as unique features of Maryland law. Specific training and accreditation criteria are published in COMAR 26.16.01 and are discussed in the text of this application. Experience gained in regulating lead paint abatement worker training, as presented by more than 20 different training providers under the earlier standards of COMAR 26.02.0711, provided a basis for the policies and procedures included in the final section of the application.

MDE experience during the past 10 years provides a pragmatic basis for regulatory compliance and enforcement. MDE staff functions include conducting environmental case management for lead-poisoned children; reviewing and monitoring abatement projects; developing enforcement cases for violations of lead paint inspection and abatement standards, and reviewing training course applications and auditing the delivery of training courses. Program policies and procedures are included in the final section of this application.

III. Federal Overfiling

TSCA section 404(b) makes it unlawful for any person to violate, or fail or refuse to comply with, any requirement of an approved State or Tribal program. Therefore, EPA reserves the right to exercise its enforcement authority under TSCA against a violation of, or a failure or refusal to comply with, any requirement of an authorized State or Tribal program.

IV. Public Record

The official record for this action, as well as the public version, has been established under docket control number "PB-402404-MD." Copies of this notice, the State of Maryland's authorization application, and all comments received on the application are available for inspection in the Region III office, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The docket is located at U.S. Environmental Protection Agency, Region III, Waste and Chemicals Management Division, Toxics Programs and Enforcement Branch (3WC33), 1650 Arch St., Philadelphia, PA.

Electronic comments can be sent directly to EPA at:
johnson.artencia@epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1/6/1 or ASCII file format. All comments and data in electronic form must be identified by the docket control number "PB–402404–MD." Electronic comments on this document may be filed online at many Federal Depository Libraries. Information claimed as CBI should not be submitted electronically.

Commenters are encouraged to structure their comments so as not to contain information for which CBI claims would be made. However, any information claimed as CBI must be marked "confidential," "CBI," or with some other appropriate designation, and a commenter submitting such information must also prepare a nonconfidential version (in duplicate) that can be placed in the public record. Any information so marked will be handled in accordance with the procedures contained in 40 CFR part 2. Comments and information not claimed as CBI at the time of submission will be placed in the public record.

V. Regulatory Assessment Requirements

A. Certain Acts and Executive Orders

EPA's actions on State or Tribal lead-based paint activities program applications are informal adjudications, not rules. Therefore, the requirements of the Regulatory Flexibility Act (RFA, 5 U.S.C. 601 *et seq.*), Executive Order 12866 ("Regulatory Planning and Review," 58 FR 51735, October 4, 1993), and Executive Order 13045 ("Protection of Children from Environmental Health Risks and Safety Risks," 62 FR 1985, April 23, 1997), do not apply to this action. This action does not contain any Federal mandates, and therefore is not subject to the requirements of the Unfunded Mandates Reform Act (2 U.S.C. 1531-1538). In addition, this action does not contain any information collection requirements and therefore does not require review or approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

B. Executive Order 12875

Under Executive Order 12875, entitled, "Enhancing Intergovernmental Partnerships" (58 FR 58093, October 28, 1993), EPA may not issue a regulation that is not required by statute and that creates a mandate upon a State, local or Tribal government, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by those governments. If the mandate is unfunded, EPA must provide to OMB a description of the extent of EPA's prior consultation with representative of affected State, local, and Tribal governments, the nature of their concerns, copies of any written communications from the governments and a statement supporting the need to issue the regulation. In addition, Executive Order 12875 requires EPA to develop an effective process permitting elected officials and other representatives of State, local, and Tribal governments "to provide meaningful and timely input in the development of regulatory proposals containing significant mandates."

Today's action does not create and unfunded Federal mandate on State, local, or Tribal governments. This action does not impose any enforceable duties on these entities. Accordingly, the requirements of section 1(a) of Executive Order 12875 do not apply to this action.

C. Executive Order 13984

Under Executive Order 13084, entitled, "Consultation and Coordination with Indian Tribal Governments" (63 FR 27655, May 19, 1998), EPA may not issue a regulation that is not required by statute and that significantly or uniquely effects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the Tribal governments. If the mandate is unfunded, EPA must provide OMB, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected Tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected and other representatives of Indian tribal governments to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities."

Today's action does not significantly or uniquely affect the communities of Indian tribal governments. This action does not involve or impose requirements that affect Indian Tribes. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this action.

Authority: 15 U.S.C 2682, 2684.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1256–DR]

Missouri; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Missouri (FEMA–1256–DR), dated October 19, 1998, and related determinations.

EFFECTIVE DATE: October 19, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated October 19, 1998, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Missouri, resulting from severe storms and flooding on July 10–31, 1998, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Pub. L. 93–288, as amended ("the Stafford Act").

I, therefore, declare that such a major disaster exists in the State of Missouri.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Hazard Mitigation in the designated areas and any other forms of assistance under the Stafford Act you may deem appropriate. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Hazard Mitigation will be limited to 75 percent of the total eligible costs. If at a later date Public Assistance is warranted, Federal funds provided under that program will also be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Curtis D. Musgrave of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Missouri to have been affected adversely by this declared major disaster: Jackson and St. Louis Counties and the City of St. Louis for Individual Assistance.

All counties within the State of Missouri are eligible to apply for assistance under the Hazard Mitigation Grant Program.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 83.537, Community Disaster Loans; 83.538, Cora Brown Fund Program; 83.539, Crisis Counseling; 83.540, Disaster Legal Services Program; 83.541, Disaster Unemployment Assistance (DUA); 83.542, Fire Suppression Assistance; 83.543, Individual and Family Grant (IFG) Program; 83.544, Public Assistance Grants; 83.545, Disaster Housing

Program; 83.548, Hazard Mitigation Grant Program)

James L. Witt,

Director.

[FR Doc. 98–29795 Filed 11–5–98; 8:45 am]

BILLING CODE 6718–02–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1257–DR]

Texas; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Texas (FEMA–1257–DR), dated October 21, 1998, and related determinations.

EFFECTIVE DATE: October 21, 1998.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–3260.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated October 21, 1998, the President declared a major disaster under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), as follows:

I have determined that the damage in certain areas of the State of Texas, resulting from severe storms, flooding, and tornadoes beginning on October 17, 1998, and continuing is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Pub. L. 93–288, as amended ("the Stafford Act"). I, therefore, declare that such a major disaster exists in the State of Texas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance and Hazard Mitigation in the designated areas and any other forms of assistance under the Stafford Act you may deem appropriate. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Hazard Mitigation will be limited to 75 percent of the total eligible costs. If Public Assistance is later requested and warranted, Federal funds provided under that program will also be limited to 75 percent of the total eligible costs.

The time period prescribed for the implementation of section 310(a), Priority to Certain Applications for Public Facility and Public Housing Assistance, 42 U.S.C. 5153, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Robert E. Hendrix of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Texas to have been affected adversely by this declared major disaster:

Bastrop, Bexar, Burleson, Caldwell, Calhoun, Colorado, Comal, DeWitt, Fayette, Goliad, Gonzales, Guadalupe, Hays, Jackson, Karnes, Refugio, Travis, Victoria, Wharton, and Wilson Counties for Individual Assistance.

All counties within the State of Texas are eligible to apply for assistance under the Hazard Mitigation Grant Program.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 83.537, Community Disaster Loans; 83.538, Cora Brown Fund Program; 83.539, Crisis Counseling; 83.540, Disaster Legal Services Program; 83.541, Disaster Unemployment Assistance (DUA); 83.542, Fire Suppression Assistance; 83.543, Individual and Family Grant (IFG) Program; 83.544, Public Assistance Grants; 83.545, Disaster Housing Program; 83.548, Hazard Mitigation Grant Program)

James L. Witt,

Director.

BILLING CODE 6718–02–P

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Commission hereby gives notice of the filing of the following agreement(s) under the Shipping Act of 1984. Interested parties can review or obtain copies of agreements at the Washington, DC offices of the Commission, 800 North Capitol Street NW., Room 962. Interested parties may submit comments on an agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days of the date this notice appears in the **Federal Register**.

Agreement No.: 203–011305–005.

Title: United Alliance Agreement.

Parties: Hanjin Shipping Co., Ltd., DSR-Senator Lines GmbH, Cho Yang Shipping Company, Ltd., United Arab Shipping Co. (S.A.G.)

Synopsis: The proposed amendment consolidates into the Tricontinental Service Agreement the vessel-sharing authorities and trade areas of three other agreements involving two or more of the parties: (1) The AMA Agreement, FMC Agreement No. 232–011481; the Tricon/Hanjin Agreement, FMC Agreement No. 232–011519; and the Hanjin/Tricon Slot Charter Agreement, FMC Agreement No. 232–0011521. When this amendment becomes effective, the three other agreements will be cancelled, and the parties will operate under this single consolidated agreement as the United Alliance.

Agreement No.: 202–011576–002.

Title: South American Independent Lines Association.

Parties: Interocean Lines, Inc., Seaboard Marine, Ltd., Trinity Shipping Line, S.A.

Synopsis: The proposed amendment would add Panama to the geographic scope of the Agreement.

Dated: November 2, 1998.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

[Docket No. R–0974]

Enhancement of Federal Reserve Net Settlement Payment Services

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of service enhancement.

SUMMARY: The Board of Governors has approved enhancements to the net settlement services that the Federal Reserve Banks offer to financial institutions with Federal Reserve accounts that participate in multilateral settlements for private-sector clearing arrangements. The enhanced service combines and improves selected features from the Reserve Banks' existing net settlement services and may be used for either gross or net multilateral settlements. The service is fully automated and provides finality of settlement intraday on the settlement day to participants in clearing arrangements using the service. The service is intended to facilitate improvements in the operational efficiency of clearinghouses and reduce operational and settlement risk for participants.

EFFECTIVE DATE: March 29, 1999.

FOR FURTHER INFORMATION CONTACT: Paul W. Bettge, Assistant Director (202/452–3174); Myriam Y. Payne, Senior Financial Services Analyst (202/452–3219); for the hearing impaired *only*, Telecommunications Device for the Deaf (TDD), Diane Jenkins (202/452–3544).

SUPPLEMENTARY INFORMATION:

I. Background

The Reserve Banks offer net settlement services to depository institutions that participate in clearinghouses and clearing arrangements for checks, as well as Automated Clearing House (ACH), automated teller machine (ATM), point-of-sale (POS) networks, and other transactions. The arrangements are typically organized as groups of three or more participating depository institutions that exchange payment instructions, account for the value exchanged, and settle balances multilaterally. Typically, the agent [1] for the arrangement computes the net amounts owed to or by each participant [2] after netting all the transactions on a multilateral basis. The calculated net amounts represent either a net debit or a net credit for each participant. If the clearinghouse uses the Reserve Banks' net settlement services, the multilateral differences may be settled by transferring funds between the accounts of the settling participants on the books of the Reserve Banks.

Currently, the Reserve Banks offer two basic types of net settlement services. In the traditional model, the clearinghouse agent provides a settlement sheet (in either paper or electronic form) to a Reserve Bank on the settlement date. The Reserve Bank then posts a net debit or a net credit to the Federal Reserve account of each settling participant. Posted credits represent available funds for the purpose of intraday cash management and overnight reserve management.[3] The Reserve Banks, however, do not provide settlement finality until the business day after the settlement day. They reserve the right to reverse settlement debits and credits if a participant is unable to cover its settlement debit. This methodology creates the possibility of a settlement failure by a clearinghouse on the day following the settlement day. Because these dating conventions refer to banking days, reversals may occur on the third or even the fourth calendar day following settlement.

The traditional settlement sheet service offers clearinghouses a familiar and inexpensive mechanism to achieve settlement. This service, however, increases the duration of settlement risk to clearinghouse participants and their customers because settlement entries are provisional until the banking day after the settlement day. Another disadvantage is that some versions of the service lack the security controls needed to ensure the authenticity of settlement information provided to the Reserve Bank and to safeguard the integrity of the settlement. In addition, the design of the traditional service does not include automated risk-management controls for verifying the Federal Reserve account balances of participants with net debit positions. To help control credit risk, the Reserve Banks rely on the right to reverse net settlement entries on the banking day following the settlement day if a participant is not able to cover its net debit obligation. As a result, the traditional service does not provide effective tools for monitoring or controlling risk to the Reserve Banks at the point the risk is incurred.

In 1990, the Board approved an interdistrict net settlement service with settlement-day finality for a national ACH clearinghouse. In this type of service, individual participants with net debit positions send Fedwire funds transfers to a settlement account at a designated Reserve Bank. Once funds transfers have been received into the settlement account to cover all net debits, the clearing arrangement's agent sends Fedwire funds transfers from the settlement account to the accounts of participants in net credit positions. Under normal circumstances, this process is completed on the settlement day. Because the service uses Fedwire funds transfers, settlement payments are final and irrevocable on the settlement day.

The Fedwire-based net settlement service provides intraday finality on the settlement day, thereby reducing the duration of credit risk to clearinghouse participants. It also offers Reserve Banks significantly greater control over credit risk because of the use of Fedwire and the associated real-time verification of Federal Reserve account balances performed through the Account Balance Monitoring System (ABMS). Fedwire funds transfers initiated by clearinghouse participants that would cause overdrafts beyond established parameters can be rejected. These capabilities permit Reserve Banks to perform automated intraday risk management on the settlement day, when settlement information becomes available and before settlement entries are posted to Federal Reserve accounts.

Relying on the initiation of individual Fedwire funds transfers to conduct multilateral settlement, however, increases the logistical complexity of settlement for certain clearing arrangements. For example, a settlement for a clearinghouse with a large number of participants could involve coordinating hundreds of individual Fedwire funds transfers that have to be sent and received within narrow time frames in order to complete scheduled settlements.

II. The June 1997 Proposal

In June 1997, the Board requested comments on a proposal that Reserve Banks offer an enhanced net settlement service to depository institutions that participate in clearinghouse arrangements (62 FR 32118, June 12, 1997). The proposed service would combine and improve selected features from the Reserve Bank's existing net settlement services. Under the proposal, the Reserve Banks would offer a fully automated settlement service with finality of settlement intraday on the settlement day. The agent for the clearinghouse would submit an electronic file containing the settlement information for each settling participant. The enhanced service would accept and process settlement files during a predefined settlement period. The service would include edits and controls to ensure the authenticity and validity of the settlement file. Once all initial edits have been completed, the service would check the account balance of settling participants that fall within established risk parameters in the ABMS and that have debit settlement positions. If the debit participants have available account balances [4] sufficient to cover their settlement obligations, their Federal Reserve accounts would be debited and funds would be transferred to a settlement account held on the books of a designated Reserve Bank. The transfer of funds from the account of a participant with a debit position would be treated as a final and irrevocable transaction. When all funds have been transferred from the account of the debit participants to the settlement account, the enhanced service would transfer final funds out of the settlement account and credit the Federal Reserve account

[1] The agent is the party designated by the participants to act on behalf of the clearinghouse.

[2] A settling participant in a clearinghouse that uses a Reserve Bank net settlement service is a financial institution with a Federal Reserve account that is debited or credited to transfer the funds needed to complete the settlement. In contrast, non-settling participants typically settle through a settling participant.

[3] The posting time for net settlement entries is chosen by each clearinghouse within the requirements of the Board's *Daylight Overdraft Transaction Posting Rules.*

[4] The available account balance is defined as the institution's Federal Reserve account balance plus any available intraday credit.

of each participant with a credit position.

If a participant with a debit position did not have an available account balance sufficient to cover its settlement obligation, the Federal Reserve would notify the participant and the agent. The agent would then be expected to take action as determined by the rules of the clearing organization. For example, the organization could choose to fund the settlement account to complete the settlement by drawing on a preestablished line of credit. Alternatively, the agent might request that the Reserve Bank cancel the settlement and return all funds in the settlement account to the participants with debit positions. After a defined period, if the organization had not been able to complete or cancel the settlement, the Reserve Bank would return all the funds in the settlement account to the participants with debit positions. The terms of the enhanced service would permit the agent to submit a revised settlement file in the event of a settlement failure.

III. Enhanced Settlement Service

The Board is approving an enhanced settlement service that retains the essential characteristics described in the proposal issued for comment in 1997. First, by providing settlement-day finality, the enhanced service will reduce the duration of credit risk to private-sector clearinghouse participants relative to the Federal Reserve's traditional net settlement service. Second, the enhanced service will improve operational efficiency and reduce operational risk for clearinghouse participants by offering a settlement mechanism that does not require the origination of individual Fedwire funds transfers to achieve settlement-day finality. In addition, the enhanced service enables the Reserve Banks to manage and limit risk by incorporating risk controls that are as robust as those used currently in the Fedwire-based net settlement service.

Service Availability and Features—The enhanced service will be available to financial institutions with Federal Reserve accounts that participate in multilateral settlements for private-sector clearing arrangements. The enhanced service will provide clearing arrangements with the capability to settle the obligations that result from their payments exchange on either a net or gross basis. In addition, the service approved by the Board incorporates the following features:

1. The Federal Reserve will provide settlement services during a business day beginning at 8:30 a.m. Eastern Time (ET) and concluding before 6:00 p.m. ET (the settlement window). A file-submission deadline will be established approximately thirty to sixty minutes before the end of the settlement window (the file-submission window) to ensure that all files received by the file-submission window can be processed before the close of the settlement window. The specific hours of operation of the service, however, will be reviewed periodically and may be modified to reflect changes in the operating hours of the Fedwire system or the business needs of settlement participants.

2. Agents will submit settlement files electronically during the predefined file-submission window. The initial release of the application software will support file submission using a standard Fedline terminal or computer interface bulk data connection. Preformatted Fedline screens will also be provided for clearinghouse arrangements that wish to key in the settlement information. In addition, internet browser capability for file submission and access to the service is being considered for a future release.

3. Agents may transmit any number of settlement files per settlement day. The service will process the settlement files for a particular settlement arrangement one at a time in the order they are received. Files received after the close of the settlement window will be held in a queue to be processed in the order received at the opening of the following day's settlement window, as long as the settlement date on the file corresponds with the following settlement date.

4. Controls and edits in the application will ensure, among other things, that the file has been transmitted by an agent authorized by the participants in the clearing arrangement, that the file has been transmitted from an authorized terminal, that the file contains settlement entries from authorized participants only, and that the sum of all the settlement debits equals the sum of all the settlement credits.

5. Settlement debit entries will be passed to the ABMS for posting to each settling participant's Federal Reserve account. The ABMS will check the available account balance of all participants that fall within established risk parameters to determine if the settlement debits can be covered. If the available account balance is sufficient to cover the participant's settlement debit, the participant's account will be debited and an offsetting credit will be posted immediately to a settlement account held on the books of a Reserve Bank. The debit to the Federal Reserve account will be a final and irrevocable transaction. When all settlement debits have been covered and the arrangement's settlement account has been fully funded, credit settlement balances will be passed to the ABMS for posting to the relevant participants' Federal Reserve accounts. The credit entries will also be final and irrevocable transactions.

The ABMS account balance report available to institutions via Fedline will include a new line that will show the net settlement debit or credit entries that have been posted to the participants' Federal Reserve accounts. For purposes of measuring the daylight overdraft positions of participants, the net debit and net credit entries will be posted to participants' Federal Reserve accounts on a flow basis, as they are processed.

Exception Processing—If a settlement cannot be completed because a participant with a debit position is unable to cover its settlement obligation, the Federal Reserve will notify the participant and the agent for the clearing arrangement. The participant with the insufficient balance will be notified immediately. The agent will be notified on either an immediate or a delayed basis, depending on the notification option that the settlement arrangement has selected. If the clearinghouse chooses immediate notification, the Federal Reserve will automatically transmit a notification of the failed debit to the agent. If the deferred option is chosen, the Federal Reserve will defer notifying the agent for a brief interval after the participant's debit is rejected. This brief interval will be defined by the Federal Reserve, initially the interval will be approximately thirty to forty-five minutes long. The interval is intended to allow the participant some time to provide funding before the agent is notified. The length of the interval may be reviewed periodically based on perceived business needs. If the participant is unable to provide sufficient funds in its account before the end of the deferral interval, the Federal Reserve will automatically send a notification to the agent. When notified of the failed debit, the agent may choose to initiate actions to complete the settlement as determined by the rules of the clearing arrangement. Pending action by the agent, the settlement will remain open and the collected funds will remain in the settlement account. The enhanced service will provide settlement agents with the capability to:

1. Instruct the Federal Reserve to retry the failed debit. That is, the agent would notify Reserve Bank staff that the participant in question has received the funds needed to fulfill its settlement obligation. The Federal Reserve would then retry debiting the participant's account and crediting the settlement account once more.

2. Fund the settlement account from an alternative source, such as a preestablished line of credit.

3. Instruct the Federal Reserve to cancel the settlement and allow the agent to submit a revised or "recast" settlement file that excludes the transactions of the participant in question and provides recalculated settlement positions for the remaining participants.

4. Instruct the Federal Reserve to cancel the settlement. If the agent selects this option, the funds in the settlement account will be returned to the Federal Reserve accounts of the debit participants that had covered their settlement obligations.

If processing of a settlement file has not been completed by the close of the settlement window because a participant is unable to cover its settlement obligation, the settlement will be cancelled by the Federal Reserve and all funds in the settlement account will be returned to the relevant participants. Extensions of the settlement window might be granted to accommodate operational disruptions or temporary funding problems. These occurrences, however, are expected to be rare and not to extend beyond the operating hours of the Fedwire funds transfer service.

Implementation and Conversion Schedule—Early in 1999, the Reserve Banks will conduct a pre-implementation pilot of the enhanced settlement service with two or three settlement arrangements. The pilot will be conducted in a test environment designed to simulate the production environment. The pilot will provide an opportunity for both Reserve Banks and participating arrangements to test the enhanced service and to refine operating procedures prior to implementation. The Reserve Banks will begin phased implementation of the enhanced settlement service on March 29, 1999.

The current Fedwire-based net settlement service used by a few national clearinghouses will continue to be offered in conjunction with the enhanced settlement service as long as a reasonable level of demand for the Fedwire-based service exists. The traditional settlement sheet service, however, will be phased out gradually. Clearinghouses and settlement arrangements that currently use the traditional net settlement service will be able to work with the Federal Reserve to develop a migration plan that is not in conflict with other critical efforts that the clearinghouses and participants may have under way. Specifically, because conversion to the enhanced settlement service may require clearinghouses to implement internal software changes, it may not be possible or desirable to address the required changes until after year 2000 system efforts have been completed. The Board expects that clearinghouses and settlement arrangements that currently use the traditional service will be able to convert to the enhanced settlement service by the end of 2001. The Board will consider extending the conversion deadline on a case-by-case basis for systems that can demonstrate significant resource demands due to other critical efforts.

Service Pricing—The planned price structure for the enhanced service has been designed to recognize both the fixed costs of providing a settlement service and the variable costs associated with the number of settlement transactions processed. This will be accomplished by assessing a charge for each settlement file transmitted by an arrangement and a charge for each settlement entry in the file. The actual price for the service will be announced in the fourth quarter of 1998 as part of the Federal Reserve's 1999 fee schedule.

IV. Summary of Comments

The Board received twenty public comment letters on its proposed enhanced settlement service.[5] The commenters included nine clearinghouse organizations and associations, six commercial banking organizations, four trade associations, and one retail payment network.

General Comments—Most commenters supported the proposed enhancements to the Federal Reserve's net settlement services. Over half of the commenters that supported the proposed service requested that the Board provide a pricing structure for the proposed service or specify the risk management policy to which institutions would be required to adhere in order to use this service. One commenter proposed that the Board convene a meeting of clearing arrangement operators to review these issues. On December 15, 1997, Federal Reserve staff held a meeting with private-sector organizations in order to answer questions and provide additional details regarding the enhanced settlement service. All organizations that submitted comment letters and other interested organizations were invited to the meeting.

A few commenters expressed concerns regarding the schedule for implementation of the proposed service. One commenter stated that if the Federal Reserve were going to require clearing and settlement arrangements to use the new service, then such a requirement should not be imposed on participants until after the year 2000. In light of the resources devoted to year 2000 issues, the Board will not require clearing and settlement arrangements to use the new service before the year 2000.

Issues Discussed at the December 15, 1997 Meeting—At the December meeting, Federal Reserve staff gave an overview of the proposed risk management policy that would apply to certain multilateral settlement systems regardless of whether they use Federal Reserve settlement services. A final policy was adopted by the Board in its *Policy Statement on Privately Operated Multilateral Settlement Systems* (63 FR 34888, June 26, 1998) and will become effective on January 4, 1999. In adopting that policy statement, the Board also emphasized that compliance with the policy does not require use of the Federal Reserve's enhanced settlement service. The planned pricing structure for the enhanced settlement service was also discussed with the private-sector representatives.

The Federal Reserve staff also briefly described pilot testing and the likely transition to the enhanced settlement service. As noted above, a pre-production pilot of the service will be conducted early in 1999. Phased implementation of the service will begin by the end of the first quarter of 1999.

One private-sector representative expressed concern regarding the proposed method of posting debits and credits to participants' Federal Reserve accounts on a flow basis, as they are processed, for purposes of measuring daylight overdraft positions. The representative felt that such a procedure would cause inequities among participants because participants would be debited or credited based on where the entry was located in the settlement file. The Board believes that, in most instances, debits and credits will be posted almost simultaneously, as soon as the settlement entries are processed. Delays in the posting of all debits and credits in a settlement file may occur if a participant is unable to cover its settlement obligation. These situations and the related consequences should be addressed in the clearinghouse rules.

[5] This total does not include comment letters from Federal Reserve Banks.

A few representatives wanted to know whether daylight overdrafts could be used to support a debit position by a settling participant. One of these representatives also requested clarification on how these debits and credits would affect a participant's daylight overdraft position. In general, a settling participant will normally be able to use its available account balance, which includes any authorized intraday credit, to fund its debit position. In addition, settlement debits and credits will be posted to the account of participants on a flow basis, as they occur.

Specific Issues on which the Board Sought Comment—The Board also sought comment on a number of other issues discussed below:

A. Continuation of Traditional Settlement Sheet Service With Next-Day Finality

Nine of the thirteen respondents to this question believed that the Federal Reserve should continue to offer its existing net settlement service with next-day finality. One commenter felt that the time and equipment investment necessary for the proposed service might prove to be a financial burden for small-volume clearinghouses. Two commenters indicated that some clearing arrangements might prefer the simplicity and low cost of the existing next-day finality service. Three commenters felt that the Federal Reserve should not continue to offer its existing net settlement service with next-day finality if the proposed service were offered. One of the commenters noted that "there are no reasons, operational or otherwise, to allow ongoing and unnecessary temporal risk in the payments system as a result of next-day finality."

The Board believes that the benefits to clearinghouse participants and the Federal Reserve provided by the enhanced service are significant. The enhanced service not only offers increased efficiency and security, but also significantly reduces settlement risk. The Board believes that the benefits of providing a more efficient and secure service that incorporates better risk controls outweigh the potential cost increase to the users of the traditional Federal Reserve net settlement service. In addition, it would not be cost effective to the Reserve Banks to continue to provide and support the current traditional settlement sheet service in addition to the enhanced service. As a result, the Board intends to phase out the traditional settlement sheet service with next-day finality. To be sensitive to the commenters' concerns regarding potential costs and resources that may have to be invested to convert to the enhanced service, the Board is adopting a flexible migration plan. Clearinghouses and their participants will have until the end of 2001 to convert to the enhanced service.

B. Continuation of the Fedwire-based Service

Nine of the fourteen commenters believed that the Federal Reserve should continue to offer the Fedwire-based net settlement service with same-day finality. One commenter felt that the Fedwire-based service provides greater opportunities for the settlement agent to manage the settlement actively and reduce the risk of a settlement failure.

Two commenters felt that the Federal Reserve should not continue to offer its Fedwire-based net settlement service because there would be no demand for this service with the introduction of the enhanced service. The commenters viewed the reduction in operational complexity from the Fedwire-based service as the justification for eliminating it.

The Board will continue to offer the Fedwire-based service as long as a reasonable level of demand for the service exists. The Fedwire-based service has robust risk management features. Because finality is granted when the settlement entries are posted via the use of Fedwire funds transfers, the Fedwire-based service also reduces settlement risk to private-sector participants.

C. Length of Settlement Window and Provision of a Warehousing Mechanism

There was no consensus among respondents as to whether the period between 8:30 a.m. and 4:00 p.m. ET would be adequate to support current and future needs of potential users of the service. Two commenters expressed a preference for the service to begin processing settlement files during the very early morning hours, with 12:30 a.m. suggested by one of the commenters. Two other commenters felt that, at a minimum, a 6:00 p.m. ET closing deadline should be implemented.

The Board recognizes that the Fedwire funds transfer service is the primary alternative for orderly and efficient settlement of bilateral obligations in case a settlement arrangement is unable to complete its multilateral settlement through the enhanced service. As a result, the Board has determined that settlement file processing should generally be completed before 6:00 p.m. to allow at least a thirty minute period before the standard close of the Fedwire funds transfer system. To ensure that processing of the settlement files is completed by the close of the settlement window, the Federal Reserve will establish a cut-off time for submission of settlement files that is approximately thirty to sixty minutes in advance of the settlement window deadline. Extensions of the settlement deadlines may be permitted under extenuating circumstances. Experience gained during the pilot period will be used to review and, if necessary, redefine settlement deadlines. At this time, the Board does not believe that a compelling business need has been expressed to start processing settlement files before 8:30 a.m. ET. This issue may be reviewed as experience is gained with the operation of the enhanced service.

With respect to the warehousing option, seven of the eleven commenters felt that this feature should be offered. One commenter claimed that settlement files should be received in a "flow processing mode" twenty-four hours a day, seven days a week. Four commenters did not support a warehousing option because they thought such an option would not be useful or thought warehousing should be handled by the clearing association's settlement agent rather than the Federal Reserve.

The enhanced settlement service will queue settlement files received after the close of the settlement window for processing at the opening of the following day's settlement window, provided the settlement date on the file corresponds with the following business date. More sophisticated warehousing capabilities will not be offered in the initial release due to cost and time constraints.

D. Submission of Settlement Data Through an Electronic Mechanism

All but one of the fifteen commenters that responded to this question felt it would be reasonable to require clearing arrangements or settlement agents to use an electronic mechanism to submit settlement data. The commenters felt that such an electronic mechanism would ensure that data are sent and received by authorized persons and not tampered with during transmission. One commenter, while agreeing that electronic devices should be used, recommended that the Federal Reserve be able to receive valid settlement data and enter the data manually into the settlement system in emergencies. One commenter did not believe that it would be reasonable to require the electronic submission of data and encouraged the Federal Reserve to offer a manual procedure for submitting data.

The Board shares the concerns of the commenters and will provide an electronic mechanism for settlement data transmission to increase the efficiency and security of the settlement process. Settlement files may be transmitted via a standard Fedline terminal or a computer interface bulk data connection. Preformatted Fedline screens for settlement data input will also be provided.

Clearing and settlement systems are encouraged to have contingency arrangements to reduce the risk of a failed settlement resulting from operational problems. The Reserve Banks will be able to accept and process non-electronic files on behalf of a settlement agent in situations in which an arrangement is experiencing severe operational disruptions and is unable to access the enhanced service directly or through its contingency channels.

E. Providing Monitoring Capabilities to the Agent

All but one of the fourteen commenters that responded to this question felt it would be appropriate to offer a monitoring capability that would allow the settlement agent to determine whether settlement entries for individual participants had been successfully posted. One commenter felt that this service should be offered to settlement agents because they represent their member financial institutions as unbiased facilitators in all aspects of the settlement process. Another commenter believed that the settlement agent must have access to information that will allow it to determine whether individual participants have fulfilled their settlement obligations.

The enhanced service will provide the agent with the capability to view the settlement account balance by using the ABMS. Automated inquiries for monitoring the progress and the status of a settlement file by the agent will be provided in a later release of the application.

F. Value-added Services That Provide Non-settling Participant Information

Eight of the ten respondents to this question did not believe that the Federal Reserve should offer a value-added service that would provide non-settling participant information. The general consensus was that such services are more appropriate for the settlement agent to offer to its participants. One commenter stated that it does not see a need for the Federal Reserve to provide these services, as the settlement agent would have this information in order to calculate the settling participant's aggregate position. The settlement agent should, therefore, be able to communicate this information to the settling participants and any non-settling participants. Two commenters felt that the value-added services should be offered by the Federal Reserve because such information would be of assistance to settling and non-settling participants in analyzing their daily obligations.

The Board agrees that, in most cases, the agent can provide the non-settling participant information more efficiently. As a result, the enhanced service will not include these value-added features in the near term.

G. Provision of a Retry Feature

The fourteen respondents that addressed this issue felt that a retry feature should be included in the proposed net settlement service. Eight of these respondents believed that the service should include a retry feature that automatically attempts to debit the account of a participant following a predefined interval after the participant fails to cover its debit obligation. The respondents also requested a retry feature that could be controlled by the agent. Four respondents felt that only an automatic retry feature should be available, whereas two others felt that only a retry feature that can be controlled by the agent should be offered. A proponent of the controlled retry feature claimed that such a system would provide the greatest flexibility and maximum operational effectiveness because a retry would be attempted only when the settlement agent felt that the settlement was likely to succeed.

A retry feature will be available in the enhanced settlement service. In cases where an arrangement has selected the deferred notification option, the Federal Reserve will retry the failed debit after a predefined interval before the Federal Reserve notifies the agent that a participant is unable to cover the debit. Once the agent has been notified, it will be able to instruct the Federal Reserve to retry a debit entry to a participant's account. Further automation of the retry function may be included in a future release of the application software.

H. Length of the Retry Window and Maximum Number of Retries

There was no consensus among the thirteen respondents that commented on this question as to how long the retry window should be. Four commenters suggested a period of anywhere from one hour up to three hours. One commenter felt that the retry capability should have no time limits other than being restricted to the operating hours of the net settlement service. Two others believed that the retry window time limit should be left to the discretion of the clearing arrangements.

In the event that a settlement account cannot be fully funded because the initial attempt to post a settlement debit to a participant's account has failed, the Federal Reserve may retry the debit after a short predefined interval. The interval is likely to be approximately thirty to forty-five minutes after the failed debit occurred. If the debit continues to remain unfunded, the agent will automatically be notified. A relatively short interval to retry a debit will give the agent as much time as possible to take alternative action to avoid unnecessary settlement failures if the retry fails. The length of the interval will be reviewed periodically based on perceived business needs. Further, retry instructions from settlement agents will be honored at any time during which the settlement service is open.

There was no consensus among the respondents as to the maximum number of retries that should be allowed. Five respondents stated that there should be a limited number of attempts but did not specify a number. Two commenters felt that a maximum of two retries should be made. Two commenters believed that the maximum number of retries allowed should be decided by the clearing arrangements.

If the clearing arrangement chooses the delayed notification option, the Federal Reserve will automatically retry the debit once following a short interval after the initial debit failed. The Federal Reserve will review periodically after the initial release whether, for clearing arrangements choosing the delayed notification option, the service should provide more than one automated retry following an initial failure to post a settlement debit. The Board has imposed no formal limit on the number of times that a settlement agent can request that a failed debit be retried.

I. Legal Status of the Debit and Credit Settlement Entries

Of the eleven commenters that responded to this question, seven believed that the debit and credit entries to the Federal Reserve accounts of the settling participants should not be considered funds transfers under Regulation J (12 CFR part 210) and other laws applicable to funds transfers. One respondent stated that the proposed service does not use Fedwire funds transfers and thus cannot rely on the same legal basis. Many suggested that the Federal Reserve amend Regulation J

to address the status of the entries posted by the enhanced settlement service. One commenter suggested that debit and credit entries to the reserve accounts of the settling participants be considered funds transfers under Regulation J and pertinent sections of Article 4A of the Uniform Commercial Code. Another felt that although Regulation J did not apply to the debit and credit entries of the proposed service, Article 4A did apply.

The Board has not amended Regulation J to cover explicitly debit and credit entries associated with the enhanced settlement service. Although certain provisions of Article 4A may apply to the debit and credit entries, the extent to which these entries would be considered "payment orders" under Article 4A is not clear. Therefore, the Reserve Bank operating circulars will establish the rules governing the debit and credit entries to the Federal Reserve accounts of the settling participants, including when those debits and credits will become final.

J. Capability to Transfer Funds Into the Settlement Account

All but one of the twelve commenters that responded to this question indicated that it would be beneficial for the service to provide the capability for a participant or another institution to transfer additional funds into the settlement account in order to complete the settlement. One commenter stated that such a feature could facilitate quick resolution of problems and prevent temporary problems from becoming permanent defaults.

Only one commenter thought that the Federal Reserve should not offer the capability for another participant or depository institution to transfer funds into the settlement account to complete the settlement process. This commenter stated that a failed debit for a settling participant should be resolved by that participant and that the settling participants can set up bilateral funding arrangements if they so choose.

The enhanced settlement service will allow another settling participant or depository institution to transfer additional funds into the settlement account in order to complete the settlement. The agent or another authorized depository institution will be able to transfer funds into the settlement account to complete settlement in accordance with the clearinghouse association rules.

K. Clearing Arrangements That Should be Eligible for the Enhanced Settlement Service

Seven out of the twelve respondents that addressed this issue felt that the Federal Reserve should offer the proposed service to any type of clearing arrangement. Three of these commenters wanted to clarify that direct settlement participants would have to be entities that are eligible for Federal Reserve accounts. Another commenter stated that the proposed service should "accommodate any type of clearing arrangement" because of the rapidly changing payment systems environment and the increasing need for new services in the industry.

Two commenters believed that the proposed service should be available only to small-dollar clearing arrangements. One of these respondents felt that large-dollar clearing arrangements, such as CHIPS, should not have access to the new service because the settlement agents should have a very active role in managing the settlements for large-dollar systems, and the Fedwire-based settlement is best suited for these purposes.

The Board is confident that the enhanced service offers an efficient and secure settlement service with strong risk management features. As a result, the Federal Reserve will make the enhanced settlement service available to financial institutions with Federal Reserve accounts that participate in multilateral settlements for private-sector clearing arrangements.

V. Competitive Impact Analysis

The Board has established procedures for assessing the competitive impact of rule or policy changes that have a substantial impact on payments system participants.[6] Under these procedures, the Board will assess whether a change would have a direct and material adverse effect on the ability of other service providers to compete effectively with the Federal Reserve in providing similar services due to differing legal powers or constraints or due to a dominant market position of the Federal Reserve deriving from such differences. If no reasonable modifications would mitigate the adverse competitive effects, the Board will determine whether the expected benefits are significant enough to proceed with the change despite the adverse effects.

The Board's proposed enhancements to the net settlement service are intended to improve the clearance and settlement process for payments by increasing the efficiency of the services currently offered by the Federal Reserve and by reducing the uncertainty and disruption to private-sector participants from the potential reversal of settlement on the following business day. From this standpoint, the enhanced settlement service should help reduce risk as well as operational burden for private-sector settlement arrangements. In addition, risk controls that would be developed in order to provide finality of settlements to clearinghouse participants on the settlement date would help protect the Federal Reserve from the risk of loss. As a result, the Board believes that the proposed enhancements to the Federal Reserve's net settlement services would enable depository institutions to continue to take advantage of the benefits of netting, while increasing operational efficiency and reducing credit risk to the private sector.

By order of the Board of Governors of the Federal Reserve System, November 2, 1998.

Jennifer J. Johnson,

Secretary of the Board.

[FR Doc. 98–29709 Filed 11–5–98; 8:45 am]

BILLING CODE 6210–01–P

[6] These procedures are described in the Board's policy statement "The Federal Reserve in the Payments System," as revised March 1990. (55 FR 11648, March 29, 1990).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Agency for Toxic Substances and Disease Registry; Senior Executive Service; Performance Review Board Members

AGENCY: Centers for Disease Control and Prevention (CDC), and Agency for Toxic Substances and Disease Registry (ATSDR), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: Title 5, U.S. Code, Section 4314(c)(4) of the Civil Service Reform Act of 1978, Public Law 95–454, requires that appointment of Performance Review Board members be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Connie Clayton, Human Resources Management Office, Office of Program Support, Centers for Disease Control and Prevention, 4770 Buford Highway, Mailstop K–07, Atlanta, Georgia 30341–3724, telephone 770–488–1874.

SUPPLEMENTARY INFORMATION: The following persons will serve on the Performance Review Board which oversees the evaluation of performance appraisals of Senior Executive Service members of the Department of Health and Human Services in the Centers for Disease Control and Prevention, and the Agency for Toxic Substances and Disease Registry:

Claire V. Broome, M.D., Chairperson
Stephen B. Blount, M.D., M.P.H.
James M. Hughes, M.D.
Arthur C. Jackson
Richard J. Jackson, M.D., M.P.H.
James S. Marks, M.D., M.P.H.
Peter J. McCumiskey
Linda Rosenstock, M.D., M.P.H.
Stephen B. Thacker, M.D.

Dated: November 3, 1998.

Claire V. Broome,

Deputy Director, Centers for Disease Control and Prevention (CDC) and Deputy Administrator, Agency for Toxic Substances and Disease Registry (ATSDR).

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Seleda Perryman, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

1. Proposed Project. 2000 National Health Interview Survey, Basic Module (0920–0214)—Revision—The National Center for Health Statistics. The annual National Health Interview Survey (NHIS) is a basic source of general statistics on the health of the U.S. population. Due to the integration of health surveys in the Department of Health and Human Services, the NHIS also has become the sampling frame and first stage of data collection for other major surveys, including the Medical Expenditure Panel Survey, the National Survey of Family Growth, and the National Health and Nutrition Examination Survey. By linking to the NHIS, the analysis potential of these surveys increases. The NHIS has long been used by government, university, and private researchers to evaluate both general health and specific issues, such as cancer, AIDS, and childhood immunizations. Journalists use its data to inform the general public. It will continue to be a leading source of data for the Congressionally-mandated "Health US" and related publications, as well as the single most important source of statistics to track progress toward the National Health Promotion and Disease Prevention Objectives, "Healthy People 2000."

Because of survey integration and changes in the health and health care of the U.S. population, demands on the NHIS have changed and increased, leading to a major redesign of the annual core questionnaire, or Basic Module, and a redesign of the data collection system from paper questionnaires to computer assisted personal interviews (CAPI). Those redesigned elements were implemented in 1997 and are expected to be in the field until 2006. Ad hoc Topical Modules on various health issues are provided for in the redesigned NHIS. This clearance is for the fourth full year of data collection, planned for January-December 2000. The Basic Module on CAPI will result in publication of new national estimates of health statistics, release of public use micro data files, and a sampling frame for other integrated surveys. It will also include a "Topical Module" (or supplement) on Cancer. The cancer module will repeat similar surveys conducted in 1987 and 1992, and will help track many of the Healthy People 2000 Objectives for cancer.

At a rate of $15 per hour, the total cost to respondents is estimated at $1,062,900 for the whole survey.

Respondents	Number of Respondents	Number of Responses/Respondent	Avg. Burden/per Response (in hrs.)	Total Burden (in hrs.)
Family	42,000	1	0.5	21,000
Sample adult	42,000	1	1.08	45,360
Sample child	18,000	1	0.25	4,500
Total				70,860

2. Validation of Self-reported Health Outcomes from the Health Assessment of Persian Gulf War Veterans From Iowa: Follow-up on Asthma—(0920–0425)—Extension—The National Center for Environmental Health—The purpose of this study is to collect additional data to validate health outcomes reported by participants in the Health Assessment of Persian Gulf War Veterans from Iowa. The original data collection consisted of a telephone survey of 3,695 military personnel who served during the time of the Persian Gulf War and listed Iowa as their home of residence. Data will be collected from subjects who participated in the telephone survey to validate the self-report of asthma. Lung function assessment, tests of airways hyperactivity, and standard respiratory health questionnaires will be administered. Review of medical records, standard physical examination, and laboratory evaluation will be conducted to validate multi systemic conditions, including chronic fatigue syndrome and fibromyalgia. The total cost to the respondents is $0.

Respondents	Number of respondents	Number of responses/respondent	Avg. burden per response (in hrs)	Total burden (in hrs.)
PGW Exposed and Non-PGW Veterans self-reporting asthma. Questionnaire (ATS and Adult Respiratory Health); Pulmonary Function Tests (spirometry, DLCO, lung volumes); Histamine Challenge.	50	1	2.25	112.5
Normal Controls. (PGW/Non-PGW Vets denying symptoms of asthma). Questionnaire (ATS and Adult Respiratory Health); Pulmonary Function Tests (spirometry, DLCO, lung volumes); Histamine Challenge	50	1	2.25	112.5
Total				225

Dated: October 29, 1998.

Kathy Cahill,

Associate Director for Policy Planning and Evaluation, Centers for Disease Control and Prevention.

Agency Recordkeeping/Reporting Requirements Under Emergency Review by the Office of Management and Budget (OMB)

Title: Information Collection for the Welfare to Work Data Collection Requirements.

OMB No.: New.

Description: The Balanced Budget Act of 1997, Pub. L. 105–33, amended title IV–A of the Social Security Act (the Act) to add the Welfare-to-Work (WtW) program. Section 411 of the Act specifies the WtW participant data collection and reporting requirements that must be submitted by those States and Indian tribes administering a WtW program. This information will be used in the evaluation that Section 413(j) of the Act requires DHHS to report to Congress in January 1999 and in January 2001.

Respondents: State, Local or Tribal Govt.

Annual Burden Estimates

Instrument	Number of Respondents	Number of Responses per Respondent	Average Burden Hours per Response	Total Burden Hours
WtW	61	4	164	40,016
ACF–198&343	61	4	248	60,512
Estimated Total Annual Burden Hours				100,528

Additional Information

ACF is requesting that OMB grant a 180 day approval for this information collection under procedures for emergency processing by November 13, 1998. A copy of this information collection, with applicable supporting documentation, may be obtained by calling the Administration for Children and Families, Reports Clearance Officer, Bob Sargis at (202) 690–7275.

Comments and questions about the information collection described above should be directed to the following address by November 13, 1998: Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for ACF, Office of Management and Budget, Paperwork Reduction Project, 725 17th Street, NW., Washington, DC 20503, (202) 395–7316.

Dated: November 2, 1998.

Bob Sargis,

Reports Clearance Officer.

Food and Drug Administration

[Docket No. 98D–0924]

Medical Devices Containing Materials Derived From Animal Sources (Except for In Vitro Diagnostic Devices), Guidance for FDA Reviewers and Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the guidance entitled "Medical Devices Containing Materials Derived From Animal Sources (Except for In Vitro Diagnostic Devices), Guidance for FDA Reviewers and Industry." This guidance is intended to provide recommendations for information that is to be included in premarket submissions—investigational device exemption (IDE), premarket approval application (PMA), and 510(k) submisions for medical devices that either contain or are exposed to animal-derived materials during manufacturing.

DATES: Written comments concerning this guidance must be received by February 4, 1999. Comments submitted after February 4, 1999, must be submitted to one of the contact persons.

ADDRESSES: Submit written requests for single copies of the guidance document entitled "Medical Devices Containing Materials Derived From Animal Sources (Except for In Vitro Diagnostic Devices), Guidance for FDA Reviewers and Industry" to the Division of Small Manufacturers Assistance (HFZ–220), Center for Devices and Radiological Health (CDRH), Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send two self-addressed adhesive labels to assist that office in processing your request, or fax your request to 301–443–8818. Written comments concerning this guidance must be submitted to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. Comments should be identified with the docket number found in brackets in the heading of this document. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance.

FOR FURTHER INFORMATION CONTACT: Karen F. Warburton, Office of Device Evaluation (HFZ–460), or Kiki B. Hellman, Office of Science and Technology (HFZ–113), Center for Devices and Radiological Health, Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–443–7158.

SUPPLEMENTARY INFORMATION:

I. Background

FDA believes that an animal disease such as bovine spongiform encephalopathy (BSE) is a concern in the manufacture of FDA-regulated products intended for administration to humans. In 1993 and, more recently, on May 6, 1996, FDA issued letters to manufacturers to request that bovine-derived materials from cattle which have resided in or originated from countries where BSE has been diagnosed (as designated by the U.S. Department of Agriculture) not be used in the manufacture of FDA-regulated products. To identify medical devices which either contain or are exposed to animal-derived materials during manufacturing, CDRH developed the biomaterials database that contains an inventory of these devices, including type of material, animal species and county of origin, and target organ or tissue for each device. Originally proposed in response to the BSE issue, the database was expanded to include all animal-derived products (including human) in order to respond to other animal-based sourcing concerns that may arise in the future.

II. Significance of Guidance

This guidance document represents the agency's current thinking on medical devices containing materials derived from animal sources. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the applicable statute, regulations, or both.

The agency has adopted good guidance practices (GGP's) which set forth the agency's policies and procedures for the development, issuance, and use of guidance documents (62 FR 8961, February 27, 1997). This guidance document is issued as a Level 1 guidance consistent with GGP's. The agency is accepting public comments, but it is implementing this guidance immediately because of public health concerns related to the use of bovine-derived materials in medical devices and the agency's previous communication to manufacturers on this subject.

III. Electronic Access

In order to receive "Medical Devices Containing Materials Derived From Animal Sources (Except for In Vitro Diagnostic Devices), Guidance for FDA Reviewers and Industry" via your fax machine, call the CDRH Facts–On–Demand system at 800–899–0381 or 301–827–0111 from a touch-tone telephone. At the first voice prompt press 1 to access DSMA Facts, at second voice prompt press 2, and then enter the document number (2206) followed by the pound sign (#). Then follow the remaining voice prompts to complete your request.

Persons interested in obtaining a copy of the guidance may also do so using the World Wide Web (WWW). CDRH maintains an entry on the WWW for easy access to information including text, graphics, and files that may be downloaded to a personal computer with access to the Web. Updated on a regular basis, the CDRH home page includes "Medical Devices Containing Materials Derived From Animal Sources (Except In Vitro Diagnostic Devices), Guidance for FDA Reviewers and Industry," device safety alerts, **Federal Register** reprints, information on premarket submissions (including lists of approved applications and manufacturers' addresses), small manufacturers' assistance, information on video conferencing and electronic submissions, mammography matters, and other device-oriented information. The CDRH home page may be accessed at http://www.fda.gov/cdrh. "Medical Devices Containing Materials Derived From Animal Sources (Except for In Vitro Diagnostic Devices), Guidance for FDA Reviewers and Industry" will be available at http://www.fda.gov/cdrh/ode/guid.html.

IV. Comments

Interested persons may, on or before February 4, 1999, submit to Dockets Management Branch (address above) written comments regarding this immediately in effect guidance. At any time after 90 days from the date of publication in the **Federal Register**, submit to the contact person (address above) written comments regarding this guidance. Such comments will be considered when determining whether to amend the current guidance. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The guidance document and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: October 28, 1998.

D.B. Burlington,

Director, Center for Devices and Radiological Health.

Food and Drug Administration

[Docket No. 98D–0896]

Guidances for the Medical Device Industry on PMA Shell Development and Modular Review; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the guidance entitled "Guidances for the Medical Device Industry on PMA Shell Development and Modular Review." This guidance describes a new program for the submission and review of premarket approval applications (PMA's) in a modular format, termed the "PMA Shell." FDA is issuing this document as part of its commitment to improve the PMA development and review processes.

DATES: Written comments concerning this guidance must be received by February 4, 1999.

ADDRESSES: Submit written requests for single copies of the guidance document entitled "Guidances for the Medical Device Industry on PMA Shell Development and Modular Review" (on a 3.5" diskette) to the Division of Small Manufacturers Assistance (HFZ–220), Center for Devices and Radiological Health, Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send one self-addressed adhesive label to assist that office in processing your request, or fax your request to 301–443–8818. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance.

Submit written comments on this guidance to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Ashley A. Boulware or Kathy M. Poneleit, Center for Devices and Radiological Health (HFZ–460 or HFZ–402), Food and Drug Administration, 9200 Corporate Blvd., Rockville, MD 20850, 301–594–2053 or 301–594–2186.

SUPPLEMENTARY INFORMATION:

I. Background

Despite a marked improvement in device approval times, FDA's Center for Devices and Radiological health (CDRH) is committed to substantial improvement of the PMA development and review processes. Often FDA's involvement with the product has been greatest during review of the PMA, which is at the end of the process. This new program involves the development of a plan for modular submission, termed the "PMA Shell," and the submission of sections of the PMA, termed modules, to increase early and effective interactions with applicants.

The essence of the modular concept for data development, submission, review, and closure is to break the contents of a PMA into well delineated components (modules) that can be submitted over time; this is expected to be particularly applicable to the preclinical information as the clinical data are being developed. The PMA Shell is a document that is proposed by the potential PMA applicant and agreed to by CDRH. The PMA Shell is used to identify the proposed modules and the proposed contents for each module. The PMA Shell allows CDRH to prospectively determine whether each proposed module will be appropriate as a document that can be reviewed separately from other information needed to evaluate the PMA. For example, the toxicology data may be appropriate as a module, whereas labeling may not be appropriate as a module independent of the clinical study data. Modules will be submitted to CDRH for review. Once they are complete and acceptable to FDA, modules will not generally be reevaluated unless a significant safety and effectiveness issue later develops that bears on the previously reviewed module.

Through increased interaction with applicants and earlier review of data and analyses, CDRH expects this program to increase the efficiency of PMA review by reviewing and bringing to closure modules nearer to when the data are developed and when the corporate staff who developed the data should most easily be able to respond to any need for clarification of the reports.

II. Significance of Guidance

This guidance document represents the agency's current thinking on improving the PMA process. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfied the applicable statute, regulations, or both.

The agency has adopted Good Guidance Practices (GGP's), which set forth the agency's policies and procedures for the development, issuance, and use of guidance documents (62 FR 8961, February 27, 1997). This guidance document is issued as a Level 1 guidance consistent with GGP's.

III. Comments

Interested persons may, on or before February 4, 1999, submit to the Dockets Management Branch (address above) written comments regarding this guidance. After February 4, 1999, submit written comments regarding this guidance to the contact persons (address above). Such comments will be considered when determining whether to amend the current guidance. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The guidance document and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

IV. Electronic Access

In order to receive "Guidances for the Medical Device Industry on PMA Shell Development and Modular Review" via your fax machine, call the CDRH Facts-On-Demand system at 800–899–0381 or 301–827–0111 from a touch-tone telephone. At the first voice prompt press 1 to access DSMA Facts, at second voice prompt press 2, and then enter the document number (835) followed by the pound sign (#). Then follow the remaining voice prompts to complete your request.

Persons interested in obtaining a copy of the guidance may also do so using the World Wide Web (WWW). CDRH maintains an entry on the WWW for easy access to information including text, graphics, and files that may be downloaded to a personal computer with access to the Web. Updated on a regular basis, the CDRH home page includes "Guidances for the Medical Device Industry on PMA Shell Development and Modular Review," device safety alerts, **Federal Register** reprints, information on premarket submissions (including lists of approved applications and manufacturers' addresses), small manufacturers' assistance, information on video conferencing and electronic submissions, mammography matters, and other device-oriented information.

The CDRH home page may be accessed at "http://www.fed.gov/cdrh". "Guidances for the Medical Device Industry on PMA Shell Development and Modular Review" will be available at "http://www.fda.gov/cdrh/ode".

Dated: October 28, 1998.

BILLING CODE 4160–01–F

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4341–N–34]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Mark Johnston, room 7256, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708–1226; TTY number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Brian Rooney, Division of Property Management, Program Support Center, HHS, room 5B–41, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: ARMY: Mr. Jeff Holste, U.S. Army Corps of Engineers, Installation Support Center, 7701 Telegraph Road, Alexandria, VA 22315; (703) 428–6318; (these are not toll-free numbers).

Dated: October 29, 1998.

Fred Karnas, Jr.,

Deputy Assistont Secretory for Economic Development.

Title V, Federal Surplus Property Program Federal Register Report for 11/06/98

Unsuitable Properties

Building (by State)

Alabama

Bldg. S162

BILLING CODE 4210–29–M

DEPARTMENT OF THE INTERIOR

Proposed Extension of Information Collection; Comment Request

AGENCY: Office of American Indian Trust, Interior.

ACTION: Notice.

SUMMARY: This notice announces that the Department of the Interior is requesting comments on information collection, "Evaluation of the Performance of Trust Functions Performed by Tribes under Self Governance Compacts" currently cleared under OMB Number 1076–0146. This extension request seeks public comment as required by regulation at 5 CFR 1320.5(a)(1)(iv).

Specifically, the Department of the Interior invites comments by the public on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have a practical use; the accuracy of the Department's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; ways to enhance the quality, usefulness, and clarity of the information to be collected; and minimizing the burden of collection on those who are to respond.

DATES: Written comments on this collection of information will be accepted on or before January 5, 1999.

ADDRESSES: Further information may be secured from, and comments should be sent to: United States Department of the Interior, Office of American Indian Trust, 1849 C Street, NW, MS 2472 MIB, Washington, DC, Attention Elizabeth Lohah Homer, Director.

SUPPLEMENTARY INFORMATION:

Respondents: For the 1998 funding year there are 63 respondents.

Burden: There is no preliminary work nor is any follow-up work required of the respondents. There are no forms to complete. The annual hour burden is calculated by the amount of time that the reviewer spends at each program site interviewing the respondents and collecting file information. The time required ranges from 4 person/hours to 80 person/hours. Based on the size and complexity of the current programs, the average hours spent for each annual evaluation is estimated at 24 person/hours. 63 × 24 = 1,512 person/hours per year for the collection of information.

Dated: October 30, 1998.

Kevin Gover,

Assistant Secretary-Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Indian Gaming

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of Approved Tribal-State Compact.

SUMMARY: Pursuant to Section 11 of the Indian Gaming Regulatory Act of 1988, Pub. L. 100–497, 25 U.S.C. 2710, the Secretary of the Interior shall publish, in the **Federal Register**, notice of approved Tribal-State Compacts for the purpose of engaging in Class III (casino) gambling on Indian reservations. The Assistant Secretary—Indian Affairs, Department of the Interior, through his delegated authority, has approved the Tribal-State Gaming Compact between the State of California and the Viejas Band of Kumeyaay Indians, which was executed on August 24, 1998.

DATES: This action is effective November 6, 1998.

FOR FURTHER INFORMATION CONTACT: George T. Skibine, Director, Indian Gaming Management Staff, Bureau of Indian Affairs, Washington, D.C. 20240, (202) 219–4066.

Dated: October 29, 1998.

Kevin Gover,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM–050–7122–00–824G]

Intent To Prepare an Environmental Impact Statement (EIS) and Conduct Public Scoping Meetings for the Proposed St. Johns, Arizona CO_2-Helium Project

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Intent to Prepare an EIS and to Conduct Public Scoping Meetings.

SUMMARY: Pursuant to section 102(20)(C) of the National Environmental Policy Act of 1969 (NEPA), Council on Environmental Quality regulations (40 CFR Parts 1500–1508), the BLM, Socorro Field Office, New Mexico, will be preparing an EIS regarding the proposal to develop a carbon dioxide (CO_2) and helium field in Apache County, Arizona, and Catron County, New Mexico. The CO_2-helium field appears to underlie approximately 500 square miles of private, state, and federal lands. The EIS will identify the potential impacts that the development of a CO_2-helium field and subsequent activities could have on the environment and identify appropriate measures to mitigate those impacts. A **Federal Register** Notice dated October 2, 1998, announced the intent to prepare the EIS. In this notice, BLM announces public information and scoping meetings for the proposed action and EIS.

DATES: BLM's public information and scoping meetings will include: notification of the public, federal, state, tribal, and local agencies of the proposed action; identification by the public of issues to be considered in the EIS, and the solicitation of assistance from the public to identify reasonable alternatives. In addition, the public will have the opportunity to ask questions regarding the proposed project.

The BLM will conduct four public scoping meetings in the area of the project. All of the public meetings will be informal to encourage public attendance and input. The dates, times, and locations for these meetings are as follows:

Date	Location
Monday, December 7, 1998, 6 p.m. to 8 p.m.	St. Johns Council Chambers, 245 W. Bursell Street, St. Johns, AZ.
Tuesday, December 8, 1998, 6 p.m. to 8 p.m.	Senior Citizens Center, 356 S. Papago Drive, Springerville, AZ.
Wednesday, December 9, 1998, 6 p.m. to 8 p.m.	Village Community Center, 4th Street (Across from High School), Reserve, NM.
Thursday, December 10, 1998, 6 p.m. to 8 p.m.	Quemado School Highway 60, Quemado, NM.

Also, a press release announcing the meeting dates and times will be submitted to newspapers in each area where the meetings will be held.

Comments: Comments on the EIS will be accepted throughout the NEPA process; however, comments specific to this early stage of scoping for the EIS will be accepted until the end of the scoping period, which is December 21, 1998. Comments should address: (1) Issues to be considered, (2) feasible and reasonable alternatives to examine, and (3) relevant information having a bearing on the EIS. Comments should be sent to the Field Manager, Bureau of Land Management, Socorro Field Office, 198 Neel Ave., Socorro, NM 87801.

FOR FURTHER INFORMATION CALL: BLM will maintain a mailing list of parties and persons interested in being kept informed about the progress of the EIS. If you are interested in obtaining more information about the scoping meetings, EIS, or receiving future information, please call Carol Van Dorn, Team Leader, at (505) 835–0412.

SUPPLEMENTARY INFORMATION: The St. Johns, Arizona CO_2-Helium Project is a proposal of Ridgeway Arizona Oil Corporation, a wholly owned subsidiary of Ridgeway Petroleum Corporation. The purpose of the proposal is to develop the CO_2-helium field that appears to underlie approximately 500 square miles of lands in Apache County, east central Arizona and Catron County, west-central New Mexico. Ridgeway has been exploring the field since 1994 and results of the technical studies to date indicate that a large scale production of CO_2 is viable. Ridgeway intends to develop the field primarily for enhanced oil recovery. To obtain and process the large volume of CO_2, Ridgeway proposes to develop approximately 200 wells, a network of access roads and gathering pipelines, and a gas processing plant.

In both, Apache and Catron counties, some lands are privately owned, but the majority of lands in the project area are administered by state and federal agencies. The federal lands in the project area are administered by the BLM. In order to conduct development and production activities, the BLM, as lead federal agency, has determined that an EIS will be required in accordance with NEPA. The EIS will analyze the entire proposed action and associated cumulative effects. The EIS studies also will refine the proposed action and will develop alternatives, including no action and others that are identified through the scoping process. In addition, potential resource sensitivities and environmental impacts will be identified, as well as a mitigation plan to guide development and production. Resource concerns to be addressed include soils, water resources, hazardous materials, geology, minerals, air quality, noise, vegetation, wildlife, special status species, range resources, land use and access, recreation, wilderness study areas, visual resources, social and economic values, and cultural resources.

It is anticipated that the EIS process will require approximately 18 to 24 months to complete and will include public and agency scoping, coordination and consultation with Federal, state, tribal and local agencies, public review and possible hearings on the published draft EIS, and a published proposed final EIS. Publication of the Record of Decision is anticipated in mid-year 2000.

Dated: November 3, 1998.

Jon Hertz,

Assistant Field Manager.

BILLING CODE 4310–FB–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA–360–1200–00]

Supplementary Rules

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Closure of certain public lands to camping and campfires in Shasta County, California.

SUMMARY: The BLM is prohibiting persons from camping and operating campfires on certain BLM lands adjacent to Keswick Reservoir. On September 8, 1998 the Shasta County Board of Supervisors voted to enact amendments to Chapter 8.52 of the Shasta County Code. The amendment prohibits camping and campfires on BLM lands that are cooperatively managed as a "Rails-To-Trails" project. This Supplementary Rule will allow the BLM to enforce the intent of the County Code on BLM lands under 43 CFR 8365.1–6.

Action

It is unlawful to camp, construct, maintain, begin the operation of, or operate a house court, campsite, or tent camp space upon any BLM property within Township 33 North, Range 5 West, sections 20, 21, 28, 29, 31, 32; and Township 32 North, Range 5 West, sections 4, 5, 6, 7, 8, 9, 16, 17, 20, and 21 of Mount Diablo Meridian as herein otherwise specified; and it shall be unlawful to occupy for living and/or sleeping purposes to reside in any established house court, campsite, or tent camp space without written permission of the BLM.

Notwithstanding the above, camping is permitted when permission has been given in writing by an authorized officer of the BLM. Said written permission shall be in the possession of a person occupying the campsite and must permit camping in the location of the campsite and for the time the campsite is occupied. Failure to possess said written permission at the campsite shall be deemed a violation of this regulation.

Furthermore, it is unlawful to build or maintain any fire, campstove, or other incendiary device so as to endanger automobiles or other property in any house court, tent camp space, squatter camp, or campsite on BLM property within Township 33 North, Range 5 West, sections 20, 21, 28, 29, 31, 32; and Township 32 North, Range 5 West, sections 4, 5, 6, 7, 8, 9, 16, 17, 20, and 21 of the Mount Diablo Meridian. It is unlawful to leave any fire, lighted and burning campstove, or other lighted and burning incendiary device unattended at any time on the premises of any house court, tent camp space, squatter camp, or campsite.

The authority for these closures and rule makings is 43 CFR 8365.1–6. Any person who fails to comply with a supplemental rule is subject to arrest and fines of up to $100,000 and/or imprisonment not to exceed 12 months.

Definitions

"Camp" means to set up, use, or remain in or at a campsite.

"Campsite" means any place where camping facilities are used.

"Camping Facilities" include, but are not limited to, tents, tarpaulins, temporary shelters, motor vehicles or parts thereof, trailers, cooking facilities, cots, ground covers, bedding, hammocks, sleeping bags, and other similar equipment used to live temporarily in the outdoors or temporarily in, upon, under, or about any structure.

"Squatter Camp" means an area of land occupied by a squatter.

DATES: This supplementary rule will take effect November 6, 1998.

FOR FURTHER INFORMATION CONTACT: Charles M. Schultz, Field Manager, Bureau of Land Management, 355 Hemsted Drive, Redding, CA 96002.

Charles M. Schultz,

Redding Area Manager.

BILLING CODE 4310–40–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA–360–1220–00]

Supplementary Rules

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Establishment of open hours for the Reading Island Recreation Site in Shasta County, California.

SUMMARY: The BLM is prohibiting persons from occupying the Reading Island Recreation Site between 11:00 p.m. and 5:00 a.m. (Pacific Standard Time) without written authorization from a BLM authorized officer.

SUPPLEMENTARY INFORMATION: Reading Island is a 40 acre recreation site within Shasta County, California that is adjacent to a residential area. Although most public use at the site is lawful and orderly, night time vandalism, littering and drug use has been a problem. The night time activity deters lawful public use, damages natural resources, and creates a public nuisance. The BLM can reduce this type of unlawful activity and enhance the setting for valid recreation use by requiring a permit for night time occupation of the premises and/or overnight camping.

The Reading Island Recreation Site is open to the general public between the hours of 5:00 a.m. and 11:00 p.m. Pacific Standard Time. After those hours, visitors to the site must obtain written authorization from a BLM authorized officer. Written authorization will be in the form of a Special Recreation Use Permit or equivalent instrument as determined by the BLM authorized officer. Law enforcement personnel and other public servants specifically authorized by the BLM are exempt from this closure.

The authority for these closures and rule makings is 43 CFR 8365.1–6. Any person who fails to comply with a supplemental rule is subject to arrest and fines of up to $100.000 and/or imprisonment not to exceed 12 months. Unauthorized vehicles left at the Reading Island Recreation Site while it is closed will be subject to towing at the owners expense.

DATES: This supplementary rule will take effect November 6, 1998.

FOR FURTHER INFORMATION CONTACT: Charles M. Schultz, Field Manager, Bureau of Land Management, 355 Hemsted Drive, Redding, CA 96002.

Notice of Filing of Plat of Survey; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey described below will be officially filed in the New Mexico State Office, Bureau of Land Management, Santa Fe, New Mexico, on November 30, 1998.

New Mexico Principal Meridian, New Mexico

T. 17 N., R. 5 E., accepted September 28, 1998, for Group 960 NM; T. 32 N., R. 16 W., accepted September 28, 1998, for Group 922 NM; T. 32 N., R. 19 W., accepted September 24, 1998, for Group 922 NM; T. 16 N., R. 18 W., accepted September 18, 1998, for Group 961 NM., T. 31 N., R. 19 W., accepted September 18, 1998, for Group 922 NM., T. 32 N., R. 17 W., accepted September 18, 1998, for Group 922 NM; T. 32 N., R. 18 W., accepted September 18, 1998, for Group 922 NM; and Supplemental Plat, T. 30 N., R. 12 W., accepted September 28, 1998, NM.

If a protest against a survey, as shown on any of the above plats is received prior to the date of official filing, the filing will be stayed pending consideration of the protest. A plat will not be officially filed until the day after all protests have been dismissed and become final or appeals from the dismissal affirmed.

A person or party who wishes to protest against any of these surveys must file a written protest with the NM State Director, Bureau of Land Management, stating that they wish to protest.

A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within thirty (30) days after the protest is filed.

The above-listed plats represent dependent resurveys, surveys, and subdivisions.

These plats will be available for inspection in the New Mexico State Office, Bureau of Land Management, P.O. Box 27115, Santa Fe, New Mexico, 87502–0115. Copies may be obtained from this office upon payment of $1.10 per sheet.

Dated: October 30, 1998.

Minerals Management Service

Environmental Assessment Prepared for Proposed Central Gulf Sale 172 on the Gulf of Mexico Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability of the environmental assessment on Proposed Central Gulf of Mexico Lease Sale 172.

SUMMARY: The Minerals Management Service (MMS) has prepared an environmental assessment (EA) for the proposed annual Lease Sale 172 for the Central Planning Area of the Gulf of Mexico Outer Continental Shelf.

In this EA, MMS has reexamined the potential environmental effects of the proposed action and alternatives based on any new information regarding potential impacts and issues that was not available at the time the Final Environmental Impact Statement (FEIS) for Lease Sales 169, 172, 175, 178, and 182 was prepared.

In summary, no new significant impacts were identified for proposed Lease Sale 172 that were not already assessed in the FEIS for Lease Sales 169, 172, 175, 178, and 182. As a result, MMS determined that a supplemental EIS is not required and prepared a Finding of No New Significant Impact.

FOR FURTHER INFORMATION CONTACT: Public Information Unit, Information Services Section at number below. You may obtain single copies of the EA from the Minerals Management Service, Gulf of Mexico OCS Region, Attention: Public Information Office (MS 5034), 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana 70123–2394 or by calling 1–800–200–GULF.

Dated: November 2, 1998.

Chris C. Oynes,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310–MR–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Preparation of an Environmental Assessment for Proposed Lease Sale 174 in the Western Gulf of Mexico (1999)

AGENCY: Minerals Management Service.

ACTION: Preparation of an Environmental Assessment.

SUMMARY: The Minerals Management Service (MMS) is beginning preparation of an environmental assessment (EA) for proposed lease Sale 174 (scheduled for August 1999) in the Western Gulf of Mexico Planning Area. In January 1997, MMS issued a Call for Information and Nominations/Notice of Intent to Prepare an EIS (Call/NOI) for the four proposed Western Gulf of Mexico sales in the current 5-year leasing program. In 1998, MMS prepared a single environmental impact statement (EIS) for all four seles. The multisale Final EIS, filed in May 1998, included an analysis of a single, "typical" sale, and a cumulative analysis that included the effects of holding all four sales, as well as the cumulative effects of the long-term development of the planning area. The MMS stated in the EIS that an EA would be prepared for each lease sale after the first sale covered in the EIS (Sale 171).

The preparation of this EA is the first step in the prelease decision process for Sale 174. The proposal and alternatives for Sale 174 were identified by the Director of MMS in January 1997 following the Call/NOI and were analyzed in the Western Gulf multisale EIS, which is available from the Gulf of Mexico OCS Region's Public Information Office at 1–800–200–GULF. The proposed action analyzed in the multisale EIS was the offering of all available unleased acreage in the Western Gulf of Mexico Planning Area, with the following exceptions: Blocks A–375 (East Flower Garden Bank) and A–398 (West Flower Garden Bank) in the High Island Area, East Addition, South Extension, designated as a national marine sanctuary; and Blocks 793, 799, and 816 in the Mustang Island Area, identified by the Navy as needed for testing equipment and for training mine warfare personnel. The proposal to be addressed in this EA has been revised to the following extent: two additional blocks or portions of these blocks (High Island Area, East Addition, South Extension, Block A–401 and High Island, South Addition, Block A–513), which lie partially within the Flower Gardens National Marine Sanctuary, are deferred from the proposed action in

light of the President's June 1998 withdrawal of all Marine Sanctuaries from oil and gas leasing. The proposed action includes existing regulations and proposed lease stipulations designed to reduce environmental risks. The EA will also analyze alternatives to exclude blocks near biologically sensitive topographic features, as well as the no action alternative. The MMS may also consider deferring blocks beyond the U.S. Exclusive Economic Zone, in the area referred to as the northern portion of the Western Gap, as talks between the U.S. and Mexico are currently underway regarding the establishment of a continental shelf boundary in this area. The analysis in the EA will reexamine the potential environmental effects of the proposal and alternatives based on any new information regarding potential impacts and issues that was not available at the time the Final EIS was prepared.

The MMS requests interested parties to submit comments regarding any such new information or issues that should be addressed in the EA to Minerals Management Service, Gulf of Mexico OCS Region, Office of Leasing and Environment, Attention: Regional Supervisor (MS 5400), 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394 by December 7, 1998. After completion of the EA, MMS will determine whether to prepare a Finding of No New Significant Impact (FONNSI) or a supplemental EIS. The MMS will then prepare and send consistency determinations to the affected States to determine whether the proposed sale is consistent with federally-approved State coastal zone management programs, and will send a proposed Notice of Sale to the Governors for their comments on the size, timing, and location of the proposed sale. The tentative schedule for the steps in the prelease decision process for Sale 174 are listed below:

Comments due to MMS, December 7, 1998;

EA/FONNSI or Supplemental EIS, March 1999;

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–380 Enforcement Proceeding]

Certain Agricultural Tractors Under 50 Power Take-Off Horsepower; Notice of Referral of Formal Enforcement Proceeding to an Administrative Law Judge for Issuance of an Initial Determination

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has referred the formal enforcement proceeding instituted on September 28, 1998, in the above-captioned investigation to an administrative law judge for appropriate proceedings and the issuance of an initial determination.

FOR FURTHER INFORMATION CONTACT: Shara L. Aranoff, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–205–3090.

SUPPLEMENTARY INFORMATION: On February 25, 1997, at the conclusion of the original investigation, the Commission issued, inter alia, cease and desist orders directed to respondents Gamut Trading Co., Inc. and Gamut Imports. The cease and desist orders prohibit Gamut Trading Co., Inc. and Gamut Imports, as well as their "principals, stockholders, officers, directors, employees, agents, licensees distributors, controlled (whether by stock ownership or otherwise) and/or majority-owned business entities, successors and assigns," from importing or selling for importation into the United States, or selling, marketing, distributing, offering for sale, or otherwise transferring (except for exportation) in the United States agricultural tractors under 50 power take-off horsepower manufactured by Kubota Corporation of Japan that infringe the KUBOTA trademark.

On July 16, 1998, Kubota Corporation, Kubota Tractor Corporation, and Kubota Manufacturing of America Corporation (collectively "Kubota"), complainants in the original investigation, filed a complaint seeking institution of a formal enforcement proceeding against Gamut Trading Co., Inc., Gamut Imports, Ronald A. DePue (Chief Executive Officer and Chairman of the Board of Directors of Gamut Trading), and Darrel J. Du Puy (Chief Financial Officer, President, and member of the Board of Directors of Gamut Trading) (collectively "the Gamut respondents"), alleging that they are violating the cease and desist orders. Kubota supplemented its complaint on August 26, 1998. On September 28, 1998, the Commission issued an order instituting a formal enforcement proceeding and instructing the Secretary to transmit the enforcement proceeding complaint to the Gamut respondents and their counsel for a response. On October 19, 1998, the Gamut respondents filed a joint response to the enforcement complaint denying violation of any of the Commission's remedial orders and infringement of the KUBOTA trademark, asserting that the Commission lacks jurisdiction to address the enforcement complaint, and requesting that the Commission strike the complaint as "meritless" and order Kubota to pay the Gamut respondents $100,000.

Having examined the Gamut respondents' response to the formal enforcement proceeding complaint filed by Kubota, and having found that issues concerning possible violation of the Commission's cease and desist orders remain, the Commission determined to refer the enforcement proceeding to Judge Paul J. Luckern for issuance, no later than six (6) months from the date of the Commission Order referring this matter, of an initial determination concerning whether Gamut Trading Co., Inc., Gamut Imports, Ronald A. DePue, and/or Darrel J. Du Puy are in violation of one or more of the Commission's cease and desist orders.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and section 210.75 of the Commission's Rules of Practice and Procedure (19 CFR 210.75).

Copies of the Commission's Order and all other nonconfidential documents filed in connection with this enforcement proceeding are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, S.W., Washington, D.C. 20436, telephone 202–205–2000. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. General information concerning the Commission may also be obtained by accessing its Internet server (http://www.usitc.gov).

Issued: October 28, 1998.

By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, As Amended

Consistent with Departmental policy, 28 CFR 50.7, 38 FR 19029, and 42 U.S.C. § 9622(d), notice is hereby given that on October 19, 1998, a proposed Consent Decree in *United States* v. *Alpine Aromatics International, Inc. et al.*, Civil Action No. 98–4813 (DRD), was lodged with the United States District Court for the District of New Jersey. The proposed Consent Decree will resolve the United States' claims under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. § 9601, *et seq.*, on behalf of the U.S. Environmental Protection Agency ("EPA") against defendants relating to the Custom Distribution Services Superfund Site ("Site") located in Perth Amboy, New Jersey. The Complaint alleges that each of the defendants is liable under Section 107(a) of CERCLA, 42 U.S.C. § 9607(a).

Pursuant to the Consent Decree, the settling defendants will reimburse the United States $1,174,000 in past response costs.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Any comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Alpine Aromatics International, Inc., et al.*, Civil Action No. 98–4813 (DRD), D.J. Ref. 90–11–3–1750.

The proposed consent decree may be examined at the Office of the United States Attorney, District of New Jersey, 970 Broad Street, Newark, New Jersey 07102 and at Region II, Office of the Environmental Protection Agency, 290 Broadway, New York, NY 10007–1866 and at the Consent Decree Library, 1120 G Street, N.W., 3rd Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 3rd Floor, Washington, D.C. 20005. In requesting a copy, please enclose a check (there is a 25 cent per page reproduction cost) in the amount of $11.00 payable to the Consent Decree Library.

Bruce S. Gelber,

Deputy Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Departmental policy, 28 C.F.R. 50.7, and Section 122 of CERCLA, 42 U.S.C § 9622, notice is hereby given that on October 8, 1998, a proposed Consent Decree in *United States* v. *Archer-Daniels-Midland Company, et al.*, Civ. Action No. 198CV 2302 was lodged with the United States District Court for the Northern District of Ohio. This Consent Decree represents a settlement of claims of the United States against: (1) Archer-Daniels-Midland Company; (2) Ashland Chemical Company; (3) Baltimore-Ennis Land Company, Inc. (formerly known as Gibson-Homans); (4) Brookside Auto Parts; (5) Lincoln Electric Company; (6) Technical Products, Inc.; and (7) Warner G. Smith (collectively "Settling Defendants"), for reimbursement of response costs in connection with the Ohio Drum Reconditioning Superfund Site ("Site") pursuant to the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), 42 U.S.C. § 96–01 *et seq.*

Under this settlement with the United States, Settling Defendants will pay $100,000, plus interest, in reimbursement of response costs incurred by the United States at the Site. In addition, Settling Defendants will finance and perform the removal action at a portion of the Site.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to the *United States* v. *Archer-Daniels-Midland Company, et al.*, D.J. Ref. 90–11–2–1300.

The proposed Consent Decree may be examined at the Office of the United States Attorney, 1800 Bank One Center, 600 Superior Ave., East Cleveland, Ohio 44114, at the Region 5 Office of the Environmental Protection Agency, 77 West Jackson Street, Chicago, Illinois 60604–3590, and at the Consent Decree Library, 1120 G Street, N.W., 3rd Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 3rd Floor, Washington, D.C. 20005. In requesting a copy of the Consent Decree, please enclose a check payable to the Consent Decree Library in the amount of $11.75 (25 cents per page reproduction cost) for a copy of the Consent Decree without attachments or $22.75 for a copy of the Consent Decree with attachments.

Joel Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 98–29708 Filed 11–5–98; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under Clean Water Act

In accordance with Departmental policy, 28 C.F.R. 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Cool Valley Mining, Inc.*, C.A. No. 5:97–0763, was lodged on October 22, 1998, with the United States District Court for the Southern District of West Virginia. The United States' Complaint alleges that Coal Valley operated the old mine refuse area site, near Whitby, Raleigh County, West Virginia ("Site"). Further, the Complaint alleges that Coal Valley in operation of the Site violated the clean Water Act and its National Pollutant Discharge Elimination System ("NPDES") Permit by discharging pollutants into the navigable waters of the United States. The consent decree resolves the United States' claims for civil penalties and injunctive relief, pursuant to the Clean Water Act, 33 U.S.C. §§ 1251 *et seq.* Under the consent decree, the defendant must maintain compliance with its NPDES Permit and will pay a civil penalty of $20,000 to the United States within thirty days after entry of the consent decree by the Court. Upon the completion of reclamation activities at the Site, Coal Valley is required to pay an additional cash penalty if bond funds posted with the State of West Virginia are released to Coal Valley.

The United States filed a related case, Civil Action Number 5:97–0762, against the Ridgeway Development Corporation, which operated a mine site, and Coal Valley sub-leased the mineral and surface rights of such mine to Ridgeway. Ridgeway violated the Clean Water Act and its NPDES Permit in operating the mine, and Coal Valley was named as a defendant in the Ridgeway case. The consent decree resolves the United States' claims against Coal Valley for civil penalties and injunctive relief in this related case.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Cool Valley Mining, Inc.*, DOJ Reference No. 90–5–2–1–2093.

The proposed consent decree may be examined at the office of the United States Attorney, room 4000, 300 Virginia Street-East, Charleston, West Virginia 25301; the Region III Office of the Environmental Protection Agency, 1650 Arch Street, Philadelphia, Pennsylvania 19103–2029; and the Consent Decree Library, 1120 G Street, N.W., 3rd Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 3rd Floor, Washington, D.C. 20005. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $6.75 (.25 cents per page production costs), payable to the Consent Decree Library.

Joel M. Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 98–29706 Filed 11–5–98; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, notice is hereby given that a proposed consent decree in *United States* v. *Sadeane Lang, Independent Executrix of the Estate of Donald R. Lang*, Civil Action No. 1:94CV57, was lodged on October 27, 1998 with the United States District Court for the Eastern District of Texas, Beaumont Division.

In the First Amended Complaint, the United States alleges that Atlantic Richfield Company ("ARCO") and ARCO Chemical Company ("ACC") are successors to and assumed liability for persons who by contract, agreement, or otherwise arranged for disposal or treatment, of hazardous substances at the Turtle Bayou Superfund Site (also known as the Petro-Chemical Systems, Inc. Site) ("Site"), located in Liberty County, Texas. The United States alleges that ARCO and ACC are liable under Section 107 of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), 42 U.S.C. § 9607 for costs incurred and to be incurred by the United States in response to the release of hazardous substances at the Site.

The proposed Consent Decree requires ARCO and ACC to perform nearly all of the remedial action for the Site, at a cost of approximately $20 million. The remedial action includes in-situ aquifer bioremediation, bioventing, aqueous phase soil bioremediation, soil excavation and off-site treatment and/or disposal, soil excavation and biotreatment, thermal desorption, soil washing, containment, monitored natural attenuation, institutional controls, soil vapor extraction, installation of storm water management controls, monitoring ground water, and restoration of the Site surface upon completion of the remedial action.

The proposed Consent Decree also provides that the United States covenants not to sue or take administrative action against ARCO and ACC under Sections 106, 107(a) of CERCLA, 42 U.S.C. §§ 9606, 9607(a) and Section 7003 of the Resource Conservation and Recovery Act ("RCRA") except as specifically provided in the consent decree.

The Department of Justice will provide a RCRA public meeting in the affected area if requested and will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments and/or a request for a RCRA public meeting should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Sadeane Lang, Independent Executrix of the Estate of Donald R. Lang*, DOJ Ref. #90–11–3–709.

The proposed consent decree may be examined at the Office of the United States Attorney, 350 Magnolia Avenue, Suite 150, Beaumont, Texas 77701; the Region VI Office of the Environmental Protection Agency, 1445 Ross Avenue, Dallas, Texas 75202; and at the Consent Decree Library, 1120 G Street, NW, 3rd Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW, 3rd Floor, Washington, DC. 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $99.75 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Joel Gross,

Chief, Environmental Enforcement Section.

[FR Doc. 98–29705 Filed 11–5–98; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decrees Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy and 28 CFR 50.7, the Department of Justice gives notice that two proposed consent decrees in *United States* v. *Midwest Metallics, L.P., et al.*, Civil Action No. 2:98CV203JM (N.D. Ind.), were lodged with the United States District Court for the Northern District of Indiana, Hammond Division, on October 21, 1998, pertaining to the H&H Enterprises Superfund Site (the "Site"), located in Gary, Lake County, Indiana. The proposed consent decrees would resolve certain civil claims of the United States under Sections 106(b) and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), 42 U.S.C. §§ 9606(b) and 9707, against three defendants named in the action.

The first proposed consent decree, captioned "Partial Consent Decree with Settling Defendant Midwest Metallics, L.P.," would require that settling defendant Midwest Metallics, L.P. (1) continue and complete an ongoing CERCLA removal action involving the treatment and off-Site disposal of accumulated waste material at the Site, and reimburse the United States' future response costs relating to the Site, including future oversight costs, (2) pay $335,000 as reimbursement of past response costs incurred by the United States, and (3) pay an additional $255,000 in penalties for alleged violations of two prior Administrative Orders on Consent relating to the Site. The second proposed consent decree, captioned "Partial Consent Decree with Settling Defendants Cozzi Iron & Metal, Inc. and General Iron Industries, Inc.," would require that (1) Cozzi Iron & Metal, Inc. and General Iron Industries, Inc. pay the United States $744,000, and (2) Cozzi Iron & Metal, Inc. pay the United States an additional $12,000 in penalties for alleged violations of a prior Administrative Order on Consent relating to the Site.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decrees. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resource Division, United States Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Midwest Metallics, L.P., et al.*, Civil Action No. 2:98CV203JM (N.D. Ind.), and DOJ Reference No. 90–11–2–1092A, and the proposed consent decree(s) which the comments address.

The proposed consent decrees may be examined at: (1) the Office of the United States Attorney for the Northern District of Indiana, 1001 Main Street, Suite A, Dyer, Indiana 46311–1234 (contact Carol Davilo (219–322–8576)); (2) the United States Environmental Protection Agency (Region 5), 77 West Jackson Boulevard, Chicago, Illinois 60604–3590 (contact Thomas Krueger (312–886–0562)); and (3) the U.S. Department of Justice, Environment and Natural Resources Division Consent Decree Library, 1120 G Street, NW, 3rd Floor, Washington, D.C. 20005 (202–624–0892). Copies of the proposed consent decrees may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW, 3rd Floor, Washington, D.C. 20005. In requesting copies, please refer to the referenced case and DOJ Reference Number, the proposed consent decree(s) requested, and enclose a check for the amount(s) described below, made payable to the Consent Decree Library. The cost for a copy of the "Partial Consent Decree with Settling Defendant Midwest Metallics, L.P." only is $15.00 (60 pages at 25 cents per page reproduction costs), or $39.25 for that consent decree and all appendices (157 pages). The cost for a copy of the "Partial Consent Decree with Settling Defendants Cozzi Iron & Metal, Inc. and General Iron Industries, Inc." only is $6.50 (26 pages at 25 cents per page reproduction costs), or $28.50 for that consent decree and all appendices (114 pages).

Joel M. Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 98–29704 Filed 11–5–98; 8:45 am]

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Air Act

Under 28 CFR 50.7, notice is hereby given that an October 9, 1998 a proposed Consent Decree in *United States* v. *Pacific Mechanical Insulators Inc., et el.*, Civil Action No. CV–94–0043–N–EJL, was lodged with the United

States District Court for the District of Idaho.

In this action the United States sought penalties and injunctive relief for claims under the Asbestos National Emissions Standard for Harzardous Air Pollutants ("NESAHP"), 40 CFR pt. 61, Subpart M, promulgated under Section 112 of the Clean Air Act ("Act"), 42 U.S.C. 7412, for inspection, notice, work practice, and waste disposal violations. The claims arose in connection with asbestos abatement activities performed during a renovation/demolition at the Potlatch pulp and paper mill in Lewiston, Idaho. Under the Consent Decree, Pacific Technologies Inc. will pay a civil penalty of $30,000 and will comply with the Asbestos NESHAP, including designating an Asbestos Site Coordinator, training all supervisors, inspectors, and workers, providing monthly reports of its activities to U.S. EPA and local air pollution control authorities, and undertaking work practices to assure ease of monitoring of activities.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Pacific Mechanical Insulators Inc., et al.*, D.J. Ref. No. 90–5–2–1–1606.

Copies of the proposed Consent Decree may be examined at the Office of the United States Attorney, 877 W. Main, Boise ID 82702; EPA Region 10, 1200 Sixth Avenue, Seattle, WA 98101; and at the Consent Decree Library 1120 G Street, NW., 3rd Floor, Washington, D.C. 20005. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 3rd Floor, Washington, D.C. 20005, (202) 624–0892. When requesting a copy of the proposed Consent Decree, please enclose a check in the amount of $3.50 (25 cents per page reproduction cost) payable to the Consent Decree.

Joel M. Gross,

Chief, Environmental Enforcement Section. Environment and Natural Resources Division.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a consent decree that would resolve the liability of Rueth Development Company and Harold G. Rueth, the two defendants in *United States of America* v. *Rueth Development Company, et al.*, Civil Action No. 2:96CV540–JM (N.D. Ind.), was lodged with the United States District Court for the Northern District of Indiana on October 23, 1998.

The proposed consent decree concerns alleged violations of the Clean Water Act, 33 U.S.C. § 1311, as a result of the unauthorized discharge of dredged and fill material into approximately three acres of wetlands which are alleged to constitute "waters of the United States." The subject wetlands are part of the Castlewood subdivision, a single-family residential development located in Dyer, Lake County, Indiana. The consent decree permanently enjoins the two defendants from taking any actions, or causing others to take any actions, which result in the discharge of dredged or fill material into waters of the United States. The consent decree further requires the two defendants (1) to pay a $23,500.00 civil penalty and (2) to complete a full freshwater wetland restoration on the violation site in order to replace the lost functions and values of the filled wetlands.

The Department of Justice will receive written comments relating to the consent decree for a period of thirty (30) days from the date of this notice. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, United States Department of Justice, Attention: Steven E. Rusak, Trial Attorney, Environmental Defense Section, P.O. Box 23986, Washington, D.C. 20026–3986, and should refer to *United States of America* v. *Rueth Development Company, et al.*, DJ Reference No. 90–5–1–6–556.

The proposed consent decree may be examined at the Clerk's Office, United States District Court, 136 Federal Building, 507 State Street, Hammond, Indiana 46320.

Letitia J. Grishaw,

Chief, Environmental Defense Section, Environment and Natural Resources Division, Department of Justice.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States* v. *County of San Luis Obispo, California*, Case No. 97–6176 ABC (Ex) (C.D. Cal.), was lodged with the United States District Court for the Central District of California on October 27, 1998. The proposed Decree concerns alleged violations of sections 301(a) and 404 of the Clean Water Act, 33 U.S.C. §§ 1311(a) and 1344, resulting from Defendant's unauthorized discharge of dredged and/or fill material into waters of the United States at numerous locations within the County of San Luis Obispo during the course of road, culvert and bridge repair construction projects conducted between January 1, 1995 and April 30, 1996.

The proposed Consent Decree would require the payment of a civil penalty of $240,000.

The United States Department of Justice will receive written comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of publication of this notice. Comments should be addressed to Naikang Tsao, Attorney, United States Department of Justice, Environmental Defense Section, P.O. Box 23986, Washington, D.C. 20026–3986, and should refer to *United States* v. *County of San Luis Obispo, California*, Case No. 97–6176 ABC (Ex) (C.D. Cal.).

The proposed Consent Decree may be examined at the Clerk's Office, United States District Court for the Central District of California, 312 North Spring Street, Los Angeles, California 90012.

Letitia J. Grishaw,

Chief, Environmental Defense Section, Environment and Natural Resources Division, Department of Justice.

BILLING CODE 4410–15–M

DEPARTMENT OF LABOR

Office of the Secretary

Submission for OMB Review; Comment Request; Correction

AGENCY: Office of the Secretary, DOL.

ACTION: Correction.

SUMMARY: This document contains corrections to the Department of Labor, Submission for OMB Review; Comment request. In notice document 98–26884 beginning on page 53930 in the issue of Wednesday, October 7, 1998, make the following corrections:

On page 53931, in the third column, for OMB Control number 1205–0321 (revision) in the Frequency the entry "Quarterly" is corrected to read "Annually".

On page 53935, in the third column, for OMB Number 1210–0062 (extension), in the Description the entry "Class Exemption 81–8 permits . . ." is corrected to read "Class Exemption 82–63 permits . . .".

On page 53936, in the second column, for OMB Number 1210–0084 (extension), in the Description the entry "ERISA Technical Release 9101 . . ." is corrected to read "ERISA Technical Release 91–1 . . .".

Dated: November 2, 1998.

Todd R. Owen,

Departmental Clearance Officer.

BILLING CODE 4510–23–M

DEPARTMENT OF LABOR

Employment Standards Administration

Wage and House Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S–3013, Washington, D.C. 20210.

Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General Wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts." This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at 1–800–363–2068.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C., This 30th Day of October 1998.

Margaret J. Washington,

Acting Chief, Branch of Construction Wage Determinations.

BILLING CODE 4510–27–M

LEGAL SERVICES CORPORATION

Sunshine Act Meeting of the Board of Directors

Time and Date. The Board of Directors of the Legal Services Corporation will meet on November 16, 1998. The meeting will begin at 9:30 a.m. and continue until conclusion of the Board's agenda.

Locotion. 9th Floor Conference Room of 750 First Street NE, Washington, DC 20002.

Status of Meeting. Open, except that a portion of the meeting may be closed pursuant to a vote of the Board of Directors to hold an executive session. At the closed session, the Corporation's General Counsel will report to the Board on litigation to which the Corporation is or may become a party, and the Board may act on the matters reported. The closing is authorized by the relevant provisions of the Government in the Sunshine Act [5 U.S.C. 552b(c)(10)] and the corresponding provisions of the Legal Services Corporation's implementing regulation [45 CFR § 1622.5(h)]. A copy of the General Counsel's Certification that the closing is authorized by law will be available upon request.

Matters To Be Considered

Open Session

1. Approval of agenda.
2. Approval of minutes of the Board's meeting of September 12, 1998.
3. Approval of minutes of the Board's executive session of September 12, 1998.
4. Chairman's and Members' Reports.
5. President's Report.
6. Inspector General's Report.
7. Consider and act on the report of the Board's Provision for the Delivery of Legal Services Committee.
8. Consider and act on the report of the Board's Operations and Regulations Committee.
9. Consider and act on schedule and location of meetings for calendar year 1999, including whether to change the date of the Board's 1999 annual meeting and, if so, to what date.
10. Consider and act on the Board's draft *Semi-annual Report to the Congress* for the period of April 1, 1998 through September 30, 1998.

11. Consider and act on delegation to the Board Chair of authority to establish a panel and appointment the membership thereof to study and report back to the board on an issue relating to LSC grantees' representation of H–2A Workers.
12. Consider and act on renewal of John McKay's contract of employment as President of the Corporation.
13. Consider and act on President McKay's recommendation of Karen Sarjeant for appointment to the office of Vice President for Programs.

Closed Session

14. Briefing [1] by the Inspector General on the activities of the OIG.
15. Consider and act on the General Counsel's report on potential and pending litigation involving the Corporation.

Open Session

16. Public comment.
17. Consider and act on other business.

Contact Person for Information: Victor M. Fortuno, General Counsel and Secretary of the Corporation, at (202) 336–8810.

Special Needs

Upon request, meeting notices will be made available in alternate formats to accommodate visual and hearing impairments. Individuals who have a disability and need an accommodation to attend the meeting may notify Shannon Nicko Adaway, at (202) 336–8810.

Dated: November 2, 1998.

Victor M. Fortuno,

General Counsel.

BILLING CODE 7050–01–U

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Civil and Mechanical Systems; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Civil and Mechanical Systems (1205).

Date and Time: November 20, 1998; 8:30 a.m. to 5:00 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 580, Arlington, VA.

Contact person: Dr. Clifford Astill, Program Director, Hazard Reduction Program Cluster, Division of Civil and Mechanical Systems, Room 545, NSF, 4201 Wilson Blvdlk Arlington, VA 22230 703/306–1316.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Siting and Geotechnical Systems proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government Sunshine Act.

Dated: November 2, 1998.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 30–16055–ML; ASLBP No. 99–756–01–ML]

Advanced Medical Systems; Designation of Presiding Officer

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and Sections 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.1207 of the Commission's Regulations, a single member of the Atomic Safety and Licensing Board Panel is hereby designated to rule on requests for hearing and/or petitions to intervene, and, if necessary, to serve as the Presiding Officer to conduct an informal adjudicatory hearing in the following proceeding.

Advanced Medical Systems

[Denial of Materials License]

The hearing, if granted, will be conducted pursuant to 10 CFR part 2 Subpart L of the Commission's Regulations, "Informal Hearing Procedures for Adjudications in Materials and Operator Licensing Proceedings." This proceeding is established as a result of the petitioner, Advanced Medical Systems, requesting a hearing on October 15, 1998, in response to an NRC letter dated September 28, 1998. The letter informs Advanced Medical Systems that its application for renewal of its license to possess and use nuclear materials has been denied due to a finding of the NRC Staff that it lacked the requisite financial assurance necessary for decommissioning the facility.

The Presiding Officer in this proceeding is Administrative Judge B. Paul Cotter, Jr. Pursuant to the provisions of 10 CFR 2.722, the Presiding Officer has appointed Administrative Judge Thomas D. Murphy to assist the Presiding Officer in taking evidence and in preparing a suitable record for review.

All correspondence, documents and other materials shall be filed with Judge Cotter and Judge Murphy in accordance with 10 CFR 2.701. Their addresses are:

Administrative Judge B. Paul Cotter, Jr., Presiding Officer, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Thomas D. Murphy, Special Assistant, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Issued at Rockville, Maryland, this 28th day of October 1998.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Dockets 72–1008 and 72–1014]

Holtec International; Issuance of Environmental Assessment and Finding of No Significant Impact Regarding the Request for Exemption From Certain Regulatory Requirements

By letter dated August 3, 1998, as supplemented on September 4, 1998, Holtec International (Holtec or applicant) requested an exemption, pursuant to 10 CFR 72.7, from the requirements of 10 CFR 72.234(c). Holtec, located in Marlton, New Jersey, is seeking Nuclear Regulatory Commission (NRC or the Commission) approval to procure materials for four MPC–68 canisters, four HI–STAR 100 overpacks, four HI–STORM 100 overpacks and one HI–TRAC transfer cask (for use with the HI–STORM 100 system) prior to receipt of Certificates of Compliance (CoCs) for either the HI–STAR or the HI–STORM cask systems.

[1] Any portion of the closed session consisting solely of staff briefings does not fall within the Sunshine Act's definition of the term "meeting" and, therefore, the requirements of the Sunshine Act do not apply to any such portion of the closed session. 5 U.S.C. 552(b)(a)(2) and (b). See also 45 CFR §§ 1622.2 & 1622.3.

In addition, Holtec seeks an exemption to authorize fabrication of four MPC–68 canisters and four HI–STAR 100 overpacks. Together, the MPC–68 canisters and the overpacks are one configuration of the HI–STAR 100 cask system. The casks are intended for use under the general license provisions of Subpart K of 10 CFR Part 72 by Southern Nuclear Operating Company (Southern Nuclear) at the Hatch Nuclear Station (Hatch) in southern Georgia.

Separately, the staff is considering issuance of an exemption from the requirements of 10 CFR 72.124(b) which states, in part, that: "Where solid neutron absorbing materials are used, the design shall provide for positive means to verify their continued efficacy." Specifically, the staff is considering granting an exemption from the requirement to verify continued efficacy of neutron absorbing materials.

Environmental Assessment (EA)

Identification of Proposed Action

By letter dated October 23, 1995, as supplemented, and pursuant to 10 CFR Part 72, Holtec submitted an application to NRC for a CoC for the HI–STAR 100 cask system. Separately, on the same date, Holtec submitted an application for a CoC for the HI–STORM cask system which includes the HI–TRAC transfer cask. These applications are currently under consideration by the NRC staff. The applicant is seeking Commission approval to procure materials for four MPC–68 canisters, four HI–STAR 100 overpacks, four HI–STORM 100 overpacks, and one HI–TRAC transfer cask prior to the Commission's issuance of CoCs for either the HI–STAR or the HI–STORM cask systems. In addition, Holtec seeks an exemption to authorize fabrication of four MPC–68 canisters and four HI–STAR 100 overpacks. Together, the MPC–68 canisters and the overpacks are one configuration of the HI–STAR 100 cask system. The casks are intended for use under the general license provisions of Subpart K of 10 CFR Part 72 by Southern Nuclear at Hatch in southern Georgia. The applicant requests an exemption from the requirements of 10 CFR 72.234(c), which state that "Fabrication of casks under the Certificate of Compliance must not start prior to receipt of the Certificate of Compliance for the cask model."

As stated above, the staff is also considering issuance of an exemption from the requirements of 10 CFR 72.124(b) which states, in part, that: "Where solid neutron absorbing materials are used, the design shall provide for positive means to verify their continued efficacy." Specifically, the staff is considering granting an exemption from the requirement to verify continued efficacy of neutron absorbing materials.

The proposed action before the Commission is whether to approve procurement of the materials and whether to grant these exemptions pursuant to 10 CFR 72.7.

Need for the Proposed Action

Holtec requested the exemption to 10 CFR 72.234(c) to ensure the availability of storage casks so that Southern Nuclear can maintain full core off-load capability at Hatch. Hatch Unit 1 will lose full core off-load capability in August 2000. Hatch has proposed an initial cask loading in September 2000. To support training and dry runs prior to the initial loading, Southern Nuclear requests the delivery of the first cask by February 2000. Holtec states that to meet this schedule, purchase of cask components must begin promptly and fabrication must begin by November 1998.

The HI–STAR 100 and HI–STORM applications, dated October 23, 1995, are under consideration by the Commission. It is anticipated that, if approved, the HI–STAR 100 CoC may be issued in late 1999 and the HI–STORM 100 by Summer of 2000. Southern Nuclear's preferred storage cask for Hatch is the HI–STORM, but Southern Nuclear is willing to use the HI–STAR 100, if the HI–STORM is not available when needed. Therefore, in recognition of the schedular differences in the certification process for the two cask systems, Holtec is requesting approval for procurement of materials for the interchangeable MPC–68 as well as for the HI–STAR, HI–STORM, and HI–TRAC. In its request, however, Holtec confirms that its current plans are only to fabricate four HI–STAR units. The proposed procurement and fabrication exemption will not authorize use of any Holtec cask to store spent fuel. That will occur only when, and if, a CoC is issued. NRC approval of the procurement and granting of the fabrication exemption request should not be construed as an NRC commitment to favorably consider any Holtec application for a CoC. Holtec will bear the risk of all activities conducted under the exemption, including the risk that the four casks Holtec plans to construct may not be usable because they may not meet specifications or conditions placed in a CoC that NRC may ultimately approve.

The exemption to 10 CFR 72.124(b) is necessary to ensure that the certification process for the HI–STAR, HI–STORM, and HI–TRAC casks takes into account previous staff conclusions that fixed neutron poisons in the similar storage casks will remain effective over the 20-year period of the license. Periodic verification of neutron poison effectiveness is not possible for these Holtec casks and, consistent with the staff's conclusion described above, is not necessary.

Environmental Impacts of the Proposed Action

Regarding the procurement approval and fabrication exemption, the Environmental Assessment for the final rule, "Storage of Spent Nuclear Fuel in NRC-Approved Storage Casks at Nuclear Power Reactor Sites" (55 FR 29181 (1990)), considered the potential environmental impacts of casks which are used to store spent fuel under a CoC and concluded that there would be no significant environmental impacts. The proposed action now under consideration would not permit use of the casks, but only procurement and fabrication. There are no radiological environmental impacts from procurement or fabrication since cask material procurement and cask fabrication do not involve radioactive materials. The major non-radiological environmental impacts involve use of natural resources due to cask fabrication. Each MPC–68 canister weighs approximately 44 tons and is made of steel. Each HI–STAR 100 overpack weighs approximately 77 tons and is fabricated mainly from steel. Each HI–STORM overpack weighs approximately 100 tons and is constructed of metal and concrete. The HI–TRAC transfer cask weighs approximately 125 tons and is made of structural steel and lead. The amount of materials required to fabricate these casks is expected to have very little impact on the associated industry. Fabrication of the metal components would be at a metal fabrication facility, not at the reactor site. While fabrication of the concrete overpacks is not contemplated at this time, it should be noted that concrete overpacks would be partially fabricated at the same fabrication facility, with only the concrete pours being done at the reactor. Fabrication of these casks is insignificant compared to the amount of metal and concrete fabrication performed annually in the United States. If the casks are not usable, the casks could be disposed of or recycled. The amount of material disposed of is insignificant compared to the amount of steel and concrete that is disposed of annually in the United States. Based upon this information, the fabrication of these casks will have no significant impact on the environment since no radioactive materials are involved, and the amount of natural resources used is minimal.

Regarding the second exemption, in NRC's September 30, 1998, draft safety evaluation of the HI–STAR 100 cask Topical Safety Analysis Report, the NRC staff concluded that fixed neutron poisons in the HI–STAR 100 cask will remain effective for the 20-year storage period. The staff concluded that the criticality design for the HI–STAR 100 cask is based on favorable geometry and fixed neutron poisons. An appraisal of the fixed neutron poisons has shown that they will remain effective for the 20-year storage period. In addition, the staff concluded that there is no credible way to lose the fixed neutron poisons; therefore, there is no need to provide a positive means to verify their continued efficacy as required by 10 CFR 72.124(b).

Consistent with the staff conclusions in the safety evaluation, the applicant did not propose any verification of the continued efficacy of the HI-STAR 100 cask's neutron absorber.

Alternative to the Proposed Action

Since there is no significant environmental impact associated with the proposed actions, any alternatives with equal or greater environmental impact are not evaluated. The alternative to the proposed actions would be: (a) to deny approval of the exemption and, therefore, not allow cask fabrication until a CoC is issued and (b) to deny approval of the exemption and, therefore, not allow elimination of the requirement to verify the continued efficacy of neutron absorbing materials. These alternatives would have the same, or greater, environmental impacts.

Given that there are no significant differences in environmental impacts between the proposed action and the alternatives considered and that the applicant has a legitimate need to procure materials and fabricate the casks prior to certification and is willing to assume the risk that any fabricated casks may not be approved or may require modification, the Commission concludes that the preferred alternative is to approve the procurement request and grant the exemption from the prohibition on fabrication prior to receipt of a CoC. Similarly, the Commission concludes that since there is no significant difference in the environmental impacts between the proposed action and the alternatives for the elimination of the requirement to verify the continued efficacy of neutron absorbing materials, the Commission concludes that the preferred alternative is to grant that exemption.

Agencies and Persons Consulted

An official from the State of Georgia Department of Environmental Protection was contacted about the EA for the proposed action and had no concerns.

Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements set forth in 10 CFR Part 51. Based upon the foregoing EA, the Commission finds that the proposed action of (1) approving procurement of materials for four MPC–68 canisters, four HI-STAR 100 overpacks, four HI-STORM 100 overpacks, and one HI-TRAC transfer cask, and granting an exemption from 10 CFR 72.234(c) so that Holtec may fabricate four MPC–68 canisters and four HI-STAR 100 overpacks prior to issuance of a CoC will not significantly impact the quality of the human environment and, (2) granting an exemption from 10 CFR 72.124(b) so that Holtec need not verify the continued efficacy of the neutron absorbing material in storage casks will not significantly impact the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed exemptions.

The request for the exemption to 10 CFR 234(c) was filed on August 3, 1998, and supplemented on September 4, 1998. For further details with respect to this action, see the applications for CoC for the HI-STAR 100 and HI-STORM 100 cask systems, both dated October 23, 1995. On September 30, 1998, a preliminary Safety Evaluation Report and a proposed CoC for the HI-STAR 100 cask system were issued by the NRC staff to initiate the rulemaking process. These documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW, Washington, DC 20555.

Dated at Rockville, Maryland, this 28th day of October 1998.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–458; License No. NPF–47]

Entergy Operations, Inc.; Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by Petition dated September 25, 1998, David A. Lochbaum (Petitioner), acting on behalf of the Union of Concerned Scientists (UCS), has requested that the U.S. Nuclear Regulatory Commission (NRC) take action with regard to the River Bend Station (RBS), operated by Entergy Operations, Incorporated. Petitioner requests that enforcement action be taken to require an immediate shutdown of the RBS, and that the facility remain shut down until all failed fuel assemblies are removed from the reactor core. As an alternate action, UCS also stated that following the requested shutdown, RBS could be restarted after its design and licensing bases were updated to permit operation with failed fuel assemblies. Additionally, the Petition requested a public hearing to present new plant-specific information regarding the operation of RBS, as well as to discuss a UCS report dated April 2, 1998, entitled "Potential Nuclear Safety Hazard/Reactor Operation With Failed Fuel Cladding."

As the basis for the request, examples were cited in the Petition (summarized below) where, in the Petitioner's opinion, the RBS Updated Safety Analysis Report (USAR) does not allow for operation with pre-existing fuel failures:

(1) Integrity of the fuel barrier is an explicit criterion in addition to radiation requirements, and RBS is violating "the spirit, if not the letter, of [USAR Section 15A, Table 15A.2–4] Criterion 4–2 since the fuel barrier has already failed, albeit to a limited extent."

(2) The USAR description for six design-bases events includes either the statement that the fuel barrier maintains its "integrity and functions as designed," or that "no radioactive material is released from the fuel," as a consequence of the event. It is the Petitioner's view that the analyses associated with these events "appear[s] valid only when the River Bend Station is operated with no failed fuel assemblies."

The Petitioner further reasserted the UCS position that nuclear power plants operating with fuel cladding failures were potentially unsafe and were in violation of Federal regulations. In its April 1998 report, the UCS stated that it has not been demonstrated that the effects from design-bases transients and accidents (i.e., hydrodynamic loads, fuel enthalpy changes, etc.) prevent pre-

existing fuel failures from propagating. Therefore, the Petitioner concluded that it was possible that "significantly more radioactive material will be released to the reactor coolant system during a transient or accident than that experienced during steady state operation." In addition, the Petitioner also stated that, by operating with possible failed fuel cladding, RBS is violating its licensing basis for the radiation worker protection (as low as reasonably achievable [ALARA]) program as it is described in USAR Sections 12.1.1, "Policy Considerations," and 12.1.2.1, "General Design Considerations for ALARA Exposures."

The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. The request has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by Section 2.206, appropriate action will be taken on this petition within a reasonable time. By letter dated October 29, 1998, the Director denied Petitioner's request for enforcement action to require Entergy Operations, Inc., to immediately shut down RBS. In addition, the Director also extended an offer to the Petitioner for an informal public hearing at a date to be determined. A copy of the petition is available for inspection at the Commission's Public Document Room at 2120 L Street, N.W., Washington, D.C. 20555–0001.

Dated at Rockville, Maryland, This 29th day of October 1998.

For the Nuclear Regulatory Commission.

Frank J. Miraglia,

Acting Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–23515; 812–10554]

Ranson & Associates, Inc., et al.; Notice of Application

November 2, 1998.

AGENCY: Securities and Exchange Commission (the "SEC" or the "Commission").

ACTION: Notice of application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from sections 2(a)(32), 2(a)(35), 14(a), 19(b), 22(d), and 26(a)(2) of the Act and rules 19b–1 and 22c–1 under the Act, and under section 11(a) of the Act for an exemption from section 11(c) of the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain unit investment trusts ("UITs") to: (a) impose sales charges on a deferred basis and waive the deferred sales charges in certain cases; (b) conduct certain offers of exchange of units; (c) publicly offer units without requiring the sponsor of the UIT to take for its own account or place with others $100,000 worth of units; and (d) distribute capital gains resulting from the sale of portfolio securities within a reasonable time after receipt.

APPLICANTS: Ransom & Associates, Inc. (the "Sponsor"), The Random Municipal Trust-Multi-State Series, Ranson Unit Investment Trusts (formerly, EVEREN Unit Investment Trusts), The Kansas Tax-Exempt Trust, Kemper Tax-Exempt Income Trust, Ohio Tax-Exempt Bond Trust, Kemper Government Securities Trust, Kemper Bond Enhanced Securities Trust, any future UIT sponsored by the Sponsor (collectively, the "Trusts"), and their respective series (each, a "Series").[1]

FILING DATES: The application was filed on March 7, 1997, and amended on July 30, 1997. Applicants have agreed to file an amendment to the application, the substance of which is incorporated in this notice, during the notice period.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on November 24, 1998, and should be accompanied by proof or service on applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of the date of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW, Washington, DC 20549. Applicants, 250 N. Rock Road, Suite 150, Wichita, KS 67206.

FOR FURTHER INFORMATION, CONTACT: Lawrence W. Pisto, Senior Counsel, at (202) 942–0527, or Christine Y. Greenlees, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

[1] Any future Trust that relies on the relief will comply with the terms and conditions of the application.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application is available for a fee from the SEC's Public Reference Branch, 450 Fifth Street, NW, Washington, DC 20549 (tel. 202–942–8090).

Applicants' Representations

1. Each Series will be a series of one of the Trusts, each a UIT registered under the Act. The Sponsor will be the sponsor of the Trusts. Each Series is created by a trust indenture among the Sponsor, an evaluator, and a banking institution or trust company serving as trustee (the "Trustee").

2. The Sponsor acquires a portfolio of securities, which it deposits with the Trustee in exchange for certificates representing units of fractional undivided interests in the portfolio ("Units"). The Units are offered to the public by the Sponsor, underwriters, and dealers at a price which, during the initial offering period, is based upon the aggregate market value of the underlying securities plus a front-end sales charge. The sales charge currently ranges from 1% to 4.9% of the public offering price. The maximum charge usually is subject to reduction in compliance with rule 22d–1 under the Act under certain stated circumstances disclosed in the prospectus, such as for volume purchases.

3. The Sponsor maintains a secondary market for Units, and continually offers to purchase these Units at prices based upon the bid side evaluation of the underlying securities. Investors may purchase Units on the secondary market at the current public offering price plus a front-end sales charge. If the Sponsor discontinues maintaining such a market at any item for any Series, holders or Units ("Unitholders") of such a Series may redeem their Units through the Trustee.

A. Deferred Sales Charge ("DSC") and Waiver of DSC Under Certain Circumstances

1. Applicants request an order to the extent necessary to permit them to impose a DSC, and waive the DSC under certain circumstances. Under applicants' proposal, a portion of the DSC would be collected "up front," *i.e.*, at the time an investor purchases Units, and the balance would be collected subsequently in equal installments ("Installment Payments") from Unitholders' distributions on the Units. The Trustee will withdraw the Installment Payment from the distribution income and pay the amount directly to the Sponsor. If distribution income is insufficient to pay an Installment Payment or if a Series' portfolio consists of non-income producing securities, the Trustee will have the authority to sell portfolio securities in an amount necessary to pay the Installment Payment.

2. When a Unitholder redeems or sells Units, the balance of the Unit holder's Installment Payments on the redeemed Units will be deducted from the proceeds of the redemption or sale. When calculating the amount due, it will be assumed that Units on which the DSC has been paid in full are redeemed first. With respect to Units on which the DSC has not been fully paid, the DSC will be applied on the assumption that Units held for the longest time are redeemed or sold first. Under certain circumstances, the Sponsor may waive the DSC in connection with redemptions or sales of Units. These circumstances will disclosed in the prospectus for the relevant Series and implemented in accordance with rule 22d–1 under the Act.

3. Each Series offering Units subject to a DSC will include in its prospectus the disclosure required in Form N–1A relating to deferred sales charges, modified as appropriate to reflect the differences between UITs and open-end investment companies. The prospectus will state the maximum amount of DSC per Unit. The prospectus also will disclose that portfolio securities may be sold to pay the DSC if distribution income is insufficient to pay the DSC, and that the securities will be sold *pro rata* or that a specific security will be designated for sale.

B. Exchange Option and Rollover Option

1. Applicants request an order to the extent necessary to permit Unitholders of a Series to exchange their Units for Units of another Series (the "Exchange Option"), and Unitholders of a Series that is terminating (each, a "Rollover Series") to exchange their Units for Units of a new Series of the same type (the "Rollover Option"). The Exchange Option and Rollover Option would apply to all exchanges of Units sold with a front-end sales charge or a DSC.

2. A Unitholder who purchased Units under the Exchange Option or Rollover Option would pay a lower sales charge than that which would be paid for the Units by a new investor. The reduced sales charge imposed will be reasonably related to the expenses incurred in connection with the administration of the DSC program, which may include an amount that will fairly and adequately compensate the Sponsor and the participating underwriters and brokers for their services in providing the DSC program.

3. Pursuant to the Exchange Option, an adjustment would be made if Units of any Series are exchanged within five months of their acquisition for Units of a Series with a higher sales charge (the "Five Months Adjustment"). An adjustment also would be made if Units on which a DSC is collected are exchanged for Units of a Series that imposes a front-end sales charge and the exchange occurs before the DSC collected at least equals the per Unit sales charge on the acquired Units (the "DSC Front-End Exchange Adjustment"). If an exchange involves either the Five Months Adjustment or the DSC Front-End Exchange Adjustment, the Unitholder would pay the greater of: (a) the reduced sales charge, or (b) an amount which, together with the sales charge already paid on the exchanged Units, equals the normal sales charge on the Units of a Series being acquired (the "Exchange Series") on the date of the exchange. With appropriate disclosures, the Sponsor may waive such payment. Further, the Sponsor would reserve the right to vary the sales charge normally applicable to a Series, vary the charge applicable to exchanges, and modify, suspend, or terminate the Exchange Option or Rollover Option as set forth in the conditions to the application.

Applicants' Legal Analysis

A. DSC and Waiver of DSC

1. Section 4(2) of the Act defines a "unit investment trust" as an investment company which "issues only redeemable securities." Section 2(a)(32) of the Act defines a "redeemable security" as a security which, upon its presentation to the issuer, entitles the holder to receive approximately his or her proportionate share of the issuer's current net assets or the cash equivalent of those assets. Rule 22c–1 under the Act requires that the price of a redeemable security issued by a registered investment company for purposes of sale, redemption, and repurchase be based on the security's current net asset value ("NAV"). To the extent that an Installment Payment may be deemed to cause Unitholders to receive less than NAV upon redemption, applicants request relief from section 2(a)(32) and rule 22c–1.

2. Section 22(d) of the Act and rule 22d–1 under the Act require an investment company and its principal underwriter and dealer to sell securities only at the current public offering price described in the investment company's prospectus, with the exception of sales of redeemable securities at prices which reflect scheduled variations in the "sales load." Section 2(a)(35) defines the term "sales load" as the difference between the sales price and the portion of the proceeds invested by the depositor or trustee. Applicants request relief from sections 2(a)(35) and 22(d) to the extent that the DSC may be paid in installments rather than upon purchase.

3. Under section 6(c), the SEC may exempt classes of transactions, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

4. Applicants state that their proposal meets the standards of section 6(c). Applicants state that the provisions of section 22(d), rule 22d–1, and section 2(a)(35), taken together, are intended to prevent (i) riskless trading in investment company securities due to backward pricing, (ii) disruption of orderly distribution by dealers selling shares at a discount, and (iii) discrimination among investors resulting form different prices charged to different investors. Applicants assert that the proposed DSC program will present none of these abuses. Applicants contend that the deduction of the Installment Payments is consistent with the policy of forward pricing. Applicants also contend that the amount, computation, and timing of the DSC will promote fair treatment of all Unitholders, while permitting the Trusts to offer Unitholders the advantage of having a large portion of their purchase amount invested immediately. Applicants further note that the DSC program will be disclosed in the prospectus of each Series and available on the same terms to all investors. Finally, applicants state that any waiver of the DSC will be disclosed in the prospectus of each Series and implemented in accordance with rule 22d–1.

5. Section 26(a)(2), in relevant part, prohibits a trustee or custodian of a UIT from collecting from the UIT as an expense any payment to the trust's depositor or principal underwriter. Because the Trustee's payment of the DSC to the Sponsor may be deemed to be an expense under section 26(a)(2)(C), applicants request relief under section 6(c) from section 26(a)(2) to the extent necessary to permit the Trustee to collect DSC payments and disburse them to the Sponsor. Applicants submit that the relief is appropriate because the DSC is more properly characterized as a sales load than as an "expense."

B. Exchange Option and Rollover Option

Section 11(a) and (c) of the Act prohibit any offer of exchange by a registered UIT for the securities of any other investment company on any basis other than the relative NAV of the securities to be exchanged, unless the terms of the offer have been approved in advance by the SEC or meet the requirements of any rules adopted to regulate exchange offers. Applicants request an order under section 11(a) for an exemption from section 11(c) to permit the Exchange Option and the Rollover Option. Applicants state that the Five Months Adjustment and the DSC Front-End Exchange Adjustment in certain circumstances are appropriate in order to maintain the equitable treatment of various investors in each Series.

C. Net Worth Requirement

1. Section 14(a) of the Act requires in substance that investment companies have $100,000 of net worth prior to making a public offering. Applicants state that each Series would comply with this requirement because the Sponsor will deposit substantially more than $100,000 of debt or equity securities or a combination thereof, depending on the objective of the particular Series. Applicants assert, however, that the SEC has interpreted section 14(a) as requiring that the initial capital investment in an investment company be made without any intention to dispose of the investment. Applicants state that, under this interpretation, a Series would not satisfy section 14(a) because of the Sponsor's intention to sell all the Units of the Series.

2. Rule 14a–3 under the Act exempts UITs from section 14(a) if certain conditions are met, one of which is that the UIT invest only in "eligible trust securities," as defined in rule 14a–3. Applicants state that they may not rely on rule 14a–3 because certain future Series (collectively, the "Equity Series") will invest all or a portion of their assets in equity securities, which do not meet the definition of eligible trust securities.

3. Applicants request an exemption under section 6(c) from section 14(a) to the extent necessary to exempt the Series from the net worth requirement in section 14(a). Applicants state that they will comply in all respects with rule 14a–3, except that the Equity Series will not restrict their portfolio investments to eligible trust securities.

D. Capital Gains Distribution

1. Section 19(b) of the Act provides that a registered investment company may not, in contravention of such rules, regulations, or orders as the SEC may prescribe, distribute long-term capital gains more than once every twelve months. Rule 19b–1(a) under the Act permits a registered investment company, with respect to any one taxable year, to make one capital gains distribution, as defined in section 852(b)(3)(C) of the Internal Revenue Code of 1986, as amended (the "Code"). Rule 19b–1(a) also permits a supplemental distribution to be made pursuant to section 855 of the Code not exceeding 10% of the total amount distributed for the year. Rule 19b–1(f) permits one additional long-term capital gains distribution to be made to avoid the excise tax under section 4982 of the Code. Rule 19b–1(c), under certain circumstances, excepts a UIT investing in "eligible trust securities" (as defined in rule 14a–3) from the provisions of rule 19b–1. Because, as noted above, the Equity Series will not limit their investments to "eligible trust securities," they will not qualify for the exemption in paragraph (c) of rule 19b–1.

2. Applicants request an exemption under section 6(c) from section 19(b) and rule 19b–1 to the extent necessary to permit capital gains earned in connection with the sale of portfolio securities to be distributed to Unitholders along with the Equity Series' regular distributions. In all other respects, applicants will comply with Section 19(b) and rule 19b–1.

3. Applicants state that their proposal meets the standards of section 6(c). Applicants assert that any sales of portfolio securities would be triggered by the need to meet Series expenses, DSC installments, or by requests to redeem Units, events over which the Sponsor and the Equity Series do not have control. Applicants further state that reports to Unitholders that will accompany each distribution pursuant to rule 19b–1 will disclose the sources of the distribution.

Applicants' Conditions

Applicants agree that any order granting the requested relief will be subject to the following conditions:

A. DSC and Waiver of DSC

1. Each Series offering Units subject to a DSC will include in its prospectus the disclosure required in Form N–1A relating to deferred sales charges, modified as appropriate to reflect the differences between UITs and open-end investment companies.

2. Any DSC imposed on Units issued by a Series will comply with the requirements of rule 6c–10(a) (1) through (3) under the Act.

B. Exchange Option and Rollover Option

1. Whenever the Exchange Option or Rollover Option is to be terminated or its terms are to be amended materially, any holder of a security subject to that privilege will be given prominent notice of the impending termination or amendment at least 60 days prior to the date of termination or the effective date of the amendment, provided that: (a) no such notice need be given if the only material effect of an amendment is to reduce or eliminate the sales charge payable at the time of an exchange, to add one or more new Series eligible for the Exchange Option or Rollover Option, or to delete a Series that has terminated; and (b) no notice need be given if, under extraordinary circumstances, either (i) there is a suspension of the redemption of Units of the Exchange Series or Rollover Series under section 22(e) of the Act and the rules and regulations promulgated under the Act, or (ii) an Exchange Series or Rollover Series temporarily delays or ceases the sale of its Units because it is unable to invest amounts effectively in accordance with applicable investment objectives, policies and restrictions.

2. An investor who purchases Units under the Exchange Option or Rollover Option will pay a lower sales charge than that which would be paid for the Units by a new investor.

3. The prospectus of each Series and any sales literature or advertising that mentions the existence of the Exchange Option or the Rollover Option will disclose that the Exchange Option and Rollover Option are subject to modification, termination or suspension, without notice except in certain limited cases.

C. Net Worth Requirement

Applicants will comply in all respects with the requirements of rule 14a–3, except that the Equity Series will not restrict their portfolio investments to "eligible trust securities."

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Rel. No. 23513; International Series Rel. No. 1166; 812–10558]

Ranson Unit Investment Trusts, et al.; Notice of Application

October 30, 1998.

AGENCY: Securities and Exchange Commission (the "SEC").

ACTION: Notice of application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from section 12(d)(3) of the Act, and under sections 6(c) and 17(b) of the Act for an exemption from section 17(a) of the Act.

SUMMARY OF APPLICATION: Order requested to permit: (a) Certain series of a unit investment trust ("UIT") to invest up to 10.5% and certain other series of a UIT to invest up to 20.5% of their respective total assets in securities of issuers that derived more than 15% of their gross revenues in their most recent fiscal year from securities related activities; and (b) a terminating series of a UIT to sell portfolio securities to a new series of the UIT.

APPLICANTS: Ranson Unit Investment Trusts (the "Trust") and certain subsequent series (each, a "Series" or "Trust Series"), and Ranson & Associates, Inc. (the "Sponsor").

FILING DATES: The application was filed on March 13, 1997. Applicants have agreed to file an amendment to the application, the substance of which is incorporated in this notice, during the notice period.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on November 23, 1998, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW, Washington, DC 20549. Applicants, 250 N. Rock Road, Suite 150, Wichita, KS 67206–2241.

FOR FURTHER INFORMATION CONTACT: Lawrence W. Pisto, Senior Counsel, at (202) 942–0527, or Christine Y. Greenlees, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch, 450 Fifth Street, NW., Washington, DC 20549 (tell. 202–942–8090).

Applicants' Representations

1. Each Series will be a series of the Trust, a UIT registered under the Act. The Sponsor is the Trust's depositor. Each Series will be created under the laws of one of the United States pursuant to a trust agreement, which will contain information specific to that Series, and which will incorporate by reference a master trust agreement between the Sponsor and a financial institution that is a bank within the meaning of section 2(a)(5) of the Act and that satisfies the criteria in section 26(a) of the Act (the "Trustee").

2. Each Series will hold a portfolio of common stocks which represents a portion of a specific index (each, an "Index"). The investment objective of each Series is to seek a greater total return than that achieved by the stocks comprising the entire related Index over the life of the Series.

3. Certain Series (each, a "Defined Ten Series") will invest approximately 10%, but no more than 10.5%, of their total assets in each of the ten common stocks in the Dow Jones Industrial Average ("DJIA"), the Financial Times Ordinary Share Index ("FT Index"), or the Hang Seng Index, as the case may be, having the highest dividend yields no more than three business days prior to the Defined Ten Series' initial date of deposit. Certain other Series (each, a "Defined Five Series") will invest approximately 20%, but in no event more than 20.5%, of their total assets in each of the five lowest dollar price per share stocks of the ten common stocks in the DJIA, the FT Index, or the Hang Seng Index, as the case may be, having the highest dividend yields not more than three business days prior to the Series' initial date of deposit.[1]

[1] The Sponsor strives to purchase equal values of each of the common stocks in a Series' portfolio. However, it is more efficient to purchase securities in 100 share lots and 50 share lots. As a result, applicants may choose to purchase securities of a Securities Related Issuer (as defined below) which represent more than 10%, but in no event more than 10.5%, of a Defined Ten Series' assets, and more than 20%, but in no event more than 20.5%, of a Defined Five Series' assets on the initial date of deposit to the extent necessary to enable the Sponsor to meet its purchase requirements and to obtain the best price for the securities.

4. Each of the DJIA, the FT Index, and the Hang Seng Index is a recognized indicator of the stock market in its respective country.[2] The publishers of the Indices are not affiliated with any Series or the Sponsor, and do not participate in any way in the creation of any Series or the selection of its stocks. The common stocks included in the Indices may include stocks of issuers that derive more than 15% of their gross revenues from securities related activities, as that term is defined in rule 12d3–1 under the Act, discussed below ("Securities Related Issuers").

5. The securities deposited in each Series will be chosen solely according to the formula described above, and will not necessarily reflect the research opinions or buy or sell recommendations of the Sponsor. The Sponsor is authorized to determine the date of deposit, to purchase securities for deposit in the Series, and to supervise each Series' portfolio. The Sponsor will have no discretion as to which securities are purchased.

6. The Series' portfolios will not be actively managed. Sales of portfolio securities will be made in connection with redemptions of units, payment of expenses, and the termination of a Series. The Sponsor has no discretion as to when securities will be sold except that it is authorized to sell securities in extremely limited circumstances, such as when an issuer defaults on the payment of any of its outstanding obligations, or when the price of a security has declined to such an extent or other credit factors exist so that in the opinion of the Sponsor, it would be detrimental to the Series to retain the securities. The adverse financial condition of an issuer will not necessarily require the sale of its securities from a Series' portfolio.

7. Each Series will have a contemplated date (a "Rollover Date") on which holders of units in that Series (a "Rollover Trust Series") may at their option redeem their units in the Rollover Trust Series and receive in return units of a subsequent Series of the same type (a "New Trust Series"). The New Trust Series will be created on or about the Rollover Date. The securities in each Rollover Trust Series will be: (a) Actively traded (*i.e.*, have had an average daily trading volume in

[2] The DJIA, which is owned by Dow Jones & Company, Inc., comprises 30 widely-held common stocks listed on the New York Stock Exchange, which are chosen by the editors of *The Wall Street Journal*. The FT Index comprises 30 widely-held common stocks listed on the London Stock Exchange, which are chosen by the editors of *The Financial Times*. The Hang Seng Index comprises 33 common stocks listed on the Stock Exchange of Hong Kong, Ltd.

the preceding six months of at least 500 shares equal in value to at least U.S. $25,000) on (i) an exchange (an "Exchange") which is either a national securities exchange which meets the qualifications of section 6 of the Securities Exchange Act of 1934, or a foreign securities exchange that meets the qualifications set forth in the proposed amendments to rule 12d3–1(d)(6) under the Act [3] and that releases daily closing prices, or (ii) the Nasdaq National Market System (the "Nasdaq-NMS"), and (b) included in a published Index, including but not limited to the DJIA, the FT Index, or the Hang Seng Index (the securities meeting these requirements are referred to in this notice as "Equity Securities").

8. Applicants anticipate that there will be some overlap in the Equity Securities selected for the portfolios of a Rollover Trust Series and the related New Trust Series. Upon termination, absent the requested relief, a Rollover Trust Series would sell all of its Equity Securities on the applicable Exchange or Nasdaq-NMS. Likewise, a New Trust Series would acquire its Equity Securities on the applicable Exchange or Nasdaq-NMS. This procedure would result in the unitholders of both the Rollover Trust Series and the New Trust Series incurring brokerage commissions on the same Equity Securities.

Applicants' Legal Analysis

A. Purchases of Stocks of Securities Related Issuers in Excess of Rule 12d3–1 Limits

1. Section 12(d)(3) of the Act, with limited exceptions, prohibits an investment company from acquiring any security issued by any person who is a broker, dealer, underwriter, or investment adviser. Rule 12d3–1 under the Act exempts the purchase of securities of a Securities Related Issuer, provided that, among other things, immediately after the acquisition, the acquiring company has invested not more than five percent of the value of its total assets in securities of the Securities Related Issuer.[4]

2. As noted above, applicants state that some of the stocks comprising the DJIA, the FT Index, and the Hang Seng Index include securities of Securities Related Issuers. Applicants assert that, in order to comply with rule 12d3–1, absent the requested relief, each Defined Ten Series and Defined Five Series may be precluded from most effectively implementing the Series' investment objective.

3. Under section 6(c), the SEC may exempt classes of transactions, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

4. Applicants request an exemption under section 6(c) from section 12(d)(3) to permit a Defined Ten Series to invest up to approximately 10%, but in no event more than 10.5%, of the value of its total assets in securities of a Securities Related Issuer, and to permit a Defined Five Series to invest up to approximately 20%, but in no event more than 20.5%, of the value of its total assets in securities of a Securities Related Issuer.

5. Applicants state that the proposed transactions satisfy the requirements of sections 6(c). Applicants state that section 12(d)(3) was intended to prevent investment companies from exposing their assets to the entrepreneurial risks of securities related businesses, to prevent potential conflicts of interest, and to eliminate certain reciprocal practices between investment companies and securities related businesses. One potential conflict could occur if an investment company purchased securities or other interests in a broker-dealer to reward that broker-dealer for selling fund shares, rather than solely on investment merit. Applicants state that this concern does not arise in connection with the Defined Five or Defined Ten Series because neither the Series nor the Sponsor has discretion in choosing the securities of a Securities Related Issuer or the amount purchased; rather, the Securities Related Issuer must qualify as either one of the ten highest dividend yielding stocks or one of the five lowest dollar price per share stocks of the ten highest dividend yielding stocks in the DJIA.

6. Applicants also state that the effect of a Defined Five or Defined Ten Series' purchase on the stock of a Securities Related Issuer would be *de minimis*. Applicants assert that the Securities Related Issuers represented in the DJIA, the FT Index and the Hang Seng Index are widely held, have active markets, and potential purchases by any Defined Five or Defined Ten Series would represent an insignificant amount of the outstanding common stock and the trading volume of any of these Securities Related Issuers.

7. Another potential conflict of interest could occur if an investment company directed brokerage to a broker-dealer in which the company has invested to enhance the broker-dealer's profitability or to assist it during financial difficulty, even though that broker-dealer may not offer the best price and execution. To preclude this type of conflict, applicants agree, as a condition to the order, that no company held in the portfolio of a Defined Ten or Defined Five Series nor any affiliate of the company will act as a broker for any Series in the purchase or sale of any security for the Series' portfolio.

B. Purchases and Sales Between Trust Series

1. Section 17(a) of the Act prohibits an affiliated person of a registered investment company from selling securities to, or purchasing securities from, the company. Section 2(a)(3) of the Act defines an "affiliated person" of another person to include, in pertinent part, any person directly or indirectly controlling, controlled by, or under common control with, the other person. Each Trust Series will have a common sponsor. Since the Sponsor of a Trust Series may be deemed to control the Trust Series, all of the Trust Series may be deemed to be under common control and, thus, affiliated persons of each other.

2. Rule 17a–7 under the Act permits registered investment companies that might be deemed affiliates solely by reason of having common investment advisers, directors, and/or officers, to purchase securities from, or sell securities to, one another at an independently determined price, provided certain conditions are met. Applicants represent that they will comply with all of the provisions of rule 17a–7, other than paragraph (e).

3. Paragraph (e) of the rule requires an investment company's board of directors to adopt and monitor certain procedures to assure compliance with the rule. Since a UIT does not have a board of directors, the Trust Series would be unable to comply with this requirement.

4. Section 17(b) of the Act provides that the SEC will exempt a proposed transaction from section 17(a) if evidence establishes that: (a) the terms of the proposed transaction are reasonable and fair and do not involve overreaching; (b) the proposed transaction is consistent with the policies of the registered investment company involved; and (c) the proposed transaction is consistent with the general purposes of the Act. As noted above, section 6(c) of the Act provides that the SEC may exempt classes of transactions if the exemption is necessary or appropriate in the public interest, and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request relief under sections 6(c) and 17(b) to permit a Rollover Trust Series to sell Equity Securities to a New Trust Series and to permit the New Trust Series to purchase the Equity Securities.

5. Applicants state that the proposed transactions satisfy the standards of sections 6(c) and 17(b). Applicants represent that purchases and sales between Trust Series will be consistent with the policy of each Trust Series. Applicants further state that permitting the proposed transactions would result in savings on brokerage fees for the Trust Series.

6. Applicants state that the condition that the Equity Securities must be actively traded on an Exchange or the Nasdaq-NMS protects against overreaching. In addition, applicants state that the Sponsor will certify to the Trustee, within five days of each sale of Equity Securities from a Rollover Trust Series to a New Trust Series: (a) that the transaction is consistent with the policy of both the Rollover Trust Series and the New Trust Series, as recited in their respective registration statements and reports filed under the Act, (b) the date of the transaction, and (c) the closing sales price on the Exchange or on the Nasdaq-NMS for the sale date of the Equity Securities. The Trustee will then countersign the certificate, unless, in the unlikely event that the Trustee disagrees with the closing sales listed on the certificate, the Trustee immediately informs the Sponsor orally of any such disagreement and returns the certificate within five days to the Sponsor with corrections duly noted. Upon the Sponsor's receipt of a corrected certificate, if the Sponsor can verify the corrected price by reference to an independently published list of closing sales prices for the date of the transactions, the Sponsor will ensure that the price of the units of the new Trust Series, and distributions to holders of the Rollover Trust Series, accurately reflect the corrected price. To the extent that the Sponsor disagrees with the Trustee's corrected price, the Sponsor and the Trustee will jointly determine the correct sales price by reference to a mutually agreeable, independently published list of closing sales prices for the date of the transaction.

Applicants' Conditions

Applicants agree that the order granting the requested relief will be subject to the following conditions:

A. Purchases of Stocks of Securities Related Issuers in Excess of Rule 12d3–1 Limits

No company held in a Defined Ten Series portfolio or a Defined Five Series portfolio, nor any affiliate of the company, will act as broker for any Defined Ten Series or any Defined Five Series in the purchase or sale of any security for the Series' portfolio.

B. Purchases and Sales Between Trust Series

1. Each sale of Equity Securities by a Rollover Trust Series to a New Trust Series will be effected at the closing price of the Equity Securities sold on the applicable Exchange or the Nasdaq-NMS on the sale date, without any brokerage charges or other remuneration except customary transfer fees, if any.

2. The nature and conditions of the transactions will be fully disclosed to investors in the prospectus of each Rollover Trust Series and New Trust Series.

3. The Trustee of each Rollover Trust Series and New Trust Series will: (a) review the procedures relating to the sale of securities from a Rollover Trust Series and the purchase of those securities for deposit in a New Trust Series, and (b) make such changes to the procedures as the Trustee deems necessary that are reasonably designed to comply with paragraphs (a) through (d) of rule 17a–7.

4. A written copy of these procedures and a written record of each transaction pursuant to the order will be maintained as provided in rule 17a–7(f).

For the SEC, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[3] Investment Company Act Release No. 17096 (Aug. 3, 1989) (proposing amendments to rule 12d3–1). The proposed amended rule defined a "Qualified Foreign Exchange" to mean a stock exchange in a country other than the United States where: (1) Trading generally occurred at least four days a week; (2) there were limited restrictions on the ability of acquiring companies to trade their holdings on the exchange; (3) the exchange had a trading volume in stocks for the previous year of at least U.S. $7.5 billion; and (4) the exchange had a turnover ratio for the preceding year of at least 20% of its market capitalization. The version of the amended rule that was adopted did not include the part of the proposed amendment defininig the term "Qualified Foreign Exchange."

[4] Under rule 12d3–1, a Securities Related Issuer is a person that derives more than 15% of its gross revenues from activities as a broker, dealer, underwriter, investment adviser registered under the Investment Advisers Act of 1940, or investment adviser to a registered investment company.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of November 9, 1998.

A closed meeting will be held on Tuesday, November 10, 1998, at 11:00 a.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10), permit consideration of the scheduled matters at the closed meeting.

Commissioner Hunt, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, November 10, 1998, at 11:00 a.m., will be:

Institution and settlement of injunctive actions.

Institution and settlement of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: The Office of the Secretary at (202) 942–7070.

Dated: November 2, 1998.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–40621; File No. SR–NYSE–98–38]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the New York Stock Exchange, Inc., Extending the Pilot Governing the Reimbursement of Member Organizations for Costs Incurred in the Transmission of Proxy and Other Shareholder Communication Material

October 30, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 29, 1998, the New York Stock Exchange, Inc. (the "Exchange" or "NYSE") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange seeks to extend the current pilot period regarding Exchange Rule 451, "Transmission of Proxy Material," and Exchange Rule 465, "Transmission of Interim Reports and Other Material" (collectively the "Rules"). The Rules establish guidelines for the reimbursement of expenses by NYSE issuers to NYSE member organizations for the processing and delivery of proxy materials and other issuer communications to security holders whose securities are held in street name. The present pilot period regarding the Rules is scheduled to expire on October 31, 1998. The Exchange proposes to extend the pilot period through February 12, 1999.

The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The "Initial Filing"[3] revised the rules to lower certain reimbursement guidelines, create incentive fees to eliminate duplicative mailings, and establish a supplemental fee for intermediaries that coordinate multiple nominees. The Commission approved the Initial Filing as a one-year pilot, and designated May 13, 1998, as the date of expiration. In the "February Filing,"[4] the Exchange extended the pilot period through July 31, 1998, and lowered the rate of reimbursement for mailing each set of initial proxies and annual reports from $.55 to $.50. In the "July Filing,"[5] the Exchange extended the pilot period through October 31, 1998, and kept intact the five cent fee reduction implemented by the February Filing. This proposed rule change would extend the pilot through February 12, 1999, and likewise keep intact the five cent fee reduction.

The extension of the pilot period would give the Commission additional time to consider the "March Filing,"[6] without a lapse in the current rules. In the March Filing, the Exchange proposed a change to the Rules regarding "householding" and proposed extending the pilot period through June 30, 2001. Thus, absent an extension of the pilot period, the fees in effect prior to the Initial Filing[7] would return to effectiveness, creating confusion among NYSE member organizations and issuers. Furthermore, the extension will provide the Exchange's independent auditor with additional time to finish its review of the impact of the pilot fee structure and will provide the Commission with an opportunity to review the auditor's Audit Report.[8]

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act[9] in that it provides for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities. The Exchange further believes that the proposed rule change satisfies the requirement under Section 6(b)(5)[10] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices; promote just and equitable principles of trade; foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities; remove impediments to and perfect the mechanism of a free and open market and a national market system; and, in general, protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on the proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change: (1) does not significantly affect the protection of investors or the public interest; (2) does not impose any significant burden on competition; and (3) the Exchange provided the Commission with written notice of its intent to file the proposed rule change at least five business days prior to the filing date; the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Exchange Act[11] and Rule 19b–4(e)(6)[12] thereunder.

A proposed rule change filed under Rule 19b–4(e)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(e)(6)(iii)[13] permits the Commission to designate such shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission designate such shorter time period so that the proposed rule change may take effect immediately upon its filing. The immediate effectiveness would: (i) continue to make available the five cent fee reduction regarding the distribution of each set of initial proxies and annual reports; (ii) provide the Commission with sufficient time to complete its review of the March Filing and analyze the Audit Report concerning the pilot fee structure that will be prepared by the Exchange's independent auditor; and (iii) allow the current pilot fee structure to continue uninterrupted.

The Commission, consistent with the protection of investors and the public interest, has determined to make the proposed rule change effective immediately upon filing for the following reasons. The proposed rule change would continue to make available the five cent fee reduction regarding the distribution of each set of initial proxies and annual reports. This fee reduction should continue to benefit NYSE issuers and public investors in the form of lower costs and expenses. As the Commission noted in the March Filing, the fee reduction is based upon the Exchange's experience with the reimbursement guidelines and better reflects the actual costs incurred by NYSE member organizations.

The proposed rule change also extends the expiration date of the pilot period from October 31, 1998, through February 12, 1999. The extension of the pilot period will provide the Commission with additional time to complete its review of the March Filing[14] and the opportunity to further evaluate the proposal. Furthermore, the current pilot period is due to expire about the same time as the estimated date on which the Exchange hopes to deliver to the Commission the Audit Report examining the proxy distribution process with respect to securities held in street name. The extension will therefore provide the Commission with the necessary time to review the Audit Report in connection with its review of the pending March Filing.

The Commission notes that unless the current pilot period's expiration date is extended, the reimbursement rates for proxy materials distributed after October 31, 1998, will revert to those in effect prior to the pilot period. The Commission believes such a result would be confusing and counterproductive, especially given that the March Filing proposing to extend the pilot period through June 30, 2001, is still pending with the Commission.

For all of the reasons set forth above, the Commission believes it is reasonable that the proposed rule change become immediately effective upon the date of filing, October 29, 1998. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW, Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–NYSE–98–38 and should be submitted by November 27, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Jonathan G. Katz,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster #3142; Amendment #1]

State of Missouri

In accordance with a notice from the Federal Emergency Management Agency dated October 29, 1998, the above-numbered Declaration is hereby amended to include Platte and Ray Counties, Missouri as a disaster area due to damages caused by severe storms and flooding which occurred October 4 through October 11, 1998.

In addition, applications for economic injury loans from small businesses located in the contiguous county of Buchanan in the State of Missouri may be filed until the specified date at the previously designated location. Any other counties contiguous to the above-named primary counties and not listed herein have been previously declared.

All other information remains the same, i.e., the deadline for filing applications for physical damage is December 13, 1998 and for economic injury the termination date is July 14, 1999.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: November 2, 1998.

Bernard Kulik,
Associate Administrator for Disaster Assistance.

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ending October 30, 1998

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: OST–98–4660.
Date Filed: October 28, 1998.
Due Date for Answers, Conforming Applications, or Motions to Modify Scope: November 25, 1998.
Description: Application of Continental Micronesia Inc., pursuant to 49 U.S.C. 41102 and Subpart Q, applies for renewal of Segment 7 of its Route 171 authority for at least a five-year period.

Dorothy W. Walker,
Federal Register Liaison.

Federal Aviation Administration

Advisory Circular; Manufacturing Process of Premium Quality Titanium Alloy Rotating Engine Components

AGENCY: Federal Aviation Administration, DOT.
ACTION: Notice of issuance of Advisory Circular (AC).

SUMMARY: This notice announces the issuance of Advisory Circular (AC), No. 33.15–1, Manufacturing Process of Premium Quality Titanium Alloy Rotating Engine Components. This AC provides guidance and information for compliance pertaining to the materials suitability and durability requirements, § 33.15, as applicable to the manufacture of titanium alloy high energy rotating parts of aircraft engines. Like all AC material, this AC is not, in itself, mandatory and does not constitute a regulation. It is issued to provide an acceptable means, but not the only means, of compliance with § 33.15. While these guidelines are not mandatory, they are derived from extensive Federal Aviation Administration (FAA) and industry experience in determining compliance with the pertinent regulations.

DATES: Advisory Circular No. 33.15–1, was issued by the New England Aircraft Certification Service, Engine and Propeller Directorate on September 22, 1998.

FOR FURTHER INFORMATION CONTACT: Tim Mouzakis, Engine and Propeller Standards Staff, ANE–110, 12 New England Executive Park, Burlington, MA, 01803, telephone (781) 238–7114, fax (781) 238–7199.

SUPPLEMENTARY INFORMATION:

Background

Advisory Circulars 21–1B, 21–6A, 21–9A, 21–27, and 21.303–1A, provide a means to obtain and maintain production approvals; however, these documents do not fully cover the manufacturing processes used in the manufacture of premium quality titanium alloy forged rotating components for type certificated turbine engines. This AC, therefore, provides supplemental guidance for the establishment of manufacturing processes, in process material and component inspections, and finished component inspections, for manufacture of premium quality titanium alloy forged rotating components, such as disks, spacers, hubs, shafts, spools and impellers, but not blades.

Interested parties were given the opportunity to review and comment on the draft AC during the proposal and development phases. Notice was published in the **Federal Register** on July 17, 1997 (62 FR 38338), to announce the availability of, and comment to the draft AC.

This advisory circular, published under the authority granted to the Administrator by 49 U.S.C. 106(g), 4113, 44701–44702, 44704, provides guidance for these requirements.

Issued in Burlington, Massachusetts, on September 22, 1998.

Jay J. Pardee,
Manager, Engine and Propeller Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Advisory Circular 23.1419–2A, Certification of Part 23 Airplanes for Flight in Icing Conditions

AGENCY: Federal Aviation Administration, DOT.
ACTION: Notice of issuance of advisory circular.

SUMMARY: This notice announces the issuance of Advisory Circular (AC) 23.1419–2A, Certification of Part 23 Airplanes for Flight in Icing Conditions. This AC sets forth an acceptable means, but not the only means of demonstrating compliance with the ice protection requirements in Title 14 of the Code of Federal Regulations (14 CFR) Part 23. The Federal Aviation Administration (FAA) will consider other methods of demonstrating compliance that an applicant may elect to present.

DATES: Advisory Circular 23.1419–2A was issued by Acting Manager, Small Airplane Directorate, Aircraft Certification Service, ACE–100, on August 19, 1998.

How to obtain copies: A copy may be obtained by writing the U.S. Department of Transportation, Subsequent Distribution Office, DOT Warehouse SVC–121.23, Ardmore East Business Center, 3341 Q 75th Avenue, Landover, MD 20785, or by faxing your request to that office at 301–386–5394.

Issued in Kansas City, Missouri, on October 29, 1998.

Michael Gallagher,
Manager, Small Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: Douglas County, CO

AGENCY: Federal Highway Administration (FHWA), DOT.
ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advice the public that an environmental impact statement/4(f) evaluation will be prepared for transportation improvements in Douglas County, Colorado.

FOR FURTHER INFORMATION CONTACT: Mr. Joe Duran, FHWA, Colorado Division, 555 Zang Street, Room 250, Lakewood, CO, 80228, Telephone: (303) 969–6730 extension 385, or Ms. Theresa Tiehen, Colorado Department of Transportation, Region 1, 18500 East Colfax Avenue, Aurora, CO 80011, Telephone: (303) 757–9285.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the Colorado Department of Transportation (CDOT) will prepare an environmental impact statement (EIS)/Section 4(f) evaluation for transportation improvements on Interstate 25 (I–25) between the I–25/Lincoln Avenue interchange (I–25 Milepost 193) and south of Castle Rock (I–25 Milepost 178) a distance of approximately 15 miles and on Colorado State Highway 85 (SH 85) as an alternative route between the Colorado 470 (C–470) (SH 85 Milepost 200) and the SH 85/I–25 interchange in Castle Rock (SH 85 Milepost 184) a distance of approximately 16 miles. The EIS will be conducted in conjunction with a major investment study (MIS) for the I–25 and SH 85 north-south corridor between Castle Rock and Denver. The proposed improvements will be identified in the MIS and the EIS/Section 4(f) evaluation.

The MIS and EIS/Section 4(f) evaluation will evaluate improvement alternatives to compare to the No-Build Alternative. These alternatives include additional general purpose lanes on I–25 and SH 85, toll facility lanes on I–25, exclusive bus/carpool lanes on I–25, rail alternatives along I–25 and SH 85, transportation management options (such as transportation systems management, transportation demand management and intelligent transportation systems), new or improved interchanges on I–25, and combinations of the various alternatives. The EIS will satisfy the requirements of the 1990 Clean Air Act Amendments.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies. Project scoping will be accomplished through coordination with affected parties, organizations, federal, state, and local agencies and through public meetings in the project corridor. Information on the time and place of the public scoping meetings will be provided in the local newspapers. To be placed on the public mailing list to receive additional project information, contact Theresa Tiehen at the address previously provided. The MIS and draft EIS/Section 4(f) evaluation will be available for public and agency review and comment prior to the public hearing.

To ensure that a full range of issues related to the proposed action are addressed and all significant issues identified, comments, and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS/Section 4(f) evaluation should be directed to Theresa Tiehen at the CDOT address previously provided.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program)

Issued on: October 20, 1998.

Ronald A. Speral,
Environmental/ROW Program Manager, Colorado Division, Federal Highway Administration, Lakewood, Colorado.

Surface Transportation Board

[STB Finance Docket No. 33666]

Belt Line Division of Tacoma Public Utilities—Operation Exemption—In Pierce, Thurston and Lewis Counties, WA

Belt Line Division of Tacoma Public Utilities (Belt Line), an existing Class III carrier,[1] has filed a verified notice of exemption under 49 CFR 1150.41 to operate approximately 131.5 miles of the City of Tacoma, WA (City), rail line (the line) in Pierce, Thurston, and Lewis Counties, WA: (1) between milepost 2192.0, at Tacoma, and milepost 17.7, at Chehalis; and (2) between milepost 2192.0, at Tacoma, and milepost 64.2, at Morton. The lines have been operated previously by Tacoma Eastern Railway Company (TE).[2]

Pursuant to 49 CFR 1150.42(e), Belt Line certified on October 23, 1998, that its annual revenues exceed $5 million and that it has, as of September 23, 1998, served the national offices of the labor unions with a copy of a notice of its intent to undertake this transaction and posted such notice at the workplace of the employees on the affected lines on September 23, 1998.

The transaction was expected to be consummated on or after October 30, 1998.[3]

If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance

[1] Applicant represents that the Charter of the City divides its operations into Public Utilities and General Government. The General Government portion of the City evidently owns the lines discussed in this notice and is negotiating with the Public Utilities portion of the City, which is evidently responsible for operations. Belt Line currently operates a shortline railroad in support of the Port of Tacoma.

[2] The Board recently granted the City's application under 49 U.S.C. 10903 permitting the discontinuance of operations by TE over the line. *See Tacoma Eastern Railway Company—Adverse Discontinuance of Operations Application—a Line of City of Tacoma, in Pierce, Thurston and Lewis Counties, WA*, STB Docket No. AB–548 (STB served Oct. 16, 1998).

[3] The date of consummation under normal circumstances would be December 22, 1998 (60 days after Belt Line's certification to the Board that it had complied with the Board's rule at 49 CFR 1150.42(e)). In a decision in this proceeding served on October 30, 1998, the Board found that sufficient notice to rail employees and their representatives had been given under the circumstances of this case and, at the request of Belt Line, waived, in part, the 60-day period to allow consummation on October 30, 1998.

Docket No. 33666 must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, D.C. 20423–0001. In addition, a copy of each pleading must be served upon Peter A. Greene, Esq., Thompson Hine & Flory LLP, 1920 N Street, N.W., Suite 800, Washington, DC 20036.

Board decisions and notices are available on our website at "WWW.STB.DOT.GOV."

Decided: November 2, 1998.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 33675]

Minnesota Commercial Railway Company—Lease and Operation Exemption—Canadian Pacific Railway Company (Soo Line District)

Minnesota Commercial Railway Company (MC), a Class III rail carrier, has filed a notice of exemption under 49 CFR 1150.41 to acquire by long-term lease from the Canadian Pacific Railway Company (Soo Line District) (CP) and operate (1) approximately 22 miles of trackage in an area known as the South Minneapolis Switching District from approximately milepost 416+/–to the end of track maintenance, at about 48th Street, South, Minneapolis, MN (no milepost); and (2) one mile of incidental trackage over CP's trackage east of Merriam Park.

Because MC's projected annual revenues after the transaction will exceed $5 million, MC has certified to the Board that the required notice of the transaction was sent to the national offices of the labor unions representing employees on the line and posted at the workplace of the employees on the affected lines on July 31, 1998. *See* 49 CFR 1150.42(e).[1] The transaction was scheduled to be consummated on November 1, 1998.

If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke does not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 33675, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, DC 20423–0001. In addition, a copy of each pleading must be served on Eugenia Langan, Esq., Shea and Gardner, 1800 Massachusetts Avenue, N.W., Washington, DC 20036.

Board decisions and notices are available on our website at "WWW.STB.DOT.GOV."

Decided: November 2, 1998.

Minnesota Commercial Railway Company—Lease and Operation Exemption—Union Pacific Railroad Company

Minnesota Commercial Railway Company (MC), a Class III rail carrier, has filed a notice of exemption under 49 CFR 1150.41 to acquire by long-term lease from the Union Pacific Railroad Company (UP) and operate approximately 2.95 miles +/–of industrial trackage in an area known as the Southeast Minneapolis Switching District.[1]

Because MC's projected annual revenues after the transaction will exceed $5 million, MC has certified to the Board that the required notice of the transaction was sent to the national offices of the labor unions representing employees on the line and posted at the workplace of the employees on the affected lines on August 31 1998. *See* 49 CFR 1150.42(e).[2] The transaction was scheduled to be consummated on November 1, 1998.

If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke does not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 33675, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, DC 20423–0001. In addition, a copy of each pleading must be served on Eugenia Langan, Esq., Shea and Gardner, 1800 Massachusetts Avenue, N.W., Washington, DC 20036.

Surface Transportation Board

[STB Docket No. AB–290 (Sub-No. 203X)][1]

Norfolk Southern Railway Company—Abandonment Exemption—in Madison and Bond Counties, IL

On October 16, 1998, Norfolk Southern Railway Company (NSR) filed with the Surface Transportation Board (Board) a petition under 49 U.S.C. 10502 for exemption from the provisions of 49 U.S.C. 10903 to abandon a 39.1-mile branch line of railroad known as the Madison-Sorento Line or the Madison Branch, extending between milepost TS–406.6 at Sorento, IL, and milepost TS–445.7 at Madison, IL, in Madison and Bond Counties, IL.[2] The line traverses U.S. Postal Service Zip Codes 62001, 62025, 62060, 62074, and 62086, and includes the stations of Madison, Stallings, Glen Carbon, Leclaire, Edwardsville, White (Town of Alhambra), New Douglas, and Sorento.

The line does not contain federally granted rights-of-way. Any documentation in the railroad's possession will be made available promptly to those requesting it. The interest of railroad employees will be protected by the conditions set forth in *Oregon Short Line R. Co.—Abondonment—Goshen*, 360 I.C.C. 91 (1979).

By issuance of this notice, the Board is instituting an exemption proceeding pursuant to 49 U.S.C. 10502(b). A final decision will be issued by February 3, 1999.

Any offer of financial assistance (OFA) under 49 CFR 1152.27(b)(2) will be due no later than 10 days after service of a decision granting the petition for exemption. Each OFA must be accompanied by a $1,000 filing fee. *See* 49 CFR 1002.2(f)(25).

All interested persons should be aware that, following abandonment of rail service and salvage of the line, the line may be suitable for other public use, including interim trail use. Any request for a public use condition under 49 CFR 1152.28 or for trail use/rail banking under 49 CFR 1152.29 will be due no later than November 27, 1998. Each trail use request must be accompanied by a $150 filing fee. *See* 49 CFR 1002.2(f)(27).

All filings in response to this notice must refer to STB Docket No. AB–290 (Sub-No. 203X) and must be sent to: (1) Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, DC 20423–0001, and (2) James R. Paschall, Three Commercial Place, Norfolk, VA 23510–2191. Replies to the NSR petition are due on or before November 27, 1998.

Persons seeking further information concerning abandonment procedures may contact the Board's Office of Public Services at (202) 565–1592 or refer to the full abandonment or discontinuance regulations at 49 CFR part 1152. Questions concerning environmental issues may be directed to the Board's Section of Environmental Analysis (SEA) at (202) 565–1545. [TDD for the hearing impaired is available at (202) 565–1695.]

An environmental assessment (EA) (or environmental impact statement (EIS), if necessary) prepared by SEA will be served upon all parties of record and upon any agencies or other persons who commented during its preparation. Other interested persons may contact SEA to obtain a copy of the EA (or EIS). EAs in these abandonment proceedings normally will be made available within 60 days of the filing of the petition. The deadline for submission of comments on the EA will generally be within 30 days of its service.

Board decisions and notices are available on our website at WWW.STB.DOT.GOV."

Decided: November 2, 1998.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF THE TREASURY

[Treasury Directive Number 11–02]

Delegation of Authority for Administering the Community Development Financial Institutions Fund

1. *Delegation.* a. Pursuant to Treasury Order (TO) 101–20, this Directive delegates to the Director, Community Development Financial Institutions Fund, all duties, powers, rights, and obligations vested by TO 101–20 in the Under Secretary (Domestic Finance) for purposes of administering the Community Development Financial Institutions Fund, a wholly owned government corporation within the Department of the Treasury.

b. The Director, Community Development Financial Institutions Fund, is designated as an officer of the Community Development Financial Institutions Fund pursuant to section 104(b)(3) of the Community Development Banking and Financial Institutions Act of 1994, subtitle A of title I of the Riegle Community Development and Regulatory Improvement Action of 1994, Pub. L. 103–325 (12 U.S.C. 4703 (b)(3)).

2. The Director, Community Development Financial Institutions Fund, shall report to the Under Secretary (Domestic Finance).

3. The Director, Community Development Financial Institutions Fund, may redelegate in writing to officers of the Community Development Financial Institutions Fund such of the authority granted under this Directive as the Director deems appropriate. For purposes of such redelegation of authority, the Director, Community Development Financial Institutions Fund, may designate as officers, in writing, such individuals as the Director deems appropriate.

4. *Authority.* TO 101–20, "Administering the Community Development Financial Institutions Fund," dated August 14, 1995.

5. *Expiration Date.* This Directive shall expire three years from the date of issuance unless superseded or canceled prior to that date.

6. *Office of Primary Interest.* Office of the Under Secretary (Domestic Finance).

John D. Hawke, Jr.,

Under Secretary (Domestic Finance).

BILLING CODE 4810–25–P

DEPARTMENT OF THE TREASURY

[Treasury Order Number 145–10]

Remission or Waiver of Liquidated Damages

Dated: October 29, 1998.

1. By virtue of authority vested in the Secretary of the Treasury, including the authority in 31 U.S.C. § 321(b), I hereby delegate to the Commissioner, Financial Management Service, (the "Commissioner"), the authority of the Secretary:

a. upon a recommendation from the head of a contracting agency, to remit or waive all or part, as in his discretion may be just and equitable, of liquidated damages for delay assessed against a contractor, in conformity with provisions of 10 U.S.C. § 2312 or 41 U.S.C. § 256a; and

b. to exercise any right or power, make any finding or determination, or perform any duty or obligation which the Secretary is authorized to exercise, make or perform under 10 U.S.C. § 2312 and 41 U.S.C. § 256a.

2. The authority delegated to the Commissioner by paragraph 1 further includes any matter in which the Secretary's authority to remit or waive liquidated damages under the cited

[1] While the required notice to employees had been given on July 31, 1998, MC did not certifiy to the Board that it had done so until October 22, 1998, when it filed its notice of exemption. The exemption would normally become effective 60 days after MC's certification to the Board that it had complied with the Board's rule at 49 CFR 1150.42(e). In a decision in this proceeding served on October 30, 1998, however, the Board found that sufficient notice to rail employees and their representatives had been given in this case and, at the request of MC, waived, in part, the 60-day period to allow consummation on November 1, 1998.

[1] MC notes that the trackage is all yard limit industrial switching territory and that no mileposts are assigned this area by UP.

[2] While the required notice to employees had been given on August 31, 1998, MC did not certify to the Board that it had done so until October 22, 1998, when it filed its notice of exemption. The exemption would normally become effective 60 days after MC's certification to the Board that it had complied with the Board's rule at 49 CFR 1150.42(e). In a decision in this proceeding served on October 30, 1998, however, the Board found that sufficient notice to rail employees and their representatives had been given in this case and, at the request of MC, waived, in part, the 60-day period to allow consummation on November 1, 1998.

[1] NSR has filed with the Board two related petitions for exemption. In *Norfolk Southern Railway Company—Purchase Exemption—Union Pacific Railroad Company*, STB Finance Docket No. 33609 (STB served Oct. 29, 1998), NSR is proposing to purchase from UP, and to operate approximately 15.3 miles of rail line between Monterey Junction, IL (including the southwest leg of the wye track at Monterey Junction), and DeCamp, IL, plus certain yard tracks at Madison, IL. In *Norfolk Southern Railway Company—Lease and Operation Exemption—Union Pacific Railroad Company*, STB Finance Docket No. 33610 (pending), NSR is proposing to lease from UP, and to operate, approximately 4.7 miles of rail line between Monterey Mine No. 1 near Carlinville, IL, and Monterey Junction, IL, and a leg of the wye track and related trackage at Monterey Junction.

[2] NSR indicates that the end point of the branch line at Sorento has been shown on its system diagram map as milepost TS–444.2 rather than TS–445.7. NSR requests an exemption or waiver from the requirement that it list the 1.5 miles of the line between those mileposts on its system diagram map. Because NSR has provided no reasons for the Board to grant either exemption or waiver here, the request will not be granted. It should be noted, however, that failure to comply with 49 U.S.C. 10903(c)(2) is not grounds for denial of this abandonment petition.

statutes is premised upon the delegation to the Secretary from the Acting Director, Office of Management and Budget, set forth in the Acting Director's "Determination with Respect to Transfer of Functions Pursuant to Public Law 104–53," dated June 28, 1996.

3. The Commissioner may redelegate in writing within the Financial Management Service the authority delegated by this order.

Robert E. Rubin,

Secretary of the Treasury.

[FR Doc. 98–29722 Filed 11–5–98; 8:45 am]

BILLING CODE 4810–25–P

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the Bureau of Alcohol, Tobacco and Firearms within the Department of the Treasury is soliciting comments concerning the Federal Firearms and Ammunition Excise Tax Return.

DATES: Written comments should be received on or before January 5, 1999, to be assured of consideration.

ADDRESS: Direct all written comments to Linda Barnes, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8930.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to Robert Ruhf, Revenue Division, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8210.

SUPPLEMENTARY INFORMATION:

Title: Federal Firearms and Ammunition Excise Tax Return.

OMB Number: 1512–0507.

Form Number: ATF F 5300.26.

Abstract: A Federal excise tax is imposed by 26 U.S.C. 4181 on the sale of pistols and revolvers, other firearms, shells and cartridges (ammunition) sold by firearms manufacturers, producers, and importers. The information on the form is necessary to establish the taxpayer's identity, the amount and type of taxes due, and the amount of payments made.

Current Actions: There is an increase in the number of respondents resulting in an increase in burden hours. Also, the form has a few minor changes. A check box has been added to 1. for the address and the wording has been changed to help clarify 3.

Type of Review: Extension.

Affected Public: Individuals or households, Business or other for-profit.

Estimated Number of Respondents: 965.

Estimated Time Per Respondent: 7 hours.

Estimated Total Annual Burden Hours: 27,020 .

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: October 29, 1998.

William T. Earle,

Assistant Director (Management) CFO.

BILLING CODE 4810–31–P

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the Bureau of Alcohol, Tobacco and Firearms within the Department of the Treasury is soliciting comments concerning the Gang Resistance Education and Training Funding Application.

DATES: Written comments should be received on or before January 5, 1999, to be assured of consideration.

ADDRESSES: Direct all written comments to Linda Barnes, Bureau of Alcohol, Tobacco and Firearms, 650 Massachusetts Avenue, NW., Washington, DC 20226, (202) 927–8930.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form(s) and instructions should be directed to James Scott, Gang Resistance Education and Training, P.O. Box 50414, Washington, DC 20091, (800) 726–7070.

SUPPLEMENTARY INFORMATION:

Title: Gang Resistance Education and Training Funding Application.

OMB Number: 1512–0548.

Form Number: ATF F 6410.1.

Abstract: State and local law enforcement agencies desiring financial assistance for the G.R.E.A.T. Program will submit ATF F 6410.1 to the ATF, G.R.E.A.T. Branch. The information collected will be used by ATF to evaluate the applicants' funding needed. The information will also be used to determine funding priorities and levels of funding, as required by law.

Current Actions: There are no changes to this information collection and it is being submitted for extension purposes only.

Type of Review: Extension.

Affected Public: State, Local or Tribal Government.

Estimated Number of Respondents: 400.

Estimated Time Per Respondent: 2 hours.

Estimated Total Annual Burden Hours: 800.

REQUEST FOR COMMENTS: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity

of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: October 29, 1998.

William T. Earle,

Assistant Director (Management) CFO.

BILLING CODE 4810–31–P

DEPARTMENT OF THE TREASURY

Customs Service

Notice of Issuance of Final Determination Concerning Surgical Instruments

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of final determination.

SUMMARY: This document provides notice that Customs has issued a final determination concerning the country of origin of certain surgical instruments which are being offered to the Department of Veterans Affairs under a Federal Supply contract. The final determination found that based upon the facts presented, the country of origin of the surgical instruments is Germany.

DATES: The final determination was issued on November 2, 1998. A copy of the final determination will be published in "Customs Bulletin and Decisions." Any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of this final determination within 30 days of November 6, 1998.

FOR FURTHER INFORMATION CONTACT: Monika Brenner, Special Classification and Marking Branch, Office of Regulations and Rulings (202–927–1675).

SUPPLEMENTARY INFORMATION: Notice is hereby given that on November 2, 1998, pursuant to Subpart B of Part 177, Customs Regulations (19 CFR Part 177, Subpart B), Customs issued a final determination concerning the country of origin of certain surgical instruments which are being offered to the Department of Veterans Affairs under a Federal Supply contract. This final determination was issued at the request of one of the offerors under procedures set forth at 19 CFR Part 177, Subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511–18). The final determination concluded that, based upon the facts presented, German surgical instrument forgings are not substantially transformed in Malaysia as a result of various machining and some assembly processes. Accordingly, the country of origin of the surgical instruments is Germany. This document gives notice pursuant to section 177.29, Customs Regulations (19 CFR 177.29), of that final determination. Any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of this final determination within 30 days of November 6, 1998.

Dated: November 2, 1998.

John Durant,

Acting Assistant Commissioner, Office of Regulations and Rulings.

DEPARTMENT OF THE TREASURY

Customs Service

[T. D. 98–85]

Annual User Fee for Customs Broker Permit; General Notice

AGENCY: Customs Service, Department of the Treasury.

ACTION: Notice of due date for broker user fee.

SUMMARY: This is to advise Customs brokers that for 1999 the annual user fee of $125 that is assessed for each permit held by an individual, partnership, association or corporate broker is due by January 8, 1999. This announcement is being published to comply with the Tax Reform Act of 1986.

DATES: Due date for fee: January 8, 1999.

FOR FURTHER INFORMATION CONTACT: Adline Tatum, Entry & Broker Compliance (202) 927–0380.

SUPPLEMENTARY INFORMATION: Section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99–272) established that an annual user fee of $125 is to be assessed for each Customs broker permit held by an individual, partnership, association, or corporation. This fee is set forth in the Customs Regulations in § 111.96 (19 CFR Part 111.96).

Customs Regulations provides that this fee is payable for each calendar year in each Broker district where the broker was issued a permit to do business by the due date which will be published in the **Federal Register** annually. Broker districts are defined in the General Notice published in the **Federal Register**, Volume 60, No.187, September 27, 1995 (60 FR 49971).

Section 1893 of the Tax Reform Act of 1986 (Pub. L. 99–514), provides that notices of the date on which a payment is due of the user fee for each broker permit shall be published by the Secretary of the Treasury in the **Federal Register** by no later than 60 days before such due date. This document notifies brokers that for 1999, the due date for payment of the user fee is January 8, 1999. It is expected that annual user fees for brokers for subsequent years will be due on or about the third of January of each year.

Dated: November 3, 1998.

Philip Metzger,

Director, Trade Compliance.

UNITED STATES INFORMATION AGENCY

Summer Institutes in American Studies for Foreign University Teachers; Request for Proposals (RFP)

SUMMARY: The Branch for the Study of the United States of the U.S. Information Agency's Bureau of Educational and Cultural Affairs announces an open competition for four (4) assistance awards. Public and private non-profit organizations meeting the provisions described in IRS regulation 26 CFR 1.501(C) may apply to develop and implement one of the following four post-graduate level American Studies programs designed for multinational groups of 18 experienced foreign university faculty:

1. Summer Institute on Contemporary American Literature
2. Summer Institute on Change and Reform in American History
3. Summer Institute on the Foundations of U.S. Foreign Policy
4. Summer Institute on the U.S. Constitution

These programs are intended to provide participants with a deeper understanding of American life and institutions, past and present, in order to promote the development and improvement of courses and teaching about the United States at universities abroad.

Program are six weeks in length, and will be conducted during the Summer of 1999.

USIA is seeking detailed proposals from colleges, universities, consortia of colleges and universities, and other non-for-profit academic organizations that have an established reputation in one or more of the following fields: political science, international relations, law, history, sociology, literature, American studies, and/or other disciplines or sub-disciplines related to the program theme. Applicant institutions must demonstrate expertise in conducting post-graduate programs for foreign educators, and *must have a minimum of four years experience in conducting international exchange programs.* The project director or one of the key program staff responsible for the academic program must have an advanced degree in one of the fields listed above. Staff escorts traveling under the USIA cooperative agreement must have demonstrated qualifications for this service.

Programs must conform with Agency requirements and guidelines outlined in the Solicitation Package. USIA programs are subject to the availability of funds.

Program Information

Overview and Objectives: The "Summer Institutes in American Studies" are intended to offer foreign scholars and teachers whose professional work focuses on the United States the opportunity to deepen their understanding of American institutions and culture. Their ultimate goal is to improve curricula and the quality of teaching about the U.S. in universities abroad.

Program should be six weeks in length, must include an academic residency segment of at least four weeks at a U.S. college or university campus (or other appropriate location), and a study tour segment of not more than two weeks which directly complements the academic program and includes visits to one or more additional regions of the United States.

All institutes should be designated as intensive academically rigorous programs that are organized through an integrated series of lectures, readings, seminar discussions, research and independent study opportunities, faculty consultations, site visits and regional travel.

Institutions submitting proposals are encouraged to design thematically coherent programs in ways that draw upon the particular strengths and resources of their institutions as well as upon the nationally recognized expertise of scholars and other experts throughout the United States. Within the limits of the program's thematic focus and organizing frameworks, proposals should also be designed to:

A. Provide participants with a survey of current scholarship and scholarly trends within the institute's governing academic discipline, indicating how current academic practice and debate represent both a continuation of and, where appropriate, a departure from past practices within that discipline;

B. Bring an interdisciplinary or multi disciplinary approach to bear on the subject when appropriate;

C. Give participants a multi-dimensional view of U.S. society and institutions that reflects a board range of perspectives, including the views of scholars and of experts outside the university, such as government officials, public intellectuals and cultural critics, journalists, and other relevant professionals; and,

D. Insure access to extensive bibliographic and materials resources that will enable grantees to continue their research, study and curriculum development after returning to their home institutions.

Program Description

1. Summer Institute on Contemporary American Literature (E/AES–99–01)

This institute should survey contemporary American literature and criticism, examining how major writers, schools and movements have both continued in the tradition of the American literary canon, and at the same time established new directions for American literature. Program may be organized thematically, historically, by genre, or by any combination thereof that serves to suggest the variety, richness and complexity of contemporary American writing.

2. Summer Institute on Change and Reform in American History (E/AEA–99–02)

This institute should examine the history of reform in the United States from the Colonial period to the present. Attention should be given to major periods (e.g., 1830s, 1890s, 1930s), themes (e.g., abolition, women's rights, civil rights) and leading figures and to the larger political, social and economic currents that contributed to and were in turn affected by the various reform movements examined. Attention should also be given to the literature that posits recurring patterns of reform in American life as a way of understanding American institutions generally.

3. Summer Institute on the Foundations of U.S. Foreign Policy (E/AES–99–03)

This institute should examine the foundations—political, social, economic and cultural—of U.S. foreign policy in the Post-Cold War era. Principal themes, critical policy debates and contemporary issues should be examined within the historical context of U.S. international relations since World War II and within the larger framework of U.S. diplomatic history as a whole. The program should be structured to give attention to U.S. policies both in a global context and in major geographic areas.

4. Summer Institute on the U.S. Constitution (E/AES–99–04)

This institute should examine the U.S. Constitution in terms of its origins, its historical evolutions and its significance in contemporary American life. The program should examine the Constitution in terms of its fundamental political principles—federalism, republicanism, checks and balances, separation of powers, individual rights—and also in terms of how the Constitution has served as a defining text through which the central values of American society and institutions have been defined and redefined throughout American history.

Program Dates: Tentative program dates are June 26 to August 6, 1999. Based on these dates, participants would be booked to arrive in the U.S. on or about June 25, and depart on August 7, 1999. USIA is willing to consider adjustment of these program dates, based on the needs of the host institution. However, the institute must be 42 program days in length, and should take place sometime between June 12 and August 28, 1999.

Participants: programs should be designed for a total of 18 highly-motivated and experienced foreign university faculty who are interested in participating in an intensive seminar on aspects of U.S. civilization as a means to develop or improve courses and teaching about the United States at their home institutions. Most participants can be expected to come from educational institutions where the study of the U.S. is relatively well-developed. Thus, while they may not have in-depth knowledge of the particular institute program theme, most will have had some experience in teaching about the United States. Many will have had sustained professional contact with American scholars and American scholarship, and some may have had substantial prior experience studying in the U.S. Participants will be drawn from all regions of the world and will be fluent in English.

Participants will be nominated by U.S. Information Service posts abroad, and selected by the staff of USIA's Branch of the Study of the United States in Washington, DC. USIA will cover all international travel costs directly.

Program Guidelines: The conception, structure and content of the institute program is entirely the responsibility of the organizers. However, given the multiple possibilities for the successful design of such a program, organizers are expected to submit proposals that articulate in concrete detail how they intend to organize and implement the institute.

Programs must comply with J–1 visa regulations. Please refer to the Solicitation Package for further details on program design and implementation, as well as additional information on all other requirements.

Budget Guidelines: Unless special circumstances warrant, based on a group of 18 participants, the total USIA-funded budget (program and administrative) should not exceed $170,000, and USIA-funded administrative costs as defined in the budget details section of the solicitation package should not exceed $51,000. Justifications for any costs above these amounts must be clearly indicated in the proposal submission. Any grants awarded to eligible organizations with less than four years of experience in conducting international exchange programs will be limited to $60,000. Applicant proposals should try to maximize cost-sharing in all facets of the program and to stimulate U.S. private sector, including foundation and corporate, support. Applicants must submit a comprehensive budget for the entire program. The Agency reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program, and availability of U.S. government funding.

Please refer to the "POGI" in the Solicitation Package for complete budget guidelines and formatting instructions for the institute program.

Announcement Name and Number: All communications with USIA concerning this announcement should refer to the following titles and reference numbers:

1. Summer Institute on Contemporary American Literature (E/AES–99–01)

2. Summer Institute on Change and Reform in American History (E/AES–99–02)

3. Summer Institute on the Foundations of U.S. Foreign Policy (E/AES–99–03)

4. Summer Institute on the U.S. Constitution (E/AES–99–04)

FOR FURTHER INFORMATION: To request a Solicitation Package containing more detailed award criteria, required application forms, specific budget instructions, and standard guidelines for proposal preparation, applicants should contact: U.S. Information Agency, Office of Academic Programs, Branch of the Study of the United States, E/AES—Room 252, 301 4th Street, S.W., Washington, D.C. 20547, Attention: Richard Taylor, Telephone number: (202) 619–4557, Fax number: (202) 619–6790, Internet address: rtaylor@usia.gov.

Please specify USIA Program Officer Richard Taylor on all inquiries and correspondence. Interested applicants should read the complete **Federal Register** announcement before addressing inquiries to the office listed above or submitting their proposals. Once the RFP deadline has passed, USIA staff may not discuss this competition in any way with applicants until after the proposal review process has been completed.

To Download a Solicitation Package Via Internet

The entire Solicitation Package may be downloaded from USIA's website at http://www/usia/gov/education/rfps. Please read all information before downloading.

To Receive a Solicitation Package via Fax on Demand

The entire Solicitation Package may be required from the Bureau's Grants Information Fax on Demand System," which is accessed by calling 202/401–7616/ The "Table of Contents" listing available documents and order numbers

should be the first order when entering the system.

Deadline for Proposals: All proposal copies must be received at the U.S. Information Agency by 5:00 p.m. Washington D.C. time on Friday, January 29, 1999. Faxed documents will not be accepted, nor will documents postmarked January 29, 1999 but received at a later date. It is the responsibility of each applicant to ensure that proposal submissions arrive by the deadline.

Submissions: Applicants must follow all instructions in the Solicitation Package. The original and 13 copies of the complete application should be sent to: U.S. Information Agency, Reference: (insert appropriate reference number from above, e.g. E/AES–99–xx), Office of Grants Management, E/XE, Room 326, 301 4th Street, S.W., Washington, D.C. 20547.

Applicants should also submit the "Executive Summary" and Proposal Narrative" sections of the proposal on a 3.5" diskette, formatted for DOS. This material must be provided in ASCII text (DOS) format with a maximum line length of 65 characters.

Diversity, Freedom and Democracy Guidelines: Pursuant to the Bureau's authorizing legislation, programs must maintain a non-political character and should be balanced and representative of the diversity of American political, social, and cultural life. "Diversity" should be interpreted in the broadest sense and encompass differences including, but not limited to ethnicity, race, gender, religion, geographic location, socio-economic status, and physical challenges. Applicants are strongly encouraged to adhere to the advancement of this principle both in program administration and in program content. Please refer to the review criteria under the "Support for Diversity" section for specific suggestions on incorporating diversity into the total proposal. Public Law 104–319 provides that "in carrying out programs of educational and cultural exchange in countries whose people do not fully enjoy freedom and democracy," USIA "shall take appropriate steps to provide opportunities for participation in such programs to human rights and democracy leaders of such countries." Proposals should reflect advancement of this goal in their program contents, to the full extent deemed feasible.

Year 2000 Compliance Requirement (Y2K Requirement): The Year 2000 (Y2K) issue is a broad operational and accounting problem that could potentially prohibit organizations from processing information in accordance with Federal management and program-specific requirements, including data exchange with USIA. The inability to process information in accordance with Federal requirements could result in grantees being required to return funds that have not been accounted for properly.

USIA therefore requires all organizations use Y2K compliant systems including hardware, software, and firmware. Systems must accurately process data and dates (calculating, comparing and sequencing) both before and after the beginning of the year 2000 and correctly adjust for leap years.

Additional information addressing the Y2K issue may be found at the General Service Administration's Office of Information Technology website at http://www.itpolicy.gsa.gov.

Review Process: USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines stated herein and in the Solicitation Package. All eligible proposals will be reviewed by the program office, as well as the USIA Geographic Area Offices. Eligible proposals will then be forwarded to panels of senior USIA officers for advisory review. Proposals may also be reviewed by the Office of the General Counsel or by other Agency elements. Final funding decisions are at the discretion of the USIA Associated Director for Educational and Cultural Affairs. Final technical authority for assistance awards (grants or cooperative agreements) resides with the USIA Grants Officer.

Review Criteria: Technically eligible applications will be competitively reviewed according to the criteria stated below. These criteria are not rank ordered, and all carry equal weight in the proposal evaluation:

1. Overall Quality: Proposals should exhibit originality and substance, consonant with the highest standards of American teaching and scholarship. Program design should reflect the main currents as well as the debates within the subject discipline of each institute. Program should reflect an overall design whose various elements are coherently and thoughtfully integrated. Lectures, panels, field visits and readings, taken as a whole, should offer a balanced presentation of issues, reflecting both the continuity of the American experience as well as the diversity and dynamism inherent in it.

2. Program Planning: Proposals should demonstrate careful planning. The organization and structure of the institute should be clearly delineated and be fully responsive to all program objectives. A program syllabus (noting specific sessions and topical readings supporting each academic unit) should be included, as should a calendar of activities. The travel component should not simply be a tour, but should be an integral and substantive part of the program, reinforcing and complementing the academic segment.

3. Institutional Capacity: Proposed personnel, including faculty and administrative staff as well as outside presenters, should be fully qualified to achieve the project's goals. Library and media resources should be accessible to participants; housing, transportation and other logistical arrangements should be fully adequate to the needs of participants and should be conducive to a collegial atmosphere.

4. Support for Diversity: Proposals should demonstrate substantive support of the Bureau's policy on diversity. This can be accomplished through documentation, such as a written statement, summarizing past and/or on-going activities and efforts that further the principle of diversity within the organization and its activities. Program activities that address this issue should be highlighted.

5. Experience: The proposal should demonstrate an institutional record of successful exchange program activity, indicating the experience that the organization and its professional staff have had in working with foreign educators.

6. Evaluation and Follow-up: The proposal should include a plan for evaluating activities during the Institute and at its conclusion. Proposals should comment on provisions made for follow-up with returned grantees as a means of establishing longer-term individual and institutional linkages.

7. Administration and Management: The proposals should indicate evidence of continuous on-site administrative and managerial capacity as well as the means by which program activities will be implemented.

8. Cost Effectiveness: The proposals should maximize cost-sharing through direct institutional contributions, in-kind support, and other private sector support. Overhead and administrative components of the proposal, including salaries and honoraria, should be kept as low as possible.

Authority: Overall grant making authority for this program is contained in the Mutual Educational and Cultural Exchange Act of 1961, Public Law 87–256, as amended, also known as the Fulbright-Hays Act. The purpose of the Act is "to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries * * *; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations * * * and thus to assist in the development of friendly, sympathetic and peaceful relations between the United States and the other countries of the world."

Notice: The terms and conditions published in this RFP are binding and may not be modified by any USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. The Agency reserves the right to reduce, revise, or increase proposal budgets in accordance with the needs of the program and the availability of funds. Awards made will be subject to periodic reporting and evaluation requirements.

Notification: Final awards cannot be made until funds have been appropriated by Congress, and allocated and committed through internal USIA procedures.

Dated: October 30, 1998.

John P. Loiello,

Associate Director for Educational and Cultural Affairs.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0216]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed reinstatement, without change, of a previously approved collection for which approval has expired, and allow 60 days for public comment in response to the notice. This notice solicits comments on the information needed to determine the appropriate claimant eligible for accrued benefits.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before January 5, 1999.

ADDRESSES: Submit written comments on the.collection of information to Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. Please refer to "OMB Control No. 2900–0216" in any correspondence.

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 273–7079 or FAX (202) 275–5947.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104–13; 44 U.S.C., 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Application for Reimbursement from Accrued Amounts Due a Deceased Beneficiary, VA Form 21–601.

OMB Control Number: 2900–0216.

Type of Review: Reinstatement, without change, of a previously approved collection for which approval has expired.

Abstract: The form is used to file a claim for accrued benefits available at the time of the veteran's death. The information is used by the Veterans Benefits Administration to determine the appropriate claimant eligible for accrued benefits.

Affected Public: Individuals or households—Business or other for-profit.

Estimated Annual Burden: 1,875 hours.

Estimated Average Burden Per Respondent: 30 minutes.

Frequency of Response: One time for most beneficiaries.

Estimated Number of Respondents: 3,750.

Dated: October 8, 1998.

By direction of the Secretary.

Donald L. Neilson,

Director, Information Management Service.

DEPARTMENT OF VETERANS AFFAIRS

Performance Review Board Members

AGENCY: Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Under the provisions of 5 U.S.C. 4314(c)(4) agencies are required to publish a notice in the **Federal Register** of the appointment of Performance Review Board (PRB) members. This notice revises the list of members of the Department of Veterans Affairs (VA) Performance Review Boards which was published in the **Federal Register** on October 15, 1997 (62 FR 53686).

EFFECTIVE DATE: November 6, 1998.

FOR FURTHER INFORMATION CONTACT:
Angel I. Wolfrey, Office of Human Resources Management (052B), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 273–4940.

VA Performance Review Board (PRB)

Eugene A. Brickhouse, Assistant Secretary for Human Resources and Administration (Chairperson)
Nora E. Egan, Deputy Under Secretary for Management, Veterans Benefits Administration
John H. Thompson, Deputy General Counsel
Thomas L. Garthwaite, M.D., Deputy Under Secretary for Health
Nancy M. Valentine, Ph.D., Chief Consultant, Nursing Strategic Healthcare Group Veterans Health Administration
Ventris C. Gibson, Deputy Assistant Secretary for Resolution Management
John T. Hanson, Deputy Assistant Secretary for Intergovernmental Affairs
Sheila C. McCready, Principal Deputy Assistant Secretary for Congressional Affairs
William T. Merriman, Deputy Inspector General
Alma B. Moore, Deputy Director, National Cemetery System
Roger R. Rapp, Director, Field Operations, National Cemetery System
Patrick Nappi, Deputy Under Secretary for Operations, Veterans Benefits Administration (Alternate)
Kenneth J. Clark, Chief Network Officer, Veterans Health Administration (Alternate)
Gerald K. Hinch, Deputy Assistant Secretary for Equal Opportunity (Alternate)
Vincent L. Barile, Director, Operations Support, National Cemetery System (Alternate)

Corrections

Federal Register
Vol. 63, No. 215
Friday, November 6, 1998

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 200

Organization, Functions, and Procedures; Freedom of Information Act

Correction

In rule document 98–26813, beginning on page 53811, in the issue of Wednesday, October 7, 1998, make the following corrections:

1. On page 53811, in the first column, under the heading **EFFECTIVE DATE:**, in the second line, "October 1, 1998" should read "October 7, 1998"

§ 200.8 [Corrected]

2. On page 53812, in the first column, in §200.8 (a), in the first line, "form" should read "from".

BILLING CODE 1505-01-D

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Announcement of Minerals Management Service Meeting on Naurtal Gas Royalty-in-Kind Pilot Program in the Federal Gulf of Mexico Region

Correction

In notice document 98–28910 appearing on page 57703 in the issue of Wednesday, October 28, 1998, make the following correction:

On page 57703, in the third column, in the first line, "communication/unit" should read "communitization/unit".

BILLING CODE 1505-01-D

NUCLEAR REGULATORY COMMISSION

Sunshine Act Meeting

Correction

In notice document 98–28881 beginning on page 57280, in the issue of Tuesday, October 27, 1998, in the third column, the agency name should read as set forth above.

Department of Transportation

Federal Transit Administration

FTA Fiscal Year 1999 Apportionments, Allocations and Program Information; Notice

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

FTA Fiscal Year 1999 Apportionments, Allocations and Program Information

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice.

SUMMARY: The Omnibus Consolidated and Emergency Supplemental Appropriations Act, Fiscal Year 1999 includes Appropriations for Department of Transportation (DOT) and Related Agencies for fiscal year 1999 (Pub. L. 105–277), signed into law by President Clinton on October 21, 1998, and provides fiscal year 1999 appropriations for the Federal Transit Administration (FTA) transit assistance programs. Based upon this Act, the Transportation Equity Act for the 21st Century (TEA–21), and 49 U.S.C. Chapter 53, this Notice contains a comprehensive list of apportionments and allocations of the various transit programs.

This Notice includes the apportionment of fiscal year 1999 funds in the 1999 Omnibus Appropriations Act for the Metropolitan Planning Program and State Planning and Research Program, the Urbanized Area Formula Program, the Nonurbanized Area Formula Program, the Elderly and Persons with Disabilities Program, the Rural Transit Assistance Program, and the Capital Program for Fixed Guideway Modernization. This Notice also contains the allocations of funds for the New Starts and Bus categories under the Capital Program in the 1999 Omnibus Appropriations Act. Also it contains general information about new programs established under TEA–21: the Clean Fuels Formula Program, the Over-the-Road Bus Accessibility Program, the Job Access and Reverse Commute Program, and the Transportation and Community and System Preservation Pilot Program.

Information regarding TEA–21 funding authorization levels for use in developing Metropolitan Transportation Improvement Programs (TIPS) and State Transportation Improvement Programs (STIP) is also included. For informational purposes, this Notice contains the apportionment of fiscal year 1999 funds for the Federal Highway Administration (FHWA) Metropolitan Planning Program and the estimated apportionment of the fiscal year 1999 State Planning and Research Program.

Included in this Notice is a listing of prior year unobligated allocations for the Section 5309 New Starts and Bus Programs as in previous year notices. In addition, the FTA policy regarding pre-award authority to incur project costs, the Letter of No Prejudice Policy, as well as other pertinent program information is included.

FOR FURTHER INFORMATION CONTACT: The appropriate FTA Regional Administrator for grant-specific information and issues; Patricia Levine, Director, Office of Resource Management and State Programs, (202) 366–2053, for general information about the Urbanized Area Formula Program, the Nonurbanized Area Formula Program, the Elderly and Persons with Disabilities Program, the Rural Transit Assistance Program, the Clean Fuels Formula Program, the Over-the-Road Bus Accessibility Program, or the Capital Program; or Robert Stout, Director, Office of Planning Operations, (202) 366–6385, for general information concerning the Metropolitan Planning Program, the State Planning and Research Program, and the Transportation and Community and System Preservation Pilot Program.

  13. Unit Values of Data—FTA FY 1999 Formula Grant Apportionments

I. Background

Metropolitan Planning funds are apportioned by a statutory formula to the Governors for allocation by them to Metropolitan Planning Organizations (MPOs) in urbanized areas or portions thereof. State Planning and Research funds also are apportioned to states by a statutory formula. Urbanized Area Formula Program funds are apportioned by statutory formula to urbanized areas and to the Governors to provide capital, operating and planning assistance in urbanized areas. Nonurbanized Area Formula Program funds are apportioned by statutory formula to the Governors for capital, operating and administrative assistance in nonurbanized areas. The Elderly and Persons with Disabilities Program funds are apportioned by statutory formula to the Governors to provide capital assistance to organizations providing transportation service for the elderly and persons with disabilities. Fixed Guideway Modernization funds are apportioned by statutory formula to specified urbanized areas for capital improvements in rail and other fixed guideways. New Start and Bus funds identified in the Omnibus Appropriations Act are also included in this Notice.

II. Overview of Appropriations for Grant Programs

A. General

The fiscal year 1999 appropriations for the FTA program is $5,390,000,000, the guaranteed funding level under TEA–21, plus an additional $25,000,000 above the guaranteed level to support the Administration's proposed and TEA–21 adopted Job Access and Reverse Commute Program.

In fiscal year 1999, the appropriation for the Metropolitan Planning Program is $43,841,600 and $9,158,400 for the State Planning and Research Program. The appropriation for formula grants totals $2,850,000,000. Under statutory authority, the distribution of the total formula funds available is as follows: $4,849,950 is set aside for the Alaska Railroad, $50,000,000 for the Clean Fuels Formula Program is transferred to the Capital Investment Bus program, and $2,000,000 is for the Over-the-Road Bus Accessibility Program. Of the remaining amount of $2,793,150,050, 91.23 percent ($2,548,190,791) is made available to the Urbanized Area Formula Program, 6.37 percent ($177,923,658) is made available to the Nonurbanized Area Formula Program, and 2.4 percent ($67,035,601) is made available to the Elderly and Persons with Disabilities Program.

The other program appropriations contained in this Notice are as follows: $5,250,000 for the Rural Transit Assistance Program (RTAP); and $2,257,000,000 for the Capital Program. Of the Capital Program amount, $902,800,000 is for Fixed Guideway Modernization, $902,800,000 is for New Starts, and $451,400,000 is for Bus Capital. In addition, $50,000,000 of formula funds for Clean Fuels was transferred to and merged with the Bus Capital Program increasing that program to $501,400,000. $75,000,000 is for the Job Access and Reverse Commute Program.

Table 1 displays the amounts appropriated for these programs, including adjustments and final apportionment and allocation amounts. The following text provides a narrative explanation for the funding levels and other factors affecting these apportionments and allocations.

B. TEA–21 Authorized Program Levels

TEA–21 provides a combination of trust and general fund authorizations that total $6,542,000,000 for fiscal year 1999 FTA program. Of this amount, $5,365,000,000 is guaranteed under the discretionary spending cap. See Table 9 for fiscal years 1998–2003 guaranteed fund levels by program, and Table 9A for the total of guaranteed and non-guaranteed levels by program.

Information regarding estimates of the fundings levels for 1999–2003 by state and urbanized area is available on the FTA home page at www.fta.dot.gov. These numbers are for planning purposes only as they will be revised in the future but may be used for programming metropolitan transportation improvement programs and statewide transportation improvement programs.

C. Project Management Oversight

49 U.S.C. Section 5327 allows the Secretary of Transportation to use not more than one-half percent of the funds made available under the Urbanized Area Formula Program, the Nonurbanized Area Formula Program; the National Capital Transportation Act, as 1 amended; and three-quarters percent of funds made available under the Capital Program to contract with any person to oversee the construction of any major project under these statutory programs; to conduct safety, procurement, management and financial reviews and audits; and to provide technical assistance to correct deficiencies identified in compliance reviews and audits. Therefore, one-half percent of the funds appropriated for the Urbanized Area Formula Program, the Nonurbanized Area Formula Program and the National Capital Transportation Act, as amended, for fiscal year 1999, and three-quarters percent of Capital Program funds have been reserved for these purposes before apportionment of funds.

III. Outreach

A. FTA-Sponsored TEA–21 Listening Sessions

Over a thirty-day period that began in early September of 1998, the FTA conducted eight listening sessions for its customers and constituents. Sessions were held in Dallas, Portland, San Francisco, Atlanta, Kansas City, Chicago, Philadelphia, and New York.

The sessions were designed to allow FTA leadership and staff to hear the concerns and issues that people had with respect to the implementation of TEA–21. The overwhelming majority of people who spoke during the sessions asked questions about new provisions, implementation schedules and funding levels. The principal issues in all of the

sessions were changes in the New Start evaluation process, the new preventive maintenance provision, and the three new programs: Job Access and Reverse Commute; Clean Fuel Formula; and Over-the-Road Bus Accessibility.

B. Revised Program Guidance Circulars

To incorporate changes introduced in TEA–21, FTA has issued revised program guidance circulars. New circulars, which are all effective October 1, 1998, include C9030.1C, Urbanized Area Formula Program: Grant Application Instructions; C9040.1E, Nonurbanized Area Formula Program Guidance and Grant Application Instructions; C9070.1E, Elderly and Persons with Disabilities Program Guidance and Grant Application Instructions; C9300.1A, Capital Program: Grant Application Instructions; and C5010.1C, Grant Management Guidelines.

IV. Emphasis Areas

A. Americans With Disabilities Act Compliance

With eight years since the passage of the Americans with Disabilities Act (ADA), compliance with all aspects of ADA is one of FTA's highest priorities. FTA will continue to focus on grantees' compliance with ADA. Several grantees have entered into voluntary compliance agreements (VCAs) which represent their commitment to come into full compliance. FTA will continue to monitor the milestones in the VCAs and expects the grantees to meet them.

TEA–21 and the fiscal year 1999 Omnibus Appropriations Act provide unprecedented levels of funding for public transportation and these increased funds should be utilized to ensure speedy and full compliance with all aspects of the ADA.

Grantees that may have difficulties with ADA compliance should contact their FTA regional office as soon as they are aware of any problems.

B. National ITS Architecture and Standards Requirements

Section 5206(e) of TEA–21 requires that Intelligent Transportation Systems (ITS) projects using funds from the Highway Trust Fund (including the Mass Transit Account) conform to the National ITS Architecture and Standards. Interim guidance on conformity with National ITS Performance Standards was issued October 2, 1998 jointly by FTA and FHWA. This document provides guidance for meeting this provision of TEA–21 and is available from the FTA regional office or on the internet at www.its.dot.gov. These standards and requirements apply to fiscal year 1999 bus allocations included in this notice which contain ITS components.

Questions regarding the applicability of these standards and requirements should be addressed to the FTA regional office or Ronald Boenau, FTA Office of Research, Demonstration and Innovation at (202) 366–0195.

V. Transportation Electronic Awards and Management System

A. Background

The FTA Grants Management Information System (GMIS) became operational 10 years ago. In 1994 FTA began the Electronic Grant Making and Management (EGMM) initiative. The EGMM program is a paperless electronic grant application, review, approval, acceptance and management process. This program started as a pilot effort and involved 20 grantees nationwide who served as pilots. By fiscal year 1998, 191 grantees were participating in the FTA EGMM program. Over 800 grantees were on line for various management activities such as filing of financial and narrative status reports. In addition, grantees could use EGMM for the electronic signature of annual certifications and assurances. During the assessment of the GMIS, FTA became aware that the GMIS was not Year 2000 compliant.

B. Transportation Electronic Awards and Management System (TEAM)

On November 2, 1998, FTA will introduce its third generation of electronic enhancements when the Transportation Electronic Awards and Management System, the TEAM system, becomes operational. This will make FTA's mission critical grant management systems Year 2000 compliant, and the FTA grant delivery process will not be interrupted. The TEAM system utilizes graphical user interface (GUI) technology providing point and click "Smart" selections that aid the grant recipients with their business process for submitting applications and management reporting.

During fiscal year 1999, the TEAM system will use a dual grant numbering system which includes the current system and one that reflects the codification of Federal transit laws. For example, a current number may be NY–90–X321; the new number would be NY–5307–0321. Starting with fiscal year 2000, only the numbers reflecting the codification will be used.

FTA outreach to the industry has been extensive and thorough. FTA personnel have traveled to 30 cities to conduct hands-on training sessions, which have attracted over 1,200 transit industry professionals—with more sessions underway until everyone who uses FTA programs can access the TEAM system. On September 30, 1998, FTA began distributing the TEAM system software to grantees at no charge and expects all grantees to apply for grants electronically in fiscal year 1999.

C. Fiscal Year 1999 Emphasis

In fiscal year 1999 FTA expects grantees to use the TEAM system grantees for grant application and approval, as well as for grant management activities if they have not already done so. FTA also expects all grantees to file the fiscal year 1999 Certifications and Assurances electronically using the TEAM system.

VI. Expanded Definition of Capital

A. Preventive Maintenance

Preventive maintenance, an expense that became eligible for FTA capital assistance for one year with the DOT 1998 Appropriations Act, was established as permanently eligible for FTA capital assistance under TEA–21; therefore, FY 1998 funds and subsequent fiscal year appropriations may be used for preventive maintenance. Preventive maintenance costs are defined as all maintenance costs. For general guidance regarding eligible maintenance costs, the grantee should refer to the definition of maintenance in the most recent National Transit Database reporting manual. A grantee may continue to request assistance for capital expenses under the FTA policies governing associated capital maintenance items (spare parts), vehicle overhaul as 20 percent of maintenance, maintenance of vehicle leased under contract, and vehicle rebuilds (major re-work); or a grantee may choose to capture all maintenance under preventive maintenance. If a grantee purchases service instead of operating service directly, and maintenance is included in the contract for that purchased service, then the grantee may apply for preventive maintenance capital assistance under the capital cost of contracting policy. The capital cost of contracting policy is discussed below.

For accounting purposes, the grantee is cautioned not to confuse the fact that an item generally considered to be an operating expense is eligible for FTA capital assistance. Generally accepted accounting principles and the grantee's accounting system detemine those costs that are to be accounting for as operating costs. The National Transit Database Reporting System (NTD) follows generally accepted accounting principles, so a grant recipient reporting to the NTD must report the operating costs the grant recipient has incurred as operating costs regardless of its eligibility for FTA capital assistance. Nevertheless, under provisions of TEA–21 and earlier under provision of the fiscal year 1998 Approriations Act, some of those operating costs, while continuing to be accounted for as operating costs in the grant recipient's accounting records, are now eligible for FTA capital assistance. Grantees may not count the same costs twice.

B. ADA Complimentary Paratransit Service

TEA–21 expanded the definition of an eligible capital project to include: "* * * the provision of nonfixed route paratransit transportation in accordance with Section 223 of the Americans with Disabilities Act of 1990 (42 U.S.C. 12143), but only for grant recipients that are in compliance with the applicable requirements of the Act, including both fixed route and demand responsive service, and only for amounts not to exceed 10 percent of such recipient's annual formula apportionment under sections 5307 and 5311."

Recipients of formula funds under the Urbanized Area Formula Program and the Nonurbanized Area Formula Program may now use up to 10 percent of their annual formula apportionment to pay for ADA paratransit operating costs. Section 223 of the ADA defines the specific type of paratransit service that is eligible for this new provision which is implemented in Subpart F of the Department of Transportation's ADA regulation, which (at 49 CFR Part 37) explains the ADA paratransit eligibility process, and the service criteria (service area, response time, fares, trip purpose restrictions, hours and days of service and capacity constraints).

a. *ADA Compliance.* Eligibility for using this expanded definition of capital is dependent upon compliance with ADA requirements. Currently, FTA grantees are required to certify compliance with ADA on an annual basis. Non-compliance with ADA is the result of a formal determination by FTA. Transit systems determined as being in non-compliance are not eligible to use this provision. Grantees who do not make satisfactory progress in negotiating voluntary compliance agreements or who do not achieve milestones within signed agreements will lose their eligibility for funds for paratransit operating expenses.

b. *Non-ADA Paratransit.* Operating costs associated with paratransit services which are not required by the ADA are not eligible for this funding option.

c. *Time of Costs Incurred.* FTA reimbursement at the 80 percent Federal share for ADA paratransit costs under this provision must be by means of a grant awarded after June 9, 1998. Eligible costs must have been incurred in a local fiscal year ending after June 9, 1998.

d. *Implementation in UZA's with More than One Grantee.* For those urbanized areas with more than one ADA paratransit provider, it will be the responsibility of the Metropolitan Planning Organization (MPO), working with the transit operators, to program up to 10 percent of the urbanized area's apportionment should it want to utilize this eligibility.

C. Capital Cost of Contracting

Some FTA grantees contract for transit service, for maintenance service, or for vehicles that the grantee will use in transit service. FTA traditionally provides assistance for the capital consumed in the course of the contract. The concept of assisting with capital consumed is referred to as the "capital cost of contracting." FTA provides assistance at the 80/20 FTA/local share ratio for the capital cost of contracting.

To incorporate the fact that preventive maintenance is now an eligible capital cost, FTA has changed the admininstration of the Capital Cost of Contracting policy, effecitive with fiscal year 1998 funds. Preventive maintenance costs are now included within the capital cost of contracting category, along with the capital charges for the use of assets (capital consumed). Consequently, revisions have been made to the schedule of precentages and type of contract used in the past. The new schedule appears in the revised Circular 9030.1C.

VII. Section 5303 Metropolitan Planning Program and Section 5313(b) State Planning and Research Program

A. Metropolitan Planning Program

The fiscal year 1999 Metropolitan Planning apportionment to states for MPOs to be used in urbanized areas totals $43,901,198. This amount includes $43,841,600 in fiscal year 1999 appropriated funds, and $59,598 in prior year deobligated funds which have become available for reallocation for this program. A basic allocation of 80 percent of this amount ($35,120,958) is distributed to the states based on the state's urbanized area population as defined by the U.S. Census Bureau for subsequent state distribution to each urbanized area, or parts thereof, within each state. A supplemental allocation of the remaining 20 percent ($8,780,240) is also provided to the States based on an FTA administrative formula to address planning needs in the larger, more complex urbanized areas. Table 2 contains the final state apportionments for the combined basic and supplemental allocations. Each state, in cooperation with the MPOs, must develop an allocation formula for the combined apportionment which distributes these funds to MPOs representing urbanized areas, or parts thereof, within the State. This formula, which must be approved by the FTA, must ensure to the maximum extent practicable that no MPO is allocated less than the amount it received by administrative formula under the Metropolitan Planning Program in fiscal year 1991 (minimum MPO allocation). Each state formula must include a provision for the minimum MPO allocation. Where the State and MPOs desire to use a new formula not previously approved by FTA, it must be submitted to the appropriate FTA Regional Office for prior approval.

B. State Planning and Research Program

The fiscal year 1999 apportionment for the State Planning and Research Program totals $9,257,248. This amount includes $9,158,400 in fiscal year 1999 appropriated funds, and $98,848 in prior year deobligated funds which have become available for reallocation to this program. Final state apportionments for this program are also contained on Table 2. These funds may be used for a variety of purposes such as planning, technical studies and assistance, demonstrations, management training, and cooperative research. In addition, a state may authorize a portion of these funds to be used to supplement planning funds allocated by the state to its urbanized areas as the state deems appropriate.

C. Data Used for Metropolitan Planning and State Planning and Research Apportionments

Population data from the 1990 Census is used in calculating these apportionments. The Metropolitan Planning funding provided to urbanized areas in each state by administrative formula in fiscal year 1991 was used as a "hold harmless" base in calculating funding to each State.

D. FHWA Metropolitan Planning Program and State Planning and Research Program

For informational purposes, the fiscal year 1999 apportionment for the FHWA

Metropolitan Planning Program and estimated apportionment for fiscal year 1999 State Planning and Research Program are contained in Table 3.

E. Local Match Waiver for Job Access Planning Activities

Federal, state, and local welfare reform initiatives may require the development of new and innovative public and other transportation services to ensure that former welfare recipients have adequate mobility for reaching employment opportunities. In recognition of the key role that transportation plays in ensuring the success of welfare-to-work initiatives, FTA and FHWA are continuing the policy established last year to permit waiver of the local match requirement for job access planning activities undertaken with metropolitan Planning Program and State Planning and Research Program funds. FTA and FHWA will support requests for waivers when they are included in metropolitan Unified Planning Work Programs and State Planning and Research Programs and meet all other appropriate requirements.

F. Planning Emphasis Areas

(1) The Concept: The FTA and FHWA have cooperatively developed Planning Emphasis Areas (PEA) for fiscal years 1999 and 2000. Emphasis areas promote priority themes for consideration, as appropriate, in metropolitan and statewide transportation planning processes.

(2) An Emphasis on System Management and Operation: TEA–21 identifies system management and operation as a focal theme and context for transportation investment nationwide. The Conference Report supporting TEA–21 contains language that places high priority on Operations and Management, as indicated by the following excerpt. "It is in the national interest to encourage and promote the safe and efficient management, operation, and development of surface transportation systems that will serve the mobility needs of people and freight and foster economic growth and development within and through urbanized areas * * *"

TEA–21 identifies seven planning areas to be considered in metropolitan and statewide planning. These include:

(A) support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;

(B) increase the safety and security of the transportation system for motorized and nonmotorized users;

(C) increase the accessibility and mobility options available to people and for freight;

(D) Protect and enhance the enviroment, promote energy conservation, and improve quality of life;

(E) enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;

(F) promote efficient system management and operation; and

(G) emphasize the preservation of the existing transportation system.

Planning area (F) promotes the consideration of efficient system management and operation in transportation planning processes and recognizes that we cannot always build our way out of congestion but need to better manage and operate the existing system. Many agencies that use a traditional capital intensive, capacity-enhancing programming process to address the area's transportation problems will need to review and revise their planning and programming process to consider system management and operations.

(3) DOT Activities in Support of Management and Operations: FTA and FHWA will work to support metropolitan areas and states in their efforts to incorporate system management and operation strategies in their local planning processes.

DOT is spearheading an effort to develop a collaborative dialogue among a broad range of transportation stakeholders leading to a consensus of the role of management and operations in transportation decision-making. This dialogue would identify customer needs for training and technical assistance. Support for integrated planning and application of Intelligent Transportation Systems (ITS) strategies, including the role of ITS National Architecture, is another effort supporting system management and operation.

(4) Next Steps: FTA and FHWA will be working over the coming months to support further development of the added emphasis on System Management and Operation and outline a comprehensive approach for consideration and use by MPOs.

G. Federal Planning Certification Reviews

Federal certification of the planning process is conducted in a Transportation Management Area (TMA), which is an urbanized area with a population of 200,000 and above or other urbanized areas designated by the Secretary of Transportation (the Secretary). The Secretary is responsible for certifying, at least once every three years, that the metropolitan transportation planning process in the TMA is being carried out under applicable provisions of Federal law.

Dates for site visits for the TMAs to be reviewed in fiscal year 1999 are being established and will be available on the FTA Home Page at http://www.fta.gov/office/planning.

For further information regarding Federal certifications of the planning process contact: For FTA: Mr. Charles Goodman, FTA Metropolitan Planning Division (TPL–12), 202–366–1944; or Scott Biehl, FTA Office of Chief Counsel (TCC–30), 202–366–4063. For FHWA: Mr. Sheldon Edner, FHWA Metropolitan Planning Division (HEP–20), 202–366–4066; or Reid Alsop, FHWA Office of the Chief Counsel (HCC–31), 202–366–1371.

H. Consolidated Planning Grant

In fiscal year 1997, FTA and FHWA began offering states the option of participating in a pilot Consolidated Planning Grant (CPG) program. Eleven states are participating in the pilot so far. Since the first CPG grant was awarded in April 1997, more than $95,000,000 has been obligated by the pilot states. Of this total, more than $69,700,000 is from FHWA sources. Of the eleven participants, nine have completed at least one full year under the pilot. Of the nine, two states have elected to continue the pilot with new, separate CPG grants for the second year. This approach treats the CPG much as FHWA funds are treated currently; that is, as basically annual apportionments with a yearly close-out of project activities and a deobligation and reobligation cycle. Seven states have elected to amend the original CPG grant to add new fiscal year funds to treat the CPG more like an FTA grant, but with even greater flexibility. Under the multi-year approach option, the CPG grant would stay open for a period of years to be determined by the state (and MPO, jointly, for Metropolitan Planning funds) with the approval of the Federal Government. New apportionments can be added by grant amendment as funds become available. The ease with which a state can opt for the single year or the multi-year approach to the CPG grant speaks to the flexibility intended for the program.

One of our original goals in developing the CPG Pilot was to give states and MPOs more control over their planning resources with a combination of broader financial controls and greater flexibility in the management of their planning activities. After more than one full year's experience under the pilot, FTA's annual review of planning program fund balances and potential lapsing funds revealed that none of the pilot states had funds in danger of lapsing (under FTA's planning programs, funds that are unobligated after four years' time lapse to the state). Further, only two of the eleven pilot states have any FTA planning funds available that were appropriated before fiscal year 1998. As in previous years, pre-award authority is granted to both of FTA's planning programs as part of this annual Notice. This pre-award authority enables states to continue planning program activities from year to year with the assurance that eligible costs can later be converted to a regularly funded Federal project without the need for prior approval or authorization from the granting agency.

This November, FTA will be providing an enhancement to its electronic grant system (TEAM system) that can be used to request planning grants, obligate funds, monitor fund balances and grant status, and file financial and status reports for the CPG. While benefiting all grants, these enhancements are particularly well suited to the very streamlined funding request format of the CPG Pilot. As part of the pilot, FTA will continue to work with participating states to increase the flexibility and further streamline the consolidated approach to planning grants. For further information on participating in the CPG Pilot, contact Ms. Candace Noonan, Intermodal and Statewide Planning Division, FTA, at (202) 366–1648 or Anthony Solury, Metropolitan Planning Division, FHWA, at (202) 366–5003.

I. New Starts Evaluation and Criteria

TEA–21 includes several changes to the evaluation process and criteria for New Starts fixed guideway projects. The Secretary shall consider several additional criteria in the Department's review and evaluation of candidate New Starts projects. FTA will be required to evaluate each project authorized for New Starts funding by each criterion, as well as provide an overall project rating of "highly recommended," "recommended," and "not recommended." In addition to its annual report to Congress on Funding Levels and Allocations of Funds for Transit Major Capital Investments, FTA will be required to issue a supplemental report in August of each year which rates all projects that have completed alternatives analysis and preliminary engineering since the date of the last report. FTA must also approve candidate New Starts project's entry into final design. FTA also continues its prior approval authority for entrance into preliminary engineering.

TEA–21 requires that no less than 92 percent of the annual New Starts program must be used for final design and construction.

FTA will soon issue regulations implementing the New Starts provision of TEA–21.

J. Metropolitan Transportation Improvement Programs (TIPs) and State Transportation Improvement Programs (STIPs)

Both the TIPs and STIPs, major products of the metropolitan and State transportation planning processes, continue to be required under TEA–21 and 23 CFR part 450. TEA–21 has provided new authorization levels as well as new programs for the FTA and FHWA. Development of 3-year TIPs and STIPs requires knowledge of Federal FTA and FHWA funding amounts and sources. With respect to Federal funding sources, "available" or "committed" funds identified in TIPs and STIPs are to be taken to mean authorized and/or appropriated funds. Authorized amounts for the purposes of TEA–21 include the total of guaranteed and nonguaranteed funding. FTA and FHWA funding amounts and sources for the six years of TEA–21 are provided by State and/or urbanized areas on the Internet at the following locations: (1) FTA, http://www.fta.dot.gov/library/policy/t21toc.htm and (2) FHWA, http://www.fhwa.dot.gov/tea21/98appor.htm.

K. Metropolitan Planning

TEA–21 retains much of the basic structure of the metropolitan and statewide planning process, as established by ISTEA, with a few significant changes. The set of sixteen metropolitan planning factors has been reduced to seven factors: economic vitality; safety and security; accessibility and mobility; environment, energy conservation and quality of life; integration and connectivity; efficient operation and management; and preservation of existing transportation resources. Freight shippers and users of public transit are added to the explicit set of stakeholders to be given opportunities to comment on metropolitan plans and transportation improvement programs (TIPs).

Metropolitan planning organizations (MPOs) may include in their TIPs an "illustrative" list of projects that could be implemented if additional resources were made available. MPOs will also be encouraged to coordinate the planning for Federally-funded non-emergency transportation services as part of the metropolitan planning process. FTA and FHWA will be revising the Joint Planning Regulations (23 CFR part 450 and 49 CFR part 613) to formally incorporate changes to the planning program.

VIII. Section 5307 Urbanized Area Formula Program

A. Total Urbanized Area Formula Apportionments

In addition to the appropriated fiscal year 1999 Urbanized Area Formula funds of $2,548,190,791, the apportionment also includes $5,055,703 in deobligated funds which have become available for reapportionment for the Urbanized Area Formula Program as provided by 49 U.S.C. 5336(i).

Table 4 displays the amount apportioned for the Urbanized Area Formula Program. After the one-half percent for oversight is set-aside ($12,740,954), the amount appropriated for this program is $2,543,135,088. The funds to be reapportioned, described in the previous paragraph, have then been added. Thus, the total amount apportioned for this program is $2,540,505,540.

An additional $4,849,950 is appropriated for the Alaska Railroad for improvements to its passenger operations. After the one-half percent for oversight is reserved ($24,250), $4,825,700 is available for the Alaska Railroad.

Table 2 contains the fiscal years 1999–2003 apportionment formula for the Section 5307 Urbanized Area Formula Program.

B. Data Used for Urbanized Area Formula Apportionments

Data from the 1997 NTD (49 U.S.C. 5335) Report Year submitted in late 1997 and early 1998 have been used to calculate the fiscal year 1999 Urbanized Area Formula apportionments for urbanized areas 200,000 in population and over. The population and population density figures used in calculating the Urbanized Area Formula are from the 1990 Census.

C. Adjustments for Energy and Operating Efficiencies

49 U.S.C. 5336(b)(2)(E) provides that, if a recipient of Urbanized Area Formula Program funds demonstrates to the satisfaction of the Secretary that energy or operating efficiencies would be achieved by actions that reduce revenue vehicle miles but provide the same frequency of revenue service to the same number of riders, the recipient's apportionment under 49 U.S.C. 5336(b)(2)(A)(i) shall not be reduced as

a result of such actions. One recipient has submitted data acceptable to FTA in accordance with this provision. Accordingly, the revenue vehicle miles used in the Urbanized Area Formula database to calculate the fiscal year 1999 Urbanized Area Formula apportionment reflect the amount the recipient would have received without the reductions in mileage.

D. Urbanized Area Formula Fiscal Year 1999 Apportionments to Governors

The total Urbanized Area Formula apportionment to the Governor for use in areas under 200,000 in population for each state is shown on Table 4. Table 4 also contains the total apportionment amount attributable to each of the urbanized areas within the state. The Governor may determine the allocation of funds among the urbanized areas under 200,000 in population with one exception. As further discussed below in Section H, funds attributed to an urbanized area under 200,000 in population, located within the planning boundaries of a transportation management area, must be obligated in that area.

E. Transit Enhancements

For urbanized areas with populations 200,000 and over, TEA–21 established a minimum annual expenditure requirement of one percent for transit projects and project elements that qualify as enhancements under the Urbanized Area Formula Program. Table 4 indicates the amount set aside for enhancements in these areas. The term "transit enhancement" includes projects or project elements that are designed to enhance mass transportation service or use and are physically or functionally related to transit facilities.

(1) *Eligible enhancements.* Following are the transit projects and project elements that may be counted to meet the minimum enhancement expenditure requirement.

(a) Historic preservation, rehabilitation, and operation of historic mass transportation buildings, structures, and facilities (including historic bus and railroad facilities);

(b) Bus shelters;

(c) Landscaping and other scenic beautification, including tables, benches, trash receptacles, and street lights;

(d) Public art;

(e) Pedestrian access and walkways;

(f) Bicycle access, including bicycle storage facilities and installing equipment for transporting bicycles on mass transportation vehicles;

(g) Transit connections to parks within the recipient's transit service area;

(h) Signage; and

(i) Enhanced access for persons with disabilities to mass transportation.

(2) *Requirements.* One percent of the Urbanized Area Formula Program apportionment in each urbanized area with a population of 200,000 and over must be made available only for transit enhancements. When there are several grantees in an urbanized area, it is not required that each grantee spend one percent of its Urbanized Area Formula Program funds on transit enhancements. Rather, one percent of the urbanized area's apportionment must be expended on projects and project elements that qualify as enhancements. If these funds are not obligated for transit enhancements within three years following the fiscal year in which the funds are apportioned, the funds will lapse and no longer be available to the urbanized area, and will be reapportioned under the Urbanized Area Formula Program.

It will be the responsibility of the MPO to determine how the one percent will be allotted to transit projects. The one percent minimum requirement does not preclude more than one percent being expended in an urbanized area for transit enhancements. Items that are only eligible as enhancements, however—in particular, operating costs for historic facilities—may only be assisted within the one percent fund level.

(3) *Project Budget.* The project budget for each grant application that includes enhancement funds must include a scope code for transit enhancements and specific budget activity line items for transit enhancements.

(4) *Enhancement Report.* The recipient must submit a report to the appropriate FTA Regional Office listing the projects or elements of projects carried out with those funds during the previous fiscal year and the amount expended. The report must be submitted in the Federal fiscal year's final quarterly report, using activity line item codes from the approved project budget.

(5) *Bicycle Access.* TEA–21 provides that projects providing bicycle access to transit assisted with the FTA enhancement apportionment shall be eligible for a 95 percent Federal share.

(6) *Enhanced Access for Persons with Disabilities.* Enhancement projects or elements of projects designed to enhance access for persons with disabilities must go beyond the requirements contained in the Americans with Disabilities Act.

F. Fiscal Year 1999 Operating Assistance

Fiscal year 1999 funding for operating assistance is available only to urbanized areas with populations under 200,000. For these smaller areas, there is no limitation on the amount of the state apportionment that may be used for operating assistance, and the Federal/local share ratio is 50/50. In addition, for all areas, many of the activities formerly funded by FTA with operating assistance are now eligible capital items under the category of preventive maintenance at the Federal/local share ratio of 80/20. TEA–21 provides one exception to the non-availability of funds for operating assistance to areas with populations 200,000 and above. Operating assistance is available to any urbanized area with a populations of 200,000 and above if the number of total bus revenue vehicle miles operated in or directly serving the area is under 900,000, and if the number of buses operated in or directly serving the area does not exceed 15.

This provision is not available to small operators within a large urbanized area in which the total number of vehicles that provide service is more than 15 and the total number of bus revenue vehicle miles operated in or directly servicing the area is 900,000 or more.

The Omnibus Appropriations Act amended Section 3027 of TEA–21 (which in turn amended 49 U.S.C. 5336 regarding use of operating assistance in larger urbanized areas) to allow transit providers of services to the elderly and disabled that operate 20 or fewer vehicles and are located in urbanized areas with a population of at least 200,000 to use Federal funds to finance the operating costs of equipment and facilities used by the transit provider in providing mass transit services to elderly persons and persons with disabilities, providing that such assistance to all entities should not exceed $1,000,000,000 annually.

G. Carryover Funds for Operating Assistance

The operating assistance limitations remain on the unused fiscal years 1996–1998 funds. These funds continue to be available for obligation at the Federal/local share ratio of 50/50 in fiscal year 1999 and throughout the period of availability. For unused fiscal year 1998 funds for areas under 200,000, operating assistance as a capital project with an 80 percent federal match ratio (without limitation) will continue to be available in fiscal year 1999 and throughout the period of availability.

H. Designated Transportation Management Areas

All urbanized areas over 200,000 in population have been designated as transportation management areas (TMAs), in accordance with 49 U.S.C. Section 5305. These designations were formally made in a **Federal Register** Notice dated May 18, 1992 (57 FR 21160), signed by the Federal Highway Administrator and the Federal Transit Administrator. Additional areas may be designated as TMAs upon the request of the Governor and the MPO designated for such area or the affected local officials. As of October 1, 1998, two additional TMAs have been formally designated: Petersburg, Virginia, comprised solely of the Petersburg, Virginia, urbanized area; and Santa Barbara, Santa Maria, and Lompoc, California, which were combined and designated as one TMA.

Guidance for setting the boundaries of TMAs is contained in the joint transportation planning regulations codified at 23 CFR part 450 and 49 CFR part 613. In some cases, the TMA boundaries, which have been established by the MPO for the designated TMA, also include one or more urbanized areas with less than 200,000 in population. Where this situation exists, the discretion of the Governor to allocate Urbanized Area Formula program "Governor's Apportionment" funds for urbanized areas with less than 200,000 in population is restricted.

As required by 49 U.S.C. 5307(a)(2), a recipient(s) must be designated to dispense the Urbanized Area Formula funds attributable to TMAs. Those urbanized areas that do not already have a designated recipient must name one and notify the appropriate FTA regional office of the designation. This would include those urbanized areas with less than 200,000 in population that may receive TMA designation independently, or those with less than 200,00 in population which are currently included within the boundaries of a larger designated TMA. In both cases, the Governor would only have discretion to allocate Governor's Apportionment funds attributable to areas which are outside of designated TMA boundaries. In order for the FTA and Governors to know which urbanized areas under 200,000 in population are included within the boundaries of an existing TMA, and so that they can be identified in future **Federal Register** notices, each MPO whose TMA planning boundaries include these smaller urbanized areas is asked to identify such areas to the FTA. This notification should be made in writing to the Associate Administrator for Program Management, Federal Transit Administration, 400 Seventh Street, SW, Washington, DC 20590, no later than July 1 of each fiscal year. To date, FTA has been notified of the following urbanized areas with less than 200,000 in population that are included within the planning boundaries of designated TMAs:

Designated TMA	Small urbanized area included in TMA boundaries
Baltimore, Maryland	Annapolis, Maryland.
Dallas-Fort Worth, Texas	Denton, Texas; Lewisville, Texas.
Houston, Texas	Galveston, Texas; Texas City, Texas.
Orlando, Florida	Kissimmee, Florida.
Philadelphia, Pennsylvania	Pottstown, Pennsylvania.
Pittsburgh, Pennsylvania	Monessen, Pennsylvania; Steubenville-Weirton, OH–WV–PA (PA portion)
Seattle, Washington	Bremerton, Washington.
Washington, DC–MD–VA	Frederick, Maryland (MD portion).

I. Urbanized Area Formula Funds Used for Highway Purposes

Urbanized Area Formula funds apportioned to a TMA are also available for highway projects if the following three conditions are met: (1) Such use must be approved by the MPO in writing after appropriate notice and opportunity for comment and appeal are provided to affected transit providers; (2) in the determination of the Secretary, such funds are not needed for investments required by the Americans with Disabilities Act of 1990 (ADA); and (3) the MPO determines that local transit needs are being addressed.

Urbanized Area Formula funds which are designated for highway projects will be transferred to and administered by the FHWA. The MPO should notify FTA of its intent to program FTA funds for highway purposes.

IX. Section 5311 Nonurbanized Area Formula Program and Section 5311(b) Rural Transit Assistance Program (RTAP)

A. Nonurbanized Area Formula Program

The fiscal year 1999 Nonurbanized Area Formula apportionments to the states totaling $177,856,722 are displayed in Table 5. Of the $177,923,658 appropriated, one-half percent ($889,618) was reserved for oversight. In addition to the current appropriation, the funds available for apportionment included $822,682 in deobligated funds from fiscal years prior to 1999.

The population figures used in calculating these apportionments are from the 1990 Census.

The Nonurbanized Formula Program provides capital, operating and administrative assistance for areas under 50,000 in population. Each state must spend no less than 15 percent of its fiscal year 1999 Nonurbanized Area Formula apportionment for the development and support of intercity bus transportation, unless the Governor certifies to the Secretary that the intercity bus service needs of the state are being adequately met. Fiscal year 1999 Nonurbanized Area Formula grant applications must reflect this level of programming for intercity bus or include a certification from the Governor.

Funding for the Nonurbanized Area Formula Program is significantly higher under TEA–21 than it was under the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). FTA encourages the states to use the increase to begin to expand the coverage of transit service into rural and small urban areas currently unserved and to improve levels of service in those areas which currently have only minimal transit service.

B. Rural Transit Assistance Program (RTAP)

The fiscal year 1999 RTAP allocations to the states totaling $5,401,831 are also displayed on Table 5. This amount includes $5,250,000 in fiscal year 1999 appropriated funds, and $151,831 in

prior year deobligated funds, which have become available for reallocation for this program.

The funds are allocated to the states to undertake research, training, technical assistance, and other support services to meet the needs of transit operators in nonurbanized areas. These funds are to be used in conjunction with the states' administration of the Nonurbanized Area Formula Program.

Effective with fiscal year 1999, FTA has revised the administrative formula used to allocate RTAP funds to the states, by increasing the minimum allocation each state receives from $50,000 to $65,000. The minimum allocation for the insular areas remains at $10,000. The effect of this change is to distribute the increase in RTAP funds more equitably to the smaller states, to enable them to continue to provide effective RTAP services. Due to the increase in program funding, no state receives an allocation in fiscal year 1999 that is less than in fiscal year 1998.

X. Section 5310 Elderly and Persons with Disabilities Program

A total of $67,136,222 is apportioned to the states for fiscal year 1999 for the Elderly and Persons with Disabilities Program. In addition to the fiscal year 1999 appropriation of $67,035,601, the fiscal year 1999 apportionment also includes $100,621 in prior year unobligated funds which have become available for reapportionment for the Elderly and Persons with Disabilities Program. Table 6 shows each state's apportionment.

The formula for apportioning these funds uses 1990 Census population data for persons aged 65 and over and for persons with disabilities.

The funds provide capital assistance for transportation for elderly persons and persons with disabilities. Eligible capital expenses may include, at the option of the recipient, the acquisition of transportation services by a contract, lease, or other arrangement.

While the assistance is intended primarily for private non-profit organizations, public bodies that coordinate services for the elderly and persons with disabilities, or any public body that certifies to the state that non-profit organizations in the area are not readily available to carry out the service, may receive these funds.

These funds may be transferred by the Governor to supplement the Urbanized Area Formula or Nonurbanized Area formula capital funds during the last 90 days of the fiscal year.

XI. Surface Transportation Program Flexible Funds Used for Transit Purposes (Title 23, U.S.C.)

A. Transfer Process

TEA–21 made changes in how funds are to be transferred from FHWA to FTA. Under ISTEA, obligation authority was not transferred to and from FTA. TEA–21 provides that obligation authority will be transferred to and from FHWA to FTA. In order to accommodate this change, FHWA and FTA are revising internal transfer procedures. The external process from transferring funds may also be revised. Until these revised procedures are developed, the two agencies have agreed to use the transfer process that was established under ISTEA which is described below.

Flexible DOT funds, such as Surface Transportation Program (STP) funds, Congestion Mitigation and Air Quality (CMAQ) funds, or others, which are designated for use in transit projects, are transferred from the FHWA to FTA after which FTA approves the project and awards a grant. Flexible funds designated for transit projects must result from the metropolitan and state planning and programming process, and must be included in an approved State Transportation Improvement Program (STIP) before the funds can be transferred. In order to initiate the transfer process, the grantee must submit a completed application to the FTA Regional Office, and must notify the state highway/transportation agency that it has submitted an application which requires a transfer of funds. Once the state highway/transportation agency determines that the state has sufficient obligation authority, the state agency notifies the FHWA Division Office that the funds are to be used for transit purposes. FHWA then notifies the FTA of the transfer project for processing and obligation. The flexible funds transferred to FTA will be placed in an urbanized area or state account for one of the three existing formula programs—Urbanized Area, Nonurbanized Area, or Elderly and Persons with Disabilities.

The flexible funds are then treated as FTA formula funds, although they retain a special identifying code. They may be used for any purpose eligible under these FTA programs. All FTA requirements are applicable to transferred funds. Flexible funds should be combined with regular FTA formula funds in a single annual grant application.

B. Matching Share for Flexible Funds

The provisions of Title 23, U.S.C. regarding the non-Federal share apply to Title 23 funds used for transit projects. Thus, flexible funds transferred to FTA retain the same matching share that the funds would have if used for highway purposes and administered by the FHWA.

There are three instances in which a higher than 80 percent Federal share would be maintained. First, in states with large areas of Indian and certain public domain lands, and national forests, parks and monuments, the local share for highway projects is determined by a sliding scale rate, calculated based on the percentage of public lands within that state. This sliding scale, which permits a greater Federal share, but not to exceed 95 percent, is applicable to transit projects funded with flexible funds in these public land states. FHWA develops the sliding scale matching ratios for the increased Federal share.

Secondly, commuter carpooling and vanpooling projects and transit safety projects using flexible funds administered by FTA may retain the same 100 percent Federal share that would be allowed for ride-sharing or safety projects administered by the FHWA. The third instance includes the 100 percent Federal safety projects; however, these are subject to a nationwide 10 percent program limitation.

C. Other Funds Transferred to FTA

Certain demonstration projects authorized in title 23 are specified to be used for transit projects and are more appropriately administered by FTA. In such cases, FHWA has transferred the funds to FTA for administration. Since these funds are not STP flexible funds, they are transferred into the appropriate Capital Program category (Bus, New Starts, or fixed Guideway Modernization) for obligation and are administered as Capital projects.

XII. Section 5309 Capital Program

A. Fixed Guideway Modernization

TEA–21 modified the formula for allocating the Fixed Guideway Modernization funds. The new formula contains seven tiers. The allocation of funding under the first four tiers, through fiscal year 2003, will be allocated based on data used to apportion the funding in fiscal year 1997. Funding in the three new tiers will be apportioned based on the latest available route miles and revenue vehicle miles on segments at least seven years old as reported to the National Transit Database.

Table 7 displays the fiscal year 1999 Fixed Guideway Modernization apportionments. Fixed Guideway

Modernization funds apportioned for this section must be used for capital projects to maintain, modernize, or improve fixed guideway systems.

All urbanized areas with fixed guideway systems that are at least seven years old are eligible to receive Fixed Guideway Modernization funds. A request for the start-up service dates for fixed guideways has been incorporated into the National Transit Database reporting system to ensure that all eligible fixed guideway data is included in the calculation of these apportionments. A threshold level of more than one mile of fixed guideway is required to receive Fixed Guideway Modernization funds. Therefore, urbanized areas reported one mile or less of Fixed Guideway mileage under the National Transit Database are not included.

For fiscal year 1999, $902,800,000 was appropriated for fixed guideway modernization. After deducting the three-fourth percent for Oversight ($6,771,000), $896,029,000 is available for apportionment to the specified urbanized areas.

Each year, the new fixed guideway modernization formula will allocate funds by seven tiers as follows:

Tier 1

The first $497,700,000 shall be apportioned to the following urbanized areas as follows: Baltimore $8,372,000; Boston $38,948,000; Chicago/Northwestern Indiana $78,169,000; Cleveland $9,509,500; New Orleans $1,730,588; New York $176,034,461; Northeastern New Jersey $50,604,653; Philadelphia/Southern New Jersey $58,924,764; Pittsburgh $13,662,463; San Francisco $33,989,571; Southwestern Connecticut $27,755,000.

Tier 2

The next $70,000,000 shall be apportioned as follows: 50 percent to areas identified in Tier I and 50 percent to other urbanized areas with fixed guideway segments which have been in operation at least seven years. These funds are apportioned using the Urbanized Area Formula Program fixed guideway tier formula factors that were used to apportion funds for the Fixed Guideway Modernization Program in fiscal year 1997.

Tier 3

The next $5,700,000 shall be apportioned to the following urbanized areas as follows: Pittsburgh, 61.76 percent; Cleveland, 10.73 percent; New Orleans, 5.79 percent; the remaining 21.72 percent is apportioned to all other cities using the same fixed guideway tier data used for Tier II.

Tier 4

The next $186,600,000 shall be apportioned to all eligible areas using the same year fixed guideway tier data that was used for Tiers II and III.

Tier 5

The next $70,000,000 shall be apportioned as follows: 65 percent to the eleven areas specified in Tier I, and 35 percent to other urbanized areas with fixed guideway system segments in revenue service for at least seven years. Allocations will be based on the latest available route miles and revenue vehicle miles for fixed guideway segments at least seven years old as reported to the National Transit Database.

Tier 6

The next $50,000,000 shall be apportioned as follows: 60 percent to the eleven areas specified in Tier I, and 40 percent to the other urbanized areas with fixed guideway system segments in revenue service for at least seven years. Allocations will be based on the latest available route miles and revenue vehicle miles for fixed guideway segments at least seven years old as reported to the National Transit Database.

Tier 7

Any remaining amounts shall be apportioned as follows: 50 percent to the eleven urbanized areas specified in Tier I, and 50 percent to the other urbanized areas with fixed guideway system segments in revenue service for at least seven years. Allocations will be based on the latest available route miles and revenue vehicle miles for fixed guideway segments at least seven years old as reported to the National Transit Database.

Table 12 contains the fiscal years 1998–2003 apportionment formula for the Section 5309 Fixed Guideway Modernization Program.

B. New Starts

The fiscal year 1999 appropriation for New Starts is $902,800,000 which was fully allocated in the fiscal year 1999 DOT Appropriations Act. However, by statute, this amount is reduced by three-fourth percent ($6,771,000) for Oversight activities, leaving $896,029,000 available for allocations to areas. The Oversight reduction was applied on a prorata basis to all 95 projects specified in the fiscal year 1999 Omnibus Appropriations Act yielding the final allocation for each of these projects (contain in Table 8 of this **Federal Register** Notice).

Prior year unobligated appropriations for New Starts in the amount of $430,856,230 remain available for obligation in fiscal year 1999. These carryover amounts are displayed in Table 8A, along with explanatory notes.

Since New Starts funds are used for design and construction of new systems or extensions to existing systems, preventive maintenance is not an eligible cost under this program.

C. Bus

The fiscal year 1999 appropriation for Bus is $451,400,000 for the purchase of buses, bus-related equipment and paratransit vehicles, and for the construction of bus-related facilities. TEA–21 established a $100,000,000 Clean Fuels Formula Program under Section 5308. The program is authorized to be funded with $50,000,000 from the Bus category of the Capital Program, and $50,000,000 from the Formula Program. However, the fiscal year 1999 Omnibus Appropriations Act directs FTA to transfer $50,000,000 Appropriated under the Formula Program to and merge it with funding provided for the Bus category of the Capital Program. Thus, $501,400,000 is available for funding the Bus category of the Capital Program. After deducting the three-fourth percent for oversight ($3,760,500), $497,639,500 remains available for projects.

The 1999 Omnibus Appropriations Act earmarked all of the fiscal year 1999 Bus funds to specified states or localities for bus and bus-related projects.

Because the three-fourth percent for oversight was subtracted from the amount appropriated, each bus project identified in the Conference Report receives three-fourth percent less than the funding level contained in the report. No funds remain available for discretionary allocation by the Federal Transit Administrator. Table 9 displays the allocations of the fiscal year 1999 Bus funds by area and also shows prior year unobligated earmarks for the Bus Program. The fiscal year 1999 bus allocations include the funding which would have been available for the Clean Fuels Formula Program under TEA–21.

Prior year unobligated appropriations for Bus in the amount of $379,813,842 remain available for obligation in fiscal year 1999, and are displayed in Table 9A.

XIII. New Programs

A. Section 5308 Clean Fuels Formula Program

TEA–21 established a $100,000,000 Clean Fuels Formula Program under Section 5308, to be funded with $50,000,000 from the Bus category of the Capital Program, and $50,000,000 from the Formula Program. However, the fiscal year 1999 Omnibus Appropriations Act transfers $50,000,000 appropriated under the Formula Program to and merges it with funding provided for the replacement, rehabilitation and purchase of buses and related equipment and the construction of bus related facilities under the Bus category of the Capital Program. In addition, in fiscal year 1999 Congress allocated the entire Bus category, including the $100,000,000, which TEA–21 provides for funding of the Clean Fuels Formula Program. These appropriation actions override the provisions established in TEA–21 for the Clean Fuels Formula Program. Therefore, FTA cannot implement this new program. A rulemaking to implement the Clean Fuels Formula program is being developed for use in fiscal year 2000. The fiscal year 1999 Bus Allocations on Table 9 include the funding which would have been available for the Clean Fuels Formula Program under TEA–21.

B. Over-the-Road Bus Accessibility Program

The Over-the-Road Bus Accessibility Program (OTRB) authorizes FTA to make grants to operators of over-the-road buses to finance the incremental capital and training costs of complying with the DOT over-the-road bus accessibility final rule, published on September 24, 1998. The legislation calls for national solicitation of applications, with grantees to be selected on a competitive basis. Federal funds are available for up to 50 percent of the project cost. A total of $2,000,000 is apportioned for intercity fixed route operators in fiscal year 1999.

FTA is exploring two approaches for implementation of the capital portion of the program. One approach would be to enter into a cooperative agreement with an intermediate entity which represents the over-the-road bus industry. This entity would serve as the funding distribution mechanism. This approach has the merit of consolidating numerous small grants and would allow a group familiar with the over-the-road bus industry to carry out the program. The entity would accept and review grant applications and make recommendations for funding based on the criteria in TEA–21 and in coordination with FTA and enter into agreements with over-the-road bus providers. The entity would also pass on all Federal requirements to the over-the-road bus operators. TEA–21 provides that all Federal requirements applicable to the Section 5311 Nonurbanized Area Formula Program are applicable to the Over-the-Road Bus Program. Federal requirements include but are not limited to competitive procurement, labor protections, Buy America, and civil rights requirements.

Alternately, FTA may implement the program with individual grants to over-the-road bus operators. With this approach, there would be a national solicitation of applications and FTA would review applications against the criteria in TEA–21 and make recommendations for funding. The appropriate FTA regional office would review the application and approve the grant.

In addition, FTA is proposing to enter into an agreement with a single agency which represents the disability community to take the lead on a national training initiative.

FTA will issue further guidance and application instructions for this program.

C. Job Access and Reverse Commute Program

A total of $75,000,000 is appropriated for the Job Access and Reverse Commute Program in fiscal year 1999. Of this amount, $50,000,000 is guaranteed under the discretionary spending cap and $25,000,000 was made available from other discretionary spending offsets. This program, established under TEA–21, provides funding for the provision of transportation services designed to increase access to jobs and employment-related activities. Job Access projects are those which transport welfare recipients and low-income individuals in urban, suburban, or rural areas to and from jobs and activities related to their employment. Reverse Commute projects provide transportation services for the general public from urban, suburban, and rural areas to suburban employment opportunities.

One of the major goals of the Job Access and Reverse Commute program is to increase collaboration among transportation providers, human service agencies, employers, metropolitan planning organizations, states, and affected communities and individuals. All projects funded under this program must be derived from a regional Job Access and Reverse Commute Transportation Plan, developed through a regional approach which supports the implementation of a variety of transportation services designed to connect welfare recipients to jobs and related activities. A key element of the program is making the most efficient use of existing public, nonprofit and private transportation service providers.

A Federal Register Notice will be published by the end of October which will provide program guidance and application procedures. The notice will also be available on the FTA website.

D. Transportation and Community and System Preservation Pilot Program (TCSP)

Section 1221 of TEA–21 established a pilot program that will enable grantees to plan or implement activities that investigate and address the relationship between transportation and community and system preservation. Eligible grantees are State agencies, metropolitan planning organizations (MPOs) and units of local governments, including public transit agencies. TCSP will provide $20,000,000 in fiscal year 1999 and $25,000,000 per year for fiscal years 2000 through 2003 for planning and implementation grants, as well as research, which address transportation efficiency while meeting community preservation and environmental goals.

TCSP activities must be eligible under Title 23 (the Federal highway program) of Chapter 52 of Title 49 (the Federal transit program) of the United States Code, or must be activities which the Secretary of Transportation determines to be appropriate. TCSP discretionary grants will be used to plan and implement strategies which (1) improve the efficiency of the transportation system; (2) reduce the impacts of transportation on the environment; (3) reduce the need for costly future public infrastructure; (4) ensure efficient access to jobs, services and centers of trade, and (5) encourage private sector development patterns which achieve these goals. Grants will be directed to new and innovative activities that are eligible but under the current Federal-aid program. TCSP activities must be coordinated with the MPO and/or state transportation planning processes.

The FHWA is administering this program and has established an interagency working group, which includes the FTA, to design and implement TCSP. On September 16, 1998, a Federal Register Notice requested comments within 60 days on TCSP implementation in fiscal year 2000 and beyond. The Notice also requested that eligible entities interested in applying for fiscal year 1999 planning and implementation grants should submit letters of intent within 60 days. The DOT expects to select about 50 letters of intent to be developed into full proposals, and to fund 20 to 30 planning and implementation grants in fiscal year 1999. TCSP research activities will begin in fiscal year 2000. The voice mail for information on TCSP is (800) 488–6034.

XIV. Unit Values of Data for the Section 5307 Urbanized Area Formula Program, Section 5311 Nonurbanized Area Formula Program, and Section 5309 Capital Fixed Guideway Modernization

For technical assistance purposes, the dollar unit values of data derived from the computations of the Urbanized Area Formula Program, the Nonurbanized Area Formula Program, and the Capital Program—Fixed Guideway Modernization apportionments are included in this Notice in Table 13. To determine how a particular apportionment amount was developed, areas may multiply their population, population density, and data from the NTD by these unit values.

XV. Period of Availability of Funds

The funds apportioned under the Metropolitan Planning Program and the State Planning and Research Program, the Urbanized Area Formula Program, and the Fixed Guideway Modernization Program, in this notice, will remain available to be obligated by FTA to recipients for three fiscal years following fiscal year 1999. Any of these apportioned funds unobligated at the close of business on September 30, 2002 will revert to FTA for reapportionment under these respective programs.

Funds apportioned to nonurbanized areas under the Nonurbanized Area Formula Program, including RTAP funds, will remain available for two fiscal years following fiscal year 1999. Any such funds remaining unobligated at the close of business on September 30, 2001, will revert to FTA for reapportionment among the states under the Nonurbanized Area Formula Program. Funds allocated to States under the Elderly and Persons with Disabilities Program in this Notice must be obligated by September 30, 1999. Any such funds remaining unobligated as of this date will revert to FTA for reapportionment among the states under the Elderly and Persons with Disabilities Program. The fiscal year 1999 Omnibus Appropriations Act includes a provision requiring that fiscal year 1999 New Starts and Bus funds not obligated for their original purpose as of September 30, 2001, shall be made available for other discretionary projects within the respective categories of the Capital Program. Similar provisions in the 1998 and 1997 DOT Appropriations Acts required that fiscal year 1998 Bus and New Starts funds that are not obligated by September 30, 2000 also be made available for other discretionary Bus or New Starts projects, respectively; and fiscal year 1997 Bus and New Starts funds unobligated by September 30, 1999 shall be made available for other discretionary Bus or New Starts projects, respectively.

XVI. Automatic Pre-Award Authority to Incur Project Cost

A. Background

Since fiscal year 1994, FTA has provided pre-award authority to cover certain planning and capital costs prior to grant award. This automatic pre-award spending authority permits a grantee to incur costs on an eligible transit capital or planning project without prejudice to possible future Federal participation in the cost of the project or projects. Prior to exercising pre-award authority, grantees must comply with the conditions and environmental planning and other Federal requirements outlined in paragraphs B and C immediately below. Failure to do so will render an otherwise eligible project ineligible for FTA financial assistance. In addition, grantees are strongly encouraged to consult with the appropriate regional office if there could be any question regarding the eligibility of the project for future FTA funds or the applicability of the conditions and Federal requirements.

Authority to incur costs for fiscal year 1998 Fixed Guideway Modernization, Metropolitan Planning, Urbanized Area Formula, Elderly and Persons with Disabilities, Nonurbanized Area Formula, STP or CMAQ flexible funds to be transferred from the FHWA and State Planning and Research Programs in advance of possible future Federal participation was provided in the December 5, 1997, **Federal Register** Notice. Pre-award authority was extended in the June 24, 1998 **Federal Register** Notice on TEA–21 to all formula funds and flexible funds that will be apportioned during the authorization period of TEA–21, 1998–2003. Pre-award authority also applies to Capital Bus funds identified in this notice. Pre-award authority does not apply to Capital New Start funds, or to Capital Bus projects not specified in this or previous notices. Pre-award authority also applies to preventive maintenance costs incurred within a local fiscal year ending during calendar year 1997, or thereafter, under the formula programs cited above.

B. Conditions

Similar to the FTA Letter of No Prejudice (LONP) authority, the conditions under which this authority may be utilized are specified below:

(1) This pre-award authority is not a legal or moral commitment that the project(s) will be approved for FTA assistance or that FTA will obligate Federal funds. Furthermore, it is not a legal or moral commitment that all items undertaken by the applicant will be eligible for inclusion in the project(s).

(2) All FTA statutory, procedural, and contractual requirements must be met at the appropriate time.

(3) No action will be taken by the grantee that prejudices the legal and administrative findings which the Federal Transit Administrator must make in order to approve a project.

(4) Local funds expended by the grantee pursuant to and after the date of this authority will be eligible for credit toward local match or reimbursement if FTA later makes a grant for the project(s) or project amendment(s).

(5) The Federal amount of any future FTA assistance to the grantee for the project will be determined on the basis of the overall scope of activities end the prevailing statutory provisions with respect to the Federal/local match ratio at the time the funds are obligated.

(6) For funds to which this authority applies, the authority expires with the lapsing of the fiscal year funds.

C. Environmental, Planning, and Other Federal Requirements

FTA emphasizes that all of the Federal grant requirements must be met for the project to remain eligible for Federal funding. Some of these requirements must be met before pre-award costs are incurred, notably the requirements of the National Environmental Policy Act (NEPA), and the planning requirements. Compliance with NEPA and other environmental laws or executive orders (e.g., protection of parklands, wetlands, historic properties) must be completed *before* state or local funds are spent on implementing activities such as final design, construction, and acquisition for a project that is expected to be subsequently funded with FTA funds. Depending on which class the project is included under in FTA environmental regulations (23 CFR part 771), the grantee may not advance the project beyond planning and preliminary engineering before FTA has approved either a categorical exclusion (refer to 23 CFR part 771.117(d)), a finding of no

significant impact, or a final environmental impact statement. The conformity requirements of the Clean Air Act (40 CFR part 93) also must be fully met before the project may be advanced with non-Federal funds.

Similiarly, the requirement that a project be included in a locally adopted metropolitan transportation improvement program and federally approved statewide transportation improvement program must be followed before the project may be advanced with non-Federal funds. In addition, Federal procurement procedures, as well as the whole range of Federal requirements, must be followed for projects in which Federal funding will be sought in the future. Failure to follow any such requirements could make the project ineligible for Federal funding. In short, this increased administrative flexibility requires a grantee to make certain that no Federal requirements are circumvented through the use of pre-award authority. If a grantee has questions or concerns regarding the environmental requirements, or any other Federal requirements that must be met before incurring costs, it should contact the appropriate regional office.

Before an applicant may incur costs either for activities expected to be funded by New Start funds, or for Bus Capital projects not listed in this notice or previous notices, it must first obtain a written LONP from FTA. To obtain an LONP, a grantee must submit a written request accompanied by adequate information and justification to the appropriate FTA regional office.

XVII. Letter of No Prejudice Policy (Prior Approval of Pre-Award Authority)

A. Policy

The latest guidance on Letters of No Prejudice (LONP) policy and procedures is contained in an October 21, 1982 **Federal Register** Notice. Since the issuance of that notice in 1982 there have been many changes to the FTA program including automatic pre-award authority for formula funds, flexible funds transferred from the FHWA and for bus earmarks. The 1982 policy was based on the philosophy that LONPs would only be issued under the most extenuating circumstances. With substantial experience with automatic pre-award authority, this philosophy is no longer an accurate reflection of FTA policy. This **Federal Register** Notice supersedes the Letter of No Prejudice (LONP) policy issued October 21, 1982.

LONP authority allows an applicant to incur costs on a future project utilizing non-Federal resources with the understanding that the costs incurred subsequent to the issuance of the LONP may be reimbursable as eligible expenses or eligible for credit toward the local match should the FTA approve the project at a later date. LONPs are applicable to projects not covered by automatic pre-award authority. The majority of LONPs will be for New Starts not covered under a full funding grant agreement or for Section 5309 bus funds not yet appropriated by Congress. At the end of an authorization period, there may be LONPs for formula funds beyond the life of the current authorization.

Under most circumstances the LONP will cover the total project. Under certain circumstances the LONP may be issued for local match only. In such cases the local match would be to permit real estate to be used for match for the project at a later date.

B. Conditions

The following conditions apply to all LONPs.

(1) LONP pre-award authority is not a legal or moral commitment that the project(s) will be approved for FTA assistance or that FTA will obligate Federal funds. Furthermore, it is not a legal or moral commitment that all items undertaken by the applicant will be eligible for inclusion in the project(s).

(2) All FTA statutory, procedural, and contractual requirements must be met.

(3) No action will be taken by the grantee that prejudices the legal and administrative findings which the Federal Transit Administrator must make in order to approve a project.

(4) Local funds expended by the grantee pursuant to and after the date of the LONP will be eligible for credit toward local match or reimbursement if FTA later makes a grant for the project(s) or project amendment(s).

(5) The Federal amount of any future FTA assistance to the grantee for the project will be determined on the basis of the overall scope of activities and the prevailing statutory provisions with respect to the Federal/local match ratio at the time the funds are obligated.

(6) For funds to which this pre-award authority applies, the authority expires with the lapsing of the fiscal year funds.

C. Environmental, Planning, and Other Federal Requirements

As with automatic pre-award authority, FTA emphasizes that all of the Federal grant requirements must be met for the project to remain eligible for Federal funding. Some of these requirements must be met before pre-award costs are incurred, notably the requirements of the National Environmental Policy Act (NEPA), and the planning requirements. Compliance with NEPA and other environmental laws or executive orders (e.g., protection of parklands, wetlands, historic properties) must be completed before state or local funds are spent on implementation activities such as final design, construction, or acquisition for a project expected to be subsequently funded with FTA funds. Depending on which class the project is included under in FTA's environmental regulations (23 CFR part 771), the grantee may not advance the project beyond planning and preliminary engineering before FTA has approved either a categorical exclusion (refer to 23 CFR part 771.117(d)), a finding of no significant impact, or a final environmental impact statement. The conformity requirements of the Clean Air Act (40 CFR part 93) also must be fully met before the project may be advanced with non-Federal funds.

Similarly, the requirement that a project be included in a locally adopted metropolitan transportation improvement program and federally approved statewide transportation improvement program must be followed before the project may be advanced with non-Federal funds. In addition, Federal procurement procedures, as well as the whole range of Federal requirements, must be followed for projects in which Federal funding will be sought in the future. Failure to follow any such requirements could make the project ineligible for Federal funding. In short, this pre-award authority requires a grantee to make certain that no Federal requirements are circumvented. If a grantee has questions or concerns regarding the environmental requirements, or any other Federal requirements that must be met before incurring costs, it should contact the appropriate regional office.

D. Request for LONP

Before an applicant may incur costs for a project not covered by automatic pre-award authority, it must first submit a written request for an LONP to the appropriate regional office. This written request must include a description of the project for which pre-award authority is desired and a justification for the request.

XVIII. State Infrastructure Banks

The State Infrastructure Bank (SIB) pilot program was authorized in the National Highway System Designation Act of 1995. It allows the creation of state-level institutions that can use Federal Highway Administration (FHWA) and FTA funds to make loans and loan guarantees (and other forms of credit enhancement) to transit and highway projects. The SIBs may earn interest on deposits of Federal funds, and they may charge below-market interest rates on long-term loans.

While 31 states established SIBs under the NHS Act authorizations, TEA–21 only renewed this authority to four states—California, Florida, Missouri, and Rhode Island. Thus, the original SIBs may continue to function with funds appropriated for their use in 1996 and 1997, but only the four SIBs authorized in TEA–21 will be allowed to use fiscal year 1998 and subsequent year grant funds for capitalization. These states may use up to 100 percent of their highway or transit formula funds for capitalization, but there are no additional funds apportioned specifically to SIBs. TEA–21 also allowed the four authorized SIBs to use any Federal capital funds to make loans to highway, transit, and rail projects—a significant increase in flexibility.

XIX. FTA Home Page on the Internet

FTA provides extended customer service by making available transit information on the FTA Home Page web site, including this Apportionment Notice. Also posted on the web site are FTA program circulars: C9030.1C, Urbanized Area Formula Program: Grant Application Instructions, dated October 1, 1998; C9040.1E, Nonurbanized Area Formula Program Guidance and Grant Application Instructions, dated October 1, 1998; C9070.1E, Elderly and Persons with Disabilities Program Guidance and Application Instructions, dated October 1, 1998; C9300.1A, Capital Program: Grant Application Instructions, dated October 1, 1998; 4220.1D, Third Party Contracting Requirements, dated April 15, 1996; C5010.1C, Grant Management Guidelines, dated October 1, 1998; and C8100.1B, Program Guidance and Application Instructions for Metropolitan Planning Program Grants, dated October 25, 1996. The fiscal year 1999 Annual List of Certifications and Assurances is also posted on the FTA web site. Other documents on the FTA web site of particular interest to public transit providers and users include the 1997 Statistical Summaries of FTA Grant Assistance Programs, and the National Transit Database Profiles.

The FTA Home Page may be accessed at: http://www.fta.dot.gov. FTA circulars and other guidance are at: http://www.fta.dot.gov/program.

Grantees should check our web site frequently to keep up to date on new postings.

XX. 1999 Annual List of Certifications and Assurances

The Fiscal Year 1999 Annual List of Certifications and Assurances is published in conjunction with the Apportionments, as per 49 U.S.C. section 5307(k). It appears as a separate Part of the **Federal Register** on the same date whenever possible. The 1999 list contains several changes to the previous year's **Federal Register** publication. (1) All applicants for FTA Capital Program or Formula Program assistance, and current grantees with an active project financed with FTA Capital Program or Formula Program assistance, will be required to provide the Appendix A Certifications and Assurances within 90 days from the date of the above **Federal Register** publication or with its first grant application in fiscal year 1999, whichever comes first. (2) The attorney signature from previous years on the single signature page is not acceptable. A current attorney's affirmation is required to certify applicant's legal authority to comply with fiscal year 1999 FTA funding assistance. (3) As in previous years, the grant applicant should (when possible) certify electronically, indicating that a current attorney's signature is on file. (4) The applicant is advised that Transit Enhancement activities (49 U.S.C. 5307(k)) require an annual report listing projects carried out during the previous year.

The fiscal year 1999 Annual List of Certifications and Assurances is accessible on the Internet at www.fta.dot.gov. Any questions regarding this document may be addressed to the appropriate Regional Office or to Pat Berkley, Office of Program Management, Federal Transit Administration, (202) 366–6470.

XXI. Grant Application Procedures

All applications for FTA funds should be submitted to the appropriate FTA Regional Office. As described in Section V, FTA is expecting that most applications will be filed electronically in FY 1999 using the new TEAM system. Formula grant applications should be prepared in conformance with the following FTA Circulars: Program Guidance and Application Instructions for Metropolitan Planning Program Grants—C8100.1B, October 25, 1996; Urbanized Area Formula Program: Grant Application Instructions—C9030.1C, October 1, 1998; Nonurbanized Area Formula Program Guidance and Grant Application Instructions—C9040.1E, October 1, 1998; Section 5310 Elderly and Persons with Disabilities Program Guidance and Application Instructions C9070.1E, October 1, 1998; and Section 5309 Capital Program: Grant Application Instructions—C9300.1A, October 1, 1998. Applications for STP "flexible" fund grants should be prepared in the same manner as the apportioned funds under the Urbanized Area Formula, Nonurbanized Area Formula, or Elderly and Persons with Disabilities Programs. Guidance on preparation of applications for State Planning and Research funds may be obtained from each FTA Regional Office. Copies of circulars are available from FTA Regional Offices as well as the FTA Home Page on the Internet.

Issued on: October 29, 1998.

Gordon J. Linton,

Administrator.

BILLING CODE 4910–67–M

TABLE 1

FEDERAL TRANSIT ADMINISTRATION

FY 1999 APPROPRIATIONS FOR GRANT PROGRAMS

SOURCES OF FUNDS	FY 1999 APPROPRIATIONS
TRANSIT PLANNING AND RESEARCH PROGRAMS	
Planning:	
Section 5303 Metropolitan Planning Program	$43,841,600
Reapportioned Funds Added	59,598
Total Apportioned	$43,901,198
Section 5313(b) State Planning and Research Program	$9,158,400
Reapportioned Funds Added	98,848
Total Apportioned	$9,257,248
Research:	
Section 5311(b) Rural Transit Assistance Program (RTAP)	$5,250,000
Reapportioned Funds Added	151,831
Total Apportioned	$5,401,831
FORMULA PROGRAMS	$2,850,000,000
Alaska Railroad (Section 5307)	4,849,950
Less Oversight (one-half percent)	(24,250)
Total Available	4,825,700
Section 5308 Clean Fuels Formula Program	50,000,000 a/
Over-the-Road Bus Accessibility Program	2,000,000
Section 5307 Urbanized Area Formula Program	
91.23% of Total Available for Sections 5307, 5311, and 5310	$2,548,190,791
Less Oversight (one-half percent)	(12,740,954)
Reapportioned Funds Added	5,055,703
Total Apportioned	$2,540,505,540
Section 5311 Nonurbanized Area Formula Program	
6.37% of Total Available for Sections 5307, 5311, and 5310	$177,923,658
Less Oversight (one-half percent)	(889,818)
Reapportioned Funds Added	822,882
Total Apportioned	$177,856,722
Section 5310 Elderly and Persons with Disabilities Formula Program

TABLE 11

FEDERAL TRANSIT ADMINISTRATION - Fiscal Years 1999-2003
Apportionment Formula for Section 5307 Urbanized Area Formula Program

Percent of Formula Funds Available--

Section 5310: 2.4% States (Allocated to states based on state's population of elderly and persons with disabilities)

Section 5311: 6.37% Nonurbanized Areas (Allocated to states based on each state's nonurbanized area population)

Section 5307: 91.23% Urbanized Areas

(UZA) Population - Weighting Factors

50,000-199,000 9.32%
(Apportioned to Governors)
- 50% - population
- 50% - population x density
  [density = inhabitants / square mile]

>200,000 90.68%
(Apportioned to UZAs)

33.29% ("Fixed Guideway" Tier*)
- 95.61% [at least 0.75% of these funds for each UZA with commuter rail & pop. > 750,000]
  - 60% - fixed guideway revenue vehicle miles
  - 40% - fixed guideway route miles
- 4.39% ("Incentive" Portion of Tier)
  [at least 0.75% of these funds for each UZA with commuter rail & pop. > 750,000]
  -- fixed guideway passenger miles x fixed guideway passenger miles/operating cost

66.71% ("Bus" Tier)
- 90.8%
  - 73.39% for UZAs with pop. >1,000,000
    - 50% - bus revenue vehicle miles
    - 25% - population
    - 25% - population x density
  - 26.61% for UZAs pop. < 1,000,000
    - 50% - bus revenue vehicle miles
    - 25% - population
    - 25% - population x density
- 9.2% ("Incentive" Portion of Tier)
  -- bus passenger miles x bus passenger miles / operating cost

*Includes all fixed guideway modes, such as heavy rail, commuter rail, light rail, trolleybus, aerial tramway, inclined plane, cable car, automated guideway transit, ferryboats, exclusive busways, and HOV lanes.

TABLE 12

FEDERAL TRANSIT ADMINISTRATION - Fiscal Years 1998-2003
Apportionment Formula for Section 5309 Fixed Guideway Modernization Program

Tier 1 — First $497,700,000 to the following areas:

Baltimore	$ 8,372,000
Boston	38,948,000
Chicago/N.W. Indiana	78,169,000
Cleveland	9,509,500
New Orleans	1,730,588
New York	176,034,461
N. E. New Jersey	50,604,653
Philadelphia/So. New Jersey	58,924,764
Pittsburgh	13,662,463
San Francisco	33,989,571
SW Connecticut	27,755,000

Tier 2 — Next $70,000,000 as follows: Tier 2(A): 50 percent is allocated to areas identified in Tier 1 and Tier 2(B): 50 percent to other urbanized areas with fixed guideway tiers in operation at least seven years. Funds are allocated by the Urbanized Area Formula Program fixed guideway tier formula factors that were used to apportion funds for the fixed guideway modernization program in FY 1997.

Tier 3 — Next $5,700,000 as follows: Pittsburgh 61.76%; Cleveland 10.73%; New Orleans 5.79% and 21.72% is allocated to all other areas in Tier 2(B) by the same fixed guideway tier formula factors used in fiscal year 1997.

Tier 4 — Next $186,600,000 as follows: All eligible areas using the same year fixed guideway tier formula factors used in fiscal year 1997.

Tier 5 — Next $70,000,000 as follows: 65% to the 11 areas identified in Tier 1, and 35% to all other areas using the most current Urbanized Area Formula Program fixed guideway tier formula factors. Any segment that is less than 7 years old in the year of the apportionment will be deleted from the data base.

Tier 6 — Next $50,000,000 as follows: 60% to the 11 areas identified in Tier 1, and 40% to all other areas using the most current Urbanized Area Formula Program fixed guideway tier formula factors. Any segment that is less than 7 years old in the year of the apportionment will be deleted from the data base.

Tier 7 — Remaining amounts as follows: 50% to the 11 areas identified in Tier 1, and 50% to all other areas using the most current Urbanized Area Formula Program fixed guideway formula factors. Any segment that is less than 7 years old in the year of the apportionment will be deleted from the data base.

Federal Transit Administration

Fiscal Year 1999 Annual List of Certifications and Assurances for Federal Transit Administration Grants and Cooperative Agreements; Notice

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Fiscal Year 1999 Annual List of Certifications and Assurances for Federal Transit Administration Grants and Cooperative Agreements

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice.

SUMMARY: This Notice contains FTA's comprehensive compilation of the Federal Fiscal Year 1999 certifications and assurances to be used in connection with all Federal assistance programs administered by FTA during Federal Fiscal Year 1999. (See Appendix A.) These certifications and assurances include all annual certifications required by 49 U.S.C. 5307(d)(1) for FTA's Urbanized Area Formula Program as well as other certifications and assurances needed for compliance with various other Federal statutes and regulations affecting FTA's assistance programs.

EFFECTIVE DATE: November 6, 1998.

FOR FURTHER INFORMATION CONTACT: Pat Berkley, Office of Program Management, Federal Transit Administration, (202) 366–6470; the FTA Web Site at http://www.fta.dot.gov; or contact FTA staff in the appropriate Regional Office listed below. For copies of other related documents, contact the Office of Public Affairs, Federal Transit Administration (202) 366–4019.

Region 1: Boston

States served: Maine, New Hampshire, Vermont, Connecticut, Rhode Island, and Massachusetts, Telephone #617–494–2055

Region 2: New York

States served: New York, New Jersey, and Virgin Islands, Telephone #212–264–8162

Region 3: Philadelphia

States served: Pennsylvania, Delaware, Maryland, Virginia, West Virginia, and District of Columbia, Telephone #215–656–7100

Region 4: Atlanta

States served: Kentucky, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, and Puerto Rico, Telephone #404–562–3500

Region 5: Chicago

States served: Minnesota, Wisconsin, Michigan, Illinois, Indiana, and Ohio, Telephone #312–353–2789

Region 6: Dallas/Ft.Worth

States served: Arkansas, Louisiana, Oklahoma, Texas, and New Mexico, Telephone #817–860–9663

Region 7: Kansas City

States served: Missouri, Iowa, Kansas, and Nebraska, Telephone #816–523–0204

Region 8: Denver

States served: Colorado, Utah, Wyoming, Montana, North Dakota, South Dakota, Telephone #303–844–3242

Region 9: San Francisco

States served: California, Hawaii, Guam, Arizona, Nevada, American Samoa, and the Northern Mariana Islands, Telephone #415–744–3133

Region 10: Seattle

States served: Idaho, Oregon, Washington, and Alaska, Telephone #206–220–7954

SUPPLEMENTARY INFORMATION: Before FTA may award a Federal grant or cooperative agreement, the applicant must provide to FTA all certifications and assurances required by Federal laws and regulations for the applicant or its project.

This Notice provides the text of certifications and assurances that may be required by Federal law, regulations, or directives for the various Federal assistance programs administered by FTA including the Capital Program, the Urbanized Area Formula Program, the Nonurbanized Area Formula Program, the Metropolitan Planning Program, the Rural Transit Assistance Program, the Elderly and Persons With Disabilities Program, the Human Resource Program, the National Training Institute Program, the State Planning and Research Program, the National Planning and Research Program, the *Joint Partnership Program for Deployment of Innovation Program and the International Mass Transportation Program*, all codified at 49 U.S.C. chapter 53. When administering Federal assistance programs authorized by other Federal statutes, such as Title 23, United States Code, FTA uses these same certifications and assurances during Federal Fiscal Year 1999. In addition FTA will also use these certifications in administering the new Job Access and Reverse Commute Program, the Over-the-road Bus Accessibility Program, the State Infrastructure Bank Pilot Program, and the Pilot Program for Intercity Rail Infrastructure authorized by the Transportation Equity Act for the 21st Century (TEA–21).

This Notice provides the applicant with a single Signature Page on which the applicant and its attorney certifies compliance with all certifications and assurances applicable to each grant or cooperative agreement for which the applicant wishes to apply in Federal Fiscal Year 1999. (See Signature Page of Appendix A.)

An applicant's Annual Certifications and Assurances applicable to a specific grant or cooperative agreement generally remain in effect for the life of the grant or cooperative agreement to closeout, or the life of the project or project property when a useful life or standard industry life is in effect. If in a later year, however, the Applicant provides certifications and assurances that differ from the certifications and assurances previously made, the later certifications and assurances will apply to the grant, cooperative agreement, project, or project property, except as FTA otherwise permits.

Electronic Submission

FTA has expanded the use of the electronic programs for applicants, first introduced in 1995. Beginning with Fiscal Year 1999, FTA expects applicants to submit their applications as well as certifications and assurances electronically by means of the FTA electronic grant award and management system. If an applicant is not able to submit the certifications electronically, the applicant should use the Signature Page form in Appendix A of this **Federal Register** Notice. The Signature Page contains the current fiscal year's certifications and, when properly attested to and submitted to FTA, assures FTA that the applicant intends to comply with the requirements for the specific program involved. Applicants may contact the appropriate Regional Office shown above for more information.

1999 Changes

(1) All Applicants for FTA capital program or formula program assistance, and current Grantees with an active project financed with FTA capital program or formula program assistance, will be required to provide the Appendix A Certifications and Assurances within 90 days from the date of this publication or with its first grant application in Fiscal Year 1999, whichever comes first. (2) The attorney signature from previous years on the Single Signature Page will not be acceptable. FTA requires a current attorney's affirmation of the Applicant's legal authority to certify compliance with the funding obligations in this document. Additional changes include clarification and reference sources. It is important that each applicant be familiar with all fifteen certification and assurance categories contained in this document as they may be a prerequisite for receiving FTA financial assistance. (3) Recipients of funds apportioned under Section 5336 serving a population of 200,000 or more are required by Section 5307(k) to make 1 per cent of their funds available for transit enhancement activities. In addition, those recipients are also required to submit a report annually listing the projects carried out during the preceding fiscal year with those funds. (See Signature Page.) (4) A recipient of funds under sections 5312(d) *Joint Partnership Program for Deployment of Innovation* and 5312(e), *International Mass Transportation Program* will be required to comply with the requirements of the 1999 Annual Certifications and Assurances. (5) A recipient of funds under the Transportation Equity Act for the 21st Century programs under section 3021, *Pilot Program for Intercity Rail Infrastructure* (only Oklahoma); *Job Access and Reverse Commute Grant Program (section 3037);* and *Over-the-road Bus Accessibility Program (3038)* will be required to comply with the requirements of the 1999 Annual Certification Program.

FTA directs your attention to Appendix C in FTA Circular 9300.1A, "Capital Program Grant Application Instructions," which was published on October 1, 1998; to Exhibit D in FTA Circular 9040.1E, dated October 1, 1998, "Nonurbanized Area Formula Program Guidance and Grant Application Instructions; and Appendix G of FTA Circular 9030.1C, dated October 1, 1998, Urbanized Area Formula Program: Grant Application Instructions. These circulars contain a previous version of the Annual Certifications and Assurances which includes some but not all of the most current and valid changes. Do not use the document contained in these circulars. They are examples only and will not be considered acceptable or valid. Therefore the provisions of this Notice supersede conflicting statements in those circulars. Note especially that the Applicant must use the most current Signature Pages shown in this Federal Fiscal Year *1999* **Federal Register** document or provide the signature concurrently through the transportation electronic award and management system for all applicants. A copy of an earlier fiscal year's Certification Signature page is not acceptable.

Background

With the publication of the Federal Fiscal Year 1995 version of this Notice, certifications and assurances for Federal assistance programs administered by FTA were for the first time consolidated into one document. This marked the beginning of an effort to assist applicants in reducing time and paper work in certifying compliance with various Federal laws and regulations. It coincided with the on-line program and the electronic initiative described above, which also reduced the time and paper required to process an application.

FTA intends to continue publishing this document annually with any changes or additions specifically highlighted, in conjunction with its publication of the FTA annual apportionment Notice, which allocates funds in accordance with the latest U.S. Department of Transportation (U.S. DOT) annual appropriations act.

Procedures

Following is a detailed compilation of Certifications and Assurances and the Signature Page (Appendix A). The Signature Page is to be signed by the applicant's authorized representative and its attorney. It is to be electronically transmitted through the FTA computerized on-line system, to the appropriate FTA Regional office within 90 days of this **Federal Register** publication date or with the applicant's first Federal assistance application in Federal Fiscal Year 1999, whichever comes first.

All applicants are advised to read the entire 1999 Certifications and Assurances to be confident of their responsibilities and commitments. The applicant may signify compliance with all Categories by placing a single "X" in the appropriate space at the top of the Signature Selection Page in Appendix A. However, the applicant's Attorney Affirmation continues to be required as indicated on the Signature Page at the end of Appendix A, regardless of the applicant's selection of a single selection for all fifteen Categories, or individual options selected from the fifteen Categories.

The Signature Page, when electronically transmitted to FTA or properly signed and submitted, assures FTA that the applicant intends to comply with the requirements for the specific program(s) involved, should they apply for an FTA grant during this fiscal year. All applicants must read the selection portion and the signature portion of this document and signify compliance by marking, where appropriate, with an "X" on the category selection side, and then signifying compliance as indicated. (See Appendix A.) An applicant participating in the electronic award and management program, described above, may submit its Signature Page (both the selection side and the signature side) electronically. The applicant should not hesitate to consult with the appropriate Regional Office or Headquarters Office before submitting its certifications and assurances.

Administrator.

Appendix A

Federal Fiscal Year 1999 Certifications and Assurances for Federal Transit Administration Assistance Programs

In accordance with 49 U.S.C. 5323(n), the following certifications and assurances have been compiled for the various Federal Transit Administration (FTA) programs. FTA requests each Applicant provide as many of the following certifications and assurances as needed to cover the various types of programs for which the Applicant intends to seek FTA assistance in Federal Fiscal Year 1999. A state providing certifications and assurances on behalf of its prospective subrecipients is expected to obtain sufficient documentation from those subrecipients needed to provide informed certifications and assurances. The fifteen categories of certifications and assurances are listed by Roman numerals I through XV on the other side of the Signature Page of this document. Categories II through XV will apply to some, but not all, applicants. The designation of the categories corresponds to the circumstances mandating submission of specific certifications, assurances, or agreements.

I. Certifications and Assurances Required of Each Applicant

Each Applicant for Federal assistance awarded by FTA *must* provide all certifications and assurances in this Category I. Accordingly, FTA may not award any Federal assistance until the Applicant provides assurance of compliance by selecting Category I on the Signature Page at the end of this document.

A. Authority of Applicant and Its Representative

The authorized representative of the Applicant and legal counsel who sign these certifications, assurances, and agreements attest that both the Applicant and its authorized representative have adequate authority under state and local law and the

by-laws or internal rules of the Applicant organization to:

(1) Execute and file the application for Federal assistance on behalf of the Applicant,

(2) Execute and file the required certifications, assurances, and agreements on behalf of the Applicant binding the Applicant, and

(3) Execute grant and cooperative agreements with FTA on behalf of the Applicant.

B. Standard Assurances

The Applicant assures that it will comply with all applicable Federal statutes, regulations, executive orders, FTA circulars, and other Federal administrative requirements in carrying out any project supported by an FTA grant or cooperative agreement. The Applicant acknowledges that it is under a continuing obligation to comply with the terms and conditions of the grant or cooperative agreement issued for its project with FTA. The Applicant understands that Federal laws, regulations, policies, and administrative practices might be modified from time to time and affect the implementation of the project. The Applicant agrees that the most recent Federal requirements will apply to the project, unless FTA issues a written determination otherwise.

C. Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions

As required by U.S. DOT regulations on Governmentwide Debarment and Suspension (Nonprocurement) at 49 CFR 29.510:

(1) The Applicant (Primary Participant) certifies, to the best of its knowledge and belief, that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not, within a three-year period preceding this certification, been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, state, or local) transaction or contract under a public transaction, violation of Federal or state antitrust statutes, or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, state, or local) with commission of any of the offenses listed in subparagraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this certification had one or more public transactions (Federal, state, or local) terminated for cause or default.

(2) The Applicant also certifies that, if it later becomes aware of any information contradicting the statements of paragraph (1) above, it will promptly provide that information to FTA.

(3) If the Applicant (Primary Participant) is unable to certify to the statements in paragraphs (1) and (2) above, it shall indicate so on its Signature Page and provide a written explanation to FTA.

D. Drug-Free Workploce Agreement

As required by U.S. DOT regulations, "Drug-Free Workplace Requirements (Grants)," 49 CFR Part 29, Subpart F, as modified by 41 U.S.C. 702, the Applicant agrees that it will provide a drug-free workplace by:

(1) Publishing a statement notifying its employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in its workplace and specifying the actions that will be taken against its employees for violation of that prohibition;

(2) Establishing an ongoing drug-free awareness program to inform its employees about:

(a) The dangers of drug abuse in the workplace,

(b) Its policy of maintaining a drug-free workplace,

(c) Any available drug counseling, rehabilitation, and employee assistance programs, and

(d) The penalties that may be imposed upon its employees for drug abuse violations occurring in the workplace;

(3) Making it a requirement that each of its employees to be engaged in the performance of the grant or cooperative agreement be given a copy of the statement required by paragraph (1);

(4) Notifying each of its employees in the statement required by paragraph (1) that, as a condition of employment financed with Federal assistance provided by the grant or cooperative agreement, the employee will be required to:

(a) Abide by the terms of the statement, and

(b) Notify the employer (Applicant) in writing of any conviction for a violation of a criminal drug statute occurring in the workplace no later than 5 calendar days after that conviction;

(5) Notifying FTA in writing, within 10 calendar days after receiving notice required by paragraph (4)(b) above from an employee or otherwise receiving actual notice of that conviction. The Applicant, as employer of any convicted employee, must provide notice, including position title, to every project officer or other designee on whose project activity the convicted employee was working. Notice shall include the identification number(s) of each affected grant or cooperative agreement.

(6) Taking one of the following actions within 30 calendar days of receiving notice under paragraph (4)(b) above with respect to any employee who is so convicted:

(a) Taking appropriate personnel action against that employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended, or

(b) Requiring that employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, state, or local health, law enforcement, or other appropriate agency;

(7) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (1), (2), (3), (4), (5), and (6) above.

The Applicant agrees to maintain a list identifying its headquarters location and each workplace it maintains in which project activities supported by FTA are conducted, and make that list readily accessible to FTA.

E. Intergovernmental Review Assurance

The Applicant assures that each application for Federal assistance submitted to FTA has been or will be submitted, as required by each state, for intergovernmental review to the appropriate state and local agencies. Specifically, the Applicant assures that it has fulfilled or will fulfill the obligations imposed on FTA by U.S. DOT regulations, "Intergovernmental Review of Department of Transportation Programs and Activities," 49 CFR part 17.

F. Nondiscrimination Assurance

As required by 49 U.S.C. 5332 (which prohibits discrimination on the basis of race, color, creed, national origin, sex, or age, and prohibits discrimination in employment or business opportunity), Title VI of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000d, and U.S. DOT regulations, "Nondiscrimination in Federally-Assisted Programs of the Department of Transportation—Effectuation of Title VI of the Civil Rights Act," 49 CFR part 21 at 21.7, the Applicant assures that it will comply with all requirements of 49 CFR part 21; FTA Circular 4702.1, "Title VI Program Guidelines for Federal Transit Administration Recipients", and other applicable directives, so that no person in the United States, on the basis of race, color, national origin, creed, sex, or age will be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination in any program or activity (particularly in the level and quality of transportation services and transportation-related benefits) for which the Applicant receives Federal assistance awarded by the U.S. DOT or FTA as follows:

(1) The Applicant assures that each project will be conducted, property acquisitions will be undertaken, and project facilities will be operated in accordance with all applicable requirements of 49 U.S.C. 5332 and 49 CFR part 21, and understands that this assurance extends to its entire facility and to facilities operated in connection with the project.

(2) The Applicant assures that it will take appropriate action to ensure that any transferee receiving property financed with Federal assistance derived from FTA will comply with the applicable requirements of 49 U.S.C. 5332 and 49 CFR part 21.

(3) The Applicant assures that it will promptly take the necessary actions to effectuate this assurance, including notifying the public that complaints of discrimination in the provision of transportation-related services or benefits may be filed with U.S. DOT or FTA. Upon request by U.S. DOT or FTA, the Applicant assures that it will submit the required information pertaining to its compliance with these requirements.

(4) The Applicant assures that it will make any changes in its 49 U.S.C. 5332 and Title VI implementing procedures as U.S. DOT or FTA may request.

(5) As required by 49 CFR 21.7(a)(2), the Applicant will include in each third party contract or subagreement appropriate provisions to impose the requirements of 49 U.S.C. 5332 and 49 CFR part 21, and include appropriate provisions imposing those requirements in deeds and instruments recording the transfer of real property, structures, improvements.

G. Assurance of Nondiscriminotion on the Bosis of Disability

As required by U.S. DOT regulations, "Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefiting from Federal Financial Assistance," at 49 CFR part 27, implementing the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act of 1990, as amended, the Applicant assures that, as a condition to the approval or extension of any Federal assistance awarded by FTA to construct any facility, obtain any rolling stock or other equipment, undertake studies, conduct research, or to participate in or obtain any benefit from any program administered by FTA, no otherwise qualified person with a disability shall be, solely by reason of that disability, excluded from participation in, denied the benefits of, or otherwise subjected to discrimination in any program or activity receiving or benefiting from Federal assistance administered by the FTA or any entity within U.S. DOT. The Applicant assures that project implementation and operations so assisted will comply with all applicable requirements of U.S. DOT regulations implementing the Rehabilitation Act of 1973, as amended, 29 U.S.C. 794, and the Americans with Disabilities Act of 1990, as amended, 42 U.S.C. 12101 *et seq.* at 49 CFR parts 27, 37, and 38, and any applicable regulations and directives issued by other Federal departments or agencies.

H. Procurement Complionce

The Applicant certifies that its procurements and procurement system will comply with all applicable requirements imposed by Federal laws, executive orders, or regulations and the requirements of FTA Circular 4220.1D, "Third Party Contracting Requirements," and other implementing requirements FTA may issue. The Applicant certifies that it will include in its contracts financed in whole or in part with FTA assistance all clauses required by Federal laws, executive orders, or regulations, and will ensure that each subrecipient and each contractor will also include in its subagreements and contracts financed in whole or in part with FTA assistance all applicable clauses required by Federal laws, executive orders, or regulations.

I. Certificotions Prescribed by the Office of Management and Budget (SF–424B and SF–424D)

The Applicant certifies that it:

(1) Has the legal authority to apply for Federal assistance and the institutional, managerial, and financial capability (including funds sufficient to pay the non-Federal share of project cost) to ensure proper planning, management, and completion of the project described in its application.

(2) Will give FTA, the Comptroller General of the United States and, if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

(3) Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest or personal gain.

(4) Will initiate and complete the work within the applicable project time periods following receipt of FTA approval.

(5) Will comply with all statutes relating to nondiscrimination including, but not limited to:

(a) Title VI of the Civil Rights Act, 42 U.S.C. 2000d, which prohibits discrimination on the basis of race, color, or national origin;

(b) Title IX of the Education Amendments of 1972, as amended, 20 U.S.C. 1681, 1683, and 1685 through 1687, which prohibits discrimination on the basis of sex;

(c) Section 504 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 794, which prohibits discrimination on the basis of handicaps;

(d) The Age Discrimination Act of 1975, as amended, 42 U.S.C. 6101 through 6107, which prohibit discrimination on the basis of age;

(e) The Drug Abuse Office and Treatment Act of 1972, Pub. L. 92–255, March 21, 1972, and amendments thereto, relating to nondiscrimination on the basis of drug abuse;

(f) The Comprehensive Alcohol Abuse and Alcoholism Prevention Act of 1970, Pub. L. 91–616, Dec. 31, 1970, and amendments thereto, relating to nondiscrimination on the basis of alcohol abuse or alcoholism;

(g) The Public Health Service Act of 1912, as amended, 42 U.S.C. 290dd–3 and 290ee–3, related to confidentiality of alcohol and drug abuse patient records;

(h) Title VIII of the Civil Rights Act, 42 U.S.C. 3601 *et seq.*, relating to nondiscrimination in the sale, rental, or financing of housing;

(i) Any other nondiscrimination provisions in the specific statutes under which Federal assistance for the project may be provided including, but not limited to section 1101(b) of the Transportation Equity Act for the 21st Century, 23 U.S.C. 101 note, which provides for participation of disadvantaged business enterprises in FTA programs; and

(j) The requirements of any other nondiscrimination statute(s) that may apply to the project.

(6) Will comply, or has complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, (Uniform Relocation Act) 42 U.S.C. 4601 *et seq.*, which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally-assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases. As required by U.S. DOT regulations, "Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs," at 49 CFR 24.4, and sections 210 and 305 of the Uniform Relocation Act, 42 U.S.C. 4630 and 4655, the Applicant assures that it has the requisite authority under applicable state and local law and will comply or has complied with the requirements of the Uniform Relocation Act, 42 U.S.C. 4601 *et seq.*, and U.S. DOT regulations, "Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs," 49 CFR part 24 including, but not limited to the following:

(a) The Applicant will adequately inform each affected person of the benefits, policies, and procedures provided for in 49 CFR part 24;

(b) The Applicant will provide fair and reasonable relocation payments and assistance required by 42 U.S.C. 4622, 4623, and 4624; 49 CFR part 24; and any applicable FTA procedures, to or for families, individuals, partnerships, corporations or associations displaced as a result of any project financed with FTA assistance;

(c) The Applicant will provide relocation assistance programs offering the services described in 42 U.S.C. 4625 to such displaced families, individuals, partnerships, corporations or associations in the manner provided in 49 CFR part 24 and FTA procedures;

(d) Within a reasonable time before displacement, the Applicant will make available comparable replacement dwellings to displaced families and individuals as required by 42 U.S.C. 4625(c)(3);

(e) The Applicant will carry out the relocation process in such a manner as to provide displaced persons with uniform and consistent services, and will make available replacement housing in the same range of choices with respect to such housing to all displaced persons regardless of race, color, religion, or national origin;

(f) In acquiring real property, the Applicant will be guided to the greatest extent practicable under state law, by the real property acquisition policies of 42 U.S.C. 4651 and 4652;

(g) The Applicant will pay or reimburse property owners for necessary expenses as specified in 42 U.S.C. 4653 and 4654, understanding that FTA will participate in the Applicant's costs of providing those payments and that assistance for the project as required by 42 U.S.C. 4631;

(h) The Applicant will execute such amendments to third party contracts and subagreements financed with FTA assistance and execute, furnish, and be bound by such additional documents as FTA may determine necessary to effectuate or implement the assurances provided herein; and

(i) The Applicant agrees to make these assurances part of or incorporate them by reference into any third party contract or subagreement, or any amendments thereto, relating to any project financed by FTA

involving relocation or land acquisition and provide in any affected document that these relocation and land acquisition provisions shall supersede any conflicting provisions.

(7) Will comply, as applicable, with provisions of the Hatch Act, 5 U.S.C. 1501 through 1508, and 7324 through 7326, which limit the political activities of state and local agencies and their officers and employees whose principal employment activities are financed in whole or part with Federal funds including a Federal loan, grant, or cooperative agreement, but does not apply to a nonsupervisory employee of a transit system (or of any other agency or entity performing related functions) receiving FTA assistance to whom the Hatch Act does not otherwise apply.

(8) To the extent applicable will comply with the Davis-Bacon Act, as amended, 40 U.S.C. 276a through 276a(7), the Copeland Act, as amended, 18 U.S.C. 874 and 40 U.S.C. 276c, and the Contract Work Hours and Safety Standards Act, as amended, 40 U.S.C. 327 through 333, regarding labor standards for federally-assisted subagreements.

(9) To the extent applicable, will comply with flood insurance purchase requirements of section 102(a) of the Flood Disaster Protection Act of 1973, as amended, 42 U.S.C. 4012a(a), which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

(10) Will comply with environmental standards that may be prescribed to implement the following Federal laws and executive orders:

(a) Institution of environmental quality control measures under the National Environmental Policy Act of 1969, as amended, 42 U.S.C. 4321 *et seq.* and Executive Order No. 11514, as amended, 42 U.S.C. 4321 note;

(b) Notification of violating facilities pursuant to Executive Order No. 11738, 42 U.S.C. 7606 note;

(c) Protection of wetlands pursuant to Executive Order No. 11990, 42 U.S.C. 4321 note;

(d) Evaluation of flood hazards in floodplains in accordance with Executive Order 11988, 42 U.S.C. 4321 note;

(e) Assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972, as amended, 16 U.S.C. 1451 *et seq.*

(f) Conformity of Federal actions to State (Clean Air) Implementation Plans under section 176(c) of the Clean Air Act of 1955, as amended, 42 U.S.C. 7401 *et seq.*;

(g) Protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, 42 U.S.C. 300h *et seq.*;

(h) Protection of endangered species under the Endangered Species Act of 1973, as amended, Endangered Species Act of 1973, as amended, 16 U.S.C. 1531 *et seq.*; and

(i) Environmental protections for Federal transit programs, including, but not limited to protections for a park, recreation area, or wildlife or waterfowl refuge of national, state, or local significance or any land from a historic site of national, state, or local significance used in a transit project as required by 49 U.S.C. 303.

(11) Will comply with the Wild and Scenic Rivers Act of 1968, as amended, 15 U.S.C. 1271 *et seq.* relating to protecting components of the national wild and scenic rivers systems.

(12) Will assist FTA in assuring compliance with section 106 of the National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470f, Executive Order No. 11593 (identification and protection of historic properties), 16 U.S.C. 470 note, and the Archaeological and Historic Preservation Act of 1974, as amended, 16 U.S.C. 469a–1 *et seq.*

(13) Will comply with the Lead-Based Paint Poisoning Prevention Act, 42 U.S.C. 4801, which prohibits the use of lead-based paint in construction or rehabilitation of residence structures.

(14) Will not dispose of, modify the use of, or change the terms of the real property title, or other interest in the site and facilities on which a construction project supported with FTA assistance takes place without permission and instructions from the awarding agency. Will record the Federal interest in the title of real property in accordance with FTA directives and will include a covenant in the title of real property acquired in whole or in part with Federal assistance funds to assure nondiscrimination during the useful life of the project.

(15) Will comply with FTA requirements concerning the drafting, review, and approval of construction plans and specifications of any construction project supported with FTA assistance. As required by U.S. DOT regulations, "Seismic Safety," 49 CFR 41.117(d), before accepting delivery of any building financed with FTA assistance, it will obtain a certificate of compliance with the seismic design and construction requirements of 49 CFR part 41.

(16) Will provide and maintain competent and adequate engineering supervision at the construction site of any project supported with FTA assistance to ensure that the complete work conforms with the approved plans and specifications and will furnish progress reports and such other information as may be required by FTA or the State.

(17) Will comply with the National Research Act, Pub. L. 93–348, July 12, 1974, as amended, regarding the protection of human subjects involved in research, development, and related activities supported by the FTA assistance.

(18) Will comply with the Laboratory Animal Welfare Act of 1966, as amended, 7 U.S.C. 2131 *et seq.* pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by FTA assistance.

(19) Will have performed the required financial and compliance audits in accordance with the Single Audit Act Amendments of 1996, 31 U.S.C. 7501 *et seq.* and OMB Circular No. A–133, "Audits of States, Local Governments, and Non-Profit Organizations."

(20) Will comply with all applicable requirements of all other Federal laws, executive orders, regulations, and policies governing the project.

II. Lobbying Certification for an Application Exceeding $100,000

An Applicant that submits, or intends to submit this fiscal year, an application for Federal assistance exceeding $100,000 must provide the following certification. FTA may not provide Federal assistance for an application exceeding $100,000 until the Applicant provides this certification by selecting Category II on the Signature Page.

A. As required by U.S. DOT regulations, "New Restrictions on Lobbying," at 49 CFR 20.110, the Applicant's authorized representative certifies to the best of his or her knowledge and belief that for each application for a Federal assistance exceeding $100,000:

(1) No Federal appropriated funds have been or will be paid, by or on behalf of the Applicant, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress pertaining to the award of any Federal assistance, or the extension, continuation, renewal, amendment, or modification of any Federal assistance agreement; and

(2) If any funds other than Federal appropriated funds have been or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with any application to FTA for Federal assistance, the Applicant assures that it will complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," including the information required by the form's instructions, which may be amended to omit such information as permitted by 31 U.S.C. 1352.

B. The Applicant understands that this certification is a material representation of fact upon which reliance is placed and that submission of this certification is a prerequisite for providing Federal assistance for a transaction covered by 31 U.S.C. 1352. The Applicant also understands that any person who fails to file a required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

III. Effects on Private Mass Transportation Companies

An Applicant that is a state or local government seeking Federal assistance under 49 U.S.C. chapter 53 to acquire property or an interest in property of a private mass transportation company or operate mass transportation equipment or a facility in competition with or in addition to transportation service provided by an existing mass transportation company must provide the following certification. FTA may not award Federal assistance for that project until the Applicant provides this certification by selecting Category III on the Signature Page.

As required by 49 U.S.C. 5323(a)(1), the Applicant certifies that before it acquires

property or an interest in property of a private mass transportation company or operates mass transportation equipment or a facility in competition with or in addition to transportation service provided by an existing mass transportation company it has or will have:

A. Found that the assistance is essential to carrying out a program of projects as determined by the plans and programs of the metropolitan planning organization;

B. Provided for the participation of private mass transportation companies to the maximum extent feasible; and

C. Paid or will pay just compensation under state or local law to a private mass transportation company for its franchises or property acquired.

D. The assistance falls within the labor standards compliance requirements of 49 U.S.C. 5333(a) and 5333(b).

IV. Public Hearing Certification for a Capital Project That Will Substantially Affect a Community or its Transit Service

An Applicant seeking Federal assistance under 49 U.S.C. chapter 53 for a capital project that will substantially affect a community or the transit service of a community must provide the following certification. FTA may not award Federal assistance for that project until the Applicant provides this certification by selecting Category IV on the Signature Page.

As required by 49 U.S.C. 5323(b), the Applicant certifies that it has, or before submitting its application, will have:

A. Provided an adequate opportunity for a public hearing with adequate prior notice of the proposed project published in a newspaper of general circulation in the geographic area to be served;

B. Held that hearing and provided FTA a transcript or detailed report summarizing the issues and responses, unless no one with a significant economic, social, or environmental interest requests a hearing;

C. Considered the economic, social, and environmental effects of the project; and

D. Determined that the project is consistent with official plans for developing the urban area.

V. Certification of Pre-Award and Post-Delivery Reviews Required for Acquisition of Rolling Stock

An Applicant seeking FTA assistance to purchase rolling stock must provide the following certification. FTA may not provide assistance for any rolling stock acquisition until the Applicant provides this certification by selecting Category V on the Signature Page.

As required by 49 U.S.C. 5323(m), and implementing FTA regulations at 49 CFR 663.7, the Applicant certifies that it will comply with the requirements of 49 CFR part 663, in the course of purchasing revenue service rolling stock. Among other things, the Applicant will conduct or cause to be conducted the prescribed pre-award and post-delivery reviews, and will maintain on file the certifications required by 49 CFR part 663, subparts B, C, and D.

VI. Bus Testing Certification Required for New Bus Acquisitions

An Applicant seeking FTA assistance to acquire new buses must provide the following certification. FTA may not provide assistance for the acquisition of new buses until the Applicant provides this certification by selecting Category VI on the Signature Page.

As required by FTA regulations, "Bus Testing," at 49 CFR 665.7, the Applicant certifies that before expending any Federal assistance to acquire the first bus of any new bus model or any bus model with a new major change in configuration or components or authorizing final acceptance of that bus (as described in 49 CFR part 665):

A. The model of the bus will have been tested at a bus testing facility approved by FTA; and

B. It will have received a copy of the test report prepared on the bus model.

VII. Charter Service Agreement

An Applicant seeking FTA assistance to acquire or operate transportation equipment or facilities acquired with Federal assistance authorized by 49 U.S.C. chapter 53 or Title 23 U.S.C. (except 49 U.S.C. 5310) must enter into the following charter service agreement. FTA may not provide assistance for those projects until the Applicant enters into this agreement by selecting Category VII on the Signature Page.

A. As required by 49 U.S.C. 5323(d) and FTA regulations, "Charter Service," at 49 CFR 604.7, the Applicant agrees that it and its recipients will: (1) provide charter service that uses equipment or facilities acquired with Federal assistance authorized for 49 U.S.C. 5307, 5309, or 5311 or Title 23 U.S.C., only to the extent that there are no private charter service operators willing and able to provide the charter service that it or its recipients desire to provide, unless one or more of the exceptions in 49 CFR 604.9 applies, and (2) comply with the provisions of 49 CFR part 604 before they provide any charter service using equipment or facilities acquired with Federal assistance authorized for the above statutes.

B. The Applicant understands that the requirements of 49 CFR part 604 will apply to any charter service provided, the definitions in 49 CFR part 604 apply to this agreement, and violation of this agreement may require corrective measures and the imposition of penalties, including debarment from the receipt of further Federal assistance for transportation.

VIII. School Transportation Agreement

An Applicant seeking FTA assistance to acquire or operate transportation facilities and equipment acquired with Federal assistance authorized by 49 U.S.C. chapter 53 must agree as follows. FTA may not provide assistance for transportation facilities until the Applicant enters into this Agreement by selecting Category VIII on the Signature Page.

A. As required by 49 U.S.C. 5323(f) and FTA regulations, "School Bus Operations," at 49 CFR 605.14, the Applicant agrees that it and all its recipients will:

(1) Engage in school transportation operations in competition with private school transportation operators only to the extent permitted by an exception provided by 49 U.S.C. 5323(f), and implementing regulations, and

(2) Comply with the requirements of 49 CFR part 605 before providing any school transportation using equipment or facilities acquired with Federal assistance awarded by FTA and authorized by 49 U.S.C. chapter 53 or Title 23.U.S.C. for transportation projects.

B. The Applicant understands that the requirements of 49 CFR part 605 will apply to any school transportation it provides, the definitions of 49 CFR part 605 apply to this school transportation agreement, and a violation of this agreement may require corrective measures and the imposition of penalties, including debarment from the receipt of further Federal assistance for transportation.

IX. Certification Required for the Direct Award of FTA Assistance to an Applicant for its Demand Responsive Service

An Applicant seeking direct Federal assistance to support its demand responsive service must provide the following certification. FTA may not award Federal assistance directly to an Applicant to support its demand responsive service until the Applicant provides this certification by selecting Category IX on the Signature Page.

As required by U.S. DOT regulations, "Transportation Services for Individuals with Disabilities (ADA)," at 49 CFR 37.77, the Applicant certifies that its demand responsive service offered to persons with disabilities, including persons who use wheelchairs, is equivalent to the level and quality of service offered to persons without disabilities. When viewed in its entirety, the Applicant's service for persons with disabilities is provided in the most integrated setting feasible and is equivalent with respect to: (1) response time, (2) fares, (3) geographic service area, (4) hours and days of service, (5) restrictions on trip purpose, (6) availability of information and reservation capability, and (7) constraints on capacity or service availability.

X. Substance Abuse Certifications

If the Applicant is required by Federal regulations to provide the following substance abuse certifications, FTA may not provide Federal assistance to that Applicant until it provides these certifications by selecting Category X on the Signature Page.

A. Alcohol Testing Certification

As required by FTA regulations, "Prevention of Alcohol Misuse in Transit Operations," at 49 CFR 654.83, the Applicant certifies that it has established and implemented an alcohol misuse prevention program complying with the requirements of 49 CFR part 654; and if the Applicant has employees regulated by the Federal Railroad Administration (FRA), the Applicant also certifies that it has for those employees an alcohol misuse prevention program complying with FRA regulations, "Control of Alcohol and Drug Use," 49 CFR part 219.

B. Anti-Drug Program Certification

As required by FTA regulations "Prevention of Prohibited Drug Use in

Transit Operations," at 49 CFR 653.83, the Applicant certifies that it has established and implemented an anti-drug program and has conducted employee training complying with the requirements of 49 CFR part 653; and if the Applicant has employees regulated by the U.S. Federal Railroad Administration (FRA), the Applicant also certifies that it has for those employees an anti-drug program complying with FRA regulations, "Control of Alcohol and Drug Use," 49 CFR part 219.

XI. Certification for a Project Involving Interest or Other Financing Costs

The Applicant must provide the following certification in connection with requests for reimbursements of interest or other financing costs of capital projects. FTA may not provide assistance to support those costs until the Applicant provides this certification by selecting Category XI on the Signature Page.

As required by 49 U.S.C. 5307(g), 49 U.S.C. 5309(g)(2)(B), 49 U.S.C. 5309(g)(3)(A), and 49 U.S.C. 5309(n), the Applicant certifies that it will not seek reimbursement for interest and other financing costs unless its records demonstrate it has used reasonable diligence in seeking the most favorable financing terms underlying those costs, to the extent FTA might require.

XII. Certifications for the Urbanized Area Formula Program and the Job Access and Reverse Commute Program

Each Applicant to FTA for Urbanized Area Formula Program assistance authorized for 49 U.S.C. 5307 and each Applicant for Job Access and Reverse Commute Program assistance authorized for Section 3037 of the Transportation Equity Act for the 21st Century, 49 U.S.C. 5309 note, must provide the following certifications in connection with its application. FTA may not award Urbanized Area Formula Program assistance or Job Access and Reverse Commute Program assistance to the Applicant until the Applicant provides these certifications and assurances by selecting Category XIV on the Signature Page.

In addition, each Applicant with a population of 200,000 or more awarded funds apportioned under 49 U.S.C. 5307(k) after June 9, 1998, must submit a report listing the Transit Enhancement projects carried out during Federal fiscal year 1998 with those funds. FTA may not award Urbanized Area Formula Program assistance to any Applicant with a population of 200,000 or more until that Applicant indicates that it has submitted this Report by selecting "Transit Enhancement Activities Report Submitted" on the Signature Page under Category XII.

A. Certifications Required by Statute

As required by 49 U.S.C. 5307(d)(1) (A) through (J), the Applicant certifies that:

(1) It has or will have the legal, financial, and technical capacity to carry out the proposed program of projects;

(2) It has or will have satisfactory continuing control over the use of the equipment and facilities;

(3) It will adequately maintain the equipment and facilities;

(4) It will ensure that the elderly and handicapped persons, or any person presenting a Medicare card issued to himself or herself under title II or title XVIII of the Social Security Act (42 U.S.C. 401 *et seq.* or 42 U.S.C. 1395 *et seq.*), will be charged during non-peak hours for transportation using or involving a facility or equipment of a project financed with Federal assistance authorized for 49 U.S.C. 5307 or Section 3037 of the Transportation Equity Act for the 21st Century (TEA–21), 49 U.S.C. 5309 note, not more than 50 percent of the peak hour fare;

(5) In carrying out a procurement financed with Federal assistance authorized for the Urbanized Area Formula Program at 49 U.S.C. 5307 or Section 3037 of TEA–21, 49 U.S.C. 5309 note, it will use competitive procurement (as defined or approved by the Secretary), it will not use a procurement using exclusionary or discriminatory specifications, and it will comply with applicable Buy America laws in carrying out a procurement;

(6) It has complied or will comply with the requirements of 49 U S.C. 5307(c); specifically, it has or before submitting its application it will: (a) make available to the public information on amounts available for the Urbanized Area Formula Program at 49 U.S.C. 5307 and, if applicable, the Job Access and Reverse Commute Grant Program, 49 U.S.C. 5309 note, and the program of projects it proposes to undertake with those funds; (b) develop, in consultation with interested parties, including private transportation providers, a proposed program of projects for activities to be financed; (c) publish a proposed program of projects in a way that affected citizens, private transportation providers, and local elected officials have the opportunity to examine the proposed program and submit comments on the proposed program and the performance of the Applicant; (d) provide an opportunity for a public hearing to obtain the views of citizens on the proposed program of projects; and (e) ensure that the proposed program of projects provides for the coordination of transportation services assisted under 49 U.S.C. 5336 with transportation services assisted by another Federal Government source; (f) consider comments and views received, especially those of private transportation providers, in preparing the final program of projects; and (g) make the final program of projects available to the public;

(7) It has or will have available and will provide the amount of funds required by 49 U.S.C. 5307(e) and applicable FTA policy (specifying Federal and local shares of project costs);

(8) It will comply with: (a) 49 U.S.C. 5301(a) (requirements to develop transportation systems that maximize mobility and minimize fuel consumption and air pollution); (b) 49 U.S.C. 5301(d) (requirements for transportation of the elderly and persons with disabilities); (c) 49 U.S.C. 5303 through 5306 (planning requirements); and (d) 49 U.S.C. 5310 (a) through (d) (programs for the elderly and persons with disabilities);

(9) It has a locally developed process to solicit and consider public comment before raising fares or implementing a major reduction of transportation; and

(10) As required by 49 U.S.C. 5307(d)(1)(J), unless the Applicant has determined that it is not necessary to expend one percent of the amount of Federal assistance it receives for this fiscal year apportioned in accordance with 49 U.S.C. 5336 for transit security projects, it will expend at least one percent of the amount of that assistance for transit security projects, including increased lighting in or adjacent to a transit system (including bus stops, subway stations, parking lots, and garages), increased camera surveillance of an area in or adjacent to that system, emergency telephone line or lines to contact law enforcement or security personnel in an area in or adjacent to that system, and any other project intended to increase the security and safety of an existing or planned transit system.

B. Certification Required for Capital Leasing

As required by FTA regulations, "Capital Leases," at 49 CFR 639.15(b)(1) and 639.21, to the extent the Applicant uses Federal assistance authorized for 49 U.S.C. 5307 or Section 3037 of TEA–21, 49 U.S.C. 5309 note, to acquire any capital asset by lease, the Applicant certifies that:

(1) It will not use Federal assistance authorized for 49 U.S.C. 5307 or Section 3037 of TEA–21, 49 U.S.C. 5309 note, to finance the cost of leasing any capital asset until it performs calculations demonstrating that leasing the capital asset would be more cost-effective than purchasing or constructing a similar asset;

(2) It will complete these calculations before entering into the lease or before receiving a capital grant for the asset, whichever is later; and

(3) It will not enter into a capital lease for which FTA can only provide incremental funding unless it has the financial capacity to meet its future obligations under the lease in the event Federal assistance is not available for capital projects in subsequent years.

C. Certificotion Required for Sole Source Purchase of Associated Capital Maintenance Item

As required by 49 U.S.C. 5325(c), to the extent that the Applicant procures an associated capital maintenance item under the authority of 49 U.S.C. 5307(b)(1), the Applicant certifies that it will use competition to procure an associated capital maintenance item unless the manufacturer or supplier of that item is the only source for the item and the price of the item is no more than the price similar customers pay for the item, and maintain sufficient records pertaining to each such procurement on file easily retrievable for FTA inspection.

XIII. Certifications and Assurances for the Elderly and Persons with Disabilities Program

An Applicant that intends to administer, on behalf of the state, the Elderly and Persons with Disabilities Program must provide the following certifications and assurances. FTA may not award assistance for the Elderly and Persons with Disabilities Program until the Applicant provides these certifications and assurances by selecting Category XIII on the Signature Page.

Based on its own knowledge and, as necessary, on information submitted by the subrecipient, the Applicant administering on behalf of the state the Elderly and Persons with Disabilities Program authorized by 49 U.S.C. 5310 certifies and assures that the following requirements and conditions will be fulfilled:

A. The state organization serving as the Applicant and each subrecipient has or will have the necessary legal, financial, and managerial capability to apply for, receive, and disburse Federal assistance authorized for 49 U.S.C. 5310; and to implement and manage the project.

B. The state assures that each subrecipient either is recognized under state law as a private nonprofit organization with the legal capability to contract with the state to carry out the proposed project, or is a public body that has met the statutory requirements to receive Federal assistance authorized for 49 U.S.C. 5310.

C. The subrecipient's application for 49 U.S.C. 5310 assistance contains information from which the state concludes that the transit service provided or offered to be provided by existing public or private transit operators is unavailable, insufficient, or inappropriate to meet the special needs of the elderly and persons with disabilities.

D. The state assures that sufficient non-Federal funds have been or will be committed to provide the required local share.

E. The subrecipient has, or will have by the time of delivery, sufficient funds to operate and maintain the vehicles and equipment purchased with Federal assistance awarded for this project.

F. The state assures that before issuing the state's formal approval of a project, its Elderly and Persons with Disabilities Formula Program is included in the Statewide Transportation Improvement Program as required by 23 U.S.C. 135; all projects in urbanized areas recommended for approval are included in the annual element of the metropolitan Transportation Improvement Program in which the subrecipient is located; and any public body that is a prospective subrecipient of capital assistance has provided an opportunity for a public hearing.

G. The subrecipient has, to the maximum extent feasible, coordinated with other transportation providers and users, including social service agencies authorized to purchase transit service.

H. The subrecipient is in compliance with all applicable civil rights requirements, and has signed the Nondiscrimination Assurance. (Category I.F., "Certifications and Assurances Required of Each Applicant.")

I. The subrecipient will comply with applicable requirements of U.S. DOT regulations on participation of disadvantaged business enterprises in U.S. DOT programs.

J. The state will comply with all existing Federal requirements regarding transportation of elderly persons and persons with disabilities. Each subrecipient has provided to the state an Assurance of Nondiscrimination on the Basis of Disability, as set forth in the Certifications and Assurances required of each applicant for FTA assistance at Category 1.G of this document. If non-accessible vehicles are being purchased for use by a public entity in demand responsive service for the general public, the state will obtain from the subrecipient a "Certification of Equivalent Service," which states that when viewed in its entirety the public entity's demand responsive service offered to persons with disabilities, including persons who use wheelchairs, meets the standard of equivalent service set forth in 40 CFR section 37.77(c).

K. The subrecipient has certified to the state that it will comply with applicable provisions of 49 CFR part 605 pertaining to school transportation operations. (See Category VIII, "School Transportation Agreement.")

L. Unless otherwise noted, each of the subrecipient's projects qualifies for a categorical exclusion and does not require further environmental approvals, as described in the joint FHWA/FTA regulations, "Environmental Impact and Related Procedures," at 23 CFR 771.117(c). The state certifies that financial assistance will not be provided for any project that does not qualify for a categorical exclusion described in 23 CFR 771.117(c) until FTA has made the required environmental finding. The state further certifies that no financial assistance will be provided for a project requiring a conformity finding in accordance with the Environmental Protection Agency's Clean Air Conformity regulations at 40 CFR parts 51 and 93, until FTA makes the required conformity finding.

M. The subrecipient has submitted (or will submit) all applicable certifications and assurances currently required, including, but not limited to: a certification that its procurements and procurement system will comply with all applicable requirements imposed by Federal laws, executive orders, or regulations and the requirements of FTA Circular 4220.1D, "Third Party Contracting Requirements," and other implementing requirements FTA may issue; a certification that its project provides for the participation of private mass transportation companies to the maximum extent feasible; a certification it has paid or will pay just compensation under state or local law to each private mass transportation company for its franchise or property acquired under the project; a nonprocurement suspension and debarment certification; a bus testing certification for new models; a pre-award and post-delivery review certification; and a lobbying certification for each application exceeding $100,000. Certifications and assurances applicable to and submitted by the subrecipient should be substantially similar to the text of parallel certifications and assurances text of Categories I–XI of this document, but modified as necessary to accommodate the subrecipient's circumstances.

N. The state will enter into a written agreement with each subrecipient stating the terms and conditions of assistance by which the project will be undertaken and completed.

O. The state recognizes FTA's authority to conduct audits and reviews to verify compliance with the foregoing requirements and stipulations.

XIV. Certifications and Assurances for the Nonurbanized Area Formula Program

An Applicant that intends to administer, on behalf of the state, the Nonurbanized Area Formula Program must provide the following certifications and assurances. FTA may not award Nonurbanized Area Formula Program assistance to the Applicant until the Applicant provides these certifications and assurances by selecting Category XIV on the Signature Page.

Based on its own knowledge and, as necessary, on information submitted by the subrecipient, the Applicant administering on behalf of the state the Nonurbanized Area Formula Program authorized by 49 U.S.C. 5311 certifies and assures that the following requirements and conditions will be fulfilled:

A. The state organization serving as the Applicant and each subrecipient has or will have the necessary legal, financial, and managerial capability to apply for, receive and disburse Federal assistance authorized for 49 U.S.C. 5311; and to implement and manage the project.

B. The state assures that sufficient non-Federal funds have been or will be committed to provide the required local share.

C. The subrecipient has, or will have by the time of delivery, sufficient funds to operate and maintain the vehicles and equipment purchased with Federal assistance authorized for this project.

D. The state assures that before issuing the state's formal approval of the project, its Nonurbanized Area Formula Program is included in the Statewide Transportation Improvement Program as required by 23 U.S.C. 135; to the extent applicable, projects are included in a metropolitan Transportation Improvement Program.

E. The state has provided for a fair and equitable distribution of Federal assistance authorized for 49 U.S.C. 5311 within the state, including Indian reservations within the state.

F. The subrecipient has, to the maximum extent feasible, coordinated with other transportation providers and users, including social service agencies authorized to purchase transit service.

G. The subrecipient is in compliance with all applicable civil rights requirements, and has signed the Nondiscrimination Assurance. (See Category I.F, "Certifications and Assurances Required of Each Applicant.")

H. The subrecipient will comply with applicable requirements of U.S. DOT regulations on participation of disadvantaged business enterprise in U.S. DOT programs.

I. The state will comply with all existing Federal requirements regarding transportation of elderly persons and persons with disabilities. Each subrecipient has provided to the state an Assurance of Nondiscrimination on the Basis of Disability, as set forth in the Certifications and Assurances required of each applicant for FTA assistance at Category 1.G of this document. If non-accessible vehicles are

being purchased for use by a public entity in demand responsive service for the general public, the state will obtain from the subrecipient a "Certification of Equivalent Service," which states that when viewed in its entirety the public entity's demand responsive service offered to persons with disabilities, including persons who use wheelchairs, meets the standard of equivalent service set forth in 40 C.F.R. section 37.77(c).

J. The subrecipient has complied with the transit employee protective provisions of 49 U.S.C. 5333(b), by one of the following actions: (1) signing the Special Warranty for the Nonurbanized Area Formula Program, (2) agreeing to alternative comparable arrangements approved by the Department of Labor (DOL), or (3) obtaining a waiver from DOL; and the state has certified the subrecipient's compliance to DOL.

K. The subrecipient has certified to the state that it will comply with 49 CFR part 604 in the provision of any charter service provided with equipment or facilities acquired with FTA assistance, and will also comply with applicable provisions of 49 CFR part 605 pertaining to school transportation operations. (See Category VII, "Charter Service Agreement," and Category VIII, "School Transportation Agreement.")

L. Unless otherwise noted, each of the subrecipient's projects qualifies for a categorical exclusion and does not require further environmental approvals, as described in the joint FHWA/FTA regulations, "Environmental Impact and Related Procedures," at 23 CFR 771.117(c). The state certifies that financial assistance will not be provided for any project that does not qualify for a categorical exclusion described in 23 CFR 771.117(c) until FTA has made the required environmental finding. The state further certifies that no financial assistance will be provided for a project requiring a conformity finding in accordance with the Environmental Protection Agency's Clean Air Conformity regulations at 40 CFR parts 51 and 93, until FTA makes the required conformity finding.

M. The subrecipient has submitted (or will submit) all applicable certifications and assurances currently required, including but not limited to: a certification that its procurements and procurement system will comply with all applicable requirements imposed by Federal laws, executive orders, or regulations and the requirements of FTA Circular 4220.1D, "Third Party Contracting Requirements," and other implementing requirements FTA may issue; a certification that its project provides for the participation of private mass transportation companies to the maximum extent feasible; a certification it has paid or will pay just compensation under state or local law to each private mass transportation company for its franchise or property acquired under the project; a nonprocurement suspension and debarment certification; a bus testing certification for new bus models; a pre-award and post-delivery review certification; and a lobbying certification for each application exceeding $100,000. Certifications and assurances applicable to and submitted by the subrecipient should be substantially similar to the text of parallel certifications and assurances text of Categories I-XI of this document, but modified as necessary to accommodate the subrecipient's circumstances.

N. The state will enter into a written agreement with each subrecipient stating the terms and conditions of assistance by which the project will be undertaken and completed.

O. The state recognizes FTA's authority to conduct audits and reviews to verify compliance with the foregoing requirements and stipulations.

P. As required by 49 U.S.C. 5311(f), it will expend not less than fifteen percent of the Federal assistance authorized for 49 U.S.C. 5311(f) it receives during this fiscal year to carry out a program to develop and support intercity bus transportation, unless the chief executive officer of the state or his or her duly authorized designee certifies that the intercity bus service needs of the state are being adequately met.

XV. Certifications and Assurances for the State Infrastructure Bank Program

A state Applicant for a grant of Federal assistance for deposit in the Transit Account of the State Infrastructure Bank (SIB) within that state must provide the following certifications and assurances. The Federal Transit Administration (FTA) may not award Federal assistance to capitalize a SIB until the state Applicant provides these certifications and assurances by selecting Category XV on the Signature Page.

Based on its own knowledge and, as necessary, on information submitted by the participating parties, the state Applicant for Federal assistance for the Transit Account of its state SIB program authorized by either section 350 of the National Highway System Designation Act of 1995, as amended, 23 U.S.C. 101 note, or the State Infrastructure Bank Pilot Program, 23 U.S.C. 181 note, certifies and assures that the following requirements and conditions will be fulfilled pertaining to any project financed with Federal assistance derived from the Transit Account of the SIB:

A. The state organization serving as the Applicant (state) agrees and assures the agreement of the SIB and each recipient of Federal assistance derived from the Transit Account of the SIB within the state (subrecipient) that each Project financed with Federal assistance derived from the Transit Account will be administered in accordance with: (1) the requirements of section 350 of the National Highway System Designation Act of 1995, as amended, 23 U.S.C. 101 note, or the State Infrastructure Bank Pilot Program, 23 U.S.C. 181 note, (2) the provisions of FTA's SIB Guidelines, and any amendments thereto, (3) the provisions of FHWA and FTA Cooperative Agreement with the state to establish the state's SIB program, and (4) the provisions of the FTA Grant Agreement with the state that obligating Federal assistance for the SIB, except that any provision of the Federal Transit Administration Master Agreement incorporated by reference into that Grant Agreement will not apply if it conflicts with any provision of National Highway System Designation Act of 1995, as amended, 23 U.S.C. 101 note, or section 1511 of TEA-21, as amended, and FTA SIB Guidelines, the provisions of the Cooperative Agreement establishing the SIB program within the state, or the text within the FTA Grant Agreement.

B. The state agrees to comply with and assures the compliance of the SIB and each subrecipient of all applicable requirements for the SIB program, as those requirements may be amended from time to time. Pursuant to subsection 1511(h)(2) of TEA-21, applicants for assistance authorized by the State Infrastructure Bank Pilot Program, 23 U.S.C. 181 note, agree that previous cooperative agreements entered into with States under section 350 of the National Highway System Designation Act of 1995, as amended, will be revised to comply with new requirements.

C. The state assures that the SIB will provide Federal assistance from its Transit Account only for transit capital projects eligible under section 1511 of TEA-21, and that those projects will fulfill all requirements imposed on comparable capital transit projects financed by FTA.

D. The state understands that the total amount of funds to be awarded for a Grant Agreement will not be immediately available for draw down. Consequently, the state assures that it will limit the amount of Federal assistance it draws down for deposit in the Transit Account of its SIB to amounts that do not exceed the limitations specified in the underlying Grant Agreement or the Approved Project Budget for that Grant Agreement.

E. The state assures that each subrecipient has or will have the necessary legal, financial, and managerial capability to apply for, receive, and disburse Federal assistance authorized by Federal statute for use in the Transit Account of the SIB, including the ability to comply with Year 2000 (Y2K) management of funds and investments, and to implement, manage, operate, and maintain the project and project property for which such assistance will support.

F. The state assures that the SIB will provide Federal assistance derived from the Transit Account only to a subrecipient that is either a public or private entity recognized under state law as having the legal capability to contract with the state to carry out its proposed project.

G. The state assures that sufficient non-Federal funds have been or will be committed to provide the required local share.

H. The state assures that the SIB will enter into a written agreement with each subrecipient stating the terms and conditions of assistance by which the project will be undertaken and completed, including specific provisions that any security or debt financing instrument the SIB may issue will contain an express statement that the security or instrument does not constitute a commitment, guarantee, or obligation of the United States.

I. The state assures that before the SIB enters into an agreement with a subrecipient under which Federal assistance within the Transit Account of the SIB will be disbursed to the subrecipient, the subrecipient's project is included in the Statewide Transportation Improvement Program; all projects in urbanized areas recommended for approval are included in the annual element of the metropolitan Transportation Improvement Program in which the subrecipient is located; and it has obtained from each subrecipient of capital assistance that is also a public body a certification that an opportunity for a public hearing has been provided.

J. The state assures that the subrecipient has, to the maximum extent feasible, coordinated with other transportation providers and users, and other interested parties within the area.

K. The state assures that the subrecipient is in compliance with all applicable civil rights requirements, and has signed the Nondiscrimination Assurance. (See Category I.F, "Certifications and Assurances Required of Each Applicant," of the Federal Fiscal Year 1999 Certifications and Assurances for the Federal Transit Administration Programs.)

L. The state assures that the subrecipient will comply with applicable requirements of U.S. DOT regulations on participation of disadvantaged business enterprises in U.S. DOT programs.

M. To the extent applicable, the state will comply with all existing Federal requirements regarding transportation of elderly persons and persons with disabilities. The state assures that the SIB will provide to the state an Assurance of Nondiscrimination on the Basis of Disability from each subrecipient, as set forth in the Certifications and Assurances required of each Applicant for FTA assistance. (See Category I.G, "Certifications and Assurances Required of Each Applicant," of the Federal Fiscal Year 1999 Certifications and Assurances for the Federal Transit Administration Programs.) If non-accessible vehicles are being purchased for use by a public entity in demand responsive service for the general public, the state will obtain from the subrecipient a "Certification of Equivalent Service," which states that the public entity's demand responsive service offered to persons with disabilities, including persons who use wheelchairs, is equivalent to the level and quality of service the public entity offers to persons without disabilities. (See Category IX, "Certifications Required for the Direct Award of FTA Assistance to an Applicant for its Demand Responsive Service," of the Federal Fiscal Year 1999 Certifications and Assurances for the Federal Transit Administration Programs.) This "Certification of Equivalent Service" must also state that the public entity's demand responsive service, when viewed in its entirety, is provided in the most integrated setting feasible and has equivalent: (1) response time, (2) fares, (3) geographic service area, (4) hours and days of service, (5) restrictions or restraints on trip purpose, (6) availability of information and reservation capability, and (7) constraints on capacity or service availability.

N. The state assures that before the SIB provides Federal assistance from the Transit Account, each subrecipient will have complied with the applicable transit employee protective provisions of 49 U.S.C. 5333(b) as required for that subrecipient and its project.

O. The state assures that each subrecipient has certified or will certify to the state that it will comply with applicable provisions of 49 CFR part 604 in the provision of any charter service provided with equipment or facilities acquired with FTA assistance, and will also comply with applicable provisions of 49 CFR part 605 pertaining to school transportation operations. (See Category VII, "Charter Service Agreement," and Category VIII, "School Transportation Agreement," of the Federal Fiscal Year 1999 Certifications and Assurances for the Federal Transit Administration Programs.)

P. Unless otherwise noted, the state assures that each of the subrecipient's projects qualifies for a categorical exclusion and does not require further environmental approvals, as described in paragraph Q of this Category XVI. Unless otherwise noted, the state assures that each of the subrecipient's projects qualifies for a categorical exclusion and does not require further environmental approvals, as described in the joint FHWA/FTA regulations, "Environmental Impact and Related Procedures," at 23 CFR 771.117(c). The state certifies that the SIB will not provide financial assistance from the Transit Account for any project that does not qualify for a categorical exclusion described in 23 CFR 771.117(c) until FTA has made the required environmental finding. The state further certifies that the SIB will provide no financial assistance from its Transit Account for a project requiring a conformity finding in accordance with the Environmental Protection Agency's Clean Air Conformity regulations at 40 CFR parts 51 and 93, until FTA makes the required conformity finding.

Q. The state assures that the subrecipient has submitted (or will submit), when applicable, all certifications and assurances currently required, including, but not limited to: a certification that its procurements and procurement system will comply with all applicable requirements imposed by Federal laws, executive orders, or regulations and the requirements of FTA Circular 4220.1D, "Third Party Contracting Requirements," and other implementing requirements FTA may issue; a certification that its project provides for the participation of private mass transportation companies to the maximum extent feasible; a certification it has paid or will pay just compensation under state or local law to each private mass transportation company for its franchise or property acquired under the project; a nonprocurement suspension and debarment certification; a bus testing certification for new models; a pre-award and post-delivery review certification; and a lobbying certification for each application exceeding $100,000; assurances FTA requires for projects involving real property; and if required by FTA, an anti-drug program certification and an alcohol testing certification. Certifications and assurances applicable to and submitted by the subrecipient should be substantially similar to the text of parallel certifications and assurances of Categories I-XI of the Federal Fiscal Year 1999 Certifications and Assurances for the Federal Transit Administration Programs, but modified as necessary to accommodate the SIB and the subrecipient's circumstances.

R. The state agrees and assures that the SIB and each subrecipient will agree to permit FTA, U.S. DOT, and the Comptroller General to conduct audits to verify compliance with the foregoing requirements and stipulations.

FEDERAL FISCAL YEAR 1999 FTA CERTIFICATIONS AND ASSURANCES

(Required of all Applicants for FTA assistance and all FTA Grantees with an active capital or formula project)

Name of Applicant: _____

Name and Relationship of Authorized Representative: _____

BY SIGNING BELOW I, _____ (name), on behalf of the Applicant, declare that the Applicant has duly authorized me to make these certifications and assurances and bind the Applicant's compliance. Thus, the Applicant agrees to comply with all Federal statutes, regulations, executive orders, and administrative guidance required for each application it makes to the Federal Transit Administration (FTA) in Federal Fiscal Year 1999.

FTA intends that the certifications and assurances the Applicant selects on the other side of this document, as representative of the certifications and assurances in Appendix A, should apply, as required, to each project for which the Applicant seeks now, or may later, seek FTA assistance during Federal Fiscal Year 1999.

The Applicant affirms the truthfulness and accuracy of the certifications and assurances it has made in the statements submitted herein with this document and any other submission made to FTA, and acknowledges that the provisions of the Program Fraud Civil Remedies Act of 1986, 31 U.S.C. 3801 *et seq.*, as implemented by U.S. DOT regulations, "Program Fraud Civil Remedies," 49 CFR part 31 apply to any certification, assurance or submission made to FTA. The criminal fraud provisions of 18 U.S.C. 1001 apply to any certification, assurance, or submission made in connection with the Urbanized Area Formula Program, 49 U.S.C. 5307, and may apply to any other certification, assurance, or submission made in connection with any other program administered by FTA.

In signing this document, I declare under penalties of perjury that the foregoing certifications and assurances, and any other statements made by me on behalf of the Applicant are true and correct.

Signature _____ Date: _____
Name _____
Authorized Representative of Applicant

AFFIRMATION OF APPLICANT'S ATTORNEY

for _____ (Name of Applicant)

As the undersigned legal counsel for the above named Applicant, I hereby affirm to the Applicant that it has authority under state and local law to make and comply with the certifications and assurances as indicated on the foregoing pages. I further affirm that, in my opinion, the certifications and assurances have been legally made and constitute legal and binding obligations on the Applicant.

I further affirm to the Applicant that, to the best of my knowledge, there is no legislation or litigation pending or imminent that might adversely affect the validity of these certifications and assurances, or of the performance of the project. Furthermore, if I become aware of circumstances that change the accuracy of the foregoing statements, I will notify the Applicant promptly, which may so inform FTA.

Signature _____ Date: _____
Name _____
Applicant's Attorney

Each Applicant for FTA financial assistance (except 49 U.S.C. 5312(b) assistance) and each FTA Grantee with an active capital or formula project must provide an Attorney's affirmation of the Applicant's legal capacity. The Applicant may enter its PIN number in lieu of the electronic signature of its Attorney, provided the Applicant has on file this Affirmation of its Attorney in writing dated this Federal fiscal year.

RIN 0910–ZA11

Mutual Recognition of Pharmaceutical Good Manufacturing Practice Inspection Reports, Medical Device Quality System Audit Reports, and Certain Medical Device Product Evaluation Reports Between the United States and the European Community

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations pursuant to an international agreement between the United States and the European Community (EC). The agreement is entitled "Agreement on Mutual Recognition Between the United States of America and the European Community" (MRA). Under the terms of that agreement, the importing country authority may normally endorse good manufacturing practice (GMP) inspection reports for pharmaceuticals provided by the exporting authority determined by the importing authority to have an equivalent regulatory system. Likewise, the importing country authority may normally endorse medical device quality system evaluation reports and certain medical device product evaluation reports provided by conformity assessment bodies (CAB's) determined by the importing country authority to have equivalent assessment procedures. FDA is taking this action to enhance its ability to ensure the safety and effectiveness of pharmaceuticals and medical devices through more efficient and effective utilization of its regulatory resources. The proposed rule which published in the **Federal Register** on April 10, 1998 (63 FR 17744), carried an incorrect docket number in its heading. This final rule carries the correct docket number.

DATES: This regulation is effective on December 7, 1998. The Director of the Office of the Federal Register approves the incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51 of a certain publication listed in new § 26.60(b), effective December 7, 1998. Written comments and information relevant to implementation of the MRA and this regulation may be submitted at anytime.

ADDRESSES: Submit written comments and information relevant to implementation of the MRA and this regulation to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Merton V. Smith, Office of International Affairs (HFG–1), Office of External Affairs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–0910, or E-mail: "MSmith@oc.fda.gov".

SUPPLEMENTARY INFORMATION:

I. Background

On June 20, 1997, the United States and the EC concluded an agreement on the MRA. The MRA includes two sectoral annexes covering products regulated by FDA. The sectoral annex on medical devices covers medical device quality system-related inspection reports and certain product evaluation reports. The sectoral annex for pharmaceutical GMP's covers pharmaceutical GMP inspection reports. The MRA also includes sectoral annexes covering products regulated by other U.S. regulatory agencies, including telecommunication equipment, electromagnetic compatibility, electrical safety, and recreational craft. Finally, the MRA includes a "framework" agreement that contains general provisions.

At the conclusion of negotiations, the United States and the EC submitted the text of the MRA to their respective authorities to complete the necessary procedures for approval and implementation. For FDA, these procedures included publishing a proposed rule that was published in the **Federal Register** of April 10, 1998 (63 FR 17744). The proposed rule was based on the provisions contained in the two FDA sectoral annexes and the "framework" agreement of the MRA concluded on June 20, 1997. FDA received comments from 14 persons in response to this proposed rule. Many of these comments supported the proposed rule. Some comments raised significant issues but none that, in FDA's view, necessitated any substantive changes to the proposed rule. On May 14, 1998, FDA informed the Office of the U.S. Trade Representative (USTR) that it supported the signing of the MRA. The MRA was signed in London on May 18, 1998. Provisions of the MRA are between the United States and EC, and do not create rights in third parties.

II. Summary of Comments

A. General Comments and Issues

Most comments by industry associations and pharmaceutical and medical device manufacturers generally were supportive of the MRA and the proposed rule. Some comments by others expressed concern about possible diminished public health and safety if certain precautions are not taken.

1. Five comments strongly supported the MRA and the proposed rule, citing its potential to improve patient access to safe and effective technologies, reduce unnecessary regulatory redundancies, enhance the access of United States and EC companies to each other's markets, provide significant savings to both companies and regulators, and set the stage for further regulatory cooperation and harmonization. They indicated that the proposed rule and the MRA allow for incorporation of the best regulatory attributes.

FDA agrees with these comments. FDA takes the view that equivalence of GMP reports and other conformity assessment reports and evaluations between the FDA and EC Member State authorities and CAB's can be relied on to help ensure the safety, quality, and effectiveness of products exported to the United States while also reducing the regulatory burden on manufacturers. For the United States, the MRA and this regulation also permit FDA to redirect some of its inspectional resources from countries whose systems are found equivalent to, or higher to, risk priorities not covered under the MRA. The agency may thus better target its limited foreign inspection and other resources devoted to imports and other regulatory concerns. Thus, FDA will be able to leverage its resources by relying on information from its counterpart regulatory authorities in foreign countries that have demonstrated equivalence. Under the MRA and this regulation, as equivalence is achieved between regulatory systems of EC Member State authorities, or CAB's, and FDA, there will be reduced need for importing countries to engage in resource-intensive foreign inspection, sampling, and examination of products being for entry from countries with equivalent systems. This can assist in speedier approvals of safe and effective products and in more comprehensive and effective surveillance of GMP's and quality systems. In addition, during the transition period, collaborative confidence-building activities between FDA and EC Member State authorities and CAB's can result in harmonization of requirements at a high level of consumer protection, thus enhancing regulatory controls.

2. One comment described three fundamental principles which underlie the comment's concerns about the MRA and the proposed rule: (1) The paramount goal for FDA implementation of the MRA and the proposed rule must be to safeguard public health of U.S. consumers; (2) equivalence determinations performed by FDA must improve or at least maintain current U.S. public health protections; and (3) the United States' democratically accountable, policy-making process must be maintained.

FDA agrees with these comments. FDA has consistently articulated these same principles in its policies relating to international cooperative agreements over the last decade. In 1988, the FDA and Directorate-General III (Industrial Affairs) of the European Commission began early discussions in consideration of agreements in the areas of pharmaceutical and medical device GMP inspections. The FDA's primary motivation in seeking such agreements was at that time, and still is, a desire to leverage its limited inspectional resources and to enhance public health protection through increased assurance that regulatory counterparts are applying similar controls. FDA described the value of pursuing international cooperative agreements with selected foreign regulatory bodies in its 1992 "Report of the Task Force on International Harmonization" (Ref. 1). The Task Force concluded that such international agreements are an effective means of facilitating the safety, effectiveness, and/or quality of products that are offered for import into the United States and of efficiently setting priorities for the agency's inspectional resources. The Task Force concluded that a properly conceived and executed agreement would permit FDA's use of foreign government inspectional information to assist in the agency's regulatory decision-making and could help FDA to set priorities for foreign inspection or import surveillance programs. As a result of specific Task Force recommendations, in 1995 FDA revised its Compliance Policy Guide (Ref. 2) to emphasize that the agency's primary goals for entering into agreements with foreign governments are for the purposes of better utilizing its regulatory resources and furthering its mission of protecting the U.S. consumer.

The significant increase of international commerce in pharmaceuticals and medical devices and the question of how FDA can continue to ensure the safety and effectiveness of these medical products prompted the agency to convene a Foreign Inspection Working Group in 1995 to evaluate the agency's foreign inspection program and related import product monitoring. In 1997, this group issued its "Summary Report of the Foreign Inspection Working Group" (Ref. 3) that recognized the need for inspectional approaches that involve cooperative activities such as the development of international agreements between FDA and counterpart regulatory authorities in other countries.

Section 26.21 of this rule provides that the importing country has the right to fulfill its legal responsibilities by taking actions necessary to ensure the protection of human and animal health at the level of protection it deems appropriate. In addition, under § 26.74 nothing in this part limits the authority of FDA to take appropriate and immediate measures that it determines necessary to prevent compromising human health and safety, or to fulfill its legislative, regulatory, or administrative responsibilities.

To ensure a democratic and open process, the FDA will make available in a public docket the complete administrative file that constitutes the basis for FDA's equivalence determinations. In addition, any other related documents the agency receives under the MRA and this regulation will be releasable to the public (or not releasable) according to current Freedom of Information Act (FOIA) provisions. FDA also will assess the degree to which a foreign regulatory system or CAB is accountable to consumers and other interested parties as part of its equivalence determinations. (App. D of subpart A, criteria I.F.). A regulatory system that is not sufficiently transparent to assess accountability may not be found equivalent.

3. One comment stated that the MRA and the proposed rule would replace FDA-conducted inspections of foreign pharmaceutical plants and FDA reviews of foreign medical devices with inspections and evaluations performed by EC Member State authorities and CAB's located in EC Member States.

The implementation of the MRA and this regulation may or may not result in the replacement of some FDA inspections and product evaluations of medical devices produced by manufacturers located in EC Member States. Inspection reports and product evaluations may normally be endorsed under certain conditions only if, after a comprehensive assessment during the 3-year transition period, FDA determines that such reports will provide the information that FDA needs for its regulatory decision making.

4. One comment stated that the MRA negotiation took place primarily for trade facilitation purposes. Evidence of this conclusion was offered by the fact that the negotiations were co-chaired by USTR and the Department of Commerce (DOC) and that press releases and other public statements have characterized the discussions as "trade negotiations."

FDA participated in the negotiations leading to the MRA under its own authority to enter agreements with foreign authorities (see, inter alia, sections 519 and 803 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360(i), 383)). Furthermore, the agency believes that the MRA and this regulation, properly based on a rigorous determination of equivalence of regulatory systems, can help ensure the safety, quality, and effectiveness of these imports while also reducing the regulatory burden on manufacturers, thereby facilitating availability of these important medical products. The goals of facilitating trade and protection of the public health are not necessarily incompatible. The role of USTR and DOC was one of coordination. FDA's ability to reach decisions on the basis of its public health priorities was upheld, and never compromised, during the negotiations. FDA officials led the negotiations concerning the FDA annexes, and FDA's views were incorporated into the portions of the "framework" agreement where FDA's interests were affected. USTR and DOC as well as European trade counterparts undoubtedly desired an MRA for trade reasons. Those agencies, however, supported FDA's position in the negotiations and did not interfere with FDA's desire to maintain health and safety protections. FDA believes that this degree of FDA autonomy will continue as the MRA and this regulation are implemented.

Furthermore, FDA has entered into an interagency Memorandum of Understanding (MOU) with the USTR that ensures that any decisions about the MRA that relate to matters under FDA's jurisdiction will be made only by FDA (see the notice of availability for this MOU published elsewhere in this issue of the **Federal Register**). Specifically, the MOU requires that USTR notify FDA of matters that the Joint Committee will be considering. The MOU states that while USTR would normally speak and vote for the U.S. Government in the Joint Committee, subject to arrangements with other agencies covered by the MRA, FDA will speak for, and vote on behalf of, the U.S.

Government on any matter pertaining to FDA's statutory or regulatory authority raised within the Joint Committee or within any other bodies established under the MRA. In addition, the Sectoral Annex for Pharmaceutical GMP's is specifically exempted from certain provisions of the "framework" agreement, in order to avoid any possible confusion about the use of CAB's that are not utilized in the Annex. Finally, throughout the "framework" agreement and the FDA product-related annexes there are clear safeguard requirements that stipulate if there are health and safety concerns on the part of the importing authority, the importing authority may take appropriate action.

5. One comment stated that the goal of the MRA and the proposed rule appears to be to harmonize health, safety, and environmental standards to the lowest acceptable levels.

While the process of confidence-building and equivalence determination may lead to harmonization of some standards, FDA disagrees that lowest common denominator standards will result. During the transition period, collaborative activities and joint equivalence determinations by FDA-EC Member State authorities and CAB's may result in harmonization of requirements that will enhance consumer protection. By law, section 803(c)(1) of the act requires the Commissioner of Food and Drugs (by delegation under 21 CFR 5.10) to work to "harmonize regulatory requirements," but conditions these actions on findings by the Commissioner that "such harmonization continues consumer protections consistent with the purposes of this Act." FDA's experience in working as a party to the Global Harmonization Task Force (GHTF), the International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use, and the International Cooperation on Harmonisation of Technical Requirements for Registration of Veterinary Medicinal Products has demonstrated that regulatory public health authorities do not compromise health and safety as standards are harmonized, because the relevant discussions and and the resulting documents have been thorough, science-based, and protective of public health. (Harmonization can lead to higher standards because in instances where one regulator has a requirement that others lack, the ensuing discussions of why one regulator has such a requirement often leads to understanding, acceptance, and inclusion of a corresponding provision in the harmonized standard.)

6. One comment expressed the belief that the MRA and the proposed rule put U.S. consumer protection at risk of compromise and cited as evidence the fact that the negotiations extended well beyond their original deadlines, and were reportedly near collapse due to concerns about whether EC regulation is as stringent for pharmaceuticals and medical devices as U.S. regulation.

The comment is correct in stating that the MRA negotiations took longer than expected and that FDA had concerns during the early stages of MRA discussions that early MRA drafts would not provide appropriate public health protections for U.S. consumers. For example, the provision for a 3-year confidence-building transition period was not considered during early MRA discussions. Acceptance of the need for a transition period during which time equivalence would be assessed was one of the keys to moving the MRA negotiations ahead. Indeed, Article 2 of the Sectoral Annex for Pharmaceutical GMP's states that the determination of equivalence of the regulatory systems by the parties is the cornerstone of that Annex. FDA believes that the requirement of a comprehensive assessment of equivalence before inspection reports and product evaluations will be normally accepted, and other safeguard clauses such as §§ 26.21 and 26.74, as discussed previously, provide strong public health protections. In the medical device provisions, EC acceptance that FDA must, as a matter of law and policy, maintain final decision making authority over premarket notifications, and that the MRA could cover premarket notifications only for certain devices, enabled conclusion of the MRA.

7. One comment stated that FDA must make a commitment to seek additional resources to accomplish the activities required by the MRA and the proposed rule.

In the preamble to the proposed rule, FDA acknowledged that neither startup costs nor operational costs are being covered by additional FDA funding in FDA's current budget and that startup costs will have to be absorbed by current funding. Certain key activities of the MRA and this regulation, such as joint inspections of manufacturers located in EC Member States, may be accomplished as part of FDA's inspections of these manufacturers that have been scheduled for the next fiscal year as part of FDA's normal budget process. Other activities of the MRA and this regulation will likely result in new costs. These additional costs are difficult to estimate because they depend significantly on the initial findings from FDA's equivalence assessments of EC Member State authorities and CAB's. FDA will likely be better able to estimate these additional costs as experience is gained during the first year of the transition period. After the first year, FDA will reassess its need to seek additional funding for the activities required by the MRA and this regulation.

8. One comment stated that a failure to devote adequate resources to the programs of the MRA and the proposed rule during the implementation stage would endanger their success.

FDA agrees with this comment. FDA will engage in activities during implementation as its resources permit. FDA recognizes the critical need to undertake a number of activities during the transition process as part of its assessment of the equivalence of CAB's located in EC Member States, including participating in seminars, workshops, joint training exercises, and observed inspections, as well as the analysis required for the equivalence determination process. In addition, any significant problem that is identified may require additional activities to address and resolve it. Finally, the parties will need to develop a consensus on what must be present in quality system and product evaluation reports (or, where harmonization cannot be achieved, each side will need to identify what it needs). Further, the parties will develop a notification and alert system for defects, recalls, and similar problems. All of these activities will require resources, and FDA recognizes their completion is critical to the success of the MRA and the implementation of this regulation.

9. One comment stated that the number of repetitive inspections must actually decrease if the potential value of the MRA and the proposed rule is to be realized.

FDA's interest in the MRA is its view that public health protection can be better assured through enhanced regulatory cooperation. Although FDA agrees that cost savings to industry and to government regulatory authorities can be realized by an actual decrease in the number of inspections that are unnecessarily duplicative, there are additional benefits that may be achieved by the activities required under the MRA and this regulation that make the MRA endeavor worthwhile. For example, the cooperative activities between FDA and EC Member State authorities that will of necessity be part of the equivalence determination process may result in harmonization or congruence of requirements resulting in strengthened consumer protection, more effective regulatory approaches, and reduced regulatory burden on each side of the Atlantic.

10. One comment suggested that FDA must use the inspectional savings anticipated by the MRA and the proposed rule for increased surveillance activities.

Any resource savings resulting from the MRA and this regulation will be used by FDA as necessary and appropriate to enhance the effectiveness of FDA's regulatory programs.

11. One comment stated that FDA should complete confidence building activities as expeditiously as possible and should devote adequate resources to that job.

FDA agrees with this comment and, as stated previously, will devote resources to this program to the best of its ability.

12. One comment noted that the proposed rule did not address FDA guidance documents and asked how guidance documents would be handled under the MRA and this regulation. The comment implied that some FDA guidance documents contain requirements.

FDA will handle guidance documents under this MRA as it handles all guidance documents, according to FDA's Good Guidance Practices (62 FR 8961, February 27, 1997). If FDA determines that there is a need for guidance documents under the MRA, it will publish them or refer to them as appropriate. FDA periodically makes available to the public lists of guidance documents and those that are relevant to the implementation of the MRA or this regulation will be referred to during such implementation. Guidance documents do not themselves contain requirements; they do sometimes refer to or explain requirements that exist in statutes or regulations.

13. One comment expressed concern that the MRA and the proposed rule might result in lower health, safety, and environmental standards in both the United States and the EC. The comment expressed concern that the "framework" agreement might allow undue pressure to relax regulation in one sector of commercial activity in order to secure market access in another unrelated sector. Consequently, the comment asked FDA to seek "the elimination of the umbrella framework agreement" to ensure that U.S. health and safety standards are not compromised.

FDA declines to take the action requested by the comment. The "framework" agreement will not result in lower health or safety standards for FDA-regulated products. The MRA and this regulation expressly preserve the authority of a party to determine, "through its legislative, regulatory, and administrative measures, the level of protection it considers appropriate for safety; for protection of human, animal, or plant life or health; for the environment; for consumers; and otherwise with regard to risks" (MRA Article 15, "Preservation of Regulatory Authority," and § 26.74 of this regulation).

Additionally, this regulation expressly recognizes, at several places, that statutory and regulatory requirements applicable to drugs and devices remain in place unchanged (see, e.g., § 26.1(b) (definition of "equivalence") see also § 26.32(c) and § 26.62(c) and that each party may take actions necessary to ensure the protection of human and animal health "at the level of protection it deems appropriate" (see § 26.21; see also § 26.74(a) and (b) (preservation of regulatory authority)).

This position is consistent with both the statutes FDA administers and international agreements such as the Agreement on Technical Barriers to Trade which expressly recognizes that "no country should be prevented from taking measures necessary to ensure the quality of its imports, or for the protection of human, animal or plant life or health, of the environment, or for the prevention of deceptive practices, at the levels it considers appropriate, subject to the requirement that they are not applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination between countries where the same conditions prevail or a disguised restriction on international trade * * *." (See paragraph 6 of the preamble to the Agreement on Technical Barriers to Trade).

FDA further notes that, under an MOU with USTR concerning the MRA (see the notice of availability for this MOU published elsewhere in this **Federal Register**), USTR will notify FDA of matters to be considered by the Joint Committee, which will be established to consider issues relating to the effective functioning of the MRA. While USTR normally will speak and vote for the United States in the Joint Committee, subject to arrangements with other agencies covered by the MRA, FDA will speak for and vote on behalf of the United States on any matter pertaining to FDA's statutory and regulatory authority. FDA will also represent the U.S. Government on such matters in any other committee or bodies with similar functions established under the MRA or its annexes. This MOU will ensure that, insofar as FDA-regulated products and issues are concerned, public health and safety issues are adequately considered and addressed.

14. One comment strongly disagreed with FDA's position that a 30-day comment period for the proposed rule was adequate. The comment was characterized as "a preliminary identification of key issues involved in the [MRA or the proposed rule] process" and requested that the comments be viewed as "the beginning of an ongoing open process in which public comments will be considered at later junctures" with future opportunities to discuss issues with FDA and other government officials.

As stated in the preamble to the proposed rule (63 FR at 17744 at 17747), FDA provided a 30-day comment period because a longer comment period was unnecessary in light of the numerous opportunities for public input the agency provided during the MRA negotiations. These opportunities included the creation of a public docket for MRA-related issues on May 9, 1996, dissemination of a document concerning the MRA on October 18, 1996 (including an opportunity for public comment on that document), public exchange meetings on March 31, 1995, and October 30, 1996, a Transatlantic Business Dialogue (TABD) meeting on November 8 and 9, 1996, which included a discussion of the MRA, and other public meetings on March 14, 1997, and September 23, 1997. The MRA itself was initialed by governmental representatives on June 20, 1997, and has been available on the World Wide Web (WWW) for over a year. Therefore, the agreement upon which the proposed rule was based had been available for analysis and comment by interested members of the public for some months. In view of these opportunities for public discussion and consideration of the MRA, the 30-day comment period for the proposed rule was adequate.

FDA also stated that it was in the public interest to proceed expeditiously to implement the MRA, and that the 30-day comment period was not contrary to Executive Order 12889 (63 FR 17744 at 17747).

As for the comment's remarks concerning future opportunities for public comment, the agency shares this interest and notes that the public has many avenues for contacting FDA on almost any issue. For example, a person may send a letter to the agency, request a meeting, submit a citizen petition to request issuance or revision of a

regulation or to request agency action or reconsideration on a particular matter, or submit comments on a document published in the **Federal Register** (see, e.g, 21 CFR 10.20, 10.30, 10.33, 10.65).

In sum, FDA agrees that the agency will need to communicate with the public, on a regular basis, as the MRA is being implemented. Interested persons may submit comments on the MRA, or implementation of the MRA, to the agency at any time. In addition, as noted previously FDA's administrative practices and procedures regulations (21 CFR part 10) provide a range of processes for interaction with the agency. Furthermore, the agency contemplates frequent meetings and other communications with the public as MRA implementation progresses.

B. Composition and Operation of the Joint Committees

Several comments encouraged, or would revise the rule to provide for, opportunities for public, industry, or specific agency involvement in various programs or bodies established by the MRA and the proposed rule or by their operation.

1. Four comments said that FDA should ensure industry or public access to and participation in the activities of the MRA and the proposed rule. Three comments advocated industry participation and suggested that FDA and the EC consult the industry during the transitional and operational phases of the confidence building stage. Two of these three comments specifically identified TABD as being critical or essential to implementing the MRA and the proposed rule. Another comment expressed the opposite view, i.e., concern about what the comment described as the TABD's involvement in the MRA negotiations. One comment asked FDA to ensure greater public participation and access for nongovernmental organizations in future mutual recognition agreement negotiations and throughout their implementation.

The agency appreciates and values public and industry input and advice on many matters and intends to employ a variety of means to seek input from the public on the implementation of the MRA and this regulation. However, the MRA and its sectoral annexes represent an agreement between governments that contemplates examination of one another's equivalence in specific areas of regulation. Although FDA believes it would be inappropriate to amend the rule to require industry or consumer participation or the participation of specific industry or consumer representatives on delegations to meetings or to require FDA or the EC to consult industry, FDA plans to consult interested persons—whether they represent the industry, public interest groups, or any other interested person—at appropriate stages of implementation of the MRA and this regulation.

As for the comment requesting greater public participation in future mutual recognition agreement negotiations and implementation, that request is outside the scope of this rule. However, we refer interested persons to "A Plan that Establishes a Framework for Achieving Mutual Recognition of Good Manufacturing Practices Inspections," dated May 20, 1998 (see "What's New on the FDA Website") ("www.fda.gov/opacom/newonweb.html").

2. Four comments discussed representatives to either the Joint Committee or the Joint Sectoral Committee in proposed §§ 26.17 and 26.47 ("Role and Composition of the Joint Sectoral Committee") and 26.73 ("Joint Committee"). Three comments requested clarification as to which U.S. Government agencies would be represented on the Joint Committee or the Joint Sectoral Committees; two comments advocated including officials of USTR and the Department of Commerce on the Joint Sectoral Committees; and one comment recommended including EC trade offices on the Joint Sectoral Committees. All four comments advocated industry representation, or regular participation, in the Joint Committee and/or the Joint Sectoral Committees.

FDA declines to amend the rule to describe which U.S. or EC governmental bodies will send representatives to meetings of the Joint Committee or Joint Sectoral Committees as requested by the comments. In general, the government representatives to either the Joint Committee or the Joint Sectoral Committees will vary depending upon the issues presented to those committees (see, e.g., § 26.73(a) (stating that the Joint Committee consists of "representatives" of both parties) and § 26.73(b) (authorizing the Joint Committee to establish Joint Sectoral Committees "comprised of appropriate regulatory authorities and others deemed necessary"). Thus, each party has the flexibility to determine which government authorities should be present and to match a particular governmental authority's expertise to the issue or issues before a committee. Amending the rule so that either committee would have to include specific representatives of U.S. Government authorities would unnecessarily impair such flexibility, and it would be especially inappropriate for FDA to amend the rule to specify what representatives the EC would send to the committees.

In any case, as explained in section II of this document, the USTR will normally speak for and vote on behalf of the United States in the Joint Committee, subject to arrangements with other agencies covered by the MRA, and FDA will speak for and vote on behalf of the United States on any matter pertaining to FDA's statutory or regulatory authority. Furthermore, the Joint Committee (when FDA is representing the United States) and the Joint Sectoral Committee likely will be addressing technical issues of the sort that FDA, not USTR or DOC, will be considering. The agency is confident that, in all cases, the composition of the Joint Committee or Joint Sectoral Committees will be appropriate for the topics being discussed.

As for the comments seeking industry representation or participation in the Joint Committee or the Joint Sectoral Committees, FDA declines to revise the rule to require such industry representation or participation. Because the MRA, including its sectoral annexes, is an agreement between governments, it is neither necessary nor appropriate to amend the rule to include or to require nongovernmental entities or organizations on the Joint Committee or the Joint Sectoral Committees.

3. One comment asked for clarification about the composition of the Joint Committee and asked whether U.S. citizenship is required for U.S. members.

U.S. representatives addressing FDA topics will be FDA officials. Except in extremely rare circumstances, U.S. citizenship is a requirement for employment by FDA. European representatives will be European Commission officials, possibly accompanied by officials of member country regulatory authorities.

C. Transparency and Confidentiality Issues

Several comments discussed the need for ensuring public or industry participation in equivalence or other regulatory matters under the rule. Other comments emphasized a need for withholding certain information, such as trade secrets and confidential commercial information, from public disclosure.

1. One comment suggested that the rule contain a mechanism for public participation in the equivalence determination process. The comment would provide the opportunity for public comment or input throughout the 3-year transition period, as soon as FDA decides which foreign regulatory systems and CAB's it will review to determine whether they are equivalent, and again when FDA makes a preliminary determination of equivalence. The comment also called for public notice in the **Federal Register** and a response to any public comments when FDA issues a final determination.

FDA intends to hold periodic meetings with interested parties. FDA also plans to prepare and to make public summaries of key meetings held with its EC counterparts concerning implementation of the MRA and this regulation. Further, FDA will make available to the public the administrative file that constitutes the basis for any of FDA's equivalence determinations subject to exemptions from disclosure provided in the FOIA and restrictions in related statutory provisions discussed in the response to comment 2 in section II.C of this document. These approaches should give interested persons insight as to the information FDA considered when making an equivalence determination.

FDA also will use the **Federal Register** and its Internet home page to make available information on equivalence determinations under the MRA and this regulation. Interested persons can submit comments on these determinations.

The agency believes it is important that all interested parties have an opportunity to contribute to the equivalence assessment process. To facilitate such contribution, FDA intends to hold public meetings during the 3-year transition period. In addition, FDA invites all interested persons to provide the agency with information that is: (1) Generally relevant to implementation of the MRA and this regulation; and, (2) of particular relevance to equivalence criteria in Appendix D of subpart A of this rule, and their application to the authorities listed in Appendix B of subpart A of this rule. Information should be sent to the Dockets Management Branch (address above), and should be identified with docket number 95N–0185.

2. Three comments would revise the proposed rule to ensure that the public has access to: Draft programs for assessing equivalence of a regulatory system under proposed § 26.6(b); information provided by a foreign government concerning that government's regulatory activities under proposed § 26.6(c); "audit" reports by European authorities submitted to FDA; or records of CAB's reviewed by a foreign government to the extent that such records would be publicly available if they were reviewed by FDA. One comment explained that public disclosure would ensure accountability and enable U.S. consumers to maintain confidence in an "equivalent" inspection system. One comment would also revise the proposed rule to state expressly that neither party may obstruct public access to information that is publicly available under the laws or regulations of that party.

In contrast, four comments sought clarification concerning disclosure or confidentiality issues and proposed § 26.76, such as whether reports between the parties would be subject to public disclosure under the FOIA; whether information provided to the EC would be subject to EC confidentiality policies; and whether alert or vigilance reports (required by proposed § 26.50) exchanged between the parties as part of an ongoing investigation would be subject to public disclosure.

FDA declines to revise the rule as suggested by the comments. Under § 26.76(a) of this regulation and Article 17 of the MRA, each party agrees to maintain, to the extent required under its laws, the confidentiality of information exchanged under this regulation and the MRA. Trade secrets, confidential commercial or financial information, and information relating to an ongoing investigation are not subject to public disclosure (see § 26.76(b)). Additionally, the parties may designate portions of information that it considers to be exempt from disclosure, and parties are to take all precautions reasonably necessary to protect information exchanged under the MRA and this regulation from public disclosure (see § 26.76(c) and (d)).

Those receiving information under the MRA will treat the information according to their domestic laws and policies. FDA will treat information it receives consistent with the FOIA, Privacy Act, and FDA's regulations and policies. EC Member States will treat information they receive according to the applicable laws in their respective territories. Therefore, information supplied to FDA by a foreign government or CAB and other information or documents discussed by the comments are subject to the rules on public disclosure (or nondisclosure) in the FOIA, the Privacy Act, parts 20 and 21 (21 CFR parts 20 and 21). FDA further notes that other laws, regulations, and agreements may provide additional safeguards against public disclosure of trade secrets and confidential commercial information. For example, section 301(j) of the act (21 U.S.C. 331(j)), in brief, prohibits any person from using to his or her own advantage or revealing trade secret information acquired by FDA under various provisions of the act. Article 39 of the Agreement on Trade-Related Aspects of Intellectual Property Rights (better known as the "TRIPS" agreement), to which the United States is a signatory, states that:

> Members, when requiring, as a condition of approving the marketing of pharmaceutical or of agricultural chemical products which utilize new chemical entities, the submission of undisclosed test or other data, the origination of which involves a considerable effort, shall protect such data against unfair commercial use. In addition, Members shall protect such data against disclosure, except where necessary to protect the public, or unless steps are taken to ensure that the data are protected against unfair commercial use.

These laws and agreements would also be applicable to information and documents acquired by FDA under the MRA and this regulation. Consequently, given the existence of various agreements, laws, and regulations pertaining to public disclosure and confidentiality, no revision to this rule is necessary.

The public availability of the documents or information identified in the comments would, therefore, depend on whether they contained information that, under U.S. laws, regulations, or other obligations, is exempt from public disclosure. In some instances, portions of a document may be publicly available. For example, alert or vigilance reports under § 26.50, when provided to FDA, would be available for public disclosure under § 20.111 if the investigation of the reported incident has been completed; however, personal identifiers would be redacted, as FDA currently does under § 20.111.

3. Two comments would revise proposed § 26.76 so that a person submitting information to FDA could decide whether all or part of the information is confidential or trade secret and therefore not subject to public disclosure.

FDA declines to revise the rule as suggested by the comments. The agency believes this issue is handled adequately under current FDA regulations and policies. FDA policy is to make the fullest possible disclosure of records to the public, consistent with the rights of individuals to privacy, property rights in trade secrets and confidential commercial or financial information, and FDA's need to promote frank internal policy deliberations and to pursue regulatory activities without disruption (see § 20.20). Under FDA regulations, marking records submitted to FDA as confidential raises no obligation by FDA to regard such records as confidential, to return them

to the person submitting the records, to review the records to determine whether all or part of them are available for public disclosure, or to withhold them from public disclosure (see § 20.27). FDA determines whether data or other information are confidential and not subject to public disclosure, consistent with § 20.28.

4. One comment would revise proposed § 26.76 so that trade secrets, ongoing investigations, and patient records are confidential.

FDA declines to amend the rule as requested by the comment. Such a revision is unnecessary given current statutory and regulatory requirements involving public disclosure and confidentiality, including the prohibition in section 301(j) of the act against disclosure of trade secrets, all of which apply to information FDA receives from the regulatory authorities and CAB's.

5. One comment would revise the rule so that a foreign country receiving documents from FDA would have to make those documents available to the U.S. public, even if the foreign country's laws would not make those documents publicly available. The comment would make information submitted to a foreign country available to the public if that information were publicly available in the United States.

FDA declines to revise the rule as suggested by the comment. Requiring a foreign country to make information available to U.S. citizens when such disclosure would be contrary to the foreign country's own laws and regulations is beyond the scope of this rulemaking and beyond FDA's regulatory authority. In addition, the public availability in the United States of information provided to EC officials is already dealt with in FDA's regulations, particularly § 20.89. (Under § 20.89, disclosure of nonpublic information to foreign officials does not automatically result in that information being available to the public generally.)

6. One comment would revise proposed § 26.20 as it pertains to the application of the alert system against individual companies. The comment expressed concern about lack of transparency and due process before a company is placed in or removed from "a negative regulatory status" and suggested that the elements to be considered as part of the alert system be described.

The comment misunderstands the purpose of the alert system provisions of the MRA and this regulation. The agency wishes to clarify that the purpose of the alert system is to implement a timely exchange of product quality information and not information on the regulatory status of inspected firms. The agency is keenly aware of the need to avoid predecisional or otherwise inappropriate regulatory classification of a firm or product. In implementing § 26.20, FDA intends to apply the same standard of fairness and due process it currently affords to manufacturers with respect to regulatory matters. While keeping in mind the need to be fair to manufacturers, however, the agency must keep public health and safety paramount in ensuring that the alert system functions effectively to protect consumers from unsafe or ineffective products. Regarding "transparency," as discussed in section II of this document, FDA will apply to the alert system established by the MRA and this regulation the applicable requirements as to disclosure and nondisclosure.

The proposed rule did set forth the elements to be considered in developing a two-way alert system (see 63 FR 17744 at 17752), and the alert system is designed to serve as a means for notifying each party of crises and emergencies. For example, the documentation element for the two-way alert system refers to elements such as "definition of crisis/emergency and under what circumstances an alert is required" and "mechanism of health hazards evaluation and classification" (id.). The crisis management system element mentions "crisis management and communication mechanisms," "establishment of contact points," and "reporting mechanisms." In short, the alert system does not place specific firms in a "negative regulatory status" or otherwise punish firms as the comment suggests.

7. One comment asked about the confidentiality of submissions under the MRA, particularly submissions to medical device CAB's.

Confidentiality by FDA and EC regulatory authorities is addressed under Article 17 of the MRA. Confidentiality concerns are also addressed in FDA's regulations (e.g., part 20) and guidance materials. FDA urges manufacturers to include clear and definitive language regarding their views on the confidentiality of submissions in contracts developed with CAB's. Just as submitters currently identify information they believe to be confidential commercial or trade secret information in submissions to the agency, they should clearly mark the same types of information in submissions to CAB's. Although FDA needs to make the final decisions as to confidentiality, as discussed previously in comment 3 in section II.C of this document, the contractual agreement between submitters and the CAB's should address the desired handling of information marked in this manner and contractual provisions should specifically address the need to share information with regulatory agencies participating in the MRA, including FDA.

D. Equivalence issues

1. One comment recommended that equivalence determinations and suspensions of equivalence determinations should be made by the importing authority only, rather than jointly by the parties to the MRA and the proposed rule. The exporting country should develop the case for equivalence, while the importing country should have complete control over the final equivalence decision. This would maintain the importing country's sovereign prerogative to protect the health and safety of its citizens.

FDA agrees that the importing authority must have control over the decision as to whether the exporting authority is equivalent, and the agency believes that the decision-making process set up by the MRA and this regulation provides adequately for this. The MRA and this regulation stipulate that equivalence determinations will be made by the Joint Sectoral Committee, which consists of representatives of the parties. This regulation states that decisions of the Joint Sectoral Committee "will be taken by unanimous consent" (§§ 26.17(b) and 26.47(b)). Therefore, no equivalence determinations can be reached in the Joint Sectoral Committee without concurrence by both sides. Hence, in all cases, the relevant authority of the importing country (FDA, in the case of imports into the United States) will have definitive decision making authority.

Similarly, the importing party's right to determine that an equivalence determination should be suspended is also protected by the MRA and this regulation. Decisions to suspend equivalence are taken in the Joint Sectoral Committee, and when that Committee cannot reach unanimous consent on the appropriate action, the matter is referred to the Joint Committee. (As discussed earlier, FDA officials will speak for, and vote on behalf of, the U.S. Government on any matter pertaining to FDA's statutory or regulatory authority raised within the Joint Committee or Joint Sectoral Committees.) If unanimous consent is not reached within a set time period in the Joint Committee, the contested authority must be suspended. Thus, if during these deliberations, the importing authority remains convinced that an exporting authority's equivalence determination should be suspended, the contested authority will be suspended even if the other party disagrees.

Furthermore, the importing country's sovereign prerogative to protect the health and safety of its citizens is further protected for pharmaceuticals by § 26.21 and for medical devices by § 26.67(f). Section 26.21 provides that a party may, if necessary to ensure the protection of human and animal health at the level of protection it deems appropriate, take actions such as suspension of the distribution of the pharmaceutical, product detention at the border of the importing country, withdrawal of the batches and any request for additional information or inspection as provided in § 26.12. Section 26.67(f) provides that a party may, prior to the suspension of a CAB, cease accepting the results of conformity assessment procedures performed by that CAB if the decision for such action is made on the basis of health, safety or environmental considerations, among others. The "framework" of the MRA and this regulation also contain a provision (Article 15 and § 26.74, respectively) preserving domestic legislation.

2. One comment stated that equivalence determinations must be based on an exacting review of the foreign regulatory system. This comment emphasized that equivalence should be determined to exist only where a finding can be made that the foreign system meets or exceeds the level of public health protection, enforceability, transparency, and effectiveness of the U.S. system.

FDA agrees with this comment, and intends to carry out a careful, detailed, and complete review of foreign regulatory systems in order to determine whether equivalence does, in fact, exist. FDA's review will examine whether the foreign system, as it is implemented by the exporting authority, provides the same (or a higher) level of public health assurance as the FDA system. The enforcement activities of the foreign regulatory system and the foreign system's effectiveness in assuring public health protection are very important components of the overall equivalence analyses. For pharmaceuticals, they are specifically covered in subpart A of this regulation, Appendix D, Subsection I (Criteria for Assessing Equivalence for Post- and Preapproval). Criterion I. (Ability to enforce requirements and to remove products found in violation of such requirements from the market) and Criterion V. (Execution of regulatory enforcement actions to achieve corrections, designed to prevent future violations, and to remove products found in violation of requirements from the market) focus on the execution of regulatory enforcement actions. All of the criteria taken as a whole cover the public health protection and effectiveness of the foreign system. In addition, Criterion I. F. (Accountability of the regulatory authority) relates to transparency, in that there must be a system through which the regulatory authority is accountable for its actions. Similar criteria will be developed and applied for competent authority oversight of medical devices. FDA expectations as to medical device CABs' reviews of premarket evaluations are set forth in a guidance document announced in the **Federal Register** of July 2, 1998 (63 FR 36240).

3. One comment requested clarification of equivalence assessment (§ 26.6) and asserted that enforcement and regulatory compliance systems between the United States and the EC need to be comparable. The comment explained further that, before assessments can be made, local regulations for pharmaceutical manufacturing should be in place. The comment added that EC countries have not issued and made public such regulatory documents as warning letters, to identify unacceptable manufacturers.

The agency emphasizes that, as stated in the definition of equivalence, to be equivalent to the United States, EC regulatory authorities need to be "sufficiently comparable to assure that the process of inspection and the ensuing inspection reports will provide adequate information to determine whether respective statutory and regulatory requirements of the authorities have been fulfilled." (§ 26.1(c)). However, "[E]quivalence does not require that the respective regulatory systems have identical procedures." Furthermore, among the criteria for assessing equivalence, contained in Appendix D of subpart A, is the "[A]bility to enforce requirements and to remove products found in violation of such requirements from the market" and "[A]ccountability of the regulatory authority." The agency expects that these two criteria, in combination with others in Appendix D, should address the comment's concerns.

The agency does not understand the comment's apparent premise that, before assessment can commence, regulatory systems must already be comparable. The agency intends to assess the equivalence of an authority based upon the criteria in Appendix D of subpart B as they exist at the time the agency makes the assessment, and needed steps can be taken to address any shortcoming noted.

4. One comment emphasized the need to assure a level playing field in terms of inspectional activity (i.e., the length and frequency of inspections and the number of auditors). This comment recommended collection of statistics about these activities during the transition period and then steps to ensure a reasonable harmonization in approaches between European and FDA audits.

FDA agrees with this comment. Equivalence must exist not only in the foreign authority's legislation and written procedures (including those concerning audits), but also in the manner in which these policies are actually implemented. Under the MRA and this regulation, the conduct of inspections is one of the criteria (Criteria IV) that must be considered in reaching equivalence determinations for pharmaceuticals.

5. One comment questioned how the MRA and the proposed rule would stop a country from relaxing its standards to create an industry-friendly regulatory environment within its jurisdiction, resulting in movement of industry from countries with strict enforcement to countries of less strict enforcement.

There are limits to what governments can do to influence corporate choices about location or relocation of manufacturing sites; many factors play a part in these corporate choices. In any case, the MRA and this regulation have several mechanisms to help prevent "a race to the bottom" with respect to regulatory controls. First, the process for ascertaining equivalence will be rigorous. Second, after an equivalence determination has been made, Article 18 of the Sectoral Annex for Pharmaceutical GMP's (§ 26.18 of this regulation) and Article 19 of the Sectoral Annex for Medical Devices (§ 26.49 of this regulation) provide that the parties and authorities are to inform and consult one another, as permitted by law, on proposals to introduce new controls or to change existing technical regulations or inspection procedures, and to provide the opportunity to comment on such proposals. Furthermore, the parties must notify each other in writing of any changes to relevant legislation, regulations, and procedures. Third, Article 15 of the MRA and § 26.15 of this regulation provide for monitoring activities for the purpose of maintaining equivalence. Fourth, either side may refrain from "normally endorsing" audit reports or device evaluation reports if regulation is

insufficiently strict. Fifth, if FDA believes that the foreign authority has made changes to its control system that lessen the equivalence of that system, FDA has the right to contest the equivalence of that regulatory authority.

Although the MRA and this regulation cannot prevent an exporting country from relaxing its standards, the MRA and this regulation ensure that the importing country must be notified, the equivalence determination of the exporting country can be suspended, and importing countries can take needed actions to protect their citizens.

6. One comment offered support for the proposed rule's recognition that an equivalence assessment must include joint training and joint inspections. This comment emphasized that the MRA and the proposed rule should provide for monitoring and verification of on-going equivalence, including on-going training, on-going joint inspections, and periodic on-going visits.

FDA agrees with this comment. This regulation, as currently drafted, provides for such monitoring and verification in § 26.15 for pharmaceuticals and § 26.69 for medical devices. In the case of medical devices, § 26.69 does not specifically mention training, but also does not exclude it. Joint training exercises are listed in § 26.37 as a confidence building activity during the transition period, and FDA considers monitoring and verification of on-going training to be an essential element of verifying that equivalence continues to exist.

7. One comment stated that the MRA and the proposed rule should provide for periodic expiration of an equivalence determination within 3 to 5 years following the initial determination. FDA should then publish a notice in the **Federal Register** for public comment on whether the equivalence determination has worked and should be renewed. Before renewing the equivalence determination, the United States should verify that the foreign country's or CAB's procedure continues to be equivalent.

FDA agrees that periodic reexamination of a foreign system that has been found equivalent is a prudent practice to ensure that equivalence continues to exist. The agency intends to provide for monitoring of continued equivalence in its implementation of equivalence determinations arrived at under the MRA and this regulation. However, the agency does not believe it necessary to require a "sunset" provision for periodic reexamination of equivalence in the MRA or this regulation. FDA will consider how to provide for reexamination of equivalence during implementation of the MRA.

E. "Piggy back" Agreements

1. One comment suggested that the MRA and the proposed rule should prohibit the development of what the comment called the "piggy-back dilemma" because they would set a precedent for these types of arrangements. The comment described an example of such a "piggy-back" arrangement as FDA establishing a mutual recognition agreement with country A, country A then establishing a mutual recognition agreement with country B, and then FDA automatically granting a mutual recognition with country B on the basis of its mutual recognition agreement with country A.

FDA disagrees with the comment's conclusion that the MRA and this regulation would set a precedent for entering into such "piggy-back" arrangements. The MRA and this regulation require a determination of equivalence be made by FDA of each EC Member State regulatory authority and each device CAB located in EC Member States before any inspectional or evaluation reports would be "normally endorsed" by FDA under certain conditions. There are no provisions in the MRA or this regulation for the "normal endorsement" of reports from any countries or CAB's that have not been determined to be equivalent by FDA.

2. One comment strongly opposed what the comment called "piggy back equivalence" as described in the proposed rule under § 26.11(b) because it would take away FDA's authority to make its own equivalence determinations and otherwise compromise its ability to ensure public health.

The so-called "piggy-back" or "surrogate" inspections described in § 26.11(b) provide that FDA may "normally endorse" inspection reports resulting from joint inspections by an equivalent authority and a nonequivalent authority of manufacturers located in the nonequivalent authority's territory. Under the provisions of the MRA and this regulation, FDA has the option of participating in all "surrogate" inspections and expects to exercise this right as necessary. Furthermore, the MRA and this regulation have other safeguards in place for these types of inspections, and more generally as described previously, that ensure public health protections are maintained.

F. Pharmaceutical issues

1. One comment stated that if FDA has confidence that the EC can regulate drug substances, biologics should also be included in the scope of the document.

Many biological products, such as vaccines and therapeutic drug products, are included in the scope of the MRA and this regulation. Other biological products, specifically human blood, plasma, tissues and organs, were excluded from the scope of the MRA. In order for there to be a finding of equivalence, the parties to the MRA and this regulation must have sufficiently comparable regulatory systems for the products. Not all EC Member States have established regulatory systems for human blood, plasma, tissues, and organs at this time, so it would not be possible to have a finding of equivalence during the transition period for these products. Plasma derivatives were excluded from initial consideration because the U.S. regulation of plasma derivative products has recently undergone intense scrutiny and regulatory change; therefore, the FDA did not believe it appropriate at this time to include plasma derivatives within the scope of the MRA and this regulation.

2. One comment suggested that § 26.1 of the proposed rule be amended to include a definition for the term "normally endorsed."

The agency believes that a codified definition of "normally endorsed" is not needed because the rule (at § 26.12) exemplifies circumstances in which the reports would not be normally endorsed. However, FDA wishes to clarify that normal endorsement generally means that an authority will accept the information contained in the inspection report to evaluate and determine a manufacturer's compliance with that authority's requirements, and FDA expects to endorse the finding in the reports most of the time. FDA is not, however, prevented from reaching different conclusions in appropriate circumstances.

3. One comment suggested revisions to the definition of GMP's (§ 26.1(c)(1)) to explicitly include packaging, labeling, testing, and quality control.

FDA believes the suggested revisions are unnecessary. Labeling, testing, quality control, and packaging are part of manufacturing. FDA believes that the proposed definition meets the needs of part 26 because it is consistent with FDA's statutes and regulations.

4. One comment said that the proposed definition of "inspection report" (§ 26.1(e)) was inconsistent with the definition of "inspection" because it lacked reference to report coverage of commitments made as part of the approval to market a product. The comment suggested added wording to include such commitments.

The agency believes it unnecessary to modify the definition of "inspection report," as suggested, because it should be clear from other sections of the rule (such as §§ 26.2, 26.3, and 26.14), that FDA fully expects that reports covering preapproval inspections of drug manufacturers will, as a matter of course, include information relating to commitments made as part of the marketing approval. In addition, as stated in § 26.8, the agency intends to work quickly with counterpart authorities under the MRA to determine inspection report contents and format.

5. One comment suggested that the proposed rule clarify that it would apply only to inspection of firms that are exporting covered pharmaceutical products from either of the two regions to the other.

The agency believes that the current wording in § 26.3 is sufficiently clear to limit the scope of inspections to only those firms located in the two regions. The rule states in relevant part that the "provisions of this subpart shall apply to pharmaceutical inspections carried out in the United States and Member States of the European Community* * *." Furthermore, § 26.12 refers to inspection reports being normally endorsed by the importing (emphasis added) party. Clearly, the importing party is interested in only inspection reports because of products being imported into its territory.

6. One comment suggested changing the word "both" to "either" in § 26.4(a) on the grounds that a product regulated as a drug by one party but not the other should not be excluded from this regulation because at least one party will apply current GMP standards to the product.

The agency disagrees with the suggestion. If an importing country regulates an article as a drug, but the exporting country does not, the importing country would likely hold the article to a different (higher) set of manufacturing standards. In such a situation, it is unlikely that the importing country would find the exporting country's inspection report of value in assessing the manufacturer's compliance.

7. One comment objected to the provision in § 26.6(c) that equivalence assessments mandate joint inspections. The comment suggested that they be minimized or replaced by "accompanied inspections" where the lead authority is clearly designated.

FDA believes that the conduct of joint inspections is an essential part of the equivalence assessment process. Such assessments would be incomplete without first hand observation of how an authority conducts an inspection. The agency wishes to clarify that, as stated in the rule, the conduct of joint inspections is "for the purpose of assessing regulatory systems and the authorities' capabilities." The actual format of the joint inspections has not yet been determined, and may include inspections where one party observes the other party's inspectional conduct or where each party has responsibility for part of the inspection. As part of the preparation for implementation of the MRA and this regulation, FDA expects to jointly develop with the EC a standard operating procedure for joint inspection that embodies this approach.

8. One comment said the second sentence in § 26.6(a) (stating that the EC will provide information pertaining to criteria under EC competence) was problematic because the equivalence criteria in Appendix D should be complete, as is, or else augmented, as needed.

The agency believes the comment may have misinterpreted the proposed rule to mean the EC will be held to different, yet to be specified, equivalence criteria. The agency wishes to clarify that the equivalence criteria in Appendix D apply equally and fully to both parties. The sentence at issue addresses information (e.g., European Commission Directives) that the EC will provide relating to these criteria that applies to all Member State authorities, versus information that is specific to a particular Member State as to how Member State authorities meet these criteria.

9. One comment said § 26.6(b) should address the mechanism by which the parties establish and communicate their draft equivalence assessment programs. The comment called for interested parties to have the opportunity to comment on the draft programs before they become official. The comment also suggested that the phrase "as deemed necessary" would for FDA be in conflict with legislative mandates that require certain pre- and postapproval inspections.

The agency does not believe it is necessary to codify the mechanism by which the parties establish and communicate their draft equivalence assessment programs. The parties have yet to establish those logistics. Regarding the opportunity for public input on such programs, as discussed in section II of this document, the agency intends to provide for such input in a manner consistent with current policy development and FOIA requirements. The agency is fully aware of its legislative mandates regarding establishment inspections and does not believe the wording of the MRA or the rule is inconsistent with those responsibilities. FDA intends to carry out all activities that it deems necessary to be consistent with its responsibilities.

10. One comment suggested adding wording to § 26.8 to state that FDA will use its current inspection report format, or some modification thereof, until the parties develop and agree upon an inspection report format.

The agency believes the suggested wording is unnecessary because it is confident that the parties will develop and agree upon a mutually acceptable report format in a timely manner.

11. One comment suggested that § 26.9(a) be revised to explicitly require FDA to use International Organization for Standardization (ISO) 9000 and ISO 10000 standards to determine that an authority has demonstrated a pattern of consistent performance with the criteria in Appendix D.

The agency believes it is unnecessary to apply precise statistical methods in demonstrating a pattern of consistent performance, in the context of complying with Appendix D. The agency intends to apply objective and fair criteria in evaluating whether an authority has demonstrated a pattern of consistent performance but does not believe its already rigorous GMP and inspection requirements need an added "layer" of requirements based upon the ISO standards mentioned.

12. One comment suggested that § 26.11(c) be amended to include a manufacturer's certification that the product was manufactured in accordance with applicable GMP's.

FDA's view is that such a certification is unwarranted. The agency expects that, in the context of this agreement, authorities would rely upon inspectional reports to determine a manufacturer's current GMP compliance rather than relying upon the manufacturer's own declaration. The agency therefore declines to adopt the suggestion.

13. One comment suggested adding a new paragraph, to complement § 26.11(c), that would exempt U.S. manufacturers from carrying out all of the quality controls specified in the current GMP regulations, provided that the controls specified in Article 22 paragraph 1(b) of Council Directive 73/319/EEC have been carried out in the EC and each batch or lot is accompanied by

certificates of current GMP and marketing authorization compliance.

FDA does not believe it is in the public interest to exempt manufacturers from performing currently required current GMP quality control measures, or to allow products to be released for distribution without requisite laboratory determination of conformance to established specifications. The suggested changes are not adopted.

14. One comment suggested revisions to § 26.13 to explicitly require that: (1) Requests for postapproval inspections include the product and the requester's areas of special concern; and (2) when new inspections are needed the authority receiving the request should state the reasons why a new inspection is needed along with the estimated completion date.

The agency does not believe it is necessary to make the suggested modifications. The agency anticipates that, as a matter of course, inspection requests and corresponding communication will identify products, areas of concern, and other relevant information, as needed.

15. One comment suggested revising § 26.14(b) to require the notified authority to advise the requesting authority of approximately when the inspection will be completed, and to require the requesting authority at that point to detail what issues need to be addressed during the inspection.

The agency declines to accept the suggestion because it believes such operational logistics will be performed as a matter of course, and need not be codified.

16. One comment suggested revising § 26.15 to specify that review of reports includes evaluation mechanisms such as tracking trends and problems and to state that review studies be used to focus on needed training and program improvements.

The agency agrees that report evaluation and trending, along with coordination among the authorities to ensure program improvements, have merit. The agency does not, however, believe it is necessary to codify details of how equivalence monitoring will be performed.

17. With regard to § 26.18, one comment asked how changes in current GMP regulations and initiation of new programs, such as the First Party Audit Program (FPAP), would affect the implementation of the MRA and the proposed rule.

The agency advises that, under § 26.18, FDA will inform, consult with, and offer the opportunity for comment by, the other party, as permitted by law, regarding changes in current GMP regulations or inspection procedures. The mechanisms for conducting that collaboration have yet to be developed. Regarding the FPAP, the subject of an FDA public meeting held on June 23, 1998 (see 63 FR 27583, May 19, 1998), the agency advises that this initiative is currently in very early stages of development. However, conceptually, FPAP is intended to gather information from selected human use pharmaceutical manufacturers regarding their quality assurance measures; the information would be submitted to FDA by those firms and could substitute, in some measure, for information the agency would otherwise obtain from its direct inspectional activities. The agency cannot predict how these initiatives will affect the nature and volume of current GMP inspections performed under the MRA and this regulation. However, the agency will consult with the other party, in accordance with the provisions of this rule and the MRA itself.

18. One comment suggested revising § 26.18(b) to establish a 30-day timeframe for the United States to notify the EC of any changes to Appendix B, and a 5-day timeframe where such notification can be made electronically.

The agency intends to promptly notify the EC of changes to Appendix B, and to use electronic means of doing so whenever feasible. However, FDA believes it is unnecessary to codify specific timeframes.

19. One comment suggested revising § 26.19 to add reporting timeframes of 15 days for paper correspondence or 3 days for electronic correspondence.

FDA shares the comment's concern regarding the timeliness of exchanging information relating to quality problems, and intends to implement such exchange in a prompt manner to be arranged in concert with the EC. FDA does not, however, believe it is necessary to codify a specific timeframe.

20. One comment suggested revising § 26.20(a) to establish reporting timeframes of 5 days for paper correspondence or 3 days for electronic communications.

As discussed in response to comments on § 26.19, the agency agrees that reporting needs to be done promptly, but does not agree with the suggestion.

21. One comment asked if, and how, the MRA and the proposed rule will accommodate the collection of regulatory samples during pharmaceutical inspections.

The agency advises that the MRA and this regulation do not specify how regulatory samples collected during establishment inspections will be handled. However, FDA anticipates that both parties will handle such samples as they currently do, and that information about such samples would be contained in the inspection report or related documents. The agency is prepared to work with the regulatory authorities should it become necessary to develop procedures relating to sample collection.

22. One comment noted that a recent U.S. General Accounting Office (GAO) report on FDA's foreign inspection program included recommendations intended to improve management of the agency's overseas inspection program. The comment asked if FDA's consideration of the report would affect the MRA or the proposed rule.

The agency has, in response to the GAO report, already initiated several modifications in the management of its overseas inspection program. The agency does not at this point anticipate that implementation of those changes will have a significant effect on the MRA or this regulation.

23. One comment suggested adding a new paragraph to subpart C, § 26.76 that would explicitly prohibit the parties from obstructing public access to information which, by U.S. law, is disclosable to the public.

The agency does not agree that this section is needed because part 26 does not conflict with U.S. laws regarding public access to information. The agency is fully aware of its legal obligations to abide by those applicable statutes, as discussed in section II of this document.

24. One comment suggested numerous editorial changes to add clarity throughout the rule.

The agency has carefully considered the suggested revisions and believes that although some have merit, on balance, the need to retain wording in part 26 that is as close as possible to the MRA itself outweighs the advantages that the changes might afford.

G. Medical Device Issues

The Food and Drug Administration Modernization Act of 1997 (FDAMA), Pub. L. 105–115, 111 Stat. 2296 (1997), included a number of amendments to the act relevant to the MRA's Sectoral Annex on Medical Devices (Medical Devices Annex). First, an FDA pilot program for third-party review of medical devices (see 61 FR 14789, April 3, 1996) was codified in the act as new section 523 (21 U.S.C. 360m), entitled "Accredited Persons." In the **Federal Register** of May 22, 1998 (63 FR 28392), FDA published a notice of availability of a draft guidance on its third-party

accredited persons program under this new section of the act.

Interested persons should also refer to a related notice of availability published in the **Federal Register** of July 2, 1998 (63 FR 36240), entitled "Draft Guidance for Staff, Industry and Third Parties, Third Party Programs under the Sectoral Annex on Medical Devices to the Agreement on Mutual Recognition Between the United States of America and the European Community; Availability" (MRA). This guidance document is also available in FDA's Home Page on the WWW ("www.fda.gov").

Second, due to amendments made by FDAMA, FDA has exempted a number of devices from premarket notifications under section 510(k) of the act (21 U.S.C. 360(k)) (see 63 FR 3142, January 21, 1998 (Class II devices), and 63 FR 5387, February 2, 1998 (Class I devices)). On May 20, 1998, FDA made available a list of devices which are eligible for third party review under new section 523 of the act. FDA plans to propose to the European Commission that the tables attached to the Medical Devices Annex to the MRA, listing devices eligible for review during the transitional period of the MRA, be revised to reflect the changes in U.S. requirements made by FDAMA and the FDA implementing actions described previously. The EC may also suggest changes concerning devices eligible for the MRA. These adjustments will be made during the transitional period under the MRA.

Third, as discussed in comment 9 of section II.F of this document, FDA now has explicit authority to recognized voluntary consensus standards for devices due to a FDAMA amendment to section 514 (c) of the act (21 U.S.C. 360d(c)).

1. One comment identified a typographical error in Table 1 of the Sectoral Annex on Medical Devices (Annex) of the proposed rule concerning radiographic screens § 892.1960 (21 CFR 892.1960).

FDA agrees with the comment and in the final rule has corrected this typographical error. Also, several minor typographical errors in the device lists were identified by the European Commission and FDA just prior to the signing of the MRA on May 18, 1998. These corrections are also being made in corresponding provisions in this rule.

2. One comment from a manufacturer questioned whether condoms are covered by the MRA.

The list of devices that FDA made available on May 20, 1998, for eligibility in the accredited persons program under section 523 of the act includes condoms, with and without spermicidal lubricant. Therefore, FDA is willing to consider condoms with or without spermicidal lubricant as eligible for participation in the premarket assessment component of the device MRA, if the EC agrees. Condoms without spermicidal lubricant are listed in Table 3 of the Annex for possible inclusion in the scope of product coverage during the Operational Period. However, condoms with spermicidal lubricants may be regulated by the EC, or certain EC Member States, as pharmaceuticals and hence may be outside the scope of the Medical Devices Annex.

3. One comment asked whether clearance of a 510(k) will be equivalent to CE marking.

Clearance of a 510(k) will not be considered equivalent to the CE marking, nor will CE marking be considered equivalent to a 510(k). Under the MRA and this regulation, the exporting country's CAB's perform specified conformity assessments in accordance with the importing country's requirements. The MRA and this regulation are intended to enable determinations: (1) Whether CAB's in the EC are capable of conducting certain premarket and quality system evaluations in accordance with U.S. regulatory requirements in a manner equivalent to how those evaluations are conducted by FDA (with FDA making the final decision, but with an expectation that FDA would "normally endorse" a CAB's assessment), and (2) whether CAB's in the United States are capable of conducting certain premarket and quality system evaluations in accordance with EC regulatory requirements in a manner equivalent to those conducted by European CAB's, also referred to as "notified bodies."

4. One comment requested implementation of a system by which U.S. manufacturers can obtain government documents for presentation to the EC.

Appendix A of subpart B contains addresses the relevant legislation, regulations, and procedures for the EC and the United States. In addition, the European Commission has a site on the WWW for direct access to EC documents ("http://Europa.eu.int/eur-lex"). Also, just as European notified bodies are frequently a manufacturer's first point of contact regarding the process for meeting the European requirements, it is expected that, under the MRA and this regulation, U.S.-based CAB's will be able to provide manufacturers with information on EC requirements and copies of necessary European documents needed to meet European requirements.

5. One comment stated that industry would like to encourage observed audits. The comment explained that, in an observed audit, a U.S. manufacturer would allow an EC Notified Body representative to accompany an FDA inspector during an inspection of its plant.

FDA agrees that joint industry audits are necessary to demonstrate that CAB's are competent to assess medical devices to each country's requirements and level of public health protection. FDA encourages manufacturers to support observed audits.

6. One comment suggested that, to further strengthen confidence in CAB's, training on auditing should be conducted by the United States and EC, and industry should be encouraged to participate in FDA's third party system, i.e., the accredited persons program.

FDA agrees with the suggestions. Training on premarket and quality system evaluations is planned for CAB's participating in the MRA and in FDA's third-party accredited persons program. FDA has made tentative plans to conduct training for EC CAB's on October 14 to 16, 1998, in the Washington, DC area. Representatives of EC CAB's interested in participating in the MRA should begin making plans to attend this training, which is also being provided to participants in the accredited persons program. This training is intended to address the scope, content, and expectations of the evaluations sufficient to determine the equivalence of the assessments.

7. One comment requested that FDA consider IV catheters, under 21 CFR 880.5200, for inclusion in Table 2, "Class II Medical Devices Included in Scope of Product Coverage at Beginning of Transition Period."

During the negotiation of the Annex, there were no expressions of interest in adding IV catheters to any of the tables of eligible medical devices. FDA is willing to consider that issue in the future, but at this time does not intend to include IV catheters in Table 2 at this time.

8. Several comments suggested that the MRA be expanded to include more devices, including class II devices.

As discussed previously, FDA plans to propose expansion of the list of eligible devices to include all devices eligible for third party review under FDAMA, except those medical devices regulated as in vitro diagnostics. (The EC does not yet have legislation in place on in vitro diagnostics.) The agency is considering specific suggestions by industry comments for inclusion of specific devices. These suggestions are extremely useful for future decisions,

although neither the FDA nor the European Commission can, at this time, respond to these industry suggestions by including additional devices under the MRA. Revision of the list will, however, be a step taken early during the transition stage. The pace at which devices can be added to the device premarket assessment aspect of the MRA depends on the availability of guidance documents or FDA-recognized standards, as discussed in comment 8 of section II.G of this document.

9. Several comments urged FDA to accept international standards, instead of developing FDA guidance documents, for the third party review of class II devices. One comment proposed use of 81 international and regional standards to support premarket evaluations and quality system evaluations.

FDA, under FDAMA, has begun to recognize consensus standards for use in its various medical device activities (see 63 FR 9561, February 25, 1998). FDA very much appreciates the submission identifying potentially useful standards. Communications such as this that relate to the use of standards in MRA implementation and other device activities are being considered in regard to FDA's consensus standards initiative announced on February 25, 1998. FDA plans to update the guidance for the recognition and use of consensus standards, as described in the February 25, 1998, document, and in doing so the agency will take into account the suggestions received and the information and experience to be gained during the implementation of the MRA.

FDA's views on the appropriateness of including a device under the premarket evaluation component of the MRA will depend, in part, on whether FDA-recognized standards or review guidance documents exist to provide a basis for product evaluation. Recognized standards or review guidance do not currently exist for many of the additional devices suggested for inclusion in the MRA by certain industry comments. FDA plans to develop guidance documents only where recognized consensus standards fail to address sufficiently the requirements for demonstrating substantial equivalence or other U.S. requirements.

10. One comment suggested that FDA take aggressive steps to identify and designate third party review organizations.

FDA is proceeding in a timely and transparent manner to describe processes and expectations for third parties to participate in both the accredited persons program and the MRA. For example, the agency, in the **Federal Register** of July 2, 1998 (63 FR 36240), issued a comprehensive guidance document entitled "Draft Guidance for Staff, Industry and Third Parties, Third Party Programs Under the Sectoral Annex on Medical Devices to the Agreement on Mutual Recognition Between the United States of America and the European Community (MRA)," to assist interested parties to understand the designation process for CAB's and to prepare their applications. This document has been made available on the CDRH Home Page on the WWW. FDA officials also have discussed the third party programs under FDAMA and the MRA at trade shows and public meetings.

11. Two comments suggested that both quality system evaluation reports and premarket evaluation reports should be harmonized between the United States and EC. Another comment stated that one of the issues to be resolved is determining what duration of an audit is satisfactory to the designating authorities as well as the scope, content, and degree of rigor expected from such audits. One comment further suggested incorporating efforts by an international harmonization group known as the GHTF and its Study Groups I and IV in developing the format for reports. FDA officials, European government officials, and industry representatives are among those active in the GHTF, which is comprised of government and industry representatives from North America, Europe, Asia, and Australia, as well as observers from other countries and international organizations (see International Harmonization; Policy on Standards, in the **Federal Register** of October 11, 1995 (60 FR 53081)).

The comment also suggested that, in the interest of efficiency and to minimize translation costs, such reports should be in an abbreviated form in most circumstances. It further suggested that the reporting forms be limited to certification by the CAB that applicable requirements of the other party's regulations are met and that this certification may reference those documents which were examined to demonstrate compliance. The comment also recommended use of FDA's initiative known as the "510(k) Paradigm" that offers other ways of streamlining decisions on 510(k)'s.

FDA expects to use relevant GHTF documents, as appropriate, in implementing the MRA. Study Group I of GHTF is developing a universal format which provides guidance on technical documentation with a view to first identifying similarities and divergences among various regulatory systems and then striving to achieve, to the extent possible, harmonization of requirements. At this time, this study group has reviewed requirements of existing systems and is now developing the essential principles which could facilitate harmonization of requirements, particularly as to premarket submissions. FDA is hopeful that it will be able to use guidance developed by Study Group I as guidance to MRA participants on the development of premarket evaluation reports.

Study Group IV of GHTF is preparing guidelines for auditing quality systems of medical device manufacturers. These GHTF guidelines are now being made available for comments by principal participants in GHTF, e.g., by the EC United Kingdoms' Medical Devices Agency's Home Page and the United States through a future publication as a guidance in the **Federal Register** and in the FDA Home Page. FDA anticipates using audit guidance developed by Study Group IV in the implementation of the MRA.

It is too soon to say precisely what formats will be used for premarket evaluation reports and quality system evaluation reports under the MRA. FDA intends to take into account the concerns expressed in the comment about minimizing the required documentation to that which is necessary. The formats for such reports will be developed during the MRA transition period, and FDA expects guidance from the GHTF study groups to be extremely helpful in this respect. During format development, FDA will work to develop formats that will not be unduly burdensome, so that forms and reports will include information sufficient for the parties to determine if normal endorsement is warranted. FDA will consider the use by third parties of FDA streamlining initiatives such as the 510(k) Paradigm in review of applications under the accredited persons program and the MRA. Information on the 510(k) paradigm can be accessed on the CDRH Home Page under "Re-engineering Efforts" (www.fda.gov/cdrh).

12. Two comments raised the concern that the exchange of post market vigilance reports might create an administrative burden for industry if reports are not kept simple. One of the comments noted that industry has wanted to avoid multiple reporting and wishes to report only when there is a real and imminent danger to public health.

FDA believes that adverse event reports need to be clear, concise, and

addressed to public health needs. FDA, through its participation in the GHTF Study Group II, is working toward a streamlined and harmonized system of reporting adverse events that are required by EC and U.S. laws and regulations. This effort is initially focused on harmonizing the guidelines for the types of adverse events that medical device manufacturers need to report. This guidance will make it easier for a manufacturer to decide which events need to be reported to the appropriate bodies in the EC and in the United States. The guidance developed by Study Group II will also be used to institute a mechanism for sharing adverse event data between the EC and United States under the MRA.

13. Two comments expressed support for § 26.48, "Harmonization," and one suggested that FDA should continue to participate in the efforts of the GHTF.

FDA agrees with this comment and intends to continue to participate in these efforts, as resources allow.

14. One comment suggested that the FDA consider provisions by which U.S. CAB's would perform domestic inspections under the act.

This comment addresses issues outside of the scope of the MRA and of this rulemaking. Under the MRA and this regulation, U.S. CAB's will be designated only to conduct product type-examination and verification and/or quality system evaluations for products produced for export to the EC.

15. One comment asked if the "post market vigilance reports" addressed under § 26.33(a)(3) were the same as Medical Device Reports (MDR's).

Post market vigilance reports and MDR's are similar mechanisms for reporting adverse incidents in the EC and the United States respectively. A system will be set up during the transition period and maintained thereafter by which the parties will notify each other when there is an immediate danger to public health. (See § 26.50.) As part of the alert system, each party shall notify the other party of any confirmed problem reports, corrective actions, or recalls. The United States and EC plan to develop the data elements of such reports during the transition period, making use of draft documents already being prepared by the GHTF's Study Group II.

16. One comment asked if the regulatory authorities mentioned in § 26.34 and the designating authorities mentioned in § 26.65 are the same.

"Regulatory Authority" is defined in § 26.60(a)(3) and "Designating Authority" is defined in § 26.60(a)(1) of the final rule. It is possible for these authorities to be different, or they may be the same. For the purpose of the Sectoral Annex on Medical Devices, regulatory authorities have the responsibility to implement the provisions of the Annex, including the designation and monitoring of CAB's.

17. One comment asked if the criteria to be used by FDA to determine technical competence for product reviews is identical to that which is to be used in the U.S. third party program for accredited persons.

The technical competence, qualifications, and freedom from conflict of interest for the product review (510(k)) part of the MRA are essentially the same as those being applied in FDA's third-party program for accredited persons. However, the MRA also includes quality systems audits, and CAB's performing quality systems audits under the MRA will need to have the additional training, expertise, and experience to perform quality systems audits. In this respect, the MRA is broader than the FDA third party accredited persons program.

18. One comment supported § 26.31, which states that the Sectoral Annex on Medical Devices should evolve and that the parties will periodically review the program to assess progress and identify enhancements. This comment also requested that timeframes be established for specific actions during the transition period. The comment also recommended that the regulatory authorities establish a schedule for the execution of the specified confidence building activities, under § 26.35, that can serve to "benchmark" progress.

FDA finds these comments extremely useful. Specific confidence building activities will depend on the nature of product evaluation and the extent of CAB utilization, and available resources. A process for scheduling confidence building activities and the schedule for accomplishing them will be developed by the United States and EC.

19. One comment stressed the importance of defining the supporting evidence necessary to demonstrate the technical competence and independence of CAB's. This comment also requested that FDA make known to the general public the date and process by which the CAB's will be designated.

FDA issued a **Federal Register** of July 2, 1998 (63 FR 36240) announcing the availability of a draft guidance entitled "Draft Guidance for Staff, Industry, and Third Parties, Third Party Programs Under the Sectoral Annex on Medical Devices to the Agreement on Mutual Recognition between the United States of America and the European Community (MRA)." This draft guidance addresses the criteria and qualifications expected to demonstrate technical competence and independence of CAB's. In addition, the draft guidance outlines the process for designation of CAB's under the Medical Devices Annex to the MRA. FDA will keep the public informed through the home page on the WWW of events under the MRA, such as designation of CAB's.

20. One comment expressed concern that FDA stated that the operational period will start at the end of the transition period, and that FDA did not state that the transition period will be for a period of 3 years. The comment sought clarification.

FDA disagrees that further clarification is needed. The duration of the Transition Period is 3 years. This is clearly stated in § 26.35 and in the Annex, Article 5.

21. One comment supported the process of the importing party's regulatory authority routinely accepting or "normally endorsing" reports.

FDA observes that this was the criterion agreed to in the Annex and stated in the regulation (§ 26.41(d), Exchange and endorsement of quality system reports, and § 26.42(c), Exchange and endorsement of product evaluation reports).

22. One comment sought clarification of the term "normally endorse" and expected that the importing party will endorse the vast majority of quality system evaluation and premarket evaluation reports.

FDA anticipates that, once CAB's are designated, the importing party (FDA, in the case of devices to be imported into the United States) it is likely to endorse most reports. Sections 26.41(d) and 26.42(c) describe the expectation that reports will normally be endorsed by the authority of the importing party, except under circumstances delineated in those provisions.

23. One comment supported the need to continue to accept the results of conformity assessment procedures performed by a CAB prior to its suspension as a listed body, except in specified situations as identified in § 26.67(f).

FDA agrees with the comment's description of the Annex and the regulation but would also point out the provisions in the framework agreement and in § 26.74 of this regulation allowing authorities on either side to take appropriate and immediate measures to protect public health.

24. One comment expressed concern that the conformity assessment procedures performed by a CAB prior to

withdrawal remain valid subsequent to withdrawal.

FDA notes that § 26.68, "Withdrawal of Listed Conformity Assessment Bodies," clearly delineates the circumstances under which a party is no longer required to accept or recognize results of conformity assessment procedures performed by CAB's (or, in the case of this Annex, to no long normally endorse reports provided by CAB's). As noted in the response in the preceding comment, however, nothing in the MRA or this regulation supersedes a participating country's ability to preclude shipments of products that present a concern under its laws. Whether there will be "normal endorsement" of assessments done by a CAB before its suspension or withdrawal would be determined, on the merits, based on the facts in the particular case (see, also, the discussion in comment 13 in section II.A of this document under the heading "General Comments and Issues")

25. One comment suggested a definition section for subpart B.

FDA does not believe that it is necessary to change the regulation to add a definition section. Guidance may be provided in the future, if necessary.

26. One comment expected the list of CAB's would be published along with the final rule, or that the final rule would state when the list will be published.

At this time, FDA is not certain of the date when the designation of CAB's will be made under the MRA. Once this occurs, however, the list will be made public on the FDA Home Page on the WWW.

27. One comment requested availability of a description of the information which must be presented in quality system and premarket evaluation reports to be produced by CAB's. The comment suggested that this information is needed in order to judge the adequacy of the work of various CAB's.

FDA agrees. The information that FDA expects to be present in quality system and product evaluation reports will be made public through the FDA Home Page on the WWW during the transition period. Comment 4 of the section II.F of this document describes how to obtain EC documents.

28. One comment commented on the 90-day period provided for obtaining an inspection and requested provision for extension of this period for good cause.

FDA realizes that the CAB's may not be able to accommodate all inspection requests within 60 or 90 days. Time extensions may be needed, for good cause, but FDA believes procedures for such a request need not be codified in this section.

29. One comment strongly recommended that FDA conduct an on-going verification of the evaluation reports produced by the CAB's because they are vital to ensuring the safety and effectiveness of medical devices. This comment also raised concerns about the potential for conflicts of interest in a system of private review. (Some EC CAB's are private sector bodies.)

FDA is sensitive to the concerns raised in this comment and recognizes the importance of adequate reports from CAB's regarding product evaluations and quality system evaluations as well as FDA's verifications. It is anticipated that FDA will rigorously evaluate both the reports and the CAB's that produce them. In addition, FDA has issued a notice announcing the availability of a draft guidance entitled "Draft Guidance for Staff, Industry, and Third Parties, Third Party Programs Under the Sectoral Annex on Medical Devices to the Agreement on Mutual Recognition between the United States of America and the European Community (MRA)," published in the **Federal Register** of July 2, 1998 (63 FR 36240). This document addresses conflict of interest concerns as well as technical competence criteria.

Also, it should be kept in mind that final decisions on 510(k)'s will be made by FDA, "normally endorsing" submissions by CAB's, during both the transitional stage and the operational stage of the Medical Devices Annex.

33. One comment suggested that the wording of §§ 26.39(b) and 26.46(b) be clarified. These sections address equivalence and listing of CAB's.

FDA believes the wording of these sections is sufficiently clear. Further clarification, if necessary, could be considered in the future after experience is gained under these provisions.

34. One comment stated that CAB's should be designated within the first 2 years of the transition period because sufficient accumulation of evidence supporting equivalence would be unlikely if designation occurred in the last year of the transition period.

FDA points out that Article 6 of the Annex and § 26.36 of this regulation states that "each Party shall designate [CAB's] to participate in confidence-building activities by transmitting to the other Party a list of CAB's* * *." This transmission will be done at the start of the transition period. However, determinations of equivalence will be made following this exchange of lists and, indeed, will be a continuous feature of MRA implementation.

35. One comment suggested that § 26.37 be revised to include the frequency of workshops and seminars throughout the transitional and operational phases.

FDA agrees that workshops and seminars are important. However, provisions for the frequency of workshops and seminars are not appropriate for inclusion in a rule. Furthermore, available resources will determine the frequency of joint training and seminars. FDA will continue to explore cost effective means, such as audio/video conferences and videotape training, to enhance the expertise of the CAB representatives. As stated earlier, an FDA training program for EC CAB's has been tentatively scheduled for October 14 to 16, 1998, in the Washington, DC area.

36. One comment said that § 26.46(c) implies that the designation of additional CAB's in the operational phase will occur only once each year. This comment went on to suggest that, if expansion of the CAB list is expected to be an annual event, then § 26.66(b) should so state.

FDA believes the language in § 26.46(b) is sufficiently clear, and that there is no need for change in the regulatory provisions cited.

37. One comment suggested that § 26.65 be revised to state that, "Designating authorities shall only designate CAB's where the primary place of business is in the territory of the designating authority."

FDA disagrees with the suggestion, as it would introduce an unwarranted restriction into FDA's implementation of the MRA and this regulation. In any case, even if FDA were to adopt the comment's suggestion, the intended purpose of the suggested change could easily be overcome if a U.S. division of a foreign CAB simply formed a new corporation, under the law of a U.S. State, with the United States as the principal place of business.

38. One comment noted that medical devices principally regulated by FDA's Center for Biologics Evaluation and Research (CBER) appear to have been excluded from the MRA.

The comment is correct in noting that no CBER-regulated devices are included in the lists appended to the Sectoral Annex on Medical Devices. CBER has the lead responsibility for 510(k) review for 23 medical device classifications. Adding some of these devices to the list of devices that FDA wishes to make eligible for review under the Annex, at this time, would require establishment of special handling procedures, training, and monitoring within CBER without the expectation of a meaningful number of third party reviews. However, devices regulated by CBER under the device premarket notification provisions of the act (21 CFR 360(k)) might be considered for eligibility in the MRA program as experience and confidence develops.

39. A comment addressed issues of grammar and format and did not deal with substantive matters relevant to the MRA that would have any bearing on its content, issues, or outcome.

FDA declines to alter the text of the proposed rule in response to this comment. Throughout this rulemaking process FDA has attempted to adhere to the language contained in the MRA unless serious substantive matters were identified having bearing on the content, issues, or outcome of the MRA or this regulation. The nonsubstantive issues raised by this comment do not justify any amendments to this regulation.

III. Summary of Changes

1. In response to a comment, the title of the proposed regulation has been changed to the following: "Part 26—Mutual Recognition of Pharmaceutical Good Manufacturing Practice Reports, Medical Device Quality System Audit Reports, and Certain Medical Device Product Evaluation Reports: the United States and the European Community."

2. On its own initiative, FDA has determined that the language of proposed § 26.0 should be amended to provide additional and more precise explanation about the applicability of this regulation with regard to other U.S. agencies and the EC. Therefore, proposed § 26.0 has been amended to read as follows:

Section 26.0 General.

This part substantially reflects relevant provisions of the framework agreement and its sectoral annexes on pharmaceutical good manufacturing practices (GMP's) and medical devices entitled "Agreement on Mutual Recognition Between the United States of America and the European Community" (the MRA), signed in London on May 18, 1998. For codification purposes, certain provisions of the MRA have been modified for use in this part. This modification is done for purposes of clarity only and shall not affect the text of the MRA concluded between the United States and the European Community (EC), or the rights and obligations of the United States or the EC under that agreement. Whereas the parties to the MRA are the United States and the European Community (EC), this part is relevant only to the Food and Drug Administration's (FDA's) implementation of the MRA, including the sectoral annexes reflected in subparts A and B of this part. This part does not govern implementation of the MRA by the EC, which will implement the MRA in accordance with its internal procedures, nor does this part address implementation of the MRA by other concerned U.S. Federal agencies. For purposes of this part, the terms "party" or "parties," where relevant to FDA's implementation of the MRA, should be considered as referring to FDA only. If the parties to the MRA subsequently amend or terminate the MRA, FDA will modify this part accordingly, using appropriate administrative procedures.

3. On its own initiative FDA has amended several sections of the proposed rule to more accurately describe the relationship between the provisions of this part and the provisions of the MRA. Specifically, §§ 26.6(d), 26.61, 26.73, 26.78, 26.79, and 26.81(d) have been appropriately changed to accomplish this purpose.

4. In response to one comment, Table 1 of the proposed rule concerning the product code for radiographic screens, § 892.1960, is amended in the final rule to reflect the correction of a typographical error: "WAM" is changed to read "EAM."

5. Other typographical errors and nonsubstantive changes in the MRA have been identified by FDA and the EC since the FDA proposed rule was published on April 10, 1998. Because FDA has endeavored to have this regulation reflect the text of the MRA as accurately as possible, the final rule has been amended to reflect all of these nonsubstantive changes. For example, in § 26.4, the reference is now "European Community (EC), rather than "European Union" or "EU," in accordance with the preference of the EC. The EC is the correct entity, as the EU is not a juridical entity.

6. The agency has amended the authority citation to refer to U.S. statutes on confidentiality (5 U.S.C. 552, 18 U.S.C. 1905, and 21 U.S.C. 331) as well as the new accredited persons provisions of the act (section 523, 21 U.S.C. 360m) added by FDAMA.

7. Under Appendix E of Subpart A (Elements to be Considered in Developing a Two-Way Alert System), for administrative reasons the contact points for FDA are changed from "FDA's Division of Emergency and Investigational Operations" to the following:

Biologics: Director, Office of Compliance and Biologics Quality (HFM–600), 1401 Rockville Pike, Rockville, MD 20852, phone: 301–827–6190, fax: 301–594–1944.

Human Drugs: Director, Office of Compliance (HFD–300), MPN I, 7520 Standish Pl., Rockville, MD 20855–2737, phone: 301–594–0054, fax: 301–594–2114.

Veterinary Drugs: Director, Office of Surveillance and Compliance (HFV–200), MPN II, 7500 Standish Pl., Rockville, MD 20855–2773, phone: 301–827–6644, fax: 301–594–1807.

8. Under § 26.1(c), the definition of Good Manufacturing Practices (GMP's) has been changed from the following:

(c) *Good Manufacturing Practices* (GMP's): [These GMP conceptual definitions are to be merged by the parties at a future date.]

(1) GMP's mean the requirements found in the respective legislations, regulations, and administrative provisions for methods to be used in, and the facilities or controls to be used for, the manufacturing, processing, packing, and/or holding of a drug to assure that such drug meets the requirements as to safety, and has the identity and strength, and meets the quality and purity characteristics that it purports or is represented to possess.

(2) GMP's are that part of quality assurance which ensures that products are consistently produced and controlled to quality standards. For the purpose of this subpart, GMP's include, therefore, the system whereby the manufacturer receives the specifications of the product and/or process from the marketing authorization/product authorization or license holder or applicant and ensures the product is made in compliance with its specifications (qualified person certification in the European Community (EC)).

to the following:

(c) *Good Manufacturing Practices* (GMP's): [The United States has clarified its interpretation that under the MRA, that only paragraph (c)(1) of this section has to be understood as the U.S. definition and paragraph (c)(2) as the EC definition.]

(1) GMP's mean the requirements found in the legislations, regulations, and administrative provisions for methods to be used in, and the facilities or controls to be used for, the manufacturing, processing, packing, and/or holding of a drug to assure that such drug meets the requirements as to safety, and has the identity and strength, and meets the quality and purity characteristics that it purports or is represented to possess.

(2) GMP's are that part of quality assurance which ensures that products are consistently produced and controlled to quality standards. For the purpose of this subpart, GMP's include, therefore, the system whereby the manufacturer receives the specifications of the product and/or process from the marketing authorization/product authorization or license holder or applicant and ensures the product is made in compliance with its specifications (qualified person certification in the EC).

The previous changes reflect discussions between FDA and European Commission officials. As a result of those discussions, the United States has clarified its interpretation that the first paragraph of Article 1(3) of the Sectoral Annex for Pharmaceutical GMP's, has to be understood as the U.S. definition and the second as the EC definition. The agency believes that these changes are appropriate because they clarify that the applicable definition under the MRA

will be consistent with the act and regulations (see, e.g., section 501(a)(2)(B) of the act; 21 U.S.C. 351(a)(2)(B)). Furthermore, the Sectoral Annex on Pharmaceutical GMP's, including its core concept of "equivalence," does not require either party to change its definition or application of GMP's.

9. Changes have been made to the list of regulatory authorities contained in Appendix B of Subpart A (List of Authorities) as a result of the legal review carried out in the EC prior to finalizing the MRA. The European Commission amended its list of regulatory authorities contained in Appendix 2 of the Pharmaceutical GMP Annex of the MRA because the changes more correctly reflect the allocation of administrative competencies in the EC and its Member States and do not alter the activities to be carried out under the MRA.

10. Changes have been made to Table 2. of Appendix B of Subpart B of the rule. That table listed 42 class II medical devices to be included within the scope of product coverage at the beginning of the transition period. Four of the devices that were on the list cannot be reviewed by conformity assessment bodies under the MRA and this rule, because of a statutory prohibition in the act. Accordingly, the agreement will be brought into force without application to those four devices. Section 523 of the act prohibits "accredited persons" from performing review of a class II device that is intended to be permanently implantable, life sustaining, or life supporting, and review of such devices must be performed by FDA. This provision was recently added to the act by FDAMA. The agency recently determined that the following four devices are within the scope of the prohibition and have been removed from Table 2: AN 868.5925, powered emergency ventilator; OR 888.3020, intramedullary fixation rod; OR 888.3030, single/multiple component metallic bone fixation appliances and accessories; and OR 888.3040, smooth or threaded metallic bone fixation fastener. The United States has informed the EC of this situation and of the need to make appropriate amendments to the MRA promptly after its entry into force.

IV. Analysis of Impacts

FDA has examined the impacts of the final rule under Executive Order 12866, under the Regulatory Flexibility Act (Pub. L. 96–354, as amended by Pub. L. 104–121), and under the Unfunded Mandates Reform Act (Pub. L. 104–4). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant economic impact of a rule on a substantial number of small entities. The Unfunded Mandates Reform Act requires agencies to prepare an assessment of anticipated costs and benefits before enacting any rule that may result in an expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100 million (adjusted annually for inflation) in any 1 year.

The agency believes that this final rule is consistent with the regulatory philosophy and principles identified in the Executive Order and in these two statutes. Through this regulation, the agency sets out requirements through which it may normally endorse certain conformity assessment procedure reports. Such reports would be provided by equivalent EC Member State regulatory authorities for manufacturing site inspections to ascertain conformity with pharmaceutical GMP's and by equivalent CAB's for quality system audits and certain medical device premarket evaluations. Obtaining conformity assessment information in the manner described in the final rule is more efficient and cost-effective than the existing approach, where additional inspection efforts by FDA in foreign countries are necessary because foreign regulatory systems have not been found equivalent. The primary benefit of the final rule is to provide credible assurance that the increasing volume of EC Member States' imports into the United States meet pharmaceutical GMP requirements, and medical device quality system evaluation and certain premarket evaluation requirements, as specified in U.S. statutes and regulations. In the future, this credible assurance must be achievable with FDA resource expenditures that rise less than proportionately to the volume of trade.

In recent years, the credibility of the current approach has been strained as FDA's essentially constant foreign inspection capacity has been stretched over an expanding volume of imports from the EC. In the 3-year interval between 1994 and 1997, the value of EC pharmaceutical and medical device imports into the United States has nearly doubled from $5.5 billion to more than $10.7 billion. Growth has been greatest in pharmaceuticals, where annual EC exports have increased by more than $2 billion in each of the last 2 years. In 1997, FDA conducted one inspection in the EC for every $60 million in pharmaceutical exports to the United States, which is less than half the coverage intensity of 1994. In addition, the majority of these inspections have been preapproval in nature. Continuation of the current trend would further decrease FDA's coverage intensity to less than one inspection per $100 million in EC pharmaceutical exports by the year 2000. Equivalence with EC Member State regulatory systems would leverage FDA's regulatory resources so that necessary conformity assessments can be ensured despite higher volumes of future trade.

In addition to helping FDA cope with higher trade volumes, mutual recognition or equivalence-based agreements with exporting nations may permit FDA to redirect some of its inspectional resources to risk priorities not covered by such agreements. This flexibility would provide a more responsive level of U.S. consumer protection in the face of a changing global marketplace with inherently variable risk management priorities.

Another important benefit of the final rule would be the cost savings realized by the regulated industry, largely as a result of the sharing of inspection reports among equivalent regulatory authorities. This exchange, in turn, will minimize the need for duplicative inspections and permit individual firms to undergo fewer inspections of manufacturing sites. FDA does not have data on the average administrative cost incurred by manufacturers of pharmaceuticals (including biologicals) or medical devices as they participate in regulatory inspections, but it is likely that the avoidance of redundant inspections would generate cost savings. The final rule also may shorten product review times for regulated products as a result of the increased efficiency of premarket approval inspection activities and the third-party evaluation of certain medical devices. Quantification of these savings will be highly dependent on the specific countries that achieve equivalence and on the number of medical device audits and evaluations performed by CAB's under the MRA.

The costs of this regulation will have a greater impact on governmental regulatory agencies than on the regulated industry. These governmental costs involve both startup and operational components. FDA has not received additional government funding earmarked for achieving mutual recognition agreements and, therefore, must proceed to implement these agreements as a concurrent function within normal day-to-day regulatory activities. The 3-year transition period reflects the necessity to absorb these startup costs within existing regulatory budgets. Some activities such as joint inspections may be reasonably easy to absorb as concurrent functions that do not require additional funding, while others such as developing and maintaining systems for routine information exchange may involve new activities. These absorbed governmental costs will fall heavily on FDA, as it must assess equivalence of multiple EC Member States and notified bodies.

For FDA, the absorption of these startup costs will be easier with respect to those EC Member States with which the United States already has a large volume of trade in the products in question, where FDA already conducts enough inspections to have gathered a general understanding of the requirements and regulatory practices of the exporting country. From this perspective, the pace and priorities for mutual recognition agreements during the transition period will be affected by FDA's ability to conduct these processes as concurrent functions within current activities.

In the longer run, an operational system of mutual recognition agreements could pose additional costs or problems for regulatory authorities of exporting countries if equivalence requires a frequency, focus or content of inspections not presently included in regulatory requirements of the exporting nation. For example, Country A may not be able to provide the frequency of medical device inspections desired by Country B without conducting inspections beyond those required for Country A's domestic inspection strategy. Conversely, Country B may not be able to provide to Country A adequate details of the quality of pharmaceutical source materials, because Country B does not have inspectional authority over pharmaceutical starting materials. To the extent that such costs or problems are insignificant or offset by other savings, they will not be obstacles to reaching agreement on equivalence.

This rule is not expected to involve any new incremental costs to the affected industries. Although joint inspections during the transition period may create the appearance of more regulatory effort, they would not impose additional costs on the firms inspected. FDA does not anticipate an increase in the total number of EC inspections, and in fact, the coverage intensity of FDA inspections in the EC would be expected to continue to fall during the transition period, as it has for the past several years. Other activities related to equivalence determinations, such as the procedures for exchanging information and reports, focus on the interface and coordination among regulatory agencies and, as such, will not affect industry in a cost context.

The Regulatory Flexibility Act requires agencies to analyze regulatory options that would minimize any significant impact of a rule on small entities unless the rule is not expected to have a significant economic impact on a substantial number of small entities. As this final regulation is not expected to impose costs on the regulated industry, and FDA has received no comments that would indicate otherwise, the agency certifies that this rule will not have a significant impact on a substantial number of small entities. Therefore, under the Regulatory Flexibility Act, no further analysis is required.

The Unfunded Mandates Act of 1995 requires that agencies prepare an assessment of the anticipated costs and benefits before issuing any final rule that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any 1 year. This rule does not impose any mandates on State, local or tribal governments, or the private sector that would result in an annual expenditure of $100 million or more. Therefore, no further analysis is appropriate for this requirement.

V. Paperwork Reduction Act of 1995

This final rule does not contain any information collection provisions that would be subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

List of Subjects in 21 CFR Part 26

Animal and human drugs, Biologicals, Devices, Exports, Imports, Incorporation by reference, and Inspections.

Therefore, under the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR chapter I is amended by adding part 26 to read as follows:

PART 26—MUTUAL RECOGNITION OF PHARMACEUTICAL GOOD MANUFACTURING PRACTICE REPORTS, MEDICAL DEVICE QUALITY SYSTEM AUDIT REPORTS, AND CERTAIN MEDICAL DEVICE PRODUCT EVALUATION REPORTS: UNITED STATES AND THE EUROPEAN COMMUNITY

Sec.

26.0 General.

Subpart A—Specific Sector Provisions for Pharmaceutical Good Manufacturing Practices

26.1 Definitions.
26.2 Purpose.
26.3 Scope.
26.4 Product coverage.
26.5 Length of transition period.
26.6 Equivalence assessment.
26.7 Participation in the equivalence assessment and determination.
26.8 Other transition activities.
26.9 Equivalence determination.
26.10 Regulatory authorities not listed as currently equivalent.
26.11 Start of operational period.
26.12 Nature of recognition of inspection reports.
26.13 Transmission of postapproval inspection reports.
26.14 Transmission of preapproval inspection reports.
26.15 Monitoring continued equivalence.
26.16 Suspension.
26.17 Role and composition of the Joint Sectoral Committee.
26.18 Regulatory collaboration.
26.19 Information relating to quality aspects.
26.20 Alert system.

26.79 Territorial application.
26.80 Entry into force, amendment, and termination.
26.81 Final provisions.

Authority: 5 U.S.C. 552; 15 U.S.C. 1453, 1454, 1455; 18 U.S.C. 1905; 21 U.S.C. 321, 331, 351, 352, 355, 360, 360b, 360c, 360d, 360e, 360f, 360g, 360h, 360i, 360j, 360l, 360m, 371, 374, 381, 382, 383, 393; 42 U.S.C. 216, 241, 242l, 262, 264, 265.

§ 26.0 General.

This part substantially reflects relevant provisions of the framework agreement and its sectoral annexes on pharmaceutical good manufacturing practices (GMP's) and medical devices of the "Agreement on Mutual Recognition Between the United States of America and the European Community" (the MRA), signed at London May 18, 1998. For codification purposes, certain provisions of the MRA have been modified for use in this part. This modification is done for purposes of clarity only and shall not affect the text of the MRA concluded between the United States and the European Community (EC), or the rights and obligations of the United States or the EC under that agreement. Whereas the parties to the MRA are the United States and EC, this part is relevant only to the Food and Drug Administration's (FDA's) implementation of the MRA, including the sectoral annexes reflected in subparts A and B of this part. This part does not govern implementation of the MRA by the EC, which will implement the MRA in accordance with its internal procedures, nor does this part address implementation of the MRA by other concerned U.S. Federal agencies. For purposes of this part, the terms "party" or "parties," where relevant to FDA's implementation of the MRA, should be considered as referring to FDA only. If the parties to the MRA subsequently amend or terminate the MRA, FDA will modify this part accordingly, using appropriate administrative procedures.

Subpart A—Specific Sector Provisions for Pharmaceutical Good Manufacturing Practices

§ 26.1 Definitions.

(a) *Enforcement* means action taken by an authority to protect the public from products of suspect quality, safety, and effectiveness or to assure that products are manufactured in compliance with appropriate laws, regulations, standards, and commitments made as part of the approval to market a product.

(b) *Equivalence* of the regulatory systems means that the systems are sufficiently comparable to assure that the process of inspection and the ensuing inspection reports will provide adequate information to determine whether respective statutory and regulatory requirements of the authorities have been fulfilled. Equivalence does not require that the respective regulatory systems have identical procedures.

(c) *Good Manufacturing Practices* (GMP's). [The United States has clarified its interpretation that under the MRA, that only paragraph (c)(1) of this section has to be understood as the U.S. definition and paragraph (c)(2) as the EC definition.]

(1) GMP's mean the requirements found in the legislations, regulations, and administrative provisions for methods to be used in, and the facilities or controls to be used for, the manufacturing, processing, packing, and/or holding of a drug to assure that such drug meets the requirements as to safety, and has the identity and strength, and meets the quality and purity characteristics that it purports or is represented to possess.

(2) GMP's are that part of quality assurance which ensures that products are consistently produced and controlled to quality standards. For the purpose of this subpart, GMP's include, therefore, the system whereby the manufacturer receives the specifications of the product and/or process from the marketing authorization/product authorization or license holder or applicant and ensures the product is made in compliance with its specifications (qualified person certificatior. in the EC).

(d) *Inspection* means an onsite evaluation of a manufacturing facility to determine whether such manufacturing facility is operating in compliance with GMP's and/or commitments made as part of the approval to market a product.

(e) *Inspection report* means the written observations and GMP's compliance assessment completed by an authority listed in Appendix B of this subpart.

(f) *Regulatory system* means the body of legal requirements for GMP's, inspections, and enforcements that ensure public health protection and legal authority to assure adherence to these requirements.

§ 26.2 Purpose.

The provisions of this subpart govern the exchange between the parties and normal endorsement by the receiving regulatory authority of official good manufacturing practices (GMP's) inspection reports after a transitional period aimed at determination of the equivalence of the regulatory systems of the parties, which is the cornerstone of this subpart.

§ 26.3 Scope.

(a) The provisions of this subpart shall apply to pharmaceutical inspections carried out in the United States and Member States of the European Community (EC) before products are marketed (hereafter referred to as "preapproval inspections") as well as during their marketing (hereafter referred to as "postapproval inspections").

(b) Appendix A of this subpart names the laws, regulations, and administrative provisions governing these inspections and the good manufacturing practices (GMP's) requirements.

(c) Appendix B of this subpart lists the authorities participating in activities under this subpart.

(d) Sections 26.65, 26.66, 26.67, 26.68, 26.69, and 26.70 of subpart C of this part do not apply to this subpart.

§ 26.4 Product coverage.

(a) The provisions of this subpart will apply to medicinal products for human or animal use, intermediates and starting materials (as referred to in the European Community (EC)) and to drugs for human or animal use, biological products for human use, and active pharmaceutical ingredients (as referred to in the United States), only to the extent they are regulated by the authorities of both parties as listed in Appendix B of this subpart.

(b) Human blood, human plasma, human tissues and organs, and veterinary immunologicals (under 9 CFR 101.2, "veterinary immunologicals" are referred to as "veterinary biologicals") are excluded from the scope of this subpart. Human plasma derivatives (such as immunoglobulins and albumin), investigational medicinal products/new drugs, human radiopharmaceuticals, and medicinal gases are also excluded during the transition phase; their situation will be reconsidered at the end of the transition period. Products regulated by the Food and Drug Administration's Center for Biologics Evaluation and Research as devices are not covered under this subpart.

(c) Appendix C of this subpart contains an indicative list of products covered by this subpart.

§ 26.5 Length of transition period.

A 3-year transition period will start immediately after the effective date described in § 26.80(a).

§ 26.6 Equivalence assessment.

(a) The criteria to be used by the parties to assess equivalence are listed in Appendix D of this subpart. Information pertaining to the criteria under European Community (EC) competence will be provided by the EC.

(b) The authorities of the parties will establish and communicate to each other their draft programs for assessing the equivalence of the respective regulatory systems in terms of quality assurance of the products and consumer protection. These programs will be carried out, as deemed necessary by the regulatory authorities, for post- and preapproval inspections and for various product classes or processes.

(c) The equivalence assessment shall include information exchanges (including inspection reports), joint training, and joint inspections for the purpose of assessing regulatory systems and the authorities' capabilities. In conducting the equivalence assessment, the parties will ensure that efforts are made to save resources.

(d) Equivalence assessment for authorities added to Appendix B of this subpart after the effective date described in § 26.80(a) will be conducted as described in this subpart, as soon as practicable.

§ 26.7 Participation in the equivalence assessment and determination.

The authorities listed in Appendix B of this subpart will actively participate in these programs to build a sufficient body of evidence for their equivalence determination. Both parties will exercise good faith efforts to complete equivalence assessment as expeditiously as possible to the extent the resources of the authorities allow.

§ 26.8 Other transition activities.

As soon as possible, the authorities will jointly determine the essential information which must be present in inspection reports and will cooperate to develop mutually agreed inspection report format(s).

§ 26.9 Equivalence determination.

(a) Equivalence is established by having in place regulatory systems covering the criteria referred to in Appendix D of this subpart, and a demonstrated pattern of consistent performance in accordance with these criteria. A list of authorities determined as equivalent shall be agreed to by the Joint Sectoral Committee at the end of the transition period, with reference to any limitation in terms of inspection type (e.g., postapproval or preapproval) or product classes or processes.

(b) The parties will document insufficient evidence of equivalence, lack of opportunity to assess equivalence or a determination of nonequivalence, in sufficient detail to allow the authority being assessed to know how to attain equivalence.

§ 26.10 Regulatory authorities not listed as currently equivalent.

Authorities not currently listed as equivalent, or not equivalent for certain types of inspections, product classes or processes may apply for reconsideration of their status once the necessary corrective measures have been taken or additional experience is gained.

§ 26.11 Start of operational period.

(a) The operational period shall start at the end of the transition period and its provisions apply to inspection reports generated by authorities listed as equivalent for the inspections performed in their territory.

(b) In addition, when an authority is not listed as equivalent based on adequate experience gained during the transition period, the Food and Drug Administration (FDA) will accept for normal endorsement (as provided in § 26.12) inspection reports generated as a result of inspections conducted jointly by that authority on its territory and another authority listed as equivalent, provided that the authority of the Member State in which the inspection is performed can guarantee enforcement of the findings of the inspection report and require that corrective measures be taken when necessary. FDA has the option to participate in these inspections, and based on experience gained during the transition period, the parties will agree on procedures for exercising this option.

(c) In the European Community (EC), the qualified person will be relieved of responsibility for carrying the controls laid down in Article 22 paragraph 1(b) of Council Directive 75/319/EEC (see Appendix A of this subpart) provided that these controls have been carried out in the United States and that each batch/lot is accompanied by a batch certificate (in accordance with the World Health Organization Certification Scheme on the Quality of Medicinal Products) issued by the manufacturer certifying that the product complies with requirements of the marketing authorization and signed by the person responsible for releasing the batch/lot.

§ 26.12 Nature of recognition of inspection reports.

(a) Inspection reports (containing information as established under § 26.8); including a good manufacturing practice (GMP) compliance assessment, prepared by authorities listed as equivalent, will be provided to the authority of the importing party. Based on the determination of equivalence in light of the experience gained, these inspection reports will normally be endorsed by the authority of the importing party, except under specific and delineated circumstances. Examples of such circumstances include indications of material inconsistencies or inadequacies in an inspection report, quality defects identified in the postmarket surveillance or other specific evidence of serious concern in relation to product quality or consumer safety. In such cases, the authority of the importing party may request clarification from the authority of the exporting party which may lead to a request for reinspection. The authorities will endeavor to respond to requests for clarification in a timely manner.

(b) Where divergence is not clarified in this process, an authority of the importing country may carry out an inspection of the production facility.

§ 26.13 Transmission of postapproval inspection reports.

Postapproval good manufacturing practice (GMP) inspection reports concerning products covered by this subpart will be transmitted to the authority of the importing country within 60-calendar days of the request. Should a new inspection be needed, the inspection report will be transmitted within 90-calendar days of the request.

§ 26.14 Transmission of preapproval inspection reports.

(a) A preliminary notification that an inspection may have to take place will be made as soon as possible.

(b) Within 15-calendar days, the relevant authority will acknowledge receipt of the request and confirm its ability to carry out the inspection. In the European Community (EC), requests will be sent directly to the relevant authority, with a copy to the European Agency for the Evaluation of Medicinal Products (EMEA). If the authority receiving the request cannot carry out the inspection as requested, the requesting authority shall have the right to conduct the inspection.

(c) Reports of preapproval inspections will be sent within 45-calendar days of the request that transmitted the appropriate information and detailed the precise issues to be addressed during the inspection. A shorter time may be necessary in exceptional cases and these will be described in the request.

§ 26.15 Monitoring continued equivalence.

Monitoring activities for the purpose of maintaining equivalence shall include review of the exchange of inspection reports and their quality and timeliness; performance of a limited number of joint inspections; and the conduct of common training sessions.

§ 26.16 Suspension.

(a) Each party has the right to contest the equivalence of a regulatory authority. This right will be exercised in an objective and reasoned manner in writing to the other party.

(b) The issue shall be discussed in the Joint Sectoral Committee promptly upon such notification. Where the Joint Sectoral Committee determines that verification of equivalence is required, it may be carried out jointly by the parties in a timely manner, under § 26.6.

(c) Efforts will be made by the Joint Sectoral Committee to reach unanimous consent on the appropriate action. If agreement to suspend is reached in the Joint Sectoral Committee, an authority may be suspended immediately thereafter. If no agreement is reached in the Joint Sectoral Committee, the matter is referred to the Joint Committee as described in § 26.73. If no unanimous consent is reached within 30 days after such notification, the contested authority will be suspended.

(d) Upon the suspension of authority previously listed as equivalent, a party is no longer obligated to normally endorse the inspection reports of the suspended authority. A party shall continue to normally endorse the inspection reports of that authority prior to suspension, unless the authority of the receiving party decides otherwise based on health or safety considerations. The suspension will remain in effect until unanimous consent has been reached by the parties on the future status of that authority.

§ 26.17 Role and composition of the Joint Sectoral Committee.

(a) A Joint Sectoral Committee is set up to monitor the activities under both the transitional and operational phases of this subpart.

(b) The Joint Sectoral Committee will be cochaired by a representative of the Food and Drug Administration (FDA) for the United States and a representative of the European Community (EC) who each will have one vote. Decisions will be taken by unanimous consent.

(c) The Joint Sectoral Committee's functions will include:

(1) Making a joint assessment, which must be agreed by both parties, of the equivalence of the respective authorities;

(2) Developing and maintaining the list of equivalent authorities, including any limitation in terms of inspecting type or products, and communicating the list to all authorities and the Joint Committee;

(3) Providing a forum to discuss issues relating to this subpart, including concerns that an authority may be no longer equivalent and opportunity to review product coverage; and

(4) Consideration of the issue of suspension.

(d) The Joint Sectoral Committee shall meet at the request of either party and, unless the cochairs otherwise agree, at least once each year. The Joint Committee will be kept informed of the agenda and conclusions of meetings of the Joint Sectoral Committee.

§ 26.18 Regulatory collaboration.

(a) The parties and authorities shall inform and consult one another, as permitted by law, on proposals to introduce new controls or to change existing technical regulations or inspection procedures and to provide the opportunity to comment on such proposals.

(b) The parties shall notify each other in writing of any changes to Appendix B of this subpart.

§ 26.19 Information relating to quality aspects.

The authorities will establish an appropriate means of exchanging information on any confirmed problem reports, corrective actions, recalls, rejected import consignments, and other regulatory and enforcement problems for products subject to this subpart.

§ 26.20 Alert system.

(a) The details of an alert system will be developed during the transitional period. The system will be maintained in place at all times. Elements to be considered in developing such a system are described in Appendix E of this subpart.

(b) Contact points will be agreed between both parties to permit authorities to be made aware with the appropriate speed in case of quality defect, recalls, counterfeiting, and other problems concerning quality, which could necessitate additional controls or suspension of the distribution of the product.

§ 26.21 Safeguard clause.

Each party recognizes that the importing country has a right to fulfill its legal responsibilities by taking actions necessary to ensure the protection of human and animal health at the level of protection it deems appropriate. This includes the suspension of the distribution, product detention at the border of the importing country, withdrawal of the batches and any request for additional information or inspection as provided in § 26.12.

Appendix A of Subpart A—List of Applicable Laws, Regulations, and Administrative Provisions.

1. For the European Community (EC):

[Copies of EC documents may be obtained from the European Document Research, 1100 17th St. NW., suite 301, Washington, DC 20036. EC documents may be viewed on the European Commission Pharmaceuticals Units web site at "http://dg3.eudra.org".]

Council Directive 65/65/EEC of 26 January 1965 on the approximation of provisions laid down by law, regulation, or administrative action relating to proprietary medicinal products as extended, widened, and amended.

Council Directive 75/319/EEC of 20 May 1975 on the approximation of provisions laid down by law, regulation or administrative action relating to proprietary medicinal products as extended, widened and amended.

Council Directive 81/851/EEC of 28 September 1981 on the approximation of the laws of the Member States relating to veterinary medicinal products, as widened and amended.

Commission Directive 91/356/EEC of 13 June 1991 laying down the principles and guidelines of good manufacturing practice for medicinal products for human use.

Commission Directive 91/412/EEC of 23 July 1991 laying down the principles and guidelines of good manufacturing practice for veterinary medicinal products.

Council Regulation EEC No 2309/93 of 22 July 1993 laying down Community procedures for the authorization and supervision of medicinal products for human and veterinary use and establishing a European Agency for the Evaluation of Medicinal Products.

Council Directive 92/25/EEC of 31 March 1992 on the wholesale distribution of medicinal products for human use.

Guide to Good Distribution Practice (94/C 63/03).

Current version of the Guide to Good Manufacturing Practice, Rules Governing Medicinal Products in the European Community, Volume IV.

2. For the United States:

[Copies of FDA documents may be obtained from the Government Printing Office, 1510 H St. NW., Washington, DC 20005. FDA documents, except the FDA Compliance Program Guidance Manual, may be viewed on FDA's Internet web site at "http://www.FDA.gov".]

Relevant sections of the United States Federal Food, Drug, and Cosmetic Act and the United States Public Health Service Act.

Relevant sections of Title 21, United States Code of Federal Regulations (CFR) Parts 1–99, Parts 200–299, Parts 500–599, and Parts 600–799.

Relevant sections of the FDA Investigations Operations Manual, the FDA Regulatory Procedures Manual, the FDA Compliance Policy Guidance Manual, the FDA Compliance Program Guidance Manual, and other FDA guidances.

Appendix B of Subpart A—List of Authorities.

1. For the United States: In the United States, the regulatory authority is the Food and Drug Administration.

2. For the European Community: In the European Community, the regulatory authorities are the following:

Belgium: Inspection générale de la Pharmacie, Algemene Farmaceutische Inspectie.

Denmark: Laegemiddelstyrelsen.

Germany: Bundesministerium für Gesundheit for immunologicals: Paul-Ehrlich-Institut, Federal Agency for Sera and Vaccines.

Greece: Εθνικος Οργανισμος Φαρμακου, Ministry of Health and Welfare, National Drug Organization (E.O.F).

Spain: For medicinal products for human use: Ministerio de Sanidad y Consumo, Subdirección General de Control Farmacéutico. For medicinal products for veterinary use: Ministerio de Agricultura, Pesca y Alimentación (MAPA), Dirección General de la Producción Agraria.

France: For medicinal products for human use: Agence du Médicament. For veterinary medicinal products: Agence Nationale du Médicament Vétérinaire.

Ireland: Irish Medicines Board.

Italy: For medicinal products for human use: Ministero della Sanità, Dipartimento Farmaci e Farmacovigilanza. For medicinal products for veterinary use: Ministero della Sanità, Dipartimento alimenti e nutrizione e sanità pubblica veterinaria–Div. IX.

Luxembourg: Division de la Pharmacie et des Médicaments.

Netherlands: Staat der Nederlanden.

Austria: Bundesministerium für Arbeit, Gesundheit und Soziales.

Portugal: Instituto da Farmácia e do Medicamento (INFARMED).

Finland: Lääkelaitos/Läkemedelsverket (National Agency for Medicines).

Sweden: Läkemedelsverket–Medical Products Agency.

United Kingdom: For human use and veterinary (non-immunologicals): Medicines Control Agency. For veterinary immunologicals: Veterinary Medicines Directorate.

European Community: Commission of the European Communities. European Agency for the Evaluation of Medicinal Products (EMEA).

Appendix C of Subpart A—Indicative List of Products Covered by Subpart A.

Recognizing that precise definition of medicinal products and drugs are to be found in the legislation referred to above, an indicative list of products covered by this arrangement is given below:

- human medicinal products including prescription and nonprescription drugs;
- human biologicals including vaccines, and immunologicals;
- veterinary pharmaceuticals, including prescription and nonprescription drugs, with the exclusion of veterinary immunologicals (Under 9 CFR 101.2 "veterinary immunologicals" are referred to as "veterinary biologicals");
- premixes for the preparation of veterinary medicated feeds (EC), Type A medicated articles for the preparation of veterinary medicated feeds (United States);
- intermediate products and active pharmaceutical ingredients or bulk pharmaceuticals (United States)/starting materials (EC).

Appendix D of Subpart A—Criteria for Assessing Equivalence for Post- and Preapproval.

I. Legal/Regulatory authority and structures and procedures providing for post- and preapproval:

A. Appropriate statutory mandate and jurisdiction.
B. Ability to issue and update binding requirements on GMP's and guidance documents.
C. Authority to make inspections, review and copy documents, and to take samples and collect other evidence.
D. Ability to enforce requirements and to remove products found in violation of such requirements from the market.
E. Substantive current good manufacturing requirements.
F. Accountability of the regulatory authority.
G. Inventory of current products and manufacturers.
H. System for maintaining or accessing inspection reports, samples and other analytical data, and other firm/product information relating to matters covered by subpart A of this part.

II. Mechanisms in place to assure appropriate professional standards and avoidance of conflicts of interest.

III. Administration of the regulatory authority:

A. Standards of education/qualification and training.
B. Effective quality assurance systems measures to ensure adequate job performance.
C. Appropriate staffing and resources to enforce laws and regulations.

IV. Conduct of inspections:

A. Adequate preinspection preparation, including appropriate expertise of investigator/team, review of firm/product and databases, and availability of appropriate inspection equipment.
B. Adequate conduct of inspection, including statutory access to facilities, effective response to refusals, depth and competence of evaluation of operations, systems and documentation; collection of evidence; appropriate duration of inspection and completeness of written report of observations to firm management.
C. Adequate postinspection activities, including completeness of inspectors' report, inspection report review where appropriate, and conduct of followup inspections and other activities where appropriate, assurance of preservation and retrieval of records.

V. Execution of regulatory enforcement actions to achieve corrections, designed to prevent future violations, and to remove products found in violation of requirements from the market.

VI. Effective use of surveillance systems:

A. Sampling and analysis.
B. Recall monitoring.
C. Product defect reporting system.
D. Routine surveillance inspections.
E. Verification of approved manufacturing process changes to marketing authorizations/approved applications.

VII. Additional specific criteria for preapproval inspections:

A. Satisfactory demonstration through a jointly developed and administered training program and joint inspections to assess the regulatory authorities' capabilities.
B. Preinspection preparation includes the review of appropriate records, including site plans and drug master file or similar documentation to enable adequate inspections.
C. Ability to verify chemistry, manufacturing, and control data supporting an application is authentic and complete.
D. Ability to assess and evaluate research and development data as scientifically sound, especially transfer technology of pilot, scale up and full scale production batches.
E. Ability to verify conformity of the onsite processes and procedures with those described in the application.
F. Review and evaluate equipment installation, operational and performance qualification data, and evaluate test method validation.

Appendix E of Subpart A—Elements to be Considered in Developing a Two-Way Alert System.

1. Documentation

- Definition of a crisis/emergency and under what circumstances an alert is required
- Standard Operating Procedures (SOP's)
- Mechanism of health hazards evaluation and classification
- Language of communication and transmission of information

2. Crisis Management System

- Crisis analysis and communication mechanisms
- Establishment of contact points
- Reporting mechanisms

3. Enforcement Procedures

- Followup mechanisms
- Corrective action procedures

4. Quality Assurance System

- Pharmacovigilance programme
- Surveillance/monitoring of implementation of corrective action

5. Contact Points

For the purpose of subpart A of this part, the contact points for the alert system will be:

A. For the European Community:

the Executive Director of the European Agency for the Evaluation of Medicinal Products, 7, Westferry Circus, Canary Wharf, UK - London E14 4HB, England. Telephone 44–171–418 8400, Fax 418–8416.

B. For the United States :

Biologics: Director, Office of Compliance and Biologics Quality (HFM–600), 1401 Rockville Pike, Rockville, MD 20852, phone: 301–827–6190, fax: 301–594-1944.

Human Drugs: Director, Office of Compliance (HFD–300), MPN I, 7520 Standish Pl., Rockville, MD 20855–2737, phone: 301–594–0054, fax: 301–594–2114.

Veterinary Drugs: Director, Office of Surveillance and Compliance (HFV–200), MPN II, 7500 Standish Pl., Rockville, MD 20855–2773, phone: 301–827–6644, fax: 301–594–1807.

Subpart B—Specific Sector Provisions for Medical Devices

§ 26.31 Purpose.

(a) The purpose of this subpart is to specify the conditions under which a party will accept the results of quality system-related evaluations and inspections and premarket evaluations of the other party with regard to medical devices as conducted by listed conformity assessment bodies (CAB's) and to provide for other related cooperative activities.

(b) This subpart is intended to evolve as programs and policies of the parties evolve. The parties will review this subpart periodically, in order to assess progress and identify potential enhancements to this subpart as Food and Drug Administration (FDA) and European Community (EC) policies evolve over time.

§ 26.32 Scope.

(a) The provisions of this subpart shall apply to the exchange and, where appropriate, endorsement of the following types of reports from conformity assessment bodies (CAB's) assessed to be equivalent:

(1) Under the U.S. system, surveillance/postmarket and initial/preapproval inspection reports;

(2) Under the U.S. system, premarket (510(k)) product evaluation reports;

(3) Under the European Community (EC) system, quality system evaluation reports; and

(4) Under the EC system, EC type examination and verification reports.

(b) Appendix A of this subpart names the legislation, regulations, and related procedures under which:

(1) Products are regulated as medical devices by each party;

(2) CAB's are designated and confirmed; and

(3) These reports are prepared.

(c) For purposes of this subpart, equivalence means that: CAB's in the EC are capable of conducting product and quality systems evaluations against U.S. regulatory requirements in a manner equivalent to those conducted by FDA; and CAB's in the United States are capable of conducting product and quality systems evaluations against EC regulatory requirements in a manner equivalent to those conducted by EC CAB's.

§ 26.33 Product coverage.

(a) There are three components to this subpart each covering a discrete range of products:

(1) *Quality System Evaluations.* U.S.-type surveillance/postmarket and initial/preapproval inspection reports and European Community (EC)-type quality system evaluation reports will be exchanged with regard to all products regulated under both U.S. and EC law as medical devices.

(2) *Product Evaluation.* U.S.-type premarket (510(k)) product evaluation reports and EC-type-testing reports will be exchanged only with regard to those products classified under the U.S. system as Class I/Class II-Tier 2 medical devices which are listed in Appendix B of this subpart.

(3) *Postmarket Vigilance Reports.* Postmarket vigilance reports will be exchanged with regard to all products regulated under both U.S. and EC law as medical devices.

(b) Additional products and procedures may be made subject to this subpart by agreement of the parties.

§ 26.34 Regulatory authorities.

The regulatory authorities shall have the responsibility of implementing the provisions of this subpart, including the designation and monitoring of conformity assessment bodies (CAB's). Regulatory authorities will be specified in Appendix C of this subpart. Each party will promptly notify the other party in writing of any change in the regulatory authority for a country.

§ 26.35 Length and purpose of transition period.

There will be a 3-year transition period immediately following the date described in § 26.80(a). During the transition period, the parties will engage in confidence-building activities for the purpose of obtaining sufficient evidence to make determinations concerning the equivalence of conformity assessment bodies (CAB's) of the other party with respect to the ability to perform quality system and product evaluations or other reviews resulting in reports to be exchanged under this subpart.

§ 26.36 Listing of CAB's.

Each party shall designate conformity assessment bodies (CAB's) to participate in confidence building activities by transmitting to the other party a list of CAB's which meet the criteria for technical competence and independence, as identified in Appendix A of this subpart. The list shall be accompanied by supporting evidence. Designated CAB's will be listed in Appendix D of this subpart for participation in the confidence building activities once confirmed by the importing party. Nonconfirmation would have to be justified based on documented evidence.

§ 26.37 Confidence building activities.

(a) At the beginning of the transitional period, the Joint Sectoral Group will establish a joint confidence building program calculated to provide sufficient evidence of the capabilities of the designated conformity assessment bodies (CAB's) to perform quality system or product evaluations to the specifications of the parties.

(b) The joint confidence building program should include the following actions and activities:

(1) Seminars designed to inform the parties and CAB's about each party's regulatory system, procedures, and requirements;

(2) Workshops designed to provide the parties with information regarding requirements and procedures for the designation and surveillance of CAB's;

(3) Exchange of information about reports prepared during the transition period;

(4) Joint training exercises; and

(5) Observed inspections.

(c) During the transition period, any significant problem that is identified with a CAB may be the subject of cooperative activities, as resources allow and as agreed to by the regulatory authorities, aimed at resolving the problem.

(d) Both parties will exercise good faith efforts to complete the confidence building activities as expeditiously as possible to the extent that the resources of the parties allow.

(e) Both the parties will each prepare annual progress reports which will describe the confidence building activities undertaken during each year of the transition period. The form and content of the reports will be determined by the parties through the Joint Sectoral Committee.

§ 26.38 Other transition period activities.

(a) During the transition period, the parties will jointly determine the necessary information which must be present in quality system and product evaluation reports.

(b) The parties will jointly develop a notification and alert system to be used in case of defects, recalls, and other problems concerning product quality that could necessitate additional actions (e.g., inspections by the parties of the importing country) or suspension of the distribution of the product.

§ 26.39 Equivalence assessment.

(a) In the final 6 months of the transition period, the parties shall proceed to a joint assessment of the equivalence of the conformity assessment bodies (CAB's) that participated in the confidence building activities. CAB's will be determined to be equivalent provided they have demonstrated proficiency through the submission of a sufficient number of adequate reports. CAB's may be determined to be equivalent with regard to the ability to perform any type of quality system or product evaluation covered by this subpart and with regard to any type of product covered by this subpart. The parties shall develop a list contained in Appendix E of this subpart of CAB's determined to be equivalent, which shall contain a full explanation of the scope of the equivalency determination, including any appropriate limitations, with regard to performing any type of quality system or product evaluation.

(b) The parties shall allow CAB's not listed for participation in this subpart, or listed for participation only as to certain types of evaluations, to apply for participation in this subpart once the necessary measures have been taken or sufficient experience has been gained, in accordance with § 26.46.

(c) Decisions concerning the equivalence of CAB's must be agreed to by both parties.

§ 26.40 Start of the operational period.

(a) The operational period will start at the end of the transition period after the parties have developed the list of conformity assessment bodies (CAB's) found to be equivalent. The provisions of §§ 26.40, 26.41, 26.42, 26.43, 26.44, 26.45, and 26.46 will apply only with regard to listed CAB's and only to the extent of any specifications and limitations contained on the list with regard to a CAB.

(b) The operational period will apply to quality system evaluation reports and product evaluation reports generated by CAB's listed in accordance with this subpart for the evaluations performed in the respective territories of the parties, except if the parties agree otherwise.

§ 26.41 Exchange and endorsement of quality system evaluation reports.

(a) Listed European Community (EC) conformity assessment bodies (CAB's) will provide FDA with reports of quality system evaluations, as follows:

(1) For preapproval quality system evaluations, EC CAB's will provide full reports; and

(2) For surveillance quality system evaluations, EC CAB's will provide abbreviated reports.

(b) Listed U.S. CAB's will provide to the EC Notified Body of the manufacturer's choice:

(1) Full reports of initial quality system evaluations;

(2) Abbreviated reports of quality systems surveillance audits.

(c) If the abbreviated reports do not provide sufficient information, the importing party may request additional clarification from the CAB.

(d) Based on the determination of equivalence in light of the experience gained, the quality system evaluation reports prepared by the CAB's listed as equivalent will normally be endorsed by the importing party, except under specific and delineated circumstances. Examples of such circumstances include indications of material inconsistencies or inadequacies in a report, quality defects identified in postmarket surveillance or other specific evidence of serious concern in relation to product quality or consumer safety. In such cases, the importing party may request clarification from the exporting party which may lead to a request for reinspection. The parties will endeavor to respond to requests for clarification in a timely manner. Where divergence is not clarified in this process, the importing party may carry out the quality system evaluation.

§ 26.42 Exchange and endorsement of product evaluation reports.

(a) European Community (EC) conformity assessment bodies (CAB's) listed for this purpose will, subject to the specifications and limitations on the list, provide to FDA 510(k) premarket notification assessment reports prepared to U.S. medical device requirements.

(b) U.S. CAB's will, subject to the specifications and limitations on the list, provide to the EC Notified Body of the manufacturer's choice, type examination, and verification reports prepared to EC medical device requirements.

(c) Based on the determination of equivalence in light of the experience gained, the product evaluation reports prepared by the CAB's listed as equivalent will normally be endorsed by the importing party, except under specific and delineated circumstances. Examples of such circumstances include indications of material inconsistencies, inadequacies, or incompleteness in a product evaluation report, or other specific evidence of serious concern in relation to product safety, performance, or quality. In such cases, the importing party may request clarification from the exporting party which may lead to a request for a reevaluation. The parties will endeavor to respond to requests for clarification in a timely manner. Endorsement remains the responsibility of the importing party.

§ 26.43 Transmission of quality system evaluation reports.

Quality system evaluation reports covered by § 26.41 concerning products covered by this subpart shall be transmitted to the importing party within 60-calendar days of a request by the importing party. Should a new inspection be requested, the time period shall be extended by an additional 30-calendar days. A party may request a new inspection, for cause, identified to the other party. If the exporting party cannot perform an inspection within a specified period of time, the importing party may perform an inspection on its own.

§ 26.44 Transmission of product evaluation reports.

Transmission of product evaluation reports will take place according to the importing party's specified procedures.

§ 26.45 Monitoring continued equivalence.

Monitoring activities will be carried out in accordance with § 26.69.

§ 26.46 Listing of additional CAB's.

(a) During the operational period, additional conformity assessment bodies (CAB's) will be considered for equivalence using the procedures and criteria described in §§ 26.36, 26.37, and 26.39, taking into account the level of confidence gained in the overall regulatory system of the other party.

(b) Once a designating authority considers that such CAB's, having undergone the procedures of §§ 26.36, 26.37, and 26.39, may be determined to be equivalent, it will then designate those bodies on an annual basis. Such procedures satisfy the procedures of § 26.66(a) and (b).

(c) Following such annual designations, the procedures for confirmation of CAB's under § 26.66(c) and (d) shall apply.

§ 26.47 Role and composition of the Joint Sectoral Committee.

(a) The Joint Sectoral Committee for this subpart is set up to monitor the activities under both the transitional and operational phases of this subpart.

(b) The Joint Sectoral Committee will be cochaired by a representative of the Food and Drug Administration (FDA) for the United States and a representative of the European Community (EC) who will each have one vote. Decisions will be taken by unanimous consent.

(c) The Joint Sectoral Committee's functions will include:

(1) Making a joint assessment of the equivalence of conformity assessment bodies (CAB's);

(2) Developing and maintaining the list of equivalent CAB's, including any limitation in terms of their scope of activities and communicating the list to all authorities and the Joint Committee described in subpart C of this part;

(3) Providing a forum to discuss issues relating to this subpart, including concerns that a CAB may no longer be equivalent and opportunity to review product coverage; and

(4) Consideration of the issue of suspension.

§ 26.48 Harmonization.

During both the transitional and operational phases of this subpart, both parties intend to continue to participate in the activities of the Global Harmonization Task Force (GHTF) and utilize the results of those activities to the extent possible. Such participation involves developing and reviewing documents developed by the GHTF and jointly determining whether they are applicable to the implementation of this subpart.

§ 26.49 Regulatory cooperation.

(a) The parties and authorities shall inform and consult with one another, as permitted by law, of proposals to introduce new controls or to change existing technical regulations or inspection procedures and to provide the opportunity to comment on such proposals.

(b) The parties shall notify each other in writing of any changes to Appendix A of this subpart.

§ 26.50 Alert system and exchange of postmarket vigilance reports.

(a) An alert system will be set up during the transition period and maintained thereafter by which the parties will notify each other when there is an immediate danger to public health. Elements of such a system will be described in an Appendix F of this subpart. As part of that system, each party shall notify the other party of any confirmed problem reports, corrective actions, or recalls. These reports are regarded as part of ongoing investigations.

(b) Contact points will be agreed between both parties to permit authorities to be made aware with the appropriate speed in case of quality defect, batch recalls, counterfeiting and other problems concerning quality, which could necessitate additional controls or suspension of the distribution of the product.

Appendix A of Subpart B—Relevant Legislation, Regulations, and Procedures.

1. For the European Community (EC) the following legislation applies to § 26.42(a) of this subpart:

[Copies of EC documents may be obtained from the European Document Research, 1100 17th St. NW., suite 301, Washington, DC 20036.]

a. Council Directive 90/385/EEC of 20 June 1990 on active implantable medical devices OJ No. L 189, 20.7. 1990, p. 17. Conformity assessment procedures.
Annex 2 (with the exception of section 4)
Annex 4
Annex 5

b. Council Directive 93/42/EEC of 14 June 1993 on Medical Devices OJ No. L 169,12.7.1993, p.1. Conformity assessment procedures.
Annex 2 (with the exception of section 4)
Annex 3
Annex 4
Annex 5
Annex 6

2. For the United States, the following legislation applies to § 26.32(a):

[Copies of FDA documents may be obtained from the Government Printing Office, 1510 H St. NW., Washington, DC 20005. FDA documents may be viewed on FDA's Internet web site at "http://www.fda.gov".]

a. The Federal Food, Drug and Cosmetic Act, 21 U.S.C. 321 *et seq.*
b. The Public Health Service Act, 42 U.S.C. 201 *et seq.*
c. Regulations of the United States Food and Drug Administration found at 21 CFR, in particular, Parts 800 to 1299.
d. Medical Devices; Third Party Review of Selected Premarket Notifications; Pilot Program, 61 FR 14789–14796 (April 3, 1996).
e. Draft Guidance Document on Accredited Persons Program, 63 FR 28392 (May 22, 1998).
f. Draft Guidance for Staff, Industry and Third Parties, Third Party Programs under the Sectoral Annex on Medical Devices to the Agreement on Mutual Recognition Between the United States of America and the European Community (MRA), 63 FR 36240 (July 2, 1998).
g. Guidance Document on Use of Standards, 63 FR 9561 (February 25, 1998).

Appendix B of Subpart B—Scope of Product Coverage.

1. Initial Coverage of the Transition Period

Upon entry into force of this subpart as described in § 26.80 (it is understood that the date of entry into force will not occur prior to June 1, 1998, unless the parties decide otherwise), products qualifying for the transitional arrangements under this subpart include:

a. All Class I products requiring premarket evaluations in the United States—see Table 1.
b. Those Class II products listed in Table 2.

2. During the Transition Period

The parties will jointly identify additional product groups, including their related accessories, in line with their respective priorities as follows:

a. Those for which review may be based primarily on written guidance which the parties will use their best efforts to prepare expeditiously; and
b. Those for which review may be based primarily on international standards, in order for the parties to gain the requisite experience.

The corresponding additional product lists will be phased in on an annual basis. The parties may consult with industry and other interested parties in determining which products will be added.

3. Commencement of the Operational Period

a. At the commencement of the operational period, product coverage shall extend to all Class I/II products covered during the transition period.
b. FDA will expand the program to categories of Class II devices as is consistent with the results of the pilot, and with FDA's ability to write guidance documents if the device pilot for the third party review of medical devices is successful. The MRA will cover to the maximum extent feasible all Class II devices listed in Table 3 for which FDA-accredited third party review is available in the United States.

4. Unless explicitly included by joint decision of the parties, this part does not cover any U.S. Class II-tier 3 or any Class III product under either system.

[The lists of medical devices included in these tables are subject to change as a result of the Food and Drug Administration Modernization Act of 1997.]

Table 1.—Class I Products Requiring Premarket Evaluations in the United States, Included in Scope of Product Coverage at Beginning of Transition Period[1]

21 CFR Section No.	Regulation Name Product Code—Device Name
Anesthesiology Panel (21 CFR Part 868)	
868.1910	Esophageal Stethoscope BZW—Stethoscope, Esophageal
868.5620	Breathing Mouthpiece BYP—Mouthpiece, Breathing
868.5640	Medicinal Nonventilatory Nebulizer (Atomizer) CCQ—Nebulizer, Medicinal, Nonventilatory (Atomizer)
868.5675	Rebreathing Device BYW—Device, Rebreathing
868.5700	Nonpowered Oxygen Tent FOG—Hood, Oxygen, Infant BYL—Tent, Oxygen
868.6810	Tracheobronchial Suction Catheter BSY—Catheters, Suction, Tracheobronchial
Cardiovascular Panel	
(None)	
Dental Panel (21 CFR Part 872)	
872.3400	Karaya and Sodium Borate With or Without Acacia Denture Adhesive KOM—Adhesive, Denture, Acacia and Karaya With Sodium Borate

Table 2.—Class II Medical Devices Included in Scope of Product Coverage at Beginning of Transition Period (United States to develop guidance documents identifying U.S. requirements and European Community (EC) to identify standards needed to meet EC requirements)[1]

Panel	21 CFR Section No.	Regulation Name Product Code—Device Name
RA	892.1000	Magnetic Resonance Diagnostic Device MOS—COIL, Magnetic Resonance, Specialty LNH—System, Nuclear Magnetic Resonance Imaging LNI—System, Nuclear Magnetic Resonance Spectroscopic
Diagnostic Ultrasound:		
RA	892.1540	Nonfetal Ultrasonic Monitor JAF—Monitor, Ultrasonic, Nonfetal
RA	892.1550	Ultrasonic Pulsed Doppler Imaging System IYN—System, Imaging, Pulsed Doppler, Ultrasonic
RA	892.1560	Ultrasonic Pulsed Echo Imaging System IYO—System, Imaging, Pulsed Echo, Ultrasonic
RA	892.1570	Diagnostic Ultrasonic Transducer ITX—Transducer, Ultrasonic, Diagnostic

Table 2.—Class II Medical Devices Included in Scope of Product Coverage at Beginning of Transition Period (United States to develop guidance documents identifying U.S. requirements and European Community (EC) to identify standards needed to meet EC requirements)[1]—Continued

Panel	21 CFR Section No.	Regulation Name
		Product Code—Device Name
Diagnostic X-Ray Imaging Devices (except mammographic x-ray systems):		
RA	892.1600	Angiographic X-Ray System IZI—System, X-Ray, Angiographic
RA	892.1650	Image-Intensified Fluoroscopic X-Ray System MQB—Solid State X-Ray Imager (Flat Panel/Digital Imager) JAA—System, X-Ray, Fluoroscopic, Image-Intensified
RA	892.1680	Stationary X-Ray System KPR—System, X-Ray, Stationary
RA	892.1720	Mobile X-Ray System IZL—System, X-Ray, Mobile
RA	892.1740	Tomographic X-Ray System IZF—System, X-Ray, Tomographic
RA	892.1750	Computed Tomography X-Ray System JAK—System, X-Ray, Tomography, Computed
ECG-Related Devices:		
CV	870.2340	Electrocardiograph DPS—Electrocardiograph
CV	870.2350	MLC—Monitor, ST Segment Electrocardiograph Lead Switching Adaptor DRW—Adaptor, Lead Switching, Electrocardiograph
CV	870.2360	Electrocardiograph Electrode DRX—Electrode, Electrocardiograph
CV	870.2370	Electrocardiograph Surface Electrode Tester KRC—Tester, Electrode, Surface, Electrocardiographic
NE	882.1400	Electroencephalograph GWQ—Electroencephalograph
HO	880.5725	Infusion Pump (external only) MRZ—Accessories, Pump, Infusion FRN—Pump, Infusion LZF—Pump, Infusion, Analytical Sampling MEB—Pump, Infusion, Elastomeric LZH—Pump, Infusion, Enteral MHD—Pump, Infusion, Gallstone Dissolution LZG—Pump, Infusion, Insulin MEA—Pump, Infusion, PCA
Ophthalmic Instruments:		
OP	886.1570	Ophthalmoscope HLI—Ophthalmoscope, AC-Powered HLJ—Ophthalmoscope, Battery-Powered
OP	886.1780	Retinoscope HKL—Retinoscope, AC-Powered
OP	886.1850	AC-Powered Slit-Lamp Biomicroscope HJO—Biomicroscope, Slit-Lamp, AC-Powered
OP	886.4150	Vitreous Aspiration and Cutting Instrument MMC—Dilator, Expansive Iris (Accessory) HQE—Instrument, Vitreous Aspiration and Cutting, AC-Powered HKP—Instrument, Vitreous Aspiration and Cutting, Battery-Powered MLZ—Vitrectomy, Instrument Cutter
OP	886.4670	Phacofragmentation System HQC—Unit, Phacofragmentation
SU	878.4580	Surgical Lamp HBI—Illuminator, Fiberoptic, Surgical Field FTF—Illuminator, Nonremote FTG—Illuminator, Remote HJE—Lamp, Fluorescein, AC-Powered FQP—Lamp, Operating-Room FTD—Lamp, Surgical GBC—Lamp, Surgical, Incandescent FTA—Light, Surgical, Accessories FSZ—Light, Surgical, Carrier FSY—Light, Surgical, Ceiling Mounted FSX—Light, Surgical, Connector FSW—Light, Surgical, Endoscopic FST—Light, Surgical, Fiberoptic FSS—Light, Surgical, Floor Standing

	868.1780	Inspiratory airway pressure meter	2
	868.1800	Rhinoanemometer	2
	868.1840	Diagnostic spirometer	2
	868.1850	Monitoring spirometer	2
	868.1860	Peak-flow meter for spirometry	2
	868.1880	Pulmonary-function data calculator	2
	868.1890	Predictive pulmonary-function value calculator	2
	868.1900	Diagnostic pulmonary-function interpretation calculator	2
	868.2025	Ultrasonic air embolism monitor	2
	868.2375	Breathing frequency monitor (except apnea detectors)	2
	868.2480	Cutaneous carbon dioxide ($PcCO_2$) monitor	2
	868.2500	Cutaneous oxygen monitor (for an infant not under gas anesthesia)	2
	868.2550	Pneumotachomometer	2
	868.2600	Airway pressure monitor	2
	868.5665	Powered percussor	2
	868.5690	Incentive spirometer	2
Ventilator	868.5905	Noncontinuous ventilator (IPPB)	2
	868.5925	Powered emergency ventilator	2
	868.5935	External negative pressure ventilator	2
	868.5895	Continuous ventilator	2
	868.5955	Intermittent mandatory ventilation attachment	2
	868.6250	Portable air compressor	2
Cardiovascular Panel			
Cardiovascular Diagnostic	870.1425	Programmable diagnostic computer	2
	870.1450	Densitometer	2
	870.2310	Apex cardiograph (vibrocardiograph)	2
	870.2320	Ballistocardiograph	2
	870.2340	Electrocardiograph	2
	870.2350	Electrocardiograph lead switching adaptor	1
	870.2360	Electrocardiograph electrode	2
	870.2370	Electrocardiograph surface electrode tester	2
	870.2400	Vectorcardiograph	1
	870.2450	Medical cathode-ray tube display	1
	870.2675	Oscillometer	2
	870.2840	Apex cardiographic transducer	2
	870.2860	Heart sound transducer	2

Table 3.—Medical Devices for Possible Inclusion in Scope of Product Coverage During Operational Period[1]—Continued

Product Family	21 CFR Section No	Device Name	Tier
Cardiovascular Monitoring		Valve, pressure relief, cardiopulmonary bypass	
	870.1100	Blood pressure alarm	2
	870.1110	Blood pressure computer	2
	870.1120	Blood pressure cuff	2
	870.1130	Noninvasive blood pressure measurement system	2
	870.1140	Venous blood pressure manometer	2
	870.1220	Electrode recording catheter or electrode recording probe	2
	870.1270	Intracavitary phonocatheter system	2
	870.1875	Stethoscope (electronic)	2
	870.2050	Biopotential amplifier and signal conditioner	2
	870.2060	Transducer signal amplifier and conditioner	2
	870.2100	Cardiovascular blood flow-meter	2
	870.2120	Extravascular blood flow probe	2
	870.2300	Cardiac monitor (including cardiotachometer and rate alarm)	2
	870.2700	Oximeter	2
	870.2710	Ear oximeter	2
	870.2750	Impedance phlebograph	2
	870.2770	Impedance plethysmograph	2
	870.2780	Hydraulic, pneumatic, or photoelectric plethysmographs	2
	870.2850	Extravascular blood pressure transducer	2
	870.2870	Catheter tip pressure transducer	2
	870.2880	Ultrasonic transducer	2
	870.2890	Vessel occlusion transducer	2
	870.2900	Patient transducer and electrode cable (including connector)	2
	870.2910	Radiofrequency physiological signal transmitter and receiver	2
	870.2920	Telephone electrocardiograph transmitter and receiver	2
	870.4205	Cardiopulmonary bypass bubble detector	2
	870.4220	Cardiopulmonary bypass heart-lung machine console	2
	870.4240	Cardiovascular bypass heat exchanger	2
	870.4250	Cardiopulmonary bypass temperature controller	2
	870.4300	Cardiopulmonary bypass gas control unit	2
	870.4310	Cardiopulmonary bypass coronary pressure gauge	2
	870.4330	Cardiopulmonary bypass on-line blood gas monitor	2
	870.4340	Cardiopulmonary bypass level sensing monitor and/or control	2
	870.4370	Roller-type cardiopulmonary bypass blood pump	2
	870.4380	Cardiopulmonary bypass pump speed control	2
	870.4410	Cardiopulmonary bypass in-line blood gas sensor	2
Cardiovascular Therapeutic	870.5050	Patient care suction apparatus	2
	870.5900	Thermal regulation system	2
Defibrillator	870.5300	DC-defibrillator (including paddles)	2
	870.5325	Defibrillator tester	2
Echocardiograph	870.2330	Echocardiograph	2
Pacemaker & Accessories	870.1750	External programmable pacemaker pulse generator	2
	870.3630	Pacemaker generator function analyzer	2

Table 3.—Medical Devices for Possible Inclusion in Scope of Product Coverage During Operational Period[1]—Continued

Product Family	21 CFR Section No	Device Name	Tier
	870.3640	Indirect pacemaker generator function analyzer	2
	870.3720	Pacemaker electrode function tester	2
Miscellaneous	870.1800	Withdrawal-infusion pump	2
	870.2800	Medical magnetic tape recorder	2
	None	Batteries, rechargeable, class II devices	
Dental Panel			
Dental Equipment	872.1720	Pulp tester	2
	872.1740	Caries detection device	2
	872.4120	Bone cutting instrument and accessories	2
	872.4465	Gas-powered jet injector	2
	872.4475	Spring-powered jet injector	2
	872.4600	Intraoral ligature and wire lock	2
	872.4840	Rotary scaler	2
	872.4850	Ultrasonic scaler	2
	872.4920	Dental electrosurgical unit and accessories	2
	872.6070	Ultraviolet activator for polymerization	2
	872.6350	Ultraviolet detector	2
Dental Material	872.3050	Amalgam alloy	2
	872.3060	Gold-based alloys and precious metal alloys for clinical use	2
	872.3200	Resin tooth bonding agent	2
	872.3250	Calcium hydroxide cavity liner	2
	872.3260	Cavity varnish	2
	872.3275	Dental cement (other than zinc oxide-eugenol)	2
	872.3300	Hydrophilic resin coating for dentures	2
	872.3310	Coating material for resin fillings	2
	872.3590	Preformed plastic denture tooth	2
	872.3660	Impression material	2
	872.3690	Tooth shade resin material	2
	872.3710	Base metal alloy	2
	872.3750	Bracket adhesive resin and tooth conditioner	2
	872.3760	Denture relining, repairing, or rebasing resin	2
	872.3765	Pit and fissure sealant and conditioner	2
	872.3770	Temporary crown and bridge resin	2
	872.3820	Root canal filling resin (other than chloroform use)	2
	872.3920	Porcelain tooth	2
Dental X-ray	872.1800	Extraoral source x-ray system	2
	872.1810	Intraoral source x-ray system	2
Dental Implants	872.4880	Intraosseous fixation screw or wire	2
	872.3890	Endodontic stabilizing splint	2
Orthodontic	872.5470	Orthodontic plastic bracket	2
Ear/Nose/Throat Panel			
Diagnostic Equipment	874.1050	Audiometer	2
	874.1090	Auditory impedance tester	2
	874.1120	Electronic noise generator for audiometric testing	2
	874.1325	Electroglottograph	2
	874.1820	Surgical nerve stimulator/locator	2
Hearing Aids	874.3300	Hearing aid (for bone-conduction)	2
	874.3310	Hearing aid calibrator and analysis system	2
	874.3320	Group hearing aid or group auditory trainer	2
	874.3330	Master hearing aid	2
Surgical Equipment	874.4250	Ear, nose, and throat electric or pneumatic surgical drill	1
	874.4490	Argon laser for otology, rhinology, and laryngology	2

Table 3.—Medical Devices for Possible Inclusion in Scope of Product Coverage During Operational Period[1]—Continued

Product Family	21 CFR Section No	Device Name	Tier
	874.4500	Ear, nose, and throat microsurgical carbon dioxide laser	2
Gastroenterology/Urology Panel			
Endoscope (including angioscopes, laparscopes, ophthalmic endoscopes)	876.1500	Endoscope and accessories	2
	876.4300	Endoscopic electrosurgical unit and accessories	2
Gastroenterology	876.1725	Gastrointestinal motility monitoring system	1
Hemodialysis	876.5600	Sorbent regenerated dialysate delivery system for hemodialysis	2
	876.5630	Peritoneal dialysis system and accessories	2
	876.5665	Water purification system for hemodialysis	2
	876.5820	Hemodialysis system and accessories	2
	876.5830	Hemodialyzer with disposable insert (kiil-type)	2
Lithotriptor	876.4500	Mechanical lithotriptor	2
Urology Equipment	876.1620	Urodynamics measurement system	2
	876.5320	Nonimplanted electrical continence device	2
	876.5880	Isolated kidney perfusion and transport system and accessories	2
General Hospital Panel			
Infusion Pumps and Systems	880.2420	Electronic monitor for gravity flow infusion systems	2
	880.2460	Electrically powered spinal fluid pressure monitor	2
	880.5430	Nonelectrically powered fluid injector	2
	880.5725	Infusion pump	2
Neonatal Incubators	880.5400	Neonatal incubator	2
	880.5410	Neonatal transport incubator	2
	880.5700	Neonatal phototherapy unit	2
Piston Syringes	880.5570	Hypodermic single lumen needle	1
	880.5860	Piston syringe (except antistick)	1
	880.6920	Syringe needle introducer	2
Miscellaneous	880.2910	Clinical electronic thermometer	2
	880.2920	Clinical mercury thermometer	2
	880.5100	AC-powered adjustable hospital bed	1
	880.5500	AC-powered patient lift	2
	880.6880	Steam sterilizer (greater than 2 cubic feet)	2
Neurology Panel			
	882.1020	Rigidity analyzer	2
	882.1610	Alpha monitor	2
Neuro-Diagnostic	882.1320	Cutaneous electrode	2
	882.1340	Nasopharyngeal electrode	2
	882.1350	Needle electrode	2
	882.1400	Electroencephalograph	2
	882.1460	Nystagmograph	2
	882.1480	Neurological endoscope	2
	882.1540	Galvanic skin response measurement device	2
	882.1550	Nerve conduction velocity measurement device	2
	882.1560	Skin potential measurement device	2
	882.1570	Powered direct-contact temperature measurement device	2
	882.1620	Intracranial pressure monitoring device	2
	882.1835	Physiological signal amplifier	2
	882.1845	Physiological signal conditioner	2

Table 3.—Medical Devices for Possible Inclusion in Scope of Product Coverage During Operational Period[1]—Continued

Product Family	21 CFR Section No	Device Name	Tier
	882.1855	Electroencephalogram (EEG) telemetry system	2
	882.5050	Biofeedback device	2
Echoencephalography	882.1240	Echoencephalograph	2
RPG	882.4400	Radiolrequency lesion generator	2
Neuro Surgery	none	Electrode, spinal epidural	2
	882.4305	Powered compound cranial drills, burrs, trephines, and their accessories	2
	882.4310	Powered simple cranial drills burrs, trephines, and their accessories	2
	882.4360	Electric cranial drill motor	2
	882.4370	Pneumatic cranial drill motor	2
	882.4560	Stereotaxic instrument	2
	882.4725	Radiofrequency lesion probe	2
	882.4845	Powered rongeur	2
	882.5500	Lesion temperature monitor	2
Stimulators	882.1870	Evoked response electrical stimulator	2
	882.1880	Evoked response mechanical stimulator	2
	882.1890	Evoked response photic stimulator	2
	882.1900	Evoked response auditory stimulator	2
	882.1950	Tremor transducer	2
	882.5890	Transcutaneous electrical nerve stimulator for pain relief	2
Obstetrics/Gynecology Panel			
Fetal Monitoring	884.1660	Transcervical endoscope (amnioscope) and accessories	2
	884.1690	Hysteroscope and accessories (for performance standards)	2
	884.2225	Obstetric-gynecologic ultrasonic imager	2
	884.2600	Fetal cardiac monitor	2
	884.2640	Fetal phonocardiographic monitor and accessories	2
	884.2660	Fetal ultrasonic monitor and accessories	2
	884.2675	Fetal scalp circular (spiral) electrode and applicator	1
	884.2700	Intrauterine pressure monitor and accessories	2
	884.2720	External uterine contraction monitor and accessories	2
	884.2740	Perinatal monitoring system and accessories	2
	884.2960	Obstetric ultrasonic transducer and accessories	2
Gynecological Surgery Equipment	884.1720	Gynecologic laparoscope and accessories	2
	884.4160	Unipolar endoscopic coagulator-cutter and accessories	2
	884.4550	Gynecologic surgical laser	2
	884.4120	Gynecologic electrocautery and accessories	2
	884.5300	Condom	2
Ophthalmic Implants	886.3320	Eye sphere implant	2
Contact Lens	886.1385	Polymethylmethacrylate (PMMA) diagnostic contact lens	2
	886.5916	Rigid gas permeable contact lens (daily wear only)	2
Diagnostic Equipment	886.1120	Opthalmic camera	1
	886.1220	Corneal electrode	1
	886.1250	Euthyscope (AC-powered)	1
	886.1360	Visual field laser instrument	1
	886.1510	Eye movement monitor	1
	886.1570	Ophthalmoscope	1
	886.1630	AC-powered photostimulator	1
	886.1640	Ophthalmic preamplifier	1

Table 3.—Medical Devices for Possible Inclusion in Scope of Product Coverage During Operational Period[1]—Continued

Product Family	21 CFR Section No	Device Name	Tier
	886.1670	Ophthalmic isotope uptake probe	2
	886.1780	Retinoscope (AC-powered device)	1
	886.1850	AC-powered slit lamp biomicroscope	1
	886.1930	Tonometer and accessories	2
	886.1945	Transilluminator (AC-powered device)	1
	886.3130	Ophthalmic conformer	2
(Diagnostic/Surgery Equipment)	886.4670	Phacofragmentation system	2
Ophthalmic Implants	886.3340	Extraocular orbital implant	2
	886.3800	Scleral shell	2
Surgical Equipment	880.5725	Infusion pump (performance standards)	2
	886.3100	Ophthalmic tantalum clip	2
	886.3300	Absorbable implant (scleral buckling method)	2
	886.4100	Radiofrequency electrosurgical cautery apparatus	2
	886.4115	Thermal cautery unit	2
	886.4150	Vitreous aspiration and cutting instrument	2
	886.4170	Cryophthalmic unit	2
	886.4250	Ophthalmic electrolysis unit (AC-powered device)	1
	886.4335	Operating headlamp (AC-powered device)	1
	886.4390	Ophthalmic laser	2
	886.4392	Nd:YAG laser for posterior capsulotomy	2
	886.4400	Electronic metal locator	1
	886.4440	AC-powered magnet	1
	886.4610	Ocular pressure applicator	2
	886.4690	Ophthalmic photocoagulator	2
	886.4790	Ophthalmic sponge	2
	886.5100	Ophthalmic beta radiation source	2
	none	Ophthalmoscopes, replacement batteries, hand-held	1
Orthopedic Panel			
Implants	888.3010	Bone fixation cerclage	2
	888.3020	Intramedullary fixation rod	2
	888.3030	Single/multiple component metallic bone fixation appliances and accessories	2
	888.3040	Smooth or threaded metallic bone fixation fastener	2
	888.3050	Spinal interlaminal fixation orthosis	2
	888.3060	Spinal intervertebral body fixation orthosis	2
Surgical Equipment	888.1240	AC-powered dynamometer	2
	888.4580	Sonic surgical instrument and accessories/attachments	2
	none	Accessories, fixation, spinal interlaminal	2

Appendix C of Subpart B [Reserved].

Appendix D of Subpart B [Reserved].

Appendix E of Subpart B [Reserved].

Appendix F of Subpart B [Reserved].

Subpart C—"Framework" Provisions

§ 26.60 Definitions.

(a) The following terms and definitions shall apply to this subpart only:

(1) *Designating Authority* means a body with power to designate, monitor, suspend, remove suspension of, or withdraw conformity assessment bodies as specified under this part.

(2) *Designation* means the identification by a designating authority of a conformity assessment body to perform conformity assessment procedures under this part.

(3) *Regulatory Authority* means a government agency or entity that exercises a legal right to control the use or sale of products within a party's jurisdiction and may take enforcement action to ensure that products marketed within its jurisdiction comply with legal requirements.

(b) Other terms concerning conformity assessment used in this part shall have the meaning given elsewhere in this part or in the definitions contained in "Guide 2: Standardization and Related Activities—General Vocabulary of the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC)" (ISO/IEC Guide 2) (1996 edition), which is incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies are available from the International Organization for Standardization, 1, rue de Varembé, Case postale 56, CH–1211 Genève 20, Switzerland, or on the Internet at "http://www.iso.ch" or may be examined at the Food and Drug Administration's Medical Library, 5600 Fishers Lane, rm. 11B–40, Rockville, MD 20857, or the Office of the Federal Register, 800 North Capitol St. NW., suite 700, Washington, DC. In the event of an inconsistency between the ISO/IEC Guide 2 and definitions in this part, the definitions in this part shall prevail.

§ 26.61 Purpose of this part.

This part specifies the conditions by which each party will accept or recognize results of conformity assessment procedures, produced by the other party's conformity assessment bodies (CAB's) or authorities, in assessing conformity to the importing party's requirements, as specified on a sector-specific basis in subparts A and B of this part, and to provide for other related cooperative activities. The objective of such mutual recognition is to provide effective market access throughout the territories of the parties with regard to conformity assessment for all products covered under this part. If any obstacles to such access arise, consultations will promptly be held. In the absence of a satisfactory outcome of such consultations, the party alleging its market access has been denied may, within 90 days of such consultation, invoke its right to terminate the "Agreement on Mutual Recognition Between the United States of America and the European Community," from which this part is derived, in accordance with § 26.80.

§ 26.62 General obligations.

(a) The United States shall, as specified in subparts A and B of this part, accept or recognize results of specified procedures, used in assessing conformity to specified legislative, regulatory, and administrative provisions of the United States, produced by the other party's conformity assessment bodies (CAB's) and/or authorities.

(b) The European Community (EC) and its Member States shall, as specified in subparts A and B of this part, accept or recognize results of specified procedures, used in assessing conformity to specified legislative, regulatory, and administrative provisions of the EC and its Member States, produced by the other party's CAB's and/or authorities.

(c) Where sectoral transition arrangements have been specified in subparts A and B of this part, the obligations in paragraphs (a) and (b) of this section will apply following the successful completion of those sectoral transition arrangements, with the understanding that the conformity assessment procedures utilized assure conformity to the satisfaction of the receiving party, with applicable legislative, regulatory, and administrative provisions of that party, equivalent to the assurance offered by the receiving party's own procedures.

§ 26.63 General coverage of this part.

(a) This part applies to conformity assessment procedures for products and/or processes and to other related cooperative activities as described in this part.

(b) Subparts A and B of this part may include:

(1) A description of the relevant legislative, regulatory, and administrative provisions pertaining to the conformity assessment procedures and technical regulations;

(2) A statement on the product scope and coverage;

(3) A list of designating authorities;

(4) A list of agreed conformity assessment bodies (CAB's) or authorities or a source from which to obtain a list of such bodies or authorities and a statement of the scope of the conformity assessment procedures for which each has been agreed;

(5) The procedures and criteria for designating the CAB's;

(6) A description of the mutual recognition obligations;

(7) A sectoral transition arrangement;

(8) The identity of a sectoral contact point in each party's territory; and

(9) A statement regarding the establishment of a Joint Sectoral Committee.

(c) This part shall not be construed to entail mutual acceptance of standards or technical regulations of the parties and, unless otherwise specified in subpart A or B of this part, shall not entail the

mutual recognition of the equivalence of standards or technical regulations.

§ 26.64 Transitional arrangements.

The parties agree to implement the transitional commitments on confidence building as specified in subparts A and B of this part.

(a) The parties agree that each sectoral transitional arrangement shall specify a time period for completion.

(b) The parties may amend any transitional arrangement by mutual agreement.

(c) Passage from the transitional phase to the operational phase shall proceed as specified in subparts A and B of this part, unless either party documents that the conditions provided in such subpart for a successful transition are not met.

§ 26.65 Designating authorities.

The parties shall ensure that the designating authorities specified in subpart B of this part have the power and competence in their respective territories to carry out decisions under this part to designate, monitor, suspend, remove suspension of, or withdraw conformity assessment bodies (CAB's).

§ 26.66 Designation and listing procedures.

The following procedures shall apply with regard to the designation of conformity assessment bodies (CAB's) and the inclusion of such bodies in the list of CAB's in subpart B of this part:

(a) The designating authority identified in subpart B of this part shall designate CAB's in accordance with the procedures and criteria set forth in subpart B of this part;

(b) A party proposing to add a CAB to the list of such bodies in subpart B of this part shall forward its proposal of one or more designated CAB's in writing to the other party with a view to a decision by the Joint Committee;

(c) Within 60 days following receipt of the proposal, the other party shall indicate its position regarding either its confirmation or its opposition. Upon confirmation, the inclusion in subpart B of this part of the proposed CAB or CAB's shall take effect; and

(d) In the event that the other party contests on the basis of documented evidence the technical competence or compliance of a proposed CAB, or indicates in writing that it requires an additional 30 days to more fully verify such evidence, such CAB shall not be included on the list of CAB's in subpart B of this part. In this instance, the Joint Committee may decide that the body concerned be verified. After the completion of such verification, the proposal to list the CAB in subpart B may be resubmitted to the other party.

§ 26.67 Suspension of listed conformity assessment bodies.

The following procedures shall apply with regard to the suspension of a conformity assessment body (CAB) listed in subpart B of this part.

(a) A party shall notify the other party of its contestation of the technical competence or compliance of a CAB listed in subpart B of this part and the contesting party's intent to suspend such CAB. Such contestation shall be exercised when justified in an objective and reasoned manner in writing to the other party;

(b) The CAB shall be given prompt notice by the other party and an opportunity to present information in order to refute the contestation or to correct the deficiencies which form the basis of the contestation;

(c) Any such contestation shall be discussed between the parties in the Joint Sectoral Committee described in subpart B of this part. If there is no Joint Sectoral Committee, the contesting party shall refer the matter directly to the Joint Committee. If agreement to suspend is reached by the Joint Sectoral Committee or, if there is no Joint Sectoral Committee, by the Joint Committee, the CAB shall be suspended;

(d) Where the Joint Sectoral Committee or Joint Committee decides that verification of technical competence or compliance is required, it shall normally be carried out in a timely manner by the party in whose territory the body in question is located, but may be carried out jointly by the parties in justified cases;

(e) If the matter has not been resolved by the Joint Sectoral Committee within 10 days of the notice of contestation, the matter shall be referred to the Joint Committee for a decision. If there is no Joint Sectoral Committee, the matter shall be referred directly to the Joint Committee. If no decision is reached by the Joint Committee within 10 days of the referral to it, the CAB shall be suspended upon the request of the contesting party;

(f) Upon the suspension of a CAB listed in subpart B of this part, a party is no longer obligated to accept or recognize the results of conformity assessment procedures performed by that CAB subsequent to suspension. A party shall continue to accept the results of conformity assessment procedures performed by that CAB prior to suspension, unless a regulatory authority of the party decides otherwise based on health, safety or environmental considerations or failure to satisfy other requirements within the scope of subpart B of this part; and

(g) The suspension shall remain in effect until agreement has been reached by the parties upon the future status of that body.

§ 26.68 Withdrawal of listed conformity assessment bodies.

The following procedures shall apply with regard to the withdrawal from subpart B of this part of a conformity assessment body (CAB):

(a) A party proposing to withdraw a CAB listed in subpart B of this part shall forward its proposal in writing to the other party;

(b) Such CAB shall be promptly notified by the other party and shall be provided a period of at least 30 days from receipt to provide information in order to refute or to correct the deficiencies which form the basis of the proposed withdrawal;

(c) Within 60 days following receipt of the proposal, the other party shall indicate its position regarding either its confirmation or its opposition. Upon confirmation, the withdrawal from the list in subpart B of this part of the CAB shall take effect;

(d) In the event the other party opposes the proposal to withdraw by supporting the technical competence and compliance of the CAB, the CAB shall not at that time be withdrawn from the list of CAB's in subpart B of this part. In this instance, the Joint Sectoral Committee or the Joint Committee may decide to carry out a joint verification of the body concerned. After the completion of such verification, the proposal for withdrawal of the CAB may be resubmitted to the other party; and

(e) Subsequent to the withdrawal of a CAB listed in subpart B of this part, a party shall continue to accept the results of conformity assessment procedures performed by that CAB prior to withdrawal, unless a regulatory authority of the party decides otherwise based on health, safety, and environmental considerations or failure to satisfy other requirements within the scope of subpart B of this part.

§ 26.69 Monitoring of conformity assessment bodies.

The following shall apply with regard to the monitoring of conformity assessment bodies (CAB's) listed in subpart B of this part:

(a) Designating authorities shall assure that their CAB's listed in subpart B of this part are capable and remain capable of properly assessing conformity of products or processes, as applicable, and as covered in subpart B of this part. In this regard, designating authorities shall maintain, or cause to maintain, ongoing surveillance over their CAB's by means of regular audit or assessment;

(b) The parties undertake to compare methods used to verify that the CAB's listed in subpart B of this part comply with the relevant requirements of subpart B of this part. Existing systems for the evaluation of CAB's may be used as part of such comparison procedures;

(c) Designating authorities shall consult as necessary with their counterparts, to ensure the maintenance of confidence in conformity assessment procedures. With the consent of both parties, this consultation may include joint participation in audits/inspections related to conformity assessment activities or other assessments of CAB's listed in subpart B of this part; and

(d) Designating authorities shall consult, as necessary, with the relevant regulatory authorities of the other party to ensure that all technical requirements are identified and are satisfactorily addressed.

§ 26.70 Conformity assessment bodies.

Each party recognizes that the conformity assessment bodies (CAB's) listed in subpart B of this part fulfill the conditions of eligibility to assess conformity in relation to its requirements as specified in subpart B of this part. The parties shall specify the scope of the conformity assessment procedures for which such bodies are listed.

§ 26.71 Exchange of information.

(a) The parties shall exchange information concerning the implementation of the legislative, regulatory, and administrative provisions identified in subparts A and B of this part.

(b) Each party shall notify the other party of legislative, regulatory, and administrative changes related to the subject matter of this part at least 60 days before their entry into force. Where considerations of safety, health or environmental protection require more urgent action, a party shall notify the other party as soon as practicable.

(c) Each party shall promptly notify the other party of any changes to its designating authorities and/or conformity assessment bodies (CAB's).

(d) The parties shall exchange information concerning the procedures used to ensure that the listed CAB's under their responsibility comply with the legislative, regulatory, and administrative provisions outlined in subpart B of this part.

(e) Regulatory authorities identified in subparts A and B of this part shall consult as necessary with their counterparts, to ensure the maintenance of confidence in conformity assessment procedures and to ensure that all technical requirements are identified and are satisfactorily addressed.

§ 26.72 Sectoral contact points.

Each party shall appoint and confirm in writing contact points to be responsible for activities under subparts A and B of this part.

§ 26.73 Joint Committee.

(a) A Joint Committee consisting of representatives of the United States and the European Community (EC) will be established. The Joint Committee shall be responsible for the effective functioning of the "Agreement on Mutual Recognition Between the United States of America and the European Community," from which this part is derived.

(b) The Joint Committee may establish Joint Sectoral Committees comprised of appropriate regulatory authorities and others deemed necessary.

(c) The United States and the EC shall each have one vote in the Joint Committee. The Joint Committee shall make its decisions by unanimous consent. The Joint Committee shall determine its own rules and procedures.

(d) The Joint Committee may consider any matter relating to the effective functioning of that agreement. In particular it shall be responsible for:

(1) Listing, suspension, withdrawal and verification of conformity assessment bodies (CAB's) in accordance with that agreement;

(2) Amending transitional arrangements in the sectoral annexes to that agreement;

(3) Resolving any questions relating to the application of that agreement not otherwise resolved in the respective Joint Sectoral Committees;

(4) Providing a forum for discussion of issues that may arise concerning the implementation of that agreement;

(5) Considering ways to enhance the operation of that agreement;

(6) Coordinating the negotiation of additional sectoral annexes to that agreement; and

(7) Considering whether to amend that agreement in accordance with § 26.80.

(e) When a party introduces new or additional conformity assessment procedures affecting a sectoral annex to that agreement, the parties shall discuss the matter in the Joint Committee with a view to bringing such new or additional procedures within the scope of that agreement and the relevant sectoral annex.

§ 26.74 Preservation of regulatory authority.

(a) Nothing in this part shall be construed to limit the authority of a party to determine, through its legislative, regulatory, and administrative measures, the level of protection it considers appropriate for safety; for protection of human, animal, or plant life or health; for the environment; for consumers; and otherwise with regard to risks within the scope of the applicable subpart A or B of this part.

(b) Nothing in this part shall be construed to limit the authority of a regulatory authority to take all appropriate and immediate measures whenever it ascertains that a product may:

(1) Compromise the health or safety of persons in its territory;

(2) Not meet the legislative, regulatory, or administrative provisions within the scope of the applicable subpart A or B of this part; or

(3) Otherwise fail to satisfy a requirement within the scope of the applicable subpart A or B of this part. Such measures may include withdrawing the products from the market, prohibiting their placement on the market, restricting their free movement, initiating a product recall, and preventing the recurrence of such problems, including through a prohibition on imports. If the regulatory authority takes such action, it shall inform its counterpart authority and the other party within 15 days of taking such action, providing its reasons.

§ 26.75 Suspension of recognition obligations.

Either party may suspend its obligations under subpart A or B of this part, in whole or in part, if:

(a) A party suffers a loss of market access for the party's products within the scope of subpart A or B of this part as a result of the failure of the other party to fulfill its obligations under this part;

(b) The adoption of new or additional conformity assessment requirements as referenced in § 26.73(e) results in a loss of market access for the party's products within the scope of subpart B of this part because conformity assessment bodies (CAB's) designated by the party in order to meet such requirements have not been recognized by the party implementing the requirements; or

(c) The other party fails to maintain legal and regulatory authorities capable of implementing the provisions of this part.

§ 26.76 Confidentiality.

(a) Each party agrees to maintain, to the extent required under its laws, the confidentiality of information exchanged under this part.

(b) In particular, neither party shall disclose to the public, nor permit a conformity assessment body (CAB) to disclose to the public, information exchanged under this part that constitutes trade secrets, confidential commercial or financial information, or information that relates to an ongoing investigation.

(c) A party or a CAB may, upon exchanging information with the other party or with a CAB of the other party, designate the portions of the information that it considers to be exempt from disclosure.

(d) Each party shall take all precautions reasonably necessary to protect information exchanged under this part from unauthorized disclosure.

§ 26.77 Fees.

Each party shall endeavor to ensure that fees imposed for services under this part shall be commensurate with the services provided. Each party shall ensure that, for the sectors and conformity assessment procedures covered under this part, it shall charge no fees with respect to conformity assessment services provided by the other party.

§ 26.78 Agreements with other countries.

Except where there is written agreement between the parties, obligations contained in mutual recognition agreements concluded by either party with a party not a party to the agreement from which this part is derived (a third party) shall have no force and effect with regard to the other party in terms of acceptance of the results of conformity assessment procedures in the third party.

§ 26.79 Territorial application.

The agreement from which this part is derived shall apply, on the one hand, to the territories in which the Treaty establishing the European Community (EC) is applied, and under the conditions laid down in that Treaty and, on the other hand, to the territory of the United States.

§ 26.80 Entry into force, amendment, and termination.

(a) The "Agreement on Mutual Recognition Between the United States of America and the European Community," from which this part is derived, including its sectoral annexes on telecommunication equipment, electromagnetic compatibility, electrical safety, recreational craft, pharmaceutical Good Manufacturing Practices (GMP) inspections, and medical devices shall enter into force on the first day of the second month following the date on which the parties have exchanged letters confirming the completion of their respective procedures for the entry into force of that agreement.

(b) That agreement including any sectoral annex may, through the Joint Committee, be amended in writing by the parties to that agreement. Those parties may add a sectoral annex upon the exchange of letters. Such annex shall enter into force 30 days following the date on which those parties have exchanged letters confirming the completion of their respective procedures for the entry into force of the sectoral annex.

(c) Either party to that agreement may terminate that agreement in its entirety or any individual sectoral annex thereof by giving the other party to that agreement 6-months notice in writing. In the case of termination of one or more sectoral annexes, the parties to that agreement will seek to achieve by consensus to amend that agreement, with a view to preserving the remaining Sectoral Annexes, in accordance with the procedures in this section. Failing such consensus, that agreement shall terminate at the end of 6 months from the date of notice.

(d) Following termination of that agreement in its entirety or any individual sectoral annex thereof, a party to that agreement shall continue to accept the results of conformity assessment procedures performed by conformity assessment bodies under that agreement prior to termination, unless a regulatory authority in the party decides otherwise based on health, safety and environmental considerations or failure to satisfy other requirements within the scope of the applicable sectoral annex.

§ 26.81 Final provisions.

(a) The sectoral annexes referred to in § 26.80(a), as well as any new sectoral annexes added pursuant to § 26.80(b), shall form an integral part of the "Agreement on Mutual Recognition Between the United States of America and the European Community," from which this part is derived.

(b) For a given product or sector, the provisions contained in subparts A and B of this part shall apply in the first place, and the provisions of subpart C of this part in addition to those provisions. In the case of any inconsistency between the provisions of subpart A or B of this part and subpart C of this part, subpart A or B shall prevail, to the extent of that inconsistency.

(c) The agreement from which this part is derived shall not affect the rights and obligations of the parties under any other international agreement.

(d) In the case of subpart B of this part, the parties shall review the status of such subpart at the end of 3 years from the date described in § 26.80(a).

Dated: July 23, 1998.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[FDA 225–98–8002]

Memorandum of Understanding Between the Food and Drug Administration and the Office of the United States Trade Representative

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is providing notice of a memorandum of understanding (MOU) between FDA and the Office of the United States Trade Representative. The purpose of the MOU is to set forth the understandings and procedures which will guide their cooperative execution of the Joint Committee provisions of the Agreement on Mutual Recognition between the United States of America and the European Community.

DATES: The MOU became effective May 1, 1998.

FOR FURTHER INFORMATION CONTACT: Merton Smith, Office of International Affairs (HFG–1), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–4480.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 20.108(c), which states that all written agreements and understanding between FDA and other departments, agencies, and organizations shall be published in the **Federal Register** (except those between FDA and State and local government agencies that are cooperative work-sharing agreements), the agency is publishing notice of this MOU.

Dated: September 28, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

BILLING CODE 4160–01–F

225-98-8002

MEMORANDUM OF UNDERSTANDING REGARDING THE JOINT COMMITTEE UNDER THE FRAMEWORK AGREEMENT ON MUTUAL RECOGNITION BETWEEN THE UNITED STATES OF AMERICA AND THE EUROPEAN COMMUNITY

The United States and the European Community have negotiated an Agreement on Mutual Recognition (the "Agreement"), consisting of an umbrella agreement and several sectoral annexes. Products covered in the Sectoral Annex for Pharmaceutical Good Manufacturing Practices ("GMPs") and the Sectoral Annex on Medical Devices are regulated by the United States Food and Drug Administration ("FDA").

The umbrella agreement establishes a Joint Committee responsible for the effective functioning of the Agreement as a whole, and the sectoral annexes on pharmaceutical GMPs and medical devices establish separate Joint Sectoral Committees responsible for the operation of the respective sectoral annexes. Under the Agreement, issues discussed in the Joint Sectoral Committees regarding, among other things, equivalence determinations of authorities or conformity assessment bodies, may be referred to the Joint Committee.

In recognition of the relationship between the Agreement and FDA's core domestic statutory and regulatory responsibilities relating to protection of health and safety under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, and related statutes, execution of which is committed to FDA, and in light of the United States Trade Representative's (USTR) role under section 141 of the Trade Act of 1974 and Reorganization Plan #3 of 1979, FDA and USTR set forth in this Memorandum of Understanding ("MOU") the understandings and procedures which will guide their cooperative execution of the Joint Committee provisions of the Agreement.

Upon establishment of the Joint Committee pursuant to Article 14 of the Agreement, USTR shall notify FDA of matters to be considered by the Joint Committee. Subject to arrangements with other agencies covered by the Agreement, USTR normally shall speak for and vote on behalf of the United States in the Joint Committee. A representative of FDA shall speak for and vote on behalf of the United States on any matter pertaining to FDA's statutory or regulatory authority. The representative of FDA shall also represent the USG on such matters in any other committees or bodies with similar functions established under the Agreement or its annexes.

Part V

Department of Transportation

Federal Transit Administration

Job Access and Reverse Commute Competitive Grants; Notice

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Job Access and Reverse Commute Competitive Grants

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice of availability of funds; solicitation for grant applications.

SUMMARY: the U.S. Department of Transportation's (DOT) Federal Transit Administration (FTA) announces the first round of competitive grants under the Job Access and Reverse Commute grant program, authorized under Section 3037 of the Transportation Equity Act for the 21st Century (TEA–21). The Job Access and Reverse Commute grant program is intended to establish a regional approach to job access challenges through the establishment of a Regional Job Access and Reverse Commute Transportation Plan. Projects derived from this plan support the implementation of a variety of transportation services that may be needed to connect welfare recipients to jobs and related employment activities. All projects funded under the Job Access and Reverse Commute grant program must be derived from this regional plan. The Job Access and Reverse Commute Program has two major goals: to provide transportation services in urban, suburban and rural areas to assist welfare recipients and low income individuals access employment opportunities, and to increase collaboration among the transportation providers, human service agencies, employers, metropolitan planning organizations (MPOs), states, and affected communities and individuals.

While the projects must be planned in coordination with traditional transit authorities and transportation planning organizations, other interested organizations could take the lead in establishing the collaborative planning process or project application. The Job Access and Reverse Commute grant program will support projects that are implemented by a wide range of transportation providers. One key element is making the most efficient use of existing public, nonprofit and private transportation service providers.

A Job Access project is designed to transport welfare recipients and low-income individuals in urban, suburban, or rural areas to and from jobs and activities related to their employment. Job Access projects implement new transportation services or extend existing services to fill the gaps that exist in many areas between where welfare recipients and low-income persons live and employment opportunities. A Reverse Commute Project is designed to transport the general public from urban, suburban, and rural areas to suburban employment opportunities. Job Access and Reverse Commute grants funded under this program may not be used for planning or coordinating activities and cannot supplant existing sources of funding.

Funding for Job Access grants is authorized at $150 million annually. $50 million of this amount is guaranteed in fiscal year (FY) 1999. The guaranteed portion rises by $25 million a year, reaching the full authorized $150 million in FY 2003. Funding above the guaranteed level depends on congressional appropriations. No more than $10 million annually can be used for grants designated as Reverse Commute projects. In FY 1999, $75 million is available for the Job Access and Reverse Commute grant program. A 50 percent non-DOT match is required. Other Federal funds that are eligible to be expended for transportation can be used as part of the match. Applicants should submit projects that can be implemented quickly. The increasing funding levels provide ample opportunity for areas to submit future applications as Regional Job Access and Reverse Commute Transportation Plans are further developed.

This announcement describes the conditions under which applications will be received for the Job Access and Reverse Commute competitive grants program and how FTA will determine which applications it will fund. It includes all of the information needed to apply for Job Access and Reverse Commute competitive grants.

This announcement is available on the Internet on the U.S. Department of Transportation's FTA website at http://www.fta.dot.gov/wtw/. The website will also have commonly asked questions and answers. FTA will announce final selections on the website and in the **Federal Register**.

DATES: FTA will make funding commitments for the Job Access and Reverse Commute program through a two-stage process. Applications must be submitted to the appropriate FTA regional office (see Appendix A) by the close of business December 31, 1998. After evaluation, those whose projects are selected for funding will be required to submit supplementary documentation demonstrating compliance with all of FTA's Section 5307, "Urbanized Area Formula Grants" requirements. FTA will announce grant selections in February 1999.

FTA will accept comments on this notice until November 23, 1998. Based on this input, FTA may provide amending and clarifying information. At a later date, FTA intends to solicit comments from all interested parties to determine if program adjustments are merited in future solicitations.

ADDRESSES: Comments on or questions about this Notice can be made at FTA's web site http://www.fta.dot.gov/wtw/japc.html or can be sent or faxed to the following address: *Doug Birnie, Federal Transit Administration, Room 6423, 400 7th Street, S.W., Washington, D.C. 20590 (FAX (202) 366–3765).*

FOR FURTHER INFORMATION: Contact the appropriate FTA Regional Administrator for application specific information and issues (Appendix A). For general program information, contact Doug Birnie, Office of Research Management, (202) 366–1666, email douglas.birnie@fta.dot.gov. A TDD is available at 1–800–877–8339 (TDD/FIRS).

III. Application Submission
IV. Grant review Process
Appendix A FTA Regional Offices
Appendix B Definitions
Appendix C Sample Project Budget
Appendix D Application Checklist
Appendix E Summary of FTA's Section 5307 Requirements

I. General Program Information

A. Authority

Section 3037 of the Transportation Equity Act for the 21st Century (TEA–21).

B. Background

While two-thirds of all new jobs are in the suburbs, three-quarters of welfare recipients live in rural areas or in central cities. Even in metropolitan areas with extensive transit systems, studies have shown that less than half of the jobs are accessible by transit. In particular, many entry-level workers have difficulty reaching jobs during evening or weekend shifts when transit services are frequently diminished or non-existent. Work trips can also be complex, involving several destinations including child care providers. The problems are equally challenging in rural areas: approximately 40 percent of rural counties lack public transit systems.

Auto ownership among welfare recipients and low income persons is also low. As many as 94 percent of welfare recipients do not own cars and nearly 40 percent of workers with annual incomes below $10,000 do not commute by car. In 1991, the median price of a new car was equivalent to 25 weeks of salary for the average worker and considerably more for the low-income worker.

Transportation is clearly a key barrier to those moving from welfare to work. Providing a variety of new or expanded transportation options for low-income workers, especially those who are receiving or who have recently received welfare benefits, will increase the likelihood that those workers will get and retain jobs.

C. Scope

Improving mobility and shaping America's future by ensuring that the transportation system is accessible, integrated, efficient and offers flexibility of choices is a key strategic goal of the Department of Transportation. Job Access projects provide financial assistance to improve mobility for welfare recipients and other low-income people through implementing new or expanded transportation activities. Reverse Commute projects provide financial assistance to improve mobility to suburban employment opportunities for the general public as well as for welfare recipients and low income people.

D. Eligible Applicants

Local agencies and authorities, non-profit organizations and designated recipients under the FTA section 5307 program (usually a state entity or a regional transit authority) are eligible applicants for Job Access and Reverse Commute grant program funds. Local agencies and authorities include states, local governments, metropolitan planning organizations (MPOs), public transit agencies and tribal organizations.

In urbanized areas with 200,000 population or more, MPOs select the applicant(s). In small urbanized areas under 200,000 population and in non-urbanized, rural, areas states select the applicant(s). Tribal governments must go through the state process that, once selected, can choose to be sub-recipients of the state or apply directly to FTA. FTA urges MPOs to designate a single recipient, who would submit a consolidated application. States are urged to serve as the designated recipient for grants to small urbanized areas and non-urbanized areas. The selected grant recipient can suballocate funds to other project participants.

E. Eligible Projects

1. In general

Job Access or Reverse Commute projects derived from a Regional Job Access and Reverse Commute Transportation Plan are eligible. Please note that grants awarded under the Job Access and Reverse Commute program may *not* be used for planning or coordinating activities. However, planning funds made available under the FTA Section 5303 and 5113(b) programs and the Federal Highway Administration's metropolitan and statewide planning funds (PL) and state planning and research funds (SPR) can be used to fund welfare to work transportation planning activities at a 100 percent Federal share. Other funds, including Department of Health and Human Services Temporary Assistance for Needy Families (TANF) and Department of Labor's Welfare-to-Work (WtW) administrative funds, can also be used for planning.

2. Job Access Project

A Job Access project focused on implementing new or expanded transportation services targeted at filling transportation gaps and designed to transport welfare recipients and low income individuals to and from jobs and other employment-related activities such as child care or training. The Job Access Grant Program will focus on financing the capital and operating costs of new or expanded transportation services providing access to jobs and employment-related services. Employment-related support services are services such as child care, job readiness, job training, and retention services.

Localities have wide flexibility in selecting which service strategies are appropriate for their region, including but not limited to: adding late night and weekend service, providing guaranteed ride home service, initiating shuttle service, extending fixed route mass transit services, providing demand responsive van service, sponsoring ridesharing and carpooling activities, and encouraging bicycling. Localities are encouraged to implement innovative approaches to service management such as the establishment of regional mobility managers or transportation brokerage activities, application of geographic information systems (GIS) tools, implementation of intelligent transportation systems including customer trip information technologies, the integration of automated regional public and human service transit information scheduling and dispatch functions, vehicle position monitoring systems and electronic fare cards.

Job Access and Reverse Commute grants also may be made for promoting the use of: transit by workers with non-traditional work schedules, transit vouchers by appropriate agencies for welfare recipients and eligible low-income individuals; or employer-provided transportation such as shuttles, ridesharing, carpooling or transit pass and benfits under Section 132 of the Internal Revenue Code of 1986. Marketing and advertising are examples of promotional activities that could be undertaken to increase awareness of these transportation options and their benefit to welfare recipients and low-income individuals. Other locality-specific actions, strategies and linkages that further the program goals, but are not captured in the preceding description, also may be eligible.

Activities such as funding transit passes and construction of child care centers and other employment support facilities at transit hubs will not be elibible for Job Access grants. Transit-oriented construction activities are eligible under FTA's Section 5307, 5309 and 5311 Formula Grant programs. Transit passes are eligible expenses under Temporary Assistance for Needy Families (TANF) and Welfare-to-Work (WtW) programs.

Programs for private automobile ownership and repair are not legally eligible under this grant funding. However, programs supporting carpooling and other forms of mass transportation and shared-ride use, such as jitneys or special paratransit service, are eligible. In cases where vehicle acquisition is part of the program, vehicles must remain under the continuing control of the agency receiving the grant.

3. *Reverse Commute Project*

A Reverse Commute project facilitates the provision of new or expanded public mass transportation services from urban areas, suburban and rural areas to suburban work places.

Reverse Commute services include, but are not limited to subsidizing, the costs associated with adding bus, train, car and van pooling, van routes, or service; and the purchase or lease by a nonprofit organization or public agency of a van or bus dedicated to shuttling employees from their residence to a suburban work place and return.

F. Funding Availability

TEA–21 authorizes the Job Access and Reverse Commute program at $150 million annually, subject to

appropriations. The guaranteed funding levels start at $50 million in FY 1999 and increase by $25 million annually to $150 million in FY 2003. No more than $10 million annually can be used for Reverse Commute projects. Urbanized areas with populations of at least 200,000 are allocated 60 percent of each fiscal year's funding. The remaining 40 percent is divided evenly between urbanized areas with populations between 50,000 and 200,000, which receive 20 percent, and non-urbanized, rural, areas with populations below 50,000, which also receive 20 percent.

The FY 1999 Department of Transportation Appropriations Act provides $75 million for the Job Access and Reverse Commute Program, including no more than $10 million for Reverse Commute activities. Therefore, in accordance with the allocation percentages specified in TEA–21, for FY 1999: $45 million is available for urbanized areas with populations of at least 200,000; $15 million is available for urbanized areas with populations between 50,000 and 200,000; and $15 million is available for non-urbanized, rural, areas with population of less than 50,000.

G. Cost Sharing

The Job Access and Reverse Commute grant program is intended to fill gaps in existing services and leverage other state and local transportation-related funding to address the unmet needs of individuals moving from welfare to work and other low income populations. The Job Access and Reverse Commute grant program is not large enough to fund all the critical transportation needs associated with meeting these needs. FTA's program, including the funds used to match the grants, is not intended to replace any existing source of funds. The maximum DOT share of a grant under the Job Access and Reverse Commute program may not exceed 50 percent of the total project cost. The non-DOT share shall be provided in cash. If funds are matched from other Federal programs, the funds may be applied directly to project expenses by the recipients of those funds. Revenues from service agreements are an eligible match, but revenues from individual fares cannot be used as a match.

Transportation-eligible funding from Federal programs other than the Department of Transportation may be used as match. These include but are not limited to: Temporary Assistance for Needy Families (TANF), Community Services Block Grants (CSBG) and Social Services Block Grants (SSBG) administered by the U.S. Department of Health and Human Services; Welfare-to-Work (WtW) formula and competitive grants administered by the U.S. Department of Labor; Community Development Block grants (CDBG) and HOPE VI grants administered by the U.S. Department of Housing and Urban Development. The prohibitions on the use of WtW funds for matching requirements under section 403(a)(5)(C)(ii) of the Social Security Act does no apply to Federal or state funds to provide transportation services. TANF and WtW grants, when used as match, may be expended only for new or expanded transportation services and cannot be used for construction or to subsidize current transit operating expenses. Such funds also must supplement rather than supplant other state expenditures or transportation. ("Child Support Performance and Incentives Act of 1998," Pub. L. 105–200, Sec. 403, "Limitations on Use of TANF Funds for Matching Under Certain Federal Transportation Programs.")

More extensive guidance on the use of TANF and WtW funds for transportation will be provided shortly. Guidance provided in a May 4, 1998, letter from the Secretaries of Health and Human Services, Labor, and Transportation is currently being updated.

H. Federal Coordination/Outreach

To help guide implementation of the Job Access and Reverse Commute program, DOT has conducted an extensive public outreach process. To ensure that the Job Access and Reverse Commute program complements other Federal welfare to work initiatives, DOT has worked closely with other Federal agencies in writing this program notice and will establish an interagency work group to assist in the application review process.

I. Planning

1. Coordinated Transportation/Human Services Planning Process

Proposed Job Access and Reverse Commute projects must be derived from a Regional Job Access and Reverse Commute Transportation Plan (see below) which results from a coordinated public transit/human services transportation planning process. The planning process may be initiated by any interested stakeholder group in the area. FTA encourages MPOs to serve as the regional forum.

The planning process must include local transit agencies, the agencies administering TANF and WtW formula and competitive grants, welfare recipients and low-income people. The planning process also should include other stakeholders such as:

Regional planning officials; human service, private, non-profit and other appropriate transportation and support service providers; community residents and organizations; faith-based organization; disability groups and representatives; local and state workforce development organizations including One-Stop Career Centers; recipients of TANF and WtW grants; public and assisted housing providers and community development agencies; economic development agencies; employers and employer groups (such as transportation management organizations and Chambers of Commerce); Private Industry Councils; and political officials including mayors, county supervisors, state legislators, governors and other state and local officials.

2. Regional Job Access and Reverse Commute Transportation Plan

The purpose of collaboration is to develop a comprehensive regional approach to Job Access and Reverse Commute programs targeted at moving welfare recipients and low income people to jobs regarding of jurisdictional boundaries. Any project proposed for funding should be identified in the Regional Job Access Transportation Plan resulting from the above process. This plan is not meant to supersede but to build upon existing area welfare-to-work transportation planning activities. The Regional Job Access and Reverse Commute Transportation Plan must:

a. Identify the geographic distributions of welfare recipients and low-income people in the region;

b. Identify the geographic distributions of employment centers and employment-related activities in the region;

c. Identify existing public, private, non-profit and human service transportation services in the region;

d. Identify transportation gaps between the geographic distributions of people, as specified in section a, and employment, as specified in section b, which are not currently served by the transportation services, as specified in section c;

e. Identify activities and projects to address the gaps identified in section d. Each project or activity identification should include:

(1) Proposed goals and objectives of the project or activity.

(2) Estimated cost of the project or activity.

(3) explanation of how the project or activity would maximize use of existing transportation service providers and how the project or activity would be intergrated into existing transportation network

f. A list, in priority order for funding and implementation, of the activities and projects identified in section e.

Plans will vary in complexity according to area location and size. The Regional Job Access and Reverse Commute Transportation Plan should build on and incorporate existing welfare to work transportation planning activities. During this first year of program implementation, FTA recognizes that some areas may have had a cross-jurisdictional collective process to identify the location of welfare recipients, areas of employment and training opportunities, and necessary new transportation links but may not have a full Regional Job Access and Reverse Commute Transportation Plan in place. Communities should document this work to comply with the plan requirements and continue to develop these plans in future years.

3. The Role of Metropolitan Planning Organizations

MPOs are comprised of elected officials, representing local governments, and transportation service providers within the metropolitan area. They are responsible for adopting transportation plans and improvement programs to address a region's unique transportation needs and working with states to include these priorities in statewide plans.

In regions with populations of more than 200,000, MPOs are responsible for selecting applicants to be considered for Federal Job Access and Reverse Commute grant funds. In regions with populations between 50,000 and 200,000, MPOs will recommend projects to the state, which will select the applicants to be considered for Federal Job Access and Reverse Commute grants.

This means that MPOs are responsible for the following:

a. Determining that Job Access and Reverse Commute projects are consistent with the regional long-range transportation plan.

b. Endorsing and subsequently programming Job Access and Reverse Commute projects into the area Transportation Improvement Program.

In all regions with MPOs, individual Job Access and Reverse Commute projects must be adopted into the MPO's Transportation Program prior to receiving the grant. *Because this entails a formal review and project approved by the MPO Policy Board, FTA strongly urges the partners developing the Job Access and Reverse Commute Transportation Plan to communicate with the MPO from an early stage.* Further, as financial sustainability of a project is one of the evaluation criteria, coordination with the agencies participating in the MPO forum could be a critical factor in ensuring long term support for Job Access and Reverse Commute activities.

4. Statewide Transportation Planning Requirements

In all regions with populations of less than 200,000, the state is responsible for selecting applicants, based on recommendations by the MPO, to be considered for Federal Job Access and Reverse Commute grant funds. In addition, Job Access and Reverse Commute projects selected for funding must be endorsed by the state and incorporated into the statewide transportation improvement program. Because this requires approval, FTA strongly urges the partners to communicate with state officials including the State DOT from an early stage. In selecting projects in rural areas, states should give priority to projects providing service to places that are not currently served or are underserved by public transit systems.

5. Improved Transportation Planning

The statewide and metropolitan transportation planning processes mandated by TEA–21 promote ongoing, cooperative, and active involvement of public transportation providers; the public; and state, metropolitan and local government agencies in the development of state-wide and metropolitan transportation plans and improvement programs. DOT expects that the Job Access and Reverse Commute grant program will facilitate and be a catalyst for broadening the transportation planning process to better integrate employment and social equity considerations.

J. General Grant Requirements

After an application has been selected based on the program-specific requirements outlined in this notice, the applicant will be required to submit appropriate background certifications, assurances, and other documentation necessary to meet the requirements of FTA's Urbanized Area Formula Grant Program (Section 5307 program under Title 49, United States Code). These include planning, environmental, school bus, charter, procurement, labor protections and civil rights requirements, including ADA, Title VI, and DBE. Any information technology purchased with these program: funds that is used for a period of time that extends beyond December 31, 1999, must be year 2000 compliant. Applicants must have the financial, legal and technical capacity to apply for and administer projects. Copies of the Section 5307 program guidance (circular FTA 9030.1B "Urbanized Area Formula Program; Grant Application Instructions," Oct. 10, 1996) can be obtained from any FTA Regional Office or electronically through the FTA website. (See Appendix E for summary list.)

K. Performance Monitoring

FTA expects grant recipients to monitor the performance of their Job Access and Reverse Commute services and to cooperate with the legislatively-mandated FTA and GAO national evaluations. Performance monitoring indicators are necessary for both the applicant's project implementation and for the national program evaluation. FTA will work with grantees to standardize performance monitoring indicators for all Job Access and Reverse Commute Grant recipients. At a minimum, FTA will expect information to be reported on a regular basis in the following categories:

1. New/expanded service.
a. Route miles of travel.
b. Hours of operation.
c. Frequency (or headway) of service.
2. Increased Accessibility to Target Market.
a. Approximate number of low-income/welfare persons within a given distance from service.
b. Approximate measurement of employment opportunities and employment-related support services within a given distance from the service.
3. Use and Productivity of Service.
a. Number of riders.
b. Comparison of baseline estimates of ridership for welfare recipients and low-income individuals to current ridership based on periodic surveys or actual count.
c. Customer Satisfaction.
4. Collaboration.
a. List of organizations involved in the Job Access and Reverse Commute planning process.
b. Number of meetings or other activities held.
c. Listing of transportation services provided through collaboration.
d. New financial arrangements developed.
e. Additional cooperative initiatives.

II. Guidelines for Preparing Grant Application

FTA is conducting a national solicitation for applications under the Job Access and Reverse Commute

Program. Grant awards will be made on a competitive basis. FTA encourages both traditional and non-traditional grantees in urban, suburban, and rural areas to participate in the development of projects.

A. Grant Funding Amounts

Due to the relatively limited funding in FY 1999 and consistent with the legislatively-mandated funding distribution categories, FTA suggests the grant sizes identified below. Applicants may request smaller amounts from FTA.

I. For urbanized areas with populations of over one million, FTA expects to make average grants of $1 million.

2. For urbanized areas with populations greater than 200,000 and less than one million, FTA expects to make average grants of $500,000.

3. For urbanized areas with populations between 50,000 and 200,000, FTA expects to make average grants of $200,000. States should generally not submit applications that collectively exceed $1 million for this category.

4. For rural areas (areas with populations of less than 50,000), individual area grant applications generally should not exceed $150,000. Collective state grant applications for rural areas generally should not exceed $1 million.

B. Project Scope

Proposed projects must be drawn from a Regional Job Access and Reverse Commute Transportation Plan and focus on new or expanded transportation services. For FY 1999, grantees should focus on projects that can be implemented quickly.

FTA recognizes that some grantees may have well-developed plans that extend over several years and that have implementation costs that exceed the suggested FY 1999 grant size. These applicants may request a multi-year funding commitment to implement their plans. In these cases, applicants may elect to use the FY 1999 grant to fully fund high priority items of the regional plan, with subsequent grants used to phase in additional elements of the plan. Alternatively, applicants may elect to use the FY 1999 grant to cover the initial costs of a more comprehensive program, with subsequent grants used to fund carry-on activities. There may be other viable multi-year funding alternatives. In deciding on an approach that best meets local needs, applicants must note that any multi-year commitments are subject to an annual review of demonstrated progress in meeting program objectives and milestones identified in the application, as well as the conditions of match, the annual budget process, and congressional appropriations.

For planning purposes, future year funding in multi-year commitment requests should conform to the FY 1999 grant size guidelines.

III. Application Submission

A. Application Development

To promote collaboration and reduce administrative paperwork, FTA strongly encourages the submission of a consolidated application by a single entity in urbanized areas and the submission of a consolidated application by the state for rural areas. In both cases, funds may be passed on to subrecipients. Tribal projects selected by the state may choose to allow the state to include their program in the state's application or to apply directly to FTA. Furthermore, FTA encourages states and local transit authorities, which have experience in developing and administering FTA grant programs to serve as the single entity submitting applications on behalf of other entities, as these existing FTA grantees may have already met, or have on file information that will satisfy many of the FTA requirements that apply to this program.

B. Application

An original and two copies of the application must be submitted to the appropriate FTA Regional Office. The application should provide information on all project(s) for which you are requesting funding in FY 1999. If a multi-year commitment is sought, the information should cover all years for which funding is sought. The information provided in support of this application may vary with the size of the area applying and the grant being sought. Applicants should develop brief narratives on the information sought. Project narratives should not exceed 10–15 pages.

The application should include the following elements:

1. *Transmittal Letter.*

This addresses basic identifying information including:

a. Grant Applicant.
b. Contact name and phone number.
c. Population size of region.
d. Location of proposed project(s).
e. Amount of grant request.

2. *Project Eligibility.*

Every application must:

a. Describe applicant's organizational capacity to implement the proposed project(s).

b. Document matching funds, including amount and source.

c. Attach Regional Job Access and Reverse Commute Transportation Plan.

d. Document approval by affected transit authorities.

e. For urbanized areas with populations over 200,000, document MPO selection and intention to amend the Transportation Improvement Plan (TIP) if project is selected for funding.

f. For urbanized areas with populations between 50,000 and 200,000, document state selection and MPO intention to amend the TIP if project is selected for funding.

g. For areas with populations below 50,000, document state selection and intention to amend the state-wide transportation improvement plan (STIP) if project is selected for funding.

3. *Project Information.*

Provide a summary of project activities from the Regional Job Access and Reverse Commute Transportation Plan for which your application is requesting funding. The summary should include:

a. Each project's time line, including significant milestones.

b. Designation of project as a Job Access or Reverse Commute service. If applying under both, indicate how you will divide the funds.

c. Project budget (See Appendix C).

4. *Project Narrative.*

Provide the information identified below to support your application. More descriptive information has been provided in Section I of this notice.

a. Document the coordinated human services/transportation planning process. This should include:

1. Description of the collaborative transportation/human services process used in developing the Regional Job Access and Reverse Commute Transportation Plan.

2. List of the participants and their respective roles.

3. Identification of new partnerships and cooperative relationships developed.

4. Description of specific coordination with legislatively-mandated partners: transportation providers and transit agencies, state agencies administering the TANF and WtW funds.

5. Description of consultation with and public involvement of the community to be served, including welfare recipients and low income residents.

6. Sign-offs or letters of endorsement from planning partners.

b. Describe the unmet need for additional transportation services to transport welfare recipients and low income individuals to jobs, training and other employment services. This should include:

1. Definition of the proposed service areas and the population and communities to be served.

2. The number of welfare recipients and low income persons and the percentage of the population that they represent.

3. Description of the existing transportation resources, if any, including human services, nonprofit and public transportation providers.

4. Description of transportation gaps in existing services.

5. For Reverse Commute projects, information on the need for additional transportation services.

c. Describe how the proposed services will meet the unmet need described above. This should include or address the following:

1. Specify project goals and objectives.

2. Identify employment potential in the proposed service area.

3. For Job Access projects, estimate low income and welfare recipient ridership.

4. For Reverse Commute projects, estimate ridership by the general public and by welfare recipients and low income individuals.

5. Specify type of capital investments to be funded.

6. Specify type of operating costs to be funded.

7. Provide operation-specific data (e.g., miles/hours of service, new routes, route extensions, etc.).

8. Specify how use of all existing transportation service providers is being maximized.

9. Describe how these services will address the needs of persons with disabilities and how the requirements of ADA will be met.

10. Present indicators that will be used to monitor project performance and make subsequent adjustments in project implementation.

d. Document financial commitments, including prospects for sustainability.

1. Identify how human service (such as TANF, WtW, other Federal, state or local) financial resources have been leveraged.

2. Identify the financial commitment of existing transportation providers.

3. Identify long term financing that may be proposed or available to support continuation of the proposed project or other aspects of the regional plan.

e. Variable Factors. Please specify how each of the following factors applies to your project(s). If any are not applicable, explain why not.

1. Innovative Approaches—Identify innovative techniques in and approaches to the proposed project.

2. Use of Employer-based Strategies—Describe any commitment by employers that will contribute to the success of the project.

3. Linkages to Other Employment Support Services—Identify available employment support services that complement the transportation activities and are critical to ensuring that welfare recipients get and retain jobs.

4. Other Strategies—Describe other locality-specific actions, strategies and linkages, about which FTA should be aware, that were not captured in the preceding criteria.

The checklist in Appendix D should be used to ensure that you have developed a complete application.

IV. Grant Review Process

Applications are to be submitted to the appropriate FTA Regional Office by the close of business December 31, 1998. FTA will screen all applications to determine whether all required eligibility elements, as described in Section 2 of the Application, are present. A multi-agency task force will evaluate each application according to the criteria described in this announcement. FTA will select projects based on what is most advantageous to the government, considering, in addition to the award criteria, the time frame for implementation, the availability of funds, and geographic distribution.

A. Award Criteria

Once eligibility is established, the merit of each application will be evaluated based on the following factors. The number of points in parentheses indicates the maximum level of points for a given factor.

1. Coordinated human services/ transportation planning process and Regional Job Access and Reverse Commute Transportation plan (25 Points)

Evaluated based on the extent to which the applicant:

(A) Demonstrates a collaborative planning process, including:

(1) coordination with, and the financial commitment of, existing transportation service providers;

(2) coordination with the state or local agencies that administer the state program funded under part A of title IV of the Social Security Act (TANF and WtW grant programs);

(3) coordination with public housing agencies (including Indian tribes and their tribally designated housing entities as defined by the Secretary of HUD) if any, which intend to apply for Welfare to Work Housing Vouchers from the Department of Housing and Urban Development;

(4) consultation with the community to be served; and

(5) consultation with other area stakeholders.

(B) Presents a Regional Job Access and Reverse Commute Transportation Plan addressing the transportation needs of welfare recipients and low-income individuals.

2. Demonstrated Need for Additional Transportation Services (30 Points)

Evaluated based on the extent to which the applicant demonstrates:

(A) in the case of an applicant seeking assistance to finance a Job Access project, the relative need for additional services in the area to be served to transport welfare recipients and eligible low-income individuals to and from specified jobs, training and other employment support services; and

(B) in the case of an applicant seeking assistance to finance a Reverse Commute project, the need for additional services to transport individuals to suburban employment opportunities.

3. Extent to Which Proposed Services Will Meet the Need for Services (35 Points)

Evaluated based on the extent to which:

(A) The proposed service will meet the need.

(B) To which the applicant demonstrates the maximum use of existing transportation service providers and expands transit networks or hours of service, or both.

4. Financial Commitments (10 Points)

Evaluated based on the extent to which the applicant:

(A) Identifies long-term financing strategies to support proposed services.

(B) Identifies financial commitments by human service providers.

(C) Identifies financial commitments by existing transportation providers.

FTA also will consider the extent to which the applicant addresses the following variable factors: (10 Bonus Points Total)

1. Innovative approaches that are responsive to identified service needs;

2. Use of employer-based strategies;

3. Linkages to other employment-related support services; and

4. Other strategies that are effective in meeting program goals.

B. Notification

FTA will notify applicants in February 1999. Those selected must then submit appropriate background certifications, assurances, and other

documentation necessary to meet the applicable FTA Section 5307 Urbanized Area Formula Grant Program requirements and be included in the TIP or STIP as appropriate. Technical assistance regarding these requirements is available in each FTA regional office. Complete documentation must be submitted to the appropriate FTA regional office no later than March 31, 1999.

FTA is committed to obligating FY 1999 Job Access and Reverse Commute funding expeditiously. Therefore, FTA urges applicants to develop documentation in accordance with the Section 5307 program guidance as soon as possible. This allows the information necessary for grant approval to be readily available for submission to FTA when projects are selected for funding. FTA will approve final applications as soon as they are complete.

Issued on: November 3, 1998.

Gordon J. Linton,

Administrator.

APPENDIX A—(FTA) REGIONAL OFFICES

Region I—Massachusetts, Rhode Island, Connecticut, New Hampshire, Vermont and Maine, Richard H. Doyle, FTA—Regional Administrator, Volpe National Transportation Systems Center, Kendall Square, 55 Broadway, Suite 920, Cambridge, MA 02142–1093, (617) 494–2055

Region II—New York, New Jersey, Virgin Islands, Letitia Thompson, FTA—Regional Administrator, 26 Federal Plaza, Suite 2940, New York, NY 10278–0194, (212) 264–8162

Region III—Pennsylvania, Maryland, Virginia, West Virginia, Delaware, Washington, D.C., Sheldon Kinbar, FTA—Regional Administrator, 1760 Market Street, Suite 500, Philadelphia, PA 19103–4124, (215) 656–7100

Region IX—California, Arizona, Nevada, Hawaii, American Samoa, Guam, Leslie Rogers, FTA—Regional Administrator, 201 Mission Street, Suite 2210, San Francisco, CA 94105–1831, (415) 744–3133

Region X—Washington, Oregon, Idaho, Alaska, Helen Knoll, FTA—Regional Administrator, Jackson Federal Building, 915 Second Avenue, Suite 3142, Seattle, WA 98174–1002, (206) 220–7954

Appendix B—Definitions

1. *Welfare Recipient*—An individual, who receives or received aid or assistance under a state program funded under Part A of Title IV of the Social Security Act (whether in effect before or after the effective date of the amendments made by Title I of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Public Law 104–193); 110 Stat 2110) at any time during the 3-year period before the date on which the applicant applies for a grant.
2. *Elibible Low-Income Individual*—An individual whose family income is at or below 150 percent of the poverty line (as that term is defined in Section 673(2) of the Community Services Block Grant Act (42 U.S.C. 9902(2)) including any revisions required by that section for a family of the size involved. These are calculated by HHS; the 1998 guidelines were published in the February 24, 1998, (Volume 63, Number 36) *Federal Register*, page 9235–9238.
3. *Existing Transportation Service Provider*—Public transportation providers including public, private and non-profit fixed route and paratransit operators, and governmental agencies and nonprofit organizations that receive assistance from Federal, state, or local sources for nonemergency transportation services.
4. *Human Services Provider*—Agencies and organizations involved in helping welfare recipients and low income populations to make the transition to work and providing supportive employment services. These agencies and organizations include state and local workforce development organizations, agencies administering TANF and WtW formula and competitive funds, public and assisted housing providers and community development agencies, and where appropriate, faith-based and community-based organizations providing employment support services.
5. *Qualified Entity*—(A) With respect to any proposed eligible project in an urbanized area with a population of at least 200,000, the applicant(s) selected by the appropriate metropolitan planning organization that meets the program eligibility requirements, including planning and coordination requirements, from among local governmental authorities and agencies and nonprofit organizations; and (B) With respect to any proposed eligible project in an urbanized area with a population of greater than 50,000 and less than 200,000, or an area other than an urbanized area, the applicant(s) selected by the chief executive officer of the state in which the area is located that meets the program eligibility requirements, including the planning and coordination requirements, from among local governmental authorities and nonprofit organizations.
6. *Transit Capital and Operating Assistance Projects*—This term means projects to finance acquisition, construction, improvement, and operating costs of facilities, equipment and associated capital maintenance items used in mass transportation service, including crime prevention and security of and for such equipment and facilities. Direct administrative expenses associated with the provision of job access and reverse commute services are also eligible operating expenses.

Appendix D—Application Check List (To Meet December 31 Deadline)

☐ TRANSMITTAL LETTER
☐ PROJECT ELIGIBILITY
- Organizational Capacity
- 50 Percent Non-DOT Match
- Regional Job Access and Reverse Commute Transportation Plan
- Approval of Affected Transit Authorities
- MPO/State Endorsement and Programming as Appropriate

☐ PROJECT INFORMATION
- Activity Summaries/Timelines/Milestones
- Designation As Job Access Or Reverse Commute Project
- Project Budget

☐ PROJECT NARRATIVE
- Documentation of Coordinated Human Services/Transportation Planning Process
  - ✔ Coordination with Agencies Administering TANF & WtW
  - ✔ Coordination with Existing Transportation Operators
  - ✔ Consultation with Affected Communities
  - ✔ Consultation with Employers
- Documentation of Unmet Needs
- Description of How Proposed Services Will Meet Needs
- Documentation of Financial Commitments
- Response to Variable Factors (Bonus Points)
  - ✔ Innovative Approaches
  - ✔ Employer-Based Strategies
  - ✔ Linkages to Other Employment Support Services
  - ✔ Other Strategies

Appendix E—Summary of FTA's Section 5307 Requirements

This is the full range of 5307 requirements. Some of these items are covered in the application, in which case you will not need to submit information twice.

APPROVAL PREREQUISITES:
(On file with FTA, or to be submitted with application and updates as appropriate)
Opinion of Counsel
Authorizing Resolution
Current annual Certification and Assurances
Civil rights submissions up-to-date

Title VI
Annual DBE Goal
DBE Program
EEO Program
ADA
National Transit Database reports-up-to-date
Any outstanding oversight findings resolved or resolution plan and schedule set
Additional Information:
Project Budget
Project Description
Project Justification/Supporting Information as necessary
Project Milestone Schedule
Labor Union Description(s) (including information about earlier DOL certifications that may apply to this project)
Environmental Review
Date of FTA's signing of FONSI (Finding of No Significant Impact), or
Date of FTA's signing of ROD (Record of Decision) closing out the EIS process, or
Grant applicant's Categorical Exclusion recommendation if neither (a) nor (b) above applies
Air Quality
Date of project level conformity determination by FTA, or
Applicant's recommendation concerning list of exemptions in the conformity regulation (40 CFR Part 51)
STIP—Date of Approved by FTA
Request for copy of Master Agreement
(If applicant does not have latest one on file)

Department of Health and Human Services

Centers for Disease Control and Prevention

Implementation of the Fertility Clinic Success Rate and Certification Act of 1992; Proposed Model Program for the Certification of Embryo Laboratories; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Implementation of the Fertility Clinic Success Rate and Certification Act of 1992; Proposed Model Program for the Certification of Embryo Laboratories

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice and request for comments.

SUMMARY: The Fertility Clinic Success Rate and Certification Act of 1992 (Pub. L. 102–493, 42 U.S.C. 263a–1 et seq.) requires that the Secretary, HHS, through CDC, develop a model program for the certification of embryo laboratories, to be carried out voluntarily by interested States. The model certification program is to be developed in consultation with appropriate consumer groups and professional organizations with knowledge and expertise in assisted reproductive technology.

This notice sets forth a description of the proposed model certification program, including the proposed definitions, administrative requirements, and embryo laboratory standards. Accordingly, CDC solicits comments on the proposed model certification program and reserves the right to revise the program based upon the comments it receives.

DATES: To assure consideration, written comments on the proposed model certification program for embryo laboratories as described in this notice must be received at the address indicated below on or before January 5, 1999.

ADDRESSES: Address all written comments to: Model Certification Program—**Federal Register** Notice, Centers for Disease Control and Prevention, Mail Stop K–66, 4770 Buford Highway N.E., Atlanta, Georgia 30341–3724.

Due to staffing and resourcing limitations, we cannot accept facsimile (FAX) copies of comments nor can we accept comments by telephone.

FOR FURTHER INFORMATION CONTACT: Nancy Anderson or Carol Cook, Division of Laboratory Systems, telephone (770) 488–8047 or (770) 488–8029.

SUPPLEMENTARY INFORMATION:

Introduction

The Fertility Clinic Success Rate and Certification Act of 1992 (FCSRCA), Public Law 102–493 (42 U.S.C. 263a–1 et seq.), was intended to provide the public with comparable information concerning the effectiveness of infertility services and to assure the quality of such services by providing for the certification of embryo laboratories.

Section 2 of the statute requires that the Secretary, HHS, through CDC, define pregnancy success rates, and seek public comment on the proposed definitions. In addition, Section 2 requires each assisted reproductive technology (ART) program to annually report its pregnancy success rates to CDC, along with the identity of each embryo laboratory used by the program, and whether the laboratory is certified under Section 3 or has applied for such certification. Section 2 was addressed in a **Federal Register** notice published on August 26, 1997 (62 FR 45259).

Section 3(a) of the FCSRCA requires that the CDC "develop a model program for the certification of embryo laboratories . . . to be carried out by the States." In developing the model certification program, CDC is to consult with "appropriate consumer and professional organizations with expertise in using, providing, and evaluating professional services and embryo laboratories associated with assisted reproductive technology programs."

Section 3(b) lists State official who are to received a description of the model certification program, and requires that the Secretary encourage States to adopt such a program.

Section 3(c) includes the requirements for administration of the certification program by the States, with provisions for the inspection and certification of embryo laboratories by States or approved accreditation organizations, and the requirement for application to the State by an embryo laboratory that seeks certification.

Section 3(d) specifies the embryo laboratory standards that are to be in the model certification program. These include a standard to assure consistent performance of laboratory procedures; a standard for a quality assurance and quality control program; standards for the maintenance of all laboratory records (including laboratory tests and procedures performed, as well as personnel and equipment records); and a standard for personnel qualifications.

Section 3(e) includes provisions for a State to adopt the model certification program if it applies to the Secretary, and is approved, and Section 3(f) allows for the use of accreditation organizations, approved under the requirements described in Section 4, to inspect and certify embryo laboratories in States that have adopted the program.

Section 3(g) requires that States which qualify to adopt the model certification program conduct embryo laboratory inspections to determine if the laboratories meet the requirements of the program. Section 3(g) also requires the Secretary to seek public comment on the conditions under which announced inspections may be conducted without diminishing the likelihood of discovering deficiencies in the operations of an embryo laboratory. In addition, inspection results (including deficiencies and any subsequent corrections to those deficiencies) are to be reported and made available to the public.

Section 3(h) provides for the Secretary to conduct validation inspections of embryo laboratories certified by a State or an approved accreditation organization to determines if the laboratories are being operated in accordance with the standards in the model certification program. If a validation survey demonstrates that an embryo laboratory is not in compliance with such standards, the statute specifies requirements for notification of the State, or as applicable, the accreditation organization. A subsequent investigation and inspection of additional certified embryo laboratories are to be conducted to determine if the State or accreditation organization is reliably identifying laboratory deficiencies. The Secretary may revoke the approval of the State certification program or accreditation organization if requirements applicable to the program are not being met.

Section 3(i) limits the Secretary is developing the model certification program, and the States in adopting such program, from establishing any regulation, standard, or requirement that has the effect of exercising supervision or control over the practice of medicine in ART programs.

Section 3(j) states that the Secretary may define the term of the certification issued by a State or an accreditation organization in a State, through the public comment process, and provides for application for recertification to be submitted when there is a change in ownership or administration of a certified embryo laboratory.

Section 4 calls for the Secretary, through CDC, to promulgate criteria and procedures for the approval and use of accreditation organizations to inspect and certify embryo laboratories in States which have adopted the model certification program, as well as in States which have not adopted the program. The section also includes

provisions for annual evaluation of approved accreditation organizations by the Secretary, through the inspection of a representative sample of accredited embryo laboratories and other such appropriate means.

Section 5 specifies the conditions under which a certification issued by a State or an accreditation organization shall be revoked or suspended, and the effect that such revocation or suspension would impose on the certification and application for recertification of the laboratory.

Section 6 mandates that the Secretary, through CDC, annually publish pregnancy success rates as reported by ART programs (Section 2); the names of ART programs that fail to report pregnancy success rates; the identity and certification status of each embryo laboratory located in a State which has adopted the model certification program; the identity of each embryo laboratory in a State which has not adopted the certification program and which has been certified by an approved accreditation organization; and in the case of an embryo laboratory which is not certified, whether the laboratory has applied for certification. The annual publication is to be distributed to States and the public. This section was also addressed in the previously mentioned **Federal Egister** notice published on August 26, 1997 (62 FR 45259). The first report, 1995 Assisted Reproductive Technology Success Rates: National Summary and Fertility Clinic Reports, was published in December 1997. Copies of the report may be obtained by contacting RESOLVE, a national consumer organization helping infertile couples and individuals, at 1–888–299–1585 or via the Internet at www.resolve.org.

Section 7 authorizes the Secretary to charge sufficient fees to cover the cost of administering the FCSRCA and authorizes States adopting the certification program to charge sufficient fees to cover the cost of administering their program.

Section 8 includes a definition of assisted reproductive technology and provides for seeking public comment on any proposed expansion of the definition.

Actions Taken To Develop the Proposed Model Certification Program

In accordance with the FCSRCA, CDC consulted with individuals, professional organizations and consumer groups with expertise and interest in ART throughout the development of the proposed model certification program for embryo laboratories. Consultation was provided by organizations representing reproductive medicine, including the American Society for Reproductive Medicine (ASRM) and the Society for Assisted Reproductive Technology, laboratory organizations such as the College of American Pathologists (CAP) and the American Association of Bioanalysts, and a consumer group that serves to educate the public on infertility diagnosis and treatment (RESOLVE). CDC also worked closely with several State programs throughout the process to ensure that the proposed model certification program, when finalized, could easily be adopted and implemented by interested States, and sought input from Federal agencies with regulatory responsibilities related to laboratory practice, tissue banking and ART.

A useful example in developing the proposed model certification program was the voluntary accreditation program for reproductive laboratories that is currently administered by the CAP. This program was developed jointly between the CAP and the ASRM, and has been in existence since 1993. More than one third of the embryo laboratories associated with ART programs in the United States currently participate in this voluntary program. As CDC began drafting the proposed model certification program, an initial step was to meet with representatives from the CAP to gather information on the CAP/ASRM Reproductive Laboratory Accreditation Program, including the laboratory standards and inspection checklists used by CAP inspectors and reproductive laboratories. CDC also used a variety of guidelines and standards from other professional organizations, State, Federal, and international programs as resources (see References), and made a number of site visits to embryo laboratories to observe the daily operation of these facilities.

Between November 1996 and August 1997, CDC held several work sessions with technical consultants to obtain input on specific issues related to the embryo laboratory and the proposed model certification program, including personnel qualifications and responsibilities, quality assurance and quality control (quality management), recordkeeping, specific definitions as they apply to the model certification program, and State administration of the program. The individuals who participated in these work sessions were asked to provide consultation because of their expertise and interest in ART laboratory procedures, or experience with clinical laboratory testing. The input provided by each consultant was used by CDC to assist in its internal deliberations to develop a practical and effective model certification program for embryo laboratories. No group consensus was sought at any of the sessions.

On-going Review of Embryo Laboratories

In passing the FCSRCA, Congress anticipated that the cost of Federal and State monitoring and oversight of embryo laboratories would be covered by the fees they pay. Section 7 of the statute provides for the collection of sufficient fees from participating embryo laboratories to cover these costs. However, participation by embryo laboratories is voluntary; laboratories not willing to pay these fees would not be limited in their ability to operate.

CDC plans to implement oversight and monitoring under the FCSRCA to the extent the roughly 350 embryo laboratories are willing to voluntarily pay sufficient fees to cover oversight costs. At this time, embryo laboratories have not indicated they would opt into such an oversight program. CDC will continue to review embryo laboratories' interest in, and willingness to pay for, a formalized Federal oversight program, and adjust CDC's plans accordingly.

CDC has, however, developed these proposed model certification standards, incorporating the definitions, administrative requirements and laboratory standards that are called for in the FCSRCA, and is publishing them to provide an opportunity for public comment. The model certification program will be revised as necessary, based on these comments, published as a final notice in the **Federal Register**, and the final model will be distributed to State officials and health authorities as outlined in the statute.

At this time, CDC will defer implementation of the approval of state certification programs or accreditation organizations. In addition, Federal validation inspections of embryo laboratories certified by States adopting the model or accredited by an accreditation program for embryo laboratories will also be deferred until a sufficient number of laboratories are willing to opt into a self-supporting system. In this proposed model, implementation of these activities would be the responsibility of States that choose to adopt the model certification program.

To summarize, CDC proposes a model certification process for embryo laboratories performing assisted reproductive technology (ART). In developing this proposal, we have carefully reviewed an existing program, the CAP/ASRM Reproductive Laboratory Accreditation Program

(RLAP) which was developed by the professional community and provides oversight of embryo laboratories affiliated with ART programs and clinics. We have also taken note that there are existing voluntary programs in other areas of laboratory practice, such as the American Society of Clinical Pathologists and the American Board of Bioanalysts' laboratory personnel certification programs, that have had a beneficial impact on laboratory quality, without Federal oversight.

As mentioned previously in this preamble, the CAP/ASRM's RLAP provided the basis for many of the laboratory standards specified in the proposed model. We believe that this existing ART laboratory accreditation program likely will meet the standards we have proposed in the model and will provide an excellent resource for States which wish to develop their own certification program. In addition, other professional organizations have expressed an interest in establishing and/or adopting standards for the embryo laboratory; the proposed certification process should benefit those other groups.

While the model certification program for embryo laboratories proposed in this model does not provide for a Federal oversight role until a sufficient number of laboratories would opt into a self-supporting system, we welcome public comment on the need, desirability and specific benefits of Federal oversight.

Request for Comments on the Proposed Model Certification Program

Written comments on any aspect of the proposed model certification program included in this notice may be submitted to CDC during the public comment period at the address specified for receipt of comments. In addition, the FCSRCA requires the Secretary to facilitate public comment on specific aspects of the model certification program and the definitions as they relate to the model. To ensure appropriate consideration by commenters, the following issues are highlighted:

- Based on the comments received during the previously mentioned work sessions with technical consultants, the proposed model's definitions for "assisted reproductive technology" and "embryo laboratory", have been elaborated from the definitions specified in the FCSRCA. The issue is whether the revised definitions are appropriate and accurate for use in the model certification program.
- The proposed model permits announced initial and routine inspections and unannounced inspections for complaint investigations. The issues are under what circumstances should announced inspections be permitted so as not to diminish the likelihood of discovering deficiencies in the operation of an embryo laboratory, and whether there are circumstances that should require unannounced inspections.
- The proposed model specifies a 2-year term for embryo laboratory certification. The issue is whether this is an appropriate period of time for the term of certification of a laboratory (i.e., renew biennially).

In addition, we are interested in receiving comments on the following issue which is not specifically addressed in the proposed model certification program but may be considered for inclusion in the finalized model:

- Proficiency testing (PT) currently available for the embryo laboratory is limited to determining whether culture media samples provided by the PT program are suitable for in vitro mouse embryo culture. While the performance of PT is not required in the proposed model, the model's standards do require a laboratory to perform quality control procedures to monitor the reliability of the ART procedures performed (including culture media checks). Equipment and instrument maintenance and function checks are also required to ensure their adequate performance. In addition, the laboratory must track and evaluate procedural outcomes such as fertilization rates, cleavage rates and embryo quality as a means of monitoring the quality of the procedures and services provided by the laboratory. The issue is whether these standards provide a sufficient means for monitoring laboratory performance or if a standard requiring PT should be included in the model.

Organization of Proposed Model Certification Program

This notice describes the proposed model certification program for embryo laboratories and includes the proposed definitions (Part I), proposed administrative requirements (Part II), and proposed embryo laboratory standards (Part III). References are also provided as an addendum to this notice for background and educational purposes.

Dated: October 28, 1998.

Jeffrey P. Koplan,

Director, Centers for Disease Control and Prevention (CDC).

PROPOSED MODEL CERTIFICATION PROGRAM FOR EMBRYO LABORATORIES

Contents

Part I. Definitions
Part II. Administrative Requirements
Part III. Embryo Laboratory Standards
Addendum References

Part I. Definitions

Accredited institution. A school or program which——

(a) Admits as a regular student only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such certificate;

(b) Is legally authorized within the State to provide a program of education beyond secondary education;

(c) Provides an educational program for which it awards a bachelor's degree or provides not less than a 2-year program which is acceptable toward such a degree, or provides an educational program for which it awards a master's or doctoral degree; and

(d) Is accredited by a nationally recognized accrediting agency or association.

This definition includes any foreign institution of higher education that HHS or its designee determines meets substantially equivalent requirements.

Approved accreditation organization. An accreditation organization that has formally applied for and received the State's approval based on the organization's compliance with this model certification program and other requirements as specified by the State.

ART. Assisted reproductive technology.

Assisted hatching. A micromanipulation technique which involves making a small opening in the zona wall of the embryo to enhance implantation.

Assisted reproductive technology. All clinical treatments and laboratory procedures which include the handling of human oocytes and sperm, or embryos, with the intent of establishing a pregnancy. This includes, but is not limited to, in vitro fertilization, gamete intrafallopian transfer, zygote intrafallopian transfer, embryo cryopreservation, oocyte or embryo donation, and gestational surrogacy.

Assisted reproductive technology cycle. Any cycle in which (1) ART has been used, (2) in which the woman has undergone ovarian stimulation or monitoring with the intent of undergoing ART, (3) a woman has donated oocytes, or (4) in the case of cryopreserved embryos, in which embryos have been thawed with the intent of transfer. ART cycles can be stimulated (use of ovulation induction) or unstimulated (natural cycle).

Assisted reproductive technology laboratory procedures. All laboratory procedures for handling and processing of human oocytes and sperm, or embryos, with the intent of establishing a pregnancy. These procedures include, but are not limited to, the examination of follicular aspirates, oocyte classification, sperm preparation, oocyte insemination, assessment of fertilization, assessment of embryo development, preparation of embryos for embryo transfer, and cryopreservation of specimens.

Assisted reproductive technology program or clinic. A legal entity practicing under State law, recognizable to the consumer, that provides ART to couples who have experienced infertility or are undergoing ART for other reasons. This can be an individual physician or a group of physicians who practice together, and share resources and liability.

Authorized person. An individual authorized under State law to order ART procedures.

CDC. The Centers for Disease Control and Prevention.

CLIA. The Clinical Laboratory Improvement Amendments of 1988.

Certification. The certification of an embryo laboratory by a State certification program or through accreditation by an approved accreditation organization.

Certification program. The model certification program for embryo laboratories described in this notice or a State certification program for embryo laboratories which meets or exceeds the requirements of the model certification program.

Cryopreservation. A technique to preserve biologic material through freezing.

Doctoral scientist. An individual holding an earned doctoral degree in a chemical, physical, biological or medical laboratory science from an accredited institution. As defined here, doctoral scientist also includes individuals holding an earned doctoral degree in veterinary medicine.

Embryo. The normal (2 pronuclei) fertilized egg that has undergone one or more divisions.

Embryo laboratory. A facility in which human oocytes and sperm, or embryos, are subject to ART laboratory procedures.

Embryo transfer. Introduction of an embryo(s) into a woman's uterus after in vitro fertilization.

Fertilization. The penetration of the egg by the sperm and fusion of genetic materials to result in the development of a fertilized egg (or zygote).

Gamete intrafallopian transfer. An ART procedure that involves removing eggs from the woman's ovary, combining them with sperm, and immediately injecting the eggs and sperm into the fallopian tube. Fertilization takes place inside the fallopian tube.

HHS. The U.S. Department of Health and Human Services, or its designee.

Intracytoplasmic sperm injection. The placement of a single sperm into the ooplasm of an oocyte by micro-operative techniques.

In vitro fertilization. A method of assisted reproduction that involves removing eggs from a woman's ovaries, combining them with sperm in the laboratory and, if fertilized, replacing the resulting embryo(s) into the woman's uterus.

Laboratory. Unless otherwise specified in this notice, means embryo laboratory.

Micromanipulation. Microtechniques such as intracytoplasmic sperm injection and assisted hatching commonly used to overcome fertilization disorders.

Physician. An individual with a doctor of medicine or doctor of osteopathy degree who is licensed by the State to practice medicine or osteopathy within the State in which the embryo laboratory is located.

Procedural outcome. The outcome of the assisted reproductive technology laboratory procedure performed e.g., fertilization assessment—the presence of two pronuclei in the ooplasm.

Oocyte. The female reproductive cell, also called an egg.

Specimen. Human biologic material (includes human reproductive tissue such as oocytes, sperm, zygotes and embryos).

Sperm. The male reproduction cell that has completed the process of meiosis and morphological differentiation.

State. Includes, for purposes of this model certification program, each of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and other territories of the United States, and a political subdivision of a State where the State, acting pursuant to State law, has expressly delegated powers to the political subdivision sufficient to authorize the political subdivision to act for the State in enforcing requirements equal to or more stringent than the model certification program.

Zygote. A normal (2 pronuclei) fertilized egg before cell division begins.

Zygote intrafallopian transfer. Eggs are collected and fertilized, and the resulting zygote is then transferred to the fallopian tube.

Part II. Administrative Requirements

A. Overview

The certification program for embryo laboratories is a model program developed by the Centers for Disease Control and Prevention (CDC) in accordance with Pub. L. 102–493 (42 U.S.C. 263a–1 *et seq.*) and is to be administered by interested States.

B. Requirements for State Administration of the Model

Certification Program for Embryo Laboratories. The State may adopt and administer the model certification program for embryo laboratories described in this notice of administer a State certification program for embryo laboratories that meets or exceeds the requirements of the model certification program, and must, at a minimum, meet the following provisions—

1. Certification Under State Programs. A State may qualify to adopt and administer the model certification program if the State submits an attestation to CDC (contact to be provided in final notice) providing—

a. Assurances that the certification program for embryo laboratories administered by the State meets or exceeds the requirements of the model certification program specified in this notice.

b. An agreement that in administering the certification program, a State will not establish any regulation, standard, or requirement which has the effect of exercising supervision or control over the practice of medicine in assisted reproductive technology programs or clinics.

c. An agreement that the term of State certification/recertification issued to an embryo laboratory is for a period of not more than two years.

d. An agreement to investigate, when appropriate and to the extent necessary, complaints received about an embryo laboratory certified under the State's program.

e. An agreement to annually report to CDC, (contact to be provided in final notice) the identity and certification status of each embryo laboratory in the State as well as any such laboratory which has applied for certification, and the assisted reproductive technology programs, or clinics with which each embryo laboratory is associated, for annual publication by CDC.

f. Information about any proposed use and approval and revocation of approval of accreditation organizations in accordance with paragraph 2. and 5. of this section.

g. An agreement to make such reports as the Secretary of the Department of Health and Human Services (through CDC) may require.

2. Use and Approval of Accreditation Organizations. Accreditation organizations approved by the State may be used to inspect and accredit embryo laboratories for the purpose of State certification and such accreditation shall constitute certification. The criteria and procedures used by the

State to approve accreditation organizations must include, at a minimum, the following:

a. The accreditation organization must provide assurances satisfactory to the State that its standards and requirements for accreditation of embryo laboratories meet or exceed the requirements of the certification program;

b. The accreditation organization must, at a minimum, conduct inspections of embryo laboratories in accordance with the requirements under paragraph 4. of this section which includes making available to the public, upon request, the specific findings (with any explanatory information required to interpret the findings), including deficiencies identified in an inspection, and any subsequent corrections to those deficiencies, no later than 60 days after the date of the inspection;

c. The accreditation organization must agree to revoke or suspend a laboratory's accreditation for one year, if the accreditation organization finds, on the basis of inspections, that the owner or operator of the laboratory, or any employee of the laboratory—

A. Has been guilty of misrepresentation in obtaining the accreditation.

B. Has failed to comply with any standards of the accreditation program.

C. Has refused a request of the accreditation organization or State for permission to inspect the laboratory, its operations, and records; and

d. The accreditation organization must agree to submit such reports and maintain such records as the State, or HHS, may require, to include, but not be limited to, the following:

i. Notification to the State of each newly accredited embryo laboratory within the State within 30 days of the laboratory obtaining accreditation;

ii. Notification to the State of any embryo laboratory within the State that has its accreditation denied, suspended, withdrawn or revoked, or that has had any other adverse action taken against it by the accreditation organization within 30 days of the action taken;

iii. Notification to the State within 10 days of a deficiency identified in any accredited embryo laboratory within the State where the deficiency poses an immediate jeopardy to the laboratory's patients or a hazard to the general public;

iv. Notification to the State if the accreditation organization finds, on the basis of inspections, that the owner or operator of the laboratory, or any employee of the laboratory—

A. Has been guilty of misrepresentation in obtaining the accreditation.

B. Has failed to comply with any standards of the accreditation program.

C. Has refused a request of the accreditation organization for permission to inspect the laboratory, its operations, and records;

v. Provide inspection schedules as requested by the State for the purposes of conducting onsite validation inspections of laboratories; and

vi. Provide the State written notification at least 30 days in advance of the effective date of any proposed changes in its requirements.

3. Embryo Laboratory Application Requirements. The State must provide for the submission of an application to the State by an embryo laboratory requesting certification, in such form as may be specified by the State. Such an application must include the following:

a. Assurance satisfactory to the State that the embryo laboratory will be operated in accordance with the standards of the certification program;

b. An agreement by the embryo laboratory to—

i. Annually report to the State the assisted reproductive technology programs or clinics with which the laboratory is associated.

ii. Submit changes in the ownership or the administration of the laboratory to the State within 30 days of the change.

iii. Permit the State to conduct onsite inspections including, as applicable, initial, routine, validation and complaint inspections, upon presentation of identification to the owner, operator, or agent in charge of the laboratory, during the laboratory's regular hours of operation to determine compliance with the certification program.

iv. Permit the State to have access to all facilities, equipment, materials, records, and information which the State requires to determine if the laboratory is being operated in accordance with the standards of the certification program.

v. Permit the State to copy any material, record, or information inspected, or submit such, upon request by the State.

vi. Permit the State to make available, upon request, to the public, the laboratory's specific inspection findings (with any explanatory information required to interpret the findings), including deficiencies identified in an inspection, and any subsequent corrections to those deficiencies;

c. If the State allows certification of an embryo laboratory on the basis of the laboratory's accreditation by an approved accreditation organization (i.e., issues a certificate of accreditation), the laboratory must, in addition to the requirements of subparagraphs 3.a. and 3.b. of this section—

i. Submit proof of current accreditation;

ii. Permit the accreditation organization to have access to all facilities, equipment, materials, records, and information which the accreditation organization requires to determine if the laboratory is being operated in accordance with the standards of the accreditation organization program;

iii. permit the accreditation organization to copy any material, record, or information inspected, or submit such, upon request by the accreditation organization;

iv. Permit the accreditation organization to make available, upon request, to the public, the laboratory's specific inspection findings (with any explanatory information required to interpret the findings), including deficiencies identified in an inspection, and any subsequent corrections to those deficiencies; and

v. Agree to authorize the accreditation organization to submit to the State or HHS such laboratory-specific information or reports as the State or HHS may require; and

d. Such other information, agreements and assurances as the State finds necessary.

4. Initial, Routine and Complaint Inspections. Inspections must be conducted to determine if embryo laboratories applying for or renewing their certification meet the requirements of the certification program. In addition, inspections may be performed as part of the State's investigation of complaints received about a certified embryo laboratory. The inspections may be carried out by the State or, as applicable, by an accreditation organization approved by the State in accordance with paragraph 2. of this section.

a. Initial inspections for embryo laboratory certification must be performed during the laboratory's regular hours of operation and may be announced. Initial inspections are performed when the laboratory applies for certification and may be performed for recertification after the laboratory has had a change in ownership or administration.

b. Routine inspections for renewal of the laboratory's certification must be performed biennially, during the laboratory's regular hours of operation and may be announced.

c. Inspections to investigate complaints received by the State about a laboratory may be performed unannounced, during the laboratory's regular hours of operation.

d. Inspection of a laboratory may be made only upon the presentation of identification to the owner, operator, or agent in charge of the laboratory being inspected.

e. In conducting an inspection, the State or approved accreditation organization must have access to all facilities, equipment, materials, records, and information which the State or approved accreditation organization requires to determine if the laboratory is being operated in accordance with the standards of the certification program.

f. The State or approved accreditation organization may copy any material, record, or information inspected or require it to be submitted to the State or, as applicable, to the approved accreditation organization.

g. The specific findings (with any explanatory information required to interpret the findings), including deficiencies identified in an inspection, and any subsequent corrections to those deficiencies must be made available to the public upon request beginning no later than 60 days after the date of the inspection.

5. Validation Inspections. The State must annually evaluate the performance of each approved accreditation organization by performing validation inspections of a sufficient number of embryo laboratories within the State accredited by the organization, to allow a reasonable estimate of the performance of such organization.

a. The State may enter and inspect, during regular hours of operation, embryo laboratories which have been accredited by an approved accreditation organization for the purpose of determining whether the laboratory is being operated in accordance with the standards of the certification program.

b. A validation inspection of a laboratory may be announced and be made only upon the presentation of identification to the owner, operator, or agent in charge of the laboratory being inspected.

c. In conducting a validation inspection, the State must have access to all facilities, equipment, materials, records, and information which the State requires to determine if the laboratory is being operated in accordance with the standards of the certification program.

d. The State may copy any material, record, or information inspected or require it to be submitted to the State.

e. If the State determines as a result of a validation inspection that the embryo laboratory is not in compliance with the standards of the certification program, the State must—

i. Notify the accreditation organization which accredited the laboratory.

ii. Make available to the public the inspection findings (with any explanatory information required to interpret the findings), including deficiencies identified in the inspection, and any subsequent corrections to those deficiencies.

iii. Conduct additional inspections of other embryo laboratories accredited by the accreditation organization is reliably identifying the deficiencies of the laboratories.

f. If the State determines that the accreditation organization has not met the requirements of paragraph 2. of this section, the State may (under such notice and hearing standards to be developed by the State) revoke the approval of the accreditation program.

6. Revocation of an Accreditation Organization's State Approval. If the State revokes approval of an accreditation organization under subparagraph 5.f., of this section—

a. The State must notify each laboratory, accredited by the organization under the State certification

b. The certification of any embryo laboratory accredited by the organization will continue in effect for 60 days after the laboratory is notified by the State of the withdrawal of approval, except that the State may extend the period during which the certification may remain in effect if the State determines that the laboratory submitted an application to another approved accreditation organization for accreditation or to the State, as applicable, in a timely manner after receipt of such notice.

7. Embryo Laboratory Certification Revocation and Suspension.

a. A certification issued by a State for an embryo laboratory must be revoked or suspended if the State or, as applicable, approved accreditation organization finds, on the basis of inspections and after reasonable notice and opportunity for hearing (under such notice and hearing standards to be developed by the State) to the owner or operator of the laboratory, that the owner or operator or any employee of the laboratory—

i. Has been guilty of misrepresentation in obtaining the certification.

ii. Has failed to comply with any standards of the certification program.

iii. Has refused a request of the State or approved accreditation organization for permission to inspect the laboratory, its operations, and records.

b. If the certification of an embryo laboratory is revoked or suspended, the certification of the laboratory shall continue in effect for 60 days after the laboratory receives notice of the revocation or suspension, unless there is a finding that the laboratory's continued operation may constitute a public health threat, in which case the certification shall be immediately revoked or suspended.

c. If the certification of an embryo laboratory is revoked or suspended, the laboratory may apply for recertification after one year after the date of the revocation or suspension.

8. Fees. The State may require the payment of fees for the purpose of, and in an amount sufficient to cover the costs of, administering the certification program.

Part III. Embryo Laboratory Standards

A. Personnel Qualificotions and Responsibilities

The embryo laboratory must have a sufficient number of individuals, who meet the qualification requirements, to perform the functions necessary to provide timely services appropriate for the size and volume of the assisted reproductive technology program(s) or clinic(s) served by the laboratory. As a guideline, for every 90–150 assisted reproductive technology cycles performed annually, the laboratory should employ one individual who is capable of performing all assisted reproductive technology laboratory procedures provided by the embryo laboratory. Regardless of workload, at a minimum, two qualified individuals should be available to provide the appropriate laboratory services.

1. Laboratory Director Qualifications. The laboratory director must be qualified to manage and direct the laboratory personnel and the performance of assisted reproductive technology laboratory procedures. The laboratory director must—

a. Possess a current license as an embryo laboratory director issued by the State in which the laboratory is located, if such licensing is required.

b. Be a physician or a doctoral scientist with a broad knowledge of the biochemistry, biology, and physiology of reproduction, and laboratory operations including experimental design, statistics, and problem solving and meet the following.

i. Have two years documented pertinent experience in a laboratory

performing assisted reproductive technology procedures. This experience should induce familiarity with laboratory quality control, sterile technique and cell culture; and

ii. Have documented training of at least 1,000 hours in an embryo laboratory which includes performing, at a minimum, each laboratory component of the human assisted reproductive technology cycle 60 times.

Note: Documented experience and training may be acquired concurrently.

c. If not qualified under paragraph 1.b. of this section, be the director of an embryo laboratory on or before [date of publication of final notice] and meet the following:

i. Have two years documented pertinent experience in a laboratory performing assisted reproductive technology procedures. This experience should induce familiarity with laboratory quality control, sterile technique and cell culture; and

ii. Have documented training of at least 1,000 hours in an embryo laboratory which includes performing, at a minimum, each laboratory component of the human assisted reproductive technology cycle 60 times.

Note: Documented experience and training may be acquired concurrently.

d. In addition to meeting the qualification requirements above, obtain at least 12 contact hours of continuing education annually in assisted reproductive technology or clinical laboratory practice.

2. Laboratory Director Responsibilities. The laboratory director is responsible for the overall operation, administration, and technical and scientific oversight of the embryo laboratory, including the employment of personnel who are qualified to perform assisted reproductive technology laboratory procedures, and record and report procedural outcomes promptly, accurately and proficiently. If the laboratory director delegates performance of his or her responsibilities, he or she must do so in writing. The laboratory director remains responsible for ensuring that all delegated duties are properly performed. The laboratory director must—

a. Be accessible to the laboratory to provide onsite, telephone or electronic consultations as needed.

b. Ensure that the physical plant (space, facilities and equipment) and environmental conditions of the laboratory are appropriate for the laboratory procedures performed and provide a safe environment in which employees and other occupants are protected from physical, chemical, electrical and biological hazards.

c. Establish and monitor a program to ensure that aseptic conditions are maintained in the laboratory, as appropriate, for the assisted reproductive laboratory procedures to be performed.

d. Ensure that assisted reproductive technology laboratory procedures selected or developed by the laboratory are appropriate to provide quality patient care.

e. Ensure that adequate systems are in place to maintain patient confidentiality throughout those parts of the assisted reproductive technology process under the laboratory's control.

f. Ensure that an approved procedure manual is available to all personnel responsible for performing assisted reproductive technology laboratory procedures.

g. Establish and monitor a quality management program to assure the quality of laboratory services provided and to identify failures in quality as they occur.

h. Ensure that all necessary corrective actions are taken, documented and reviewed for effectiveness whenever failures in quality are identified.

i. Provide consultation to physicians and others, as appropriate, regarding the clinical significance of laboratory findings.

j. Employ a sufficient number of qualified personnel with the appropriate education and documented experience or training to supervise and perform the work of the laboratory. Written records of the qualifications of all personnel must be maintained.

k. Ensure that all personnel receive appropriate training for the assisted reproductive technology laboratory procedures to be performed, and have demonstrated that they can perform the procedures reliably prior to working on patients' specimens. All training activities must be documented.

l. Ensure that all personnel acquire, on an annual basis, the required number of continuing education contact hours. A record of each employee's continuing education participation must be maintained.

m. Specify, in writing, the responsibilities and duties of each person who performs assisted reproductive technology laboratory procedures, identifying which procedures each individual is authorized to perform and whether supervision is required.

n. Ensure that policies and procedures are established for monitoring each employee's continued competence to perform assisted reproductive technology laboratory procedures, and whenever necessary, provide remedial training or additional continuing education to improve skills.

o. Ensure that performance evaluations for each employee are performed and documented, at a minimum, annually.

3. Laboratory Supervisor Qualifications. The embryo laboratory must have one or more qualified supervisors who, under the direction of the laboratory director, provide day-to-day supervision of laboratory personnel performing assisted reproductive technology laboratory procedures. In the absence of the director, the laboratory supervisor must be responsible for the proper performance of all assisted reproductive technology laboratory procedures. The laboratory supervisor must—

a. Possess a current license issued by the State in which the laboratory is located, if such licensing is required.

b. Meet the qualification requirements for an embryo laboratory director under paragraph 1. of this section, or meet the following:

i. Have an earned master's or bachelor's degree in a chemical, physical, biological, clinical laboratory or medical technology science from an accredited institution; and

ii. Have documented training which includes performing, at a minimum, each laboratory component of the human assisted reproductive technology cycle 60 times.

c. If not qualified under subparagraph 3.b. of this section, be the supervisor of an embryo laboratory on or before [date of publication of final notice] and have documented training which includes performing, at a minimum, each laboratory component of the human assisted reproductive technology cycled 60 times.

d. In addition to meeting the qualification requirements above, obtain at least 12 contact hours of continuing education annually in assisted reproductive technology or clinical laboratory practice. If also serving as the laboratory director, continuing education obtained to meet the laboratory director qualification requirements may be used to meet this requirement.

4. Laboratory Supervisor Responsibilities. The laboratory supervisor is responsible for day-to-day supervision or oversight of the embryo laboratory operation and personnel performing assisted reproductive technology laboratory procedures. The laboratory supervisor must—

a. Be accessible to laboratory personnel at all times when assisted reproductive technology laboratory procedures are performed to provide on-site, telephone or electronic consultation to resolve technical problems in accordance with policies and procedures established by the laboratory director.

b. Provide day-to-day supervision of laboratory personnel performing assisted reproductive technology laboratory procedures.

c. Ensure direct and constant supervision of personnel undergoing training in assisted reproductive technology laboratory procedures to fulfill the qualification requirements for a reproductive biologist.

d. Perform laboratory director responsibilities as authorized in writing by the laboratory director.

5. Reproductive Biologist Qualifications. Each individual performing assisted reproductive technology laboratory procedures must—

a. Possess a current license issued by the State in which the laboratory is located, if such licensing is required.

b. Meet the qualification requirements for an embryo laboratory director under paragraph 1. of this section, laboratory supervisor requirements under paragraph 3. of this section, or meet the following:

i. Have an earned bachelor's degree in a chemical, physical, biological, clinical laboratory or medical technology science from an accredited institution; and

ii. Have documentation of training appropriate for the assisted reproductive technology laboratory procedure(s) to be performed before performing the procedure(s) without direct and constant supervision on patient specimens. Training must include performing the assisted reproductive technology laboratory procedure(s), at a minimum, 30 times under direct and constant supervision.

c. If not qualified under subparagraph 5.b. of this section, be performing assisted reproductive technology laboratory procedures in an embryo laboratory on or before [date of publication of final notice] and have documentation of training appropriate for the assisted reproductive technology laboratory procedure(s) to be performed before performing the procedure(s) without direct and constant supervision on patient specimens. Training must include performing the assisted reproductive technology laboratory procedure(s), at a minimum, 30 times under direct and constant supervision.

d. In addition to meeting the qualification requirements above, obtain at least 12 contact hours of continuing education annually in assisted reproductive technology or clinical laboratory practice. If also serving as the laboratory director or laboratory supervisor, continuing education obtained to meet the laboratory director or laboratory supervisor qualification requirements may be used to meet this requirement.

6. Reproductive Biologist Responsibilities. The reproductive biologist is responsible for performing assisted reproductive technology laboratory procedures, and recording and reporting procedural outcomes promptly, accurately and proficiently. The reproductive biologist must—

1. Perform only those assisted reproductive technology laboratory procedures that are authorized by the laboratory director, and for which training has been documented. If appropriate training has not been documented, perform assisted reproductive technology laboratory procedures only under direct and constant supervision.

b. Follow the laboratory's established policies and procedures for performing assisted reproductive technology laboratory procedures, and recording and reporting procedural outcomes.

c. Adhere to the laboratory's quality management policies, document all specimen and procedure management, quality control and quality assurance activities, and equipment and instrument calibration, function verification and maintenance performed.

d. Identify problems that may adversely affect the performance of assisted reproductive technology laboratory procedures and either immediately notify the laboratory supervisor or director, or correct the problem(s) in accordance with the laboratory's established policies and procedures and notify the laboratory supervisor or director of the problem(s) and the corrective action(s) taken.

e. Document all corrective actions taken when failures in quality are identified.

B. Facilities and Safety

The embryo laboratory must provide adequate space and the appropriate environmental conditions to ensure safe working conditions and quality performance of assisted reproductive technology laboratory procedures.

1. Requirements for Physical Space and Utilities. The laboratory must be constructed and arranged so that—

a. The laboratory space, ventilation, and utilities are adequate for the volume of assisted reproductive technology laboratory procedures performed during peak periods of activity.

b. Assisted reproductive technology laboratory procedures are carried out in a secure area with access limited to authorized personnel.

c. Movement of patient specimens and traffic around sensitive work areas is limited in order to reduce the potential for spilled or lost specimens.

d. Incubator and storage space are configured to ensure positive specimen identification and minimize the potential for errors due to misplaced specimens or retrieval of the wrong specimen.

e. Activities requiring sterile technique such as the handling, assessment and culturing of human oocytes and embryos, are performed under aseptic conditions in an area that is physically isolated from other laboratory activities.

f. All laboratory work areas (does not include administrative areas) are easily washed and disinfected.

g. The laboratory and administrative space are conveniently located, but are separate from patient areas.

h. Immediate communication can occur with the oocyte retrieval and transfer room(s).

2. Safety Requirements. Safety precautions, policies, and procedures must be established and posted, or readily available to all personnel, to ensure protection from physical, chemical, electrical and biological hazards.

a. All personnel must be knowledgeable about and abide by applicable Federal, State and local regulations regarding protection from physical, chemical, electrical and biological hazards.

b. Disposable materials should be used wherever possible for all procedures that involve exposure to tissue and body fluids.

c. The laboratory must store and dispose of tissue, body fluids, or other potentially biohazardous materials as outlined in Federal, State and local regulations.

d. Toxic chemicals, including toxic cleaning materials, must be used in a manner that is not harmful to patient specimens.

e. Radioisotopes must not be used in a laboratory that performs assisted reproductive technology procedures.

f. The laboratory must have an emergency plan appropriate for its geographical location which specifies the actions to be taken to protect employees, patients, visitors and specimens in case of a natural disaster or other potentially devastating event.

3. Laboratory Animals. If laboratory animals are used, all applicable Federal, State and local regulations regarding animal care and use must be met. Animal specimens must be—

a. Handled and stored separately from human specimens.

b. Incubated separately from human specimens, unless program/institutional approval is given for an application involving specific cell lines, i.e., animal coculture.

C. Quality Management

The embryo laboratory must establish and follow written policies and procedures for a comprehensive quality management program that is designed to monitor and evaluate the ongoing and overall quality of the assisted reproductive technology laboratory procedures performed and services provided. All quality management activities must be documented.

1. Procedure Manual. A written procedure manual including instructions for all assisted reproductive technology laboratory procedures performed must be available in the embryo laboratory and followed by all laboratory personnel. The written procedures must be in sufficient detail to assure reproducibility and competence in the performance of the laboratory procedures.

a. The procedure manual include the following, when applicable to the assisted reproductive technology laboratory procedure performed:

i. Principle (scientific basis) of the assisted reproductive technology laboratory procedure;

ii. Clinical significance of the assisted reproductive technology laboratory procedure;

iii. Requirements for specimen collection and handling;

iv. Step-by-step instructions for performance of the assisted reproductive technology laboratory procedure;

v. Preparation of required reagents, culture media, solutions, or other special supplies;

vi. Equipment and instrumentation required for the performance of the procedure, including necessary function checks and calibration protocols;

vii. Quality control procedures to be performed, including frequency of control testing, and criteria for acceptability;

viii. Remedial action to be taken when function checks, calibration or control results do not meet the laboratory's criteria for acceptability;

ix. Calculations and interpretation of procedural outcomes, including criteria for acceptable and unacceptable outcomes, and procedural outcomes requiring special notification;

x. The laboratory's system for recording and reporting procedural outcomes;

xi. Limitations in methodologies, including interfering substances and precautions;

xii. Pertinent literature references;

xiii. Description of the course of action to be taken if required equipment or instrumentation malfunctions or is inoperable;

xiv. Criteria for the referral or transfer of specimens to another embryo laboratory for the performance of an assisted reproductive technology laboratory procedure, including procedures for specimen submission and handling; and

xv. Procedure for safe and appropriate specimen disposal.

b. Manufacturers' instrument/equipment manuals and package inserts may be used, when applicable, to meet the requirements of this section.

i. Any of the items listed under subparagraph 1.a. of this section, not provided by the manufacturer must be provided by the laboratory.

ii. Any modifications to, or deviations from, the manufacturer's instructions, must be clearly documented and provided in the procedure manual.

c. Appropriate reference materials (e.g., slides, pictures, textbooks, etc.) should be available in the laboratory to allow, as needed, comparison with patient specimens.

d. Procedures must initially be approved, signed and dated by the laboratory director, and must thereafter, be reviewed by the laboratory director on an annual basis.

e. Procedures must be re-approved, signed and dated if the directorship of the laboratory changes.

f. Each change in a procedure must be approved, signed and dated by the current laboratory director.

g. The laboratory must retain a copy of each procedure with the dates of initial use and discontinuance in accordance with the requirements of section D., Maintenance of Records, of this part.

2. Equipment and Instrument Maintenance/Calibration. The embryo laboratory must perform and document equipment and instrument maintenance and, as applicable, calibration, and function verification that include(s) electronic, mechanical and operational checks necessary for the proper performance of assisted reproductive technology laboratory procedures. The laboratory must—

a. Have sufficient equipment for the type and volume of assisted reproductive technology laboratory procedures performed, which may include but is not limited to, incubators, freezers, refrigerators, hoods, thermometers, centrifuges, microscopes, pipettes, and warming devices.

b. Establish and follow written policies and procedures for equipment and instrument maintenance and, as applicable, calibration, and function checks, that ensure proper performance of the equipment and instruments used in assisted reproductive technology laboratory procedures.

The laboratory must—

i. Define acceptable limits for equipment and instrument maintenance and, as applicable, calibration, and function checks prior to their use in assisted reproductive technology laboratory procedures.

ii. Perform maintenance and, as applicable, calibration, and function checks in accordance with the equipment/instrument manufacturer's instructions and at the frequency required to ensure adequate performance of the equipment and instruments used in assisted reproductive technology laboratory procedures.

iii. Monitor environmental conditions, using an independent measuring device, in critical equipment, including but not limited to, incubators, controlled-rate freezers and liquid nitrogen storage tanks, at a frequency that ensures timely detection of conditions that are deleterious to specimens. These conditions include, if applicable:

A. Temperature;

B. Humidity;

C. Gas concentration; and

D. Liquid nitrogen levels.

iv. Maintain an alarm system on critical equipment that will immediately detect when pre-established limits for the environmental conditions listed in subparagraph 2.b.iii. (excluding humidity), of this section, are exceeded. The alarm system must be:

A. Checked periodically to ensure that it will be triggered when preestablished limits for environmental conditions are exceeded; and

B. Monitored 24 hours a day in the laboratory or at a remote site.

v. Protect critical equipment and instrumentation from fluctuations and interruptions in electrical current.

vi. Have available emergency back-up capability for critical equipment, including but not limited to, incubators, refrigerators and controlled-rate freezers.

vii. Document all maintenance, calibration, and function checks performed.

c. Identify, investigate, and correct problems with equipment or instrumentation that may adversely affect the performance of assisted reproductive technology laboratory procedures.

d. Document all corrective actions taken when problems with equipment or instrumentation are identified.

3. Labeling, Handling, and Storage of Chemicals, Reagents, Solutions, Culture Media, Materials and Supplies. The embryo laboratory must label, handle and store chemicals, reagents, solutions, culture media, materials and supplies in a manner that ensures their positive identification, optimum integrity and appropriate reactivity in assisted reproductive technology laboratory procedures. The laboratory must—

a. Have a mechanism for ensuring sufficient chemicals, reagents, solutions, culture media, materials and supplies for the type and volume of assisted reproductive technology laboratory procedures performed (e.g., inventory maintenance program).

b. Define criteria that are essential for proper storage of chemicals, reagents, solutions, and culture media, including the following, as applicable:

i. Temperature;

ii. Humidity; and

iii. Other conditions necessary for proper storage.

c. Label all chemical, reagents, solutions, and culture media to indicate the following, as applicable:

i. Identity, and when significant, batch or lot number, titer, strength, or concentration;

ii. Recommended storage conditions;

iii. Expiration date; and

iv. Other pertinent information required for proper use.

d. Verify that materials which come in contact with sperm, oocytes, and embryos have been tested and found to be non-toxic to sperm, oocytes, and embryos. Documentation supplied by the manufacturer may be used to meet this requirement.

e. Maintain records documenting the batch or lot number, date of receipt or preparation, and date placed in use, for all chemicals, reagents, solutions, and culture media.

f. Prepare, store, and handle chemicals, reagents, solutions, and culture media in a manner to ensure that they are not used when they have exceeded their expiration date, have deteriorated, or are of substandard quality.

4. Specimen and Procedure Management. The embryo laboratory must have written protocols and criteria for the laboratory procedures performed and employ and maintain a system that provides for proper patient identification and preparation; specimen collection, identification, and handling (transportation, processing, storage, preservation); and accurate recording and reporting of laboratory procedural outcomes.

a. The laboratory must have available and follow written policies and procedures for each of the following:

i. Instructions for patient preparation, if applicable;

ii. Methods used for the positive identification of patients;

iii. Specimen collection;

iv. The labeling of patient specimens to ensure positive identification from the time of specimen collection through final disposition or disposal;

v. Criteria for maintaining specimen integrity and viability during transport, storage and the performance of assisted reproductive technology laboratory procedures including, as applicable, requirements for:

A. Temperature;

B. Humidity; and

C. Gas concentration; and

vi. Criteria for specimen acceptability and, as appropriate, instructions for special handling of suboptimal specimens.

b. The laboratory must have adequate systems in place to ensure patient confidentiality throughout those parts of the assisted reproductive technology process that are under the laboratory's control.

c. The laboratory may perform assisted reproductive technology laboratory procedures only at the written or electronic request of an authorized person. Oral requests for changes to the original written or electronic request must be documented by the laboratory and followed by receipt of written or electronic documentation from an authorized person within 24 hours of the oral request. The patient's chart or medical record may be used for written authorization, but must be available to the laboratory at the time of the laboratory procedure. Written or electronic authorization must include the following:

i. The patient's name and unique identifier;

ii. When applicable, the partner's or donor's name or other unique identifier;

iii. The name and address or other suitable identifiers of the authorized person requesting the procedure, and the name of the individual communicating the request;

iv. The procedure(s) to be performed;

v. The date(s) and time(s) the procedures(s) is to be performed; and

vi. Any additional information relevant and necessary to the performance of the procedure(s) including verification of informed patient consent, and as applicable, special handling instructions and any instructions stipulated by the patient.

d. As applicable, the laboratory must establish and follow written protocols, including documented criteria, for—

i. Evaluation and assessment of oocyte morphology and maturity, fertilization, and embryo quality.

ii. Insemination schedule relative to oocyte maturity.

iii. Volume, numbers, and quality of sperm used for insemination of each oocyte.

iv. Disposition of oocytes with an abnormal number of pronuclei.

v. Disposition of excess oocytes.

vi. The time period following insemination for examination of oocytes to determine fertilization.

vii. Micromanipulation of oocytes and embryos.

viii. Re-insemination of oocytes.

ix. Cryopreservation of specimens.

x. Embryo transfer procedures, which include the following:

A. The length of time embryos are cultured prior to transfer;

B. The medium and protein supplementation used for transfer, as applicable;

C. Disposition of excess embryos;

D. Types of catheters available, with circumstances for use of each;

E. Method of transfer; and

F. Technique for post transfer catheter check.

e. The laboratory must maintain a record system, for each patient's assisted reproductive technology cycle, to ensure reliable identification and control of the patient's specimens as they are received and the laboratory procedure(s) performed. The record system must include documentation of the information specified in subparagraph 4.c. of this section, and—

i. The laboratory accession number, or other unique identification of the specimen.

ii. The date and time of specimen receipt into the laboratory and, as applicable, the number of oocytes retrieved and assessment of each oocyte or cumulus corona complex.

iii. The condition and disposition of all specimens including those that do not meet the laboratory's criteria for acceptability.

iv. The records and dates of all laboratory handling and procedures, including the following, as applicable:

A. Semen assessment before and after washing and concentration for insemination;

B. Outcome of insemination or micromanipulation procedures (e.g., fertilization);

C. Outcome of any culture (e.g., cleavage);
D. Relative timing of protocol events (incubation hours, etc.);
E. Assessment of the developmental status and quality of all embryos at transfer;
F. Verification that no embryos remain in the catheter following completion of transfer;
G. The identity and lot numbers of the media and media supplements used in each phase of the procedure; and
H. The identity of the laboratory personnel who handled the specimens and performed the procedures.

f. The laboratory must have a mechanism in place for promptly providing the authorized person who ordered the procedure a complete summary of all procedural outcomes and the occurrence of any unusual or abnormal events, including the condition and disposition of specimens that do not meet the laboratory's criteria for acceptability.

g. The laboratory must have an accurate and reliable method of tracking cryopreserved specimens ensuring positive identification of each cryopreservation container. In addition, the cryopreservation container must be labeled with the patient's name or unique identifier, and the date the specimen(s) was frozen. All labeling must be of a permanent nature. Documentation must be maintained in duplicate log books or files for each liquid nitrogen storage tank and include the following:
i. The patient's name or other unique identifier;
ii. A description of each cryopreservation container's contents;
iii. The freezing protocol used;
iv. Date frozen;
v. Type and location of cryopreservation container (e.g., straw, vial); and
vi. Final disposition/disposal of the cryopreserved specimen(s).

h. If cryopreserved specimens are received from or transferred to other facilities, the laboratory must have written policies and procedures for the receipt/transfer of cryopreserved specimens. Policies and procedures must include appropriate methods of transportation and the method for verifying the identification and number of cryopreservation containers received/transferred. In addition, documentation of the freezing protocol used, and copies of patient release forms and applicable log sheets must accompany the cryopreserved specimens.

i. Clinical laboratory testing on specimens obtained by the embryo laboratory must be performed in accordance with the regulations implementing CLIA at 42 CFR Part 493. In addition—
i. The referring embryo laboratory must not revise results or information directly related to the interpretation of results provided by the testing laboratory.
ii. The referring embryo laboratory may permit the testing laboratory to send the test result(s) directly to the authorized person who initially requested the testing. The embryo laboratory must retain or be able to produce an exact duplicate of the testing laboratory report.
iii. The authorized person who orders a clinical laboratory test must be notified by the referring embryo laboratory of the name and address of the testing laboratory.

5. Method Validation. All assisted reproductive technology procedures selected or established by the embryo laboratory must be validated by the laboratory prior to routine patient use. The laboratory must determine appropriate performance measures and demonstrate that the procedure, when performed by the laboratory's staff, meets or exceeds acceptable levels of performance as defined by the laboratory. In addition, the laboratory must periodically verify, through its quality management activities (as specified in this part), each procedure's continued acceptable level of performance. All validations must be documented.

6. Quality Control. The embryo laboratory must establish and follow written quality control procedures at a frequency appropriate to monitor the reliability of the assisted reproductive technology laboratory procedures performed. All quality control activities must be documented. The laboratory must—
a. Establish acceptability criteria for all quality control procedures.
b. Perform and document the remedial action(s) taken when problems are identified or quality control procedures do not meet the laboratory's criteria for acceptability.
c. For each laboratory procedure performed and, as applicable, culture media preparation—
i. Define and use the appropriate grade of water required.
ii. Periodically monitor water quality to ensure that its quality continues to meet the laboratory's specifications for its intended use. As applicable, adherence to manufacturers' storage and handling requirements, and expiration dates may meet this requirement.
d. As applicable, have and follow a written procedure for the preparation, washing and sterilization of glassware used in the laboratory's procedures that includes the following:
i. Rinsing all washable glassware with distilled or deionized water prior to drying; and
ii. If detergent is used, testing washed items for detergent removal.
e. Have and follow a written procedure for the quality control of culture media which includes a visual check for physical damage to the media container and evidence of media contamination prior to its use and—
i. For each batch of culture media prepared in-house, document the quality of the media by testing—
A. pH.
B. Osmolality.
C. Culture suitability using an appropriate bioassay system.
ii. For each batch of commercially prepared culture media—
A. Verify and document the quality of the media with an appropriate bioassay system. Documentation of quality control performed by the manufacturer may meet this requirement.
B. Follow the manufacturer's specifications for using the media.
iii. Test and document the quality of any media supplementation (e.g., protein), when appropriate, using a bioassay system.
iv. Test blood based media supplements (e.g., human fetal cord serum) prepared in-house with a FDA licensed, approved, or cleared test and show the supplement to be negative/nonreactive for the following communicable diseases prior to use:
A. Human immunodeficiency virus, Type 1 (e.g., anti-HIV-1);
B. Human immunodeficiency virus, Type 2 (e.g., anti-HIV-2);
C. Hepatitis B virus (e.g., HbsAg);
D. Hepatitis C virus (e.g., anti-HCV);
E. Human T-cell lymphotrophic virus, Type I (e.g., anti-HTLV-I); and
F. Such other diseases that may be later added to this list.

NOTE: A batch of media (solid, semi-solid, or liquid) consists of all tubes, plates, or containers of the same medium prepared at the same time in the laboratory; or, if received from an outside source of commercial supplier, consists of all of the plates, tubes or containers of the same medium that have the same lot numbers and are received in a single shipment.

7. Quality Assurance. The embryo laboratory must establish and follow written policies and procedures for a quality assurance program to monitor the quality of services provided by the laboratory, and resolve problems that are identified. The laboratory must have a mechanism to evaluate the effectiveness of its policies and procedures; identify and correct problems; and assure the adequacy and competency of the staff. As necessary, the laboratory must revise its policies and procedures based on the results of those evaluations. All quality assurance activities must be documented.

a. The laboratory must have an ongoing mechanism for monitoring, evaluating and revising, if necessary, based on the results of its evaluations, the following:
i. The criteria established for patient identification and specimen collection, identification, and handling;
ii. The information requested and maintained on each patient and for each laboratory procedure performed for its completeness, relevance and necessity;
iii. The timeliness and accuracy of recording and reporting procedural outcomes;
iv. The accuracy and reliability of tracking cryopreserved specimens;
v. The appropriate storage and retrieval of laboratory records such as procedural outcomes, and other data recorded and maintained; and
vi. The corrective actions taken for—
A. Problems identified during the evaluation of equipment and instrument maintenance, calibration, and function check data.
B. Problems identified during the evaluation of quality control data.
C. Errors detected in patient or specimen identification and handling.
D. Clerical or analytical errors detected in laboratory records.

b. The embryo laboratory must have an ongoing mechanism to—
i. Identify and evaluate laboratory procedural outcomes that appear inconsistent with the patient or donor history.
ii. Track and evaluate laboratory procedural outcomes including, but not limited to, fertilization rates, cleavage rates and embryo quality.
iii. Maintain a file of adverse reactions occurring as a result of errors made during the performance of assisted reproductive technology laboratory procedures.
iv. Evaluate the effectiveness of its policies and procedures for assuring employee competence in performing assisted reproductive technology laboratory procedures.
v. Document problems that occur as a result of a breakdown in communication between the laboratory and referring physicians or others involved in the assisted reproductive technology procedures, and take corrective actions to resolve the problems and minimize future communications breakdowns.
vi. Assure that all complaints and problems reported to the laboratory are documented. Investigations of complaints must be made, when appropriate, and as necessary, corrective actions must be instituted.
vii. Document and assess problems identified during quality assurance reviews, and discuss them with the laboratory staff and, as appropriate, referring physicians and others involved in the assisted reproductive technology procedures. The laboratory must take the necessary corrective actions to prevent recurrences.

D. Maintenance of Records

The embryo laboratory must retain records of all of its policies and procedures; personnel employment, training, evaluations and continuing education activities; and quality management activities specified in this part.

1. Record Format. Laboratory records must be accurate, indelible, and legible. Records may be retained electronically, or as original paper records, or as true copies such as photocopies, microfiche, or microfilm.

2. Retention Period. Laboratory records must be retained in accordance with time frames specified by applicable Federal, State and local laws or for ten years beyond the date of final disposition or disposal of all specimens obtained during each patient's assisted reproductive technology cycle, whichever is later. Records must be retained on site for two years. Note: Transfer of cryopreserved specimens to another facility constitutes final disposition for the transferring facility.

3. Record Retrieval. Laboratory records must be maintained in a manner which ensures timely, accurate and reliable retrieval.

4. Laboratory Closure. In the event that the laboratory ceases operation, the laboratory must make provisions for these records to be maintained for the time frame required above.

Department of Commerce

National Telecommunications and Information Administration

Public Telecommunications Facilities Program: Closing Date; Notice

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

[Docket No. 981028269–8269–01]

RIN 0660–ZA05

Public Telecommunications Facilities Program: Closing Date

AGENCY: National Telecommunications and Information Administration (NTIA), Commerce.

ACTION: Notice of availability of funds.

SUMMARY: The National Telecommunications and Information Administration (NTIA), U.S. Department of Commerce, announces the solicitation of applications for planning and construction grants for public telecommunications facilities under the Public Telecommunications Facilities Program (PTFP).

Applicants for matching grants under the PTFP must file their applications on or before January 14, 1999. NTIA anticipates making grant awards by September 30, 1999. NTIA shall not be liable for any proposal preparation costs.

Approximately $21 million is available for FY 1999 for PTFP grants pursuant to P.L. 105–277, the "Department of Commerce and Related Agencies Appropriations Act, 1999." The amount of a grant award by NTIA will vary, depending on the approved project. For fiscal year 1998, NTIA awarded $19.8 million in funds to 115 projects. The awards ranged from $3,000 to $978,033.

The applicable Rules for the PTFP were published on November 8, 1996. These rules, 15 CFR Part 2301 *et seq.* will be in effect for FY 1999 PTFP applications. Certain requirements of the PTFP at 15 CFR Part 2301 are modified in this Notice. Copies of the 1996 Rules will be distributed as part of the PTFP Application Kit and applicants are cautioned not to use older versions of the PTFP Rules which were published in 1991.

Parties interested in applying for financial assistance should refer to these rules and to the authorizing legislation (47 U.S.C. §§ 390–393, 397–399b) for additional information on the program's goals and objectives, eligibility criteria, evaluation criteria, and other requirements.

DATES: Pursuant to 15 CFR § 2301.8(b), the Administrator of NTIA hereby establishes the closing date for the filing of applications for grants under the PTFP. The closing date selected for the submission of applications for 1999 is January 14, 1999. Applications must be received prior to 8 p.m. on or before January 14, 1999. Applicants sending an application should submit an original and five copies to the place indicated in the ADDRESS section below. Applicants sending applications by the United States Postal Service or commercial delivery services must ensure that the carrier will be able to guarantee delivery of the application by the Closing Date and Time. NTIA will not accept mail delivery of applications posted on the Closing Date or later and received after the above deadline. However, if an application is received after the Closing Date due to (1) carrier error, when the carrier accepted the package with a guarantee for delivery by the Closing Date, or (2) significant weather delays or natural disasters, NTIA will, upon receipt of proper documentation, consider the application as having been received by the deadline. Applicants submitting applications by hand delivery are notified that, due to security procedures in the Department of Commerce, all packages must be cleared by the Department's security office. Entrance to the Department of Commerce Building for security clearance is on the 15th Street side of the building. Applicants whose applications are not received by the deadline are hereby notified that their applications will not be considered in the current grant cycle and will be returned to the applicant. See 15 CFR § 2301.8(c); but see also 15 CFR § 2301.26. NTIA will also return any application which is substantially incomplete, or when the Agency finds that either the applicant or project is ineligible for funding under 15 CFR § 2301.3 or § 2301.4. The Agency will inform the applicant of the reason for the return of any application.

ADDRESSES: To obtain an application package, submit completed applications, or send any other correspondence, write to: NTIA/PTFP, Room H–4625, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Dennis R. Connors, Director, Public Broadcasting Division, telephone: (202) 482–5802; fax: (202) 482–2156. Information about the PTFP can also be obtained electronically via Internet (http://www.ntia.doc.gov).

SUPPLEMENTARY INFORMATION:

I. Application Forms and Regulations

To apply for a PTFP grant, an applicant must file an original and five copies of a timely and complete application on a current form approved by the Agency. The current application form will be provided to applicants as part of the application package. This form expires on November 30, 2000, and no previous versions of the form may be used. (In accordance with the Paperwork Reduction Act, the current application form has been cleared under OMB control no. 0660–0003.) Applications submitted by facsimile or electronic means are not acceptable.

All persons and organizations on the PTFP's mailing list will be sent a copy of the current application form and the Final Rules. Those not on the mailing list may obtain copies by contacting the PTFP at the telephone and fax numbers or at the Internet or mailing addresses noted above. Prospective applicants should read the Final Rules carefully before submitting applications. Applicants whose applications were deferred in FY 1998 will be mailed pertinent PTFP materials and instructions for requesting reactivation of their applications.

Based upon NTIA's experience in implementing the PTFP during the 1998 grant round, NTIA has determined that it is in the best interests of NTIA and applicants to modify or waive certain requirements contained in the PTFP regulations at 15 CFR Part 2301. These changes, which are applicable to the FY 1999 PTFP applications and resulting awards only, are indicated in italics below. Dependent upon the effectiveness of these changes, amendments may be made to the PTFP regulations to implement these changes.

Section 2301.10 Applications Resulting From Catastrophic Damage or Emergency Situations

Section 2301.10 provides for submission of applications resulting from catastrophic damage or emergency situations. Section 2301.10(a) requires that an emergency "application may be filed with a request for a waiver of the Closing Date." Section 2301.10(f) requires that emergency "applications will be subject to the same evaluation and selection process followed for applications received in the normal application cycle." This section has been revised for FY 1999 PTFP applicants to clarify that (1) an emergency application may be filed at any time, (2) an emergency application will be evaluated according the evaluation criteria set forth on § 2301.17(b) and the degree to which the application satisfies the purposes of this section, and (3) the selection process that will be used in determining a grant award.

(a) For FY 1999 PTFP applicants, when an eligible broadcast applicant suffers catastrophic damage to the basic equipment essential to its continued operation as a result of a natural or manmade disaster, or as the result of significant equipment failure, and is in dire need of assistance in funding replacement of the damaged equipment, it may file an emergency application for PTFP funding at any time. This section is limited to equipment essential to a station's continued operation such as transmitters, tower, antennas, STL's or similar equipment which, if the equipment failed, would result in a complete loss of service to the community.

(b) The emergency application must set forth the circumstances that prompt the request and be accompanied by appropriate supporting documentation.

(c) An application may be granted an award only if it is determined that (1) the emergency satisfies the requirements of subparagraph (a) of this section, and (2) the applicant either carried adequate insurance or had acceptable self-insurance coverage.

(d) Applicants claiming significant failure of equipment must document the circumstances of the equipment failure and demonstrate that the equipment has been maintained in accordance with standard broadcast engineering practices.

(e) Applications filed and accepted pursuant to this section must contain all of the information required by the Agency application materials and must be submitted in the number of copies specified by the Agency.

(f) The application will be subject to the evaluation criteria set forth in 2301.17(b). The PTFP Director takes into account program staff evaluations (including the outside reviewers) the availability of funds, the type of project and broadcast priorities set forth at 2301.4(b), and whether the applicant has any current NTIA grants. The Director presents recommendations to the OTIA Associate Administrator for review and approval. Upon approval by the OTIA Associate Administrator, the Director's recommendation will be presented to the Selecting Official, the NTIA Administrator. The Administrator makes final award selections taking into consideration the Director's recommendation and the degree to which the application satisfies the program's stated purposes set forth at 2301.1(a) and (c) and this section.

Section 2301.11 Service of Applications

Section 2301.11 provides that: "On or before the closing date, all new or deferred applicants must serve a summary copy of the application on the following Agencies:

(a) In the case of an application for a construction grant for which FCC authorization is necessary, the Secretary, Federal Communications Commission * * *

(b) The state telecommunications agency(-ies) if any, having jurisdiction over the development of broadcast and/or non broadcast telecommunications in the state(s) and community(-ies) to be served by the proposed project * * *

(c) The state office established to review applications under Executive Order 12372.

§ 2301.11(a)

For the FY 1999 PTFP, applicants are not required to submit copies of their PTFP applications to the FCC, nor will they be required to submit copies of the FCC transmittal cover letters as part of their PTFP applications. NTIA routinely notifies the FCC of applications submitted for funding which require FCC authorizations.

§ 2301.11(b)

For the FY 1999 PTFP, applicants for distance learning projects are not required to notify every state telecommunications agency in a potential service area. NTIA has found that state telecommunication agency input has been useful with regard to broadcast projects, but has received little input from state agencies with regard to distance learning projects. Since many distance learning applications propose projects which are nationwide in nature, NTIA believes that the requirement to provide a summary copy of the application in every state telecommunications agency in a potential service area is unduly burdensome to applicants. NTIA, however, does expect that distance learning applicants will submit documentation that they have coordinated their project with appropriate state telecommunications agencies in their service area.

Section 2301.12 Federal Communications Commission Authorizations

Section 2301.12(a) provides, in part, that "Each applicant whose project requires FCC authorization must file an application for that authorization on or before the closing date. NTIA recommends that its applicants submit PTFP-related FCC applications to the FCC at least 60 days prior to the PTFP closing date."

For the FY 1999 PTFP, applicants may submit applications to the FCC after the closing date, but do so at their own risk. Applicants are urged to submit their FCC applications with as much time before the PTFP closing date as possible. No grant will be awarded for a project requiring FCC authorization until confirmation has been received by NTIA from the FCC that the necessary authorization will be issued.

Section 2301.12(b) provides that "In the case of FCC authorizations where it is not possible or practical to submit the FCC application with the PTFP application, such as C-band satellite uplinks * * * a copy of the FCC application as it will be submitted to the FCC, or the equivalent engineering data, must be included in the PTFP application."

For the FY 1999 PTFP applications, since there is no potential for terrestrial interference with Ku-band satellite uplinks, grant applicants for Ku-band satellite uplinks may submit FCC applications after a PTFP award is made. Grant recipients for Ku-band satellite uplinks will be required to document receipt of FCC authorizations to operate the uplink prior to the release of Federal funds.

Section 2301.12(d) provides that "Any FCC authorization required for the project must be in the name of the applicant for the PTFP grant."

For the FY 1999 PTFP applications, NTIA may accept FCC authorizations that are in the name of an organization other than the PTFP applicant in certain circumstances. Applicants requiring the use of FCC authorizations issued to another organization should discuss in the application Program Narrative why the FCC authorization must be in the other organization's name. NTIA believes that such circumstances will be rare and, in our experience, are usually limited to authorizations such as those for microwave interconnections or satellite uplinks.

Section 2301.12(g) provides that "If the applicant fails to file the required FCC application(s) by the closing date * * * the Agency may reject or return the application."

As noted above, for the FY 1999 PTFP applications, NTIA does not require that the FCC applications must be filed by the closing date. While NTIA is permitting submission of FCC applications after the closing date, applicants are reminded that they must continue to provide copies of FCC applications, as they were filed or will be filed, or equivalent engineering data, in the PTFP application so NTIA can properly evaluate the equipment request. These include applications for permits, construction permits and licenses already received for: (1) Construction of broadcast station

(including a digital broadcasting facility), or translator, (2) microwave facilities, (3) ITFS authorizations, (4) SCA authorizations, and (5) requests for extensions of time.

Applicants should note that they must continue to comply with the provisions of Executive Order 12372, "Intergovernmental Review of Federal Programs." The Executive Order requires applicants for financial assistance under this program to file a copy of their application with the Single Points of Contact (SPOC) of all states relevant to the project. Applicants are required to provide a copy of their completed application to the appropriate SPOC on or before January 14, 1999. Applicants are encouraged to contact the appropriate SPOC well before the PTFP closing date.

Indirect costs for *construction* applications are not supported by this program. The total dollar amount of the indirect costs proposed in a *planning* application under this program must not exceed the indirect cost rate negotiated and approved by a cognizant Federal agency prior to the proposed effective date of the award or 100 percent of the total proposed direct costs dollar amount in the application, whichever is less.

You are not required to respond to a collection of information sponsored by the Federal government, and the government may not conduct or sponsor this collection, unless it displays a currently valid OMB control number or if we fail to provide you with this notice.

All primary applicants must submit a completed Form CD–511, "Certifications Regarding Debarment, Suspension, and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying," and the following explanations are hereby provided:

(1) *Nonprocurement Debarment and Suspension.* Prospective participants (as defined at 15 CFR Part 26, Section 105) are subject to 15 CFR Part 26, "Nonprocurement Debarment and Suspension" and the related section of the certification form prescribed above applies;

(2) *Drug Free Workplace.* Grantees (as defined at 15 CFR Part 26, Section 605) are subject to 15 CFR Part 26, Subpart F, "Government-wide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form prescribed above applies;

(3) *Anti-lobbying.* Persons (as defined at 15 CFR Part 28, Section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form prescribed above applies to applicants/bidders for grants, cooperative agreements, and contracts for more than $100,000, and loans and loan guarantees for more than $150,000, or the single family maximum mortgage limit for affected programs, whichever is greater; and

(4) *Anti-lobbying Disclosures.* Any applicant that has paid or will pay for lobbying using any funds must submit an SF–LLL, "Disclosure of Lobbying Activities," (OMB Control Number 0348–0046) as required under 15 CFR Part 28, Appendix B.

Recipients shall require applicants/bidders for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the grant award to submit, if applicable, a completed Form CD–512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions and Lobbying" and disclosure form, SF–LLL, "Disclosure of Lobbying Activities." Form CD–512 is intended for the use of recipients and should not be transmitted to the Department. SF–LLL submitted by any tier recipient or subrecipient should be submitted to the Department in accordance with the instructions contained in the award document.

If an application is selected for funding, the Department of Commerce has no obligation to provide any additional future funding in connection with that award. Renewal of an award to increase funding or extend the period of performance is at the total discretion of the Department.

Recipients and subrecipients are subject to all Federal laws and Federal and DOC policies, regulations, and procedures applicable to Federal assistance awards. In addition, unsatisfactory performance by the applicant under prior Federal awards may result in the application not being considered for funding.

If applicants incur any costs prior to an award being made, they do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal or written assurance that they have received, there is no obligation on the part of the Department to cover preaward costs.

No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either: (1) the delinquent account is paid in full; (2) a negotiated repayment schedule is established and at least one payment is received, or (3) other arrangements satisfactory to the Department are made.

Applicants are reminded that a false statement on the application may be grounds for denial or termination of funds and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

Special Note: NTIA has established a policy which is intended to encourage stations to increase from 25 percent to 50 percent the matching percentage for those proposals that call for equipment replacement, improvement, or augmentation (PTFP Policy Statement, (56 FR 59168 (1991)). The presumption of 50 percent funding will be the general rule for the replacement, improvement or augmentation of equipment A showing of extraordinary need (i.e. small community-licensee stations or a station that is licensed to a large institution [e.g., a college or university] documenting that it does not receive direct or in-kind support from the larger institution) or an emergency situation will be taken into consideration as justification for grants of up to 75 percent of the total project cost for such projects.

A point of clarification is in order: NTIA expects to continue funding projects to activate stations or to extend service at up to 75 percent of the total project cost. NTIA will do this because applicants proposing to provide first service to a geographic area ordinarily incur considerable costs that are not eligible for NTIA funding. The applicant must cover the ineligible costs including those for construction or renovation of buildings and other similar expenses.

Since NTIA has limited funds for the PTFP program, the PTFP Final Rules published November 8, 1996 modified NTIA's policy regarding the funding of planning applications. Our policy now includes the general presumption to fund planning projects at no more than 75 percent of the project costs. NTIA notes that most of the planning grants awarded by PTFP in recent years include matching in-kind services and funds contributed by the grantee. The new NTIA policy therefore codifies what already has become PTFP practice. NTIA, however, is mindful that planning grants are sometimes the only resource that emerging community groups have with which to initiate the planning of new facilities in unserved areas. We therefore will continue to award up to 100 percent of total project costs in cases of extraordinary need (e.g. small community group proposing to initiate new public telecommunication service).

We wish to take this opportunity to restate the policy published in the November 22, 1991, PTFP Policy Statement (56 FR 59168 (1991)), regarding applicants' use of funds from the Corporation for Public Broadcasting (CPB) to meet the local match requirements of the PTFP grant. NTIA continues to believe that the policies and purposes underlying the PTFP requirements could be significantly frustrated if applicants routinely relied upon another Federally supported grant program for local matching funds. Accordingly, NTIA has limited the use of CPB funds for the non-Federal share of PTFP projects to circumstances of "clear and compelling need" (15 CFR § 2301.6(c)(2)). NTIA intends to maintain that standard and to apply it on a case-by-case basis.

II. Digital Broadcasting

The FCC's adoption of the Fifth Report and Order in April 1997 requires that all public television stations begin the broadcast of a digital signal by May 1, 2003. NTIA believes that it is critical that all public television applicants fully consider digital technology in any request for equipment replacement submitted to PTFP. Any public television applicant must describe whether it has a plan for digital conversion to meet the FCC's mandate and whether the requested equipment is consistent with that plan. If the applicant is developing a plan for digital conversion, the application should address how the requested equipment will be consistent with the overall objective of converting the facility for digital broadcasting.

NTIA recognizes that digital technology will be an important means for the more efficient creation and distribution of programming in the future. Consequently, public broadcasters seeking to replace, upgrade, and buy new equipment that employs digital technology will be permitted, when appropriate, to use PTFP funds for such purposes.

For fiscal year 1998, NTIA awarded $12.5 million in funds to 50 projects which assisted public television stations in the conversion to digital technologies. The awards ranged from $36,405 to $967,400. The use of digital technologies is also appropriate for public radio facilities. NTIA funded projects for digital STL's and audio production equipment which will assist public radio stations as they prepare for conversion to digital technologies. These digital projects are funded as equipment replacement, improvement or augmentation projects with the presumption of a 50 percent Federal share as noted earlier, unless a showing of extraordinary need for a higher percentage has been made pursuant to § 2301.6(b)(ii) of the PTFP Rules.

III. Distance Learning Projects

The growth of digital technologies provides new opportunities for distance learning projects using both broadcast (e.g., the multi-channel capabilities of DTV) or nonbroadcast facilities. Since 1979, NTIA has funded nonbroadcast distance learning projects through the "Special Applications" category as established in § 2301.4(a) of the PTFP Rules. In 1996, NTIA established a similar category for broadcast projects, "Broadcast/other" in § 2301.4(b)(6). NTIA encourages applications in either category for innovative or unique distance learning projects which address demonstrated and substantial community needs.

For fiscal year 1998, NTIA awarded $3.67 million in funds to 12 grants for distance learning projects. The awards ranged from $55,452 to $594,936.

The November 22, 1991, PTFP Policy Statement (56 FR 59168 (1991)) mentioned in the Application Forms and Regulations section discussed a number of issues of particular relevance to applicants proposing *nonbroadcast* educational and instructional projects and potential improvement of nonbroadcast facilities. These policies remain in effect and will be available to all PTFP applicants as part of the Guidelines for preparing FY 1999 PTFP applications.

IV. Eligible and Ineligible Costs

Eligible equipment for the 1999 grant round includes apparatus necessary for the production, interconnection, captioning, broadcast, or other distribution of programming, including but not limited to studio equipment; audio and video storage, processing, and switching equipment; terminal equipment; towers; antennas; transmitters; remote control equipment; transmission line; translators; microwave equipment; mobile equipment; satellite communications equipment; instructional television fixed service equipment; subsidiary communications authorization transmitting and receiving equipment; cable television equipment; and optical fiber communications equipment.

The following list provides clarification regarding several equipment and other cost areas that will be helpful in preparing applications. NTIA also reserves the right to eliminate any costs, whether specified here or not, that it determines are not appropriate prior to the awarding of a grant.

A. Equipment and Supplies

(1) Buildings and Modifications to Buildings. (a) Eligible: Small equipment shelters that are part of satellite earth stations, translators, microwave interconnection facilities, and similar facilities. (b) Ineligible: Purchase or lease of buildings and modifications to buildings, including the renovation of space for studios intended to house eligible equipment; costs associated with removing old equipment.

(2) Land and Land Improvements. (a) Eligible: Site preparation necessary to construct towers and guy anchors for transmission and interconnection equipment. (b) Ineligible: Purchase or lease of land.

(3) Moving Costs. (a) Eligible: Shipping and delivery charges for equipment acquired within the award. (b) Ineligible: Moving costs required by relocation of any facilities.

(4) Reception Equipment. (a) Eligible: Fixed frequency demodulator, as required by good engineering practice for monitoring the off-air transmission of signals; subcarrier demodulator; telemetry transmitters and receivers; satellite receivers; and subcarrier decoders for the handicapped. (b) Ineligible: Consumer-type TV sets and FM receivers.

(5) Tower Modifications. (a) Eligible: Strengthening or modifying a commercial entity's tower to accommodate a public broadcasting entity (structural modifications on towers and/or antenna changes must meet EIA (Electronic Industries Association) and any required local standards). (b) Ineligible: Modifying or strengthening the applicant's tower to accommodate a commercial entity.

(6) Production and Control Room Equipment. (a) Eligible: Standard production studio and control room equipment for TV or radio program production. (b) Ineligible: Consumer-type mixers, tape recorders, turntables, CD players, etc; ancillary production devices such as stopwatches and stop-clocks, building lights, sound effects, scenery and props, cycloramas, sound insulation devices and materials, draperies and related equipment for production use, film and still photography processing, film sound synchronization editing.

(7) Video Equipment. (a) Eligible: Videotape editing and processing equipment that conforms to broadcast-standard quality equipment for field recording and production editing. (b) Ineligible: Consumer level videotape recording formats not accepted in the industry as broadcast-standard quality.

(8) Furniture and Office Equipment. (a) Eligible: Consoles required to mount

equipment such as audio consoles and video switchers. (b) Ineligible: Such items as office furniture, office equipment, studio clocks and systems, blackboards, office intercoms, equipment inventory labels and label-makers, word processors, telephone systems, and printing and duplication equipment.

(9) Expendable Items and Spare Parts. (a) Eligible: A transmitter spare parts kit and one set of final and driver tubes for a transmitter awarded in the grant; a spare parts kit for video tape recorders awarded in the grant. (b) Ineligible: Spare lenses, spare circuit components, spare parts kits for studio equipment, except as noted above; recording tape, film, reels, cartridge tapes, records, compact discs, and record or tape cleaning equipment; art and graphics supplies; maintenance supplies, including replacement final and driver tubes normally considered in the industry as normal maintenance-budget-provided items and similar items.

(10) Backup Equipment. (a) Eligible: Hot standby or backup microwave for the main studio-to-transmitter link only; a backup or spare exciter for a television transmitter, as required by good engineering practice. (b) Ineligible: Redundant equipment, such as spare transmitters, or costs associated with them, as well as backup microwave equipment (except as noted above).

(11) Electric Power. (a) Eligible: Generally, all primary power costs from the output of the main power meter panel; regulators and surge protectors, as required by good engineering practice, to stabilize transmitter RF output. Where primary power is not available or is unusable for broadcast, then PTFP may provide funding for those devices needed to power the facility if the need for that equipment is fully documented in the application. (b) Ineligible: Costs of installing primary power to the facility, including transformers, power lines, gasoline or diesel powered generators, and related equipment.

(12) Test and Maintenance Equipment. (a) Eligible: Required test equipment, as indicated by good engineering practice for the maintenance of the project equipment. (b) Ineligible: Maintenance equipment such as hand and power tools, storage cabinets, and maintenance services.

(13) Air Conditioning and Ventilation. (a) Eligible: The costs to provide ventilation of eligible project equipment, such as ducting for transmitters and transmitter air conditioning, as required by good engineering practice. (b) Ineligible: Unless exceptionally well-documented, air conditioning for control rooms, or equipment rooms, studios, mobile units, and other operational rooms and offices.

(14) Remote Vans. (a) Eligible: Items to equip a remote van for audio/video production. (b) Ineligible: All vehicles.

B. Other Costs

(1) Construction Applications: NTIA generally will not fund salary expenses, including staff installation costs, and pre-application legal and engineering fees. Certain "pre-operational expenses" are eligible for funding. (See 15 CFR § 2301.2.) Despite this provision, NTIA regards its primary mandate to be funding the acquisition of equipment and only secondarily funding of salaries. A discussion of this issue appears in the PTFP Final Rules under the heading *Support for Salary Expenses* in the introductory section of the document.

(2) Planning Applications. (a) Eligible: Salaries are eligible expenses for all planning grant applications, but should be fully described and justified within the application. Planning grant applicants may lease office equipment, furniture and space, and may purchase expendable supplies under the terms of 47 U.S.C. § 392 (c). (b) Ineligible: Planning grant applications cannot include the cost of constructing or operating a telecommunications facility.

(3) Audit Costs. Audits shall be performed in accordance with audit requirements contained in Office of Management and Budget Circular A–133, Audits of States, Local Governments, and Non-Profit Organizations, revised June 30, 1997. OMB Circular A–133 requires that non-profit organizations, government agencies, Indian tribes and educational institutions expending more than $300,000 in federal funds during a one-year period conduct a single audit in accordance with guidelines outlined in the circular. Applicants are reminded that other audits may be conducted by the Office of Inspector General.

NTIA recognizes that most of its grant recipients are divisions of state and local governments or are public broadcasting facilities, all of which routinely conduct annual audits. In order to make the maximum amount of monies available for equipment purchases and planning activities, NTIA will therefore only fund audit costs in exceptional circumstances.

V. Notice of Applications Received

In accordance with 15 CFR § 2301.13, NTIA will publish a notice in the **Federal Register** listing all applications received by the Agency. Listing an application in such a notice merely acknowledges receipt of an application to compete for funding with other applications. Publication does not preclude subsequent return of the application for the reasons discussed under the Dates section above, or disapproval of the application, nor does it assure that the application will be funded. The notice will also include a request for comments on the applications from any interested party.

VI. Evaluation Process

See 15 CFR § 2301.16 for a description of the Technical Evaluation and 15 CFR § 2301.17 for the Evaluation Criteria.

VII. Selection Process

Based upon the above cited evaluation criteria, the PTFP program staff prepares summary recommendations for the PTFP Director. These recommendations incorporate outside reviewers rankings and recommendations, engineering assessments, and input from the National Advisory Panel, State Single Point of Contacts and state telecommunications agencies. Staff recommendations also consider project impact, the cost/benefit of a project and whether review panels have consistently applied the evaluation criteria. The PTFP Director will consider the summary recommendations prepared by program staff, will recommend the funding order of the applications, and will present recommendations to the OTIA (Office of Telecommunications and Information Applications) Associate Administrator for review and approval. The PTFP Director recommends the funding order for applications in three categories: "Recommended for Funding," "Recommended for Funding if Funds Available," and "Not Recommended for Funding." See 15 CFR § 2301.18 for a description of the selection factors retained by the Director, OTIA Associate Administrator, and the Assistant Secretary for Telecommunications and Information.

Upon review and approval by the OTIA Associate Administrator, the Director's recommendations will then be presented to the Selection Official, the NTIA Administrator. The NTIA Administrator selects the applications for possible grant award taking into consideration the Director's recommendations and the degree to which the slate of applications, taken as a whole, satisfies the program's stated purposes set forth at 15 CFR § 2301.1(a) and (c). Prior to award, applications may be negotiated between PTFP staff and the applicant to resolve whatever differences might exist between the original request and what PTFP proposes to fund. Some applications may be dropped from the proposed slate due to lack of Federal Communications Commission licensing authority, an applicant's inability to make adequate assurances or certifications, or other reasons. Negotiation of an application does not ensure that a final award will be made. The PTFP Director recommends final selections to the NTIA Administrator applying the same factors as listed in 15 CFR § 2301.18. The Administrator then makes the final award selections taking into consideration the Director's recommendations and the degree to which the slate of applications, taken as a whole, satisfies the program's stated purposes in 15 CFR § 2301.1 (a) and (c).

VIII. Project Period

Planning grant award periods customarily do not exceed one year, whereas construction grant award periods commonly range from one to two years. Although these time frames are generally applied to the award of all PTFP grants, variances in project periods may be based on specific circumstances of an individual proposal.

Authority: The Public Telecommunications Financing Act of 1978, as amended, 47 U.S.C. §§ 390–393, 397–399(b).

Title 3—

The President

Executive Order 13105 of November 2, 1998

Open Enrollment Season for Participants in the Foreign Service Retirement and Disability System and the Central Intelligence Agency Retirement and Disability System

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 827 of the Foreign Service Act of 1980 (22 U.S.C. 4067) and section 292 of the Central Intelligence Agency Retirement Act of 1964 (50 U.S.C. 2141), and in order to conform further the Foreign Service Retirement and Disability System and the Central Intelligence Agency Retirement and Disability System to the Civil Service Retirement and Disability System, it is hereby ordered as follows:

Section 1. In conjunction with section 860 of the Foreign Service Act of 1980 (22 U.S.C. 4071i), the Secretary of State shall issue regulations providing for an open enrollment period from November 1, 1998, to April 30, 1999, during which employee participants in the Foreign Service Retirement and Disability System may elect to become subject to the Foreign Service Pension System.

Sec. 2. In conjunction with section 307(a) of the Central Intelligence Agency Retirement Act of 1964 (50 U.S.C. 2157(a)), the Director shall provide for an open enrollment period from November 1, 1998, to April 30, 1999, during which employee participants in the Central Intelligence Agency Retirement and Disability System may elect to become subject to the Federal Employees' Retirement System, comparable to the election for civil service employees provided for by the Federal Employees' Retirement System Open Enrollment Act of 1997, Public Law 105–61.

William J. Clinton

THE WHITE HOUSE,
November 2, 1998.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at http://www.nara.gov/fedreg.

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at http://www.access.gpo.gov/su_docs/. Some laws may not yet be available.

H.R. 678/P.L. 105–331
Thomas Alva Edison Commemorative Coin Act (Oct. 31, 1998; 112 Stat. 3073)

H.R. 1853/P.L. 105–332
Carl D. Perkins Vocational and Applied Technology Education Amendments of 1998 (Oct. 31, 1998; 112 Stat. 3076)

H.R. 2000/P.L. 105–333
ANCSA Land Bank Protection Act of 1998 (Oct. 31, 1998; 112 Stat. 3129)

H.R. 2327/P.L. 105–334
Drive for Teen Employment Act (Oct. 31, 1998; 112 Stat. 3137)

H.R. 3830/P.L. 105–335
Utah Schools and Lands Exchange Act of 1998 (Oct. 31, 1998; 112 Stat. 3139)

H.R. 3874/P.L. 105–336
William F. Goodling Child Nutrition Reauthorization Act of 1998 (Oct. 31, 1998; 112 Stat. 3143)

H.R. 4259/P.L. 105–337
Haskell Indian Nations University and Southwestern Indian Polytechnic Institute Administrative Systems Act of 1998 (Oct. 31, 1998; 112 Stat. 3171)

H.R. 4655/P.L. 105–338
Iraq Liberation Act of 1998 (Oct. 31, 1998; 112 Stat. 3178)

S. 1021/P.L. 105–339
Veterans Employment Opportunities Act of 1998 (Oct. 31, 1998; 112 Stat. 3182)

S. 1722/P.L. 105–340
Women's Health Research and Prevention Amendments of 1998 (Oct. 31, 1998; 112 Stat. 3191)

S. 2285/P.L. 105–341
Women's Progress Commemoration Act (Oct. 31, 1998; 112 Stat. 3196)

S. 2240/P.L. 105–342
Adams National Historical Park Act of 1998 (Nov. 2, 1998; 112 Stat. 3200)

S. 2246/P.L. 105–343
To amend the Act which established the Frederick Law Olmsted National Historic Site, in the Commonwealth of Massachusetts, by modifying the boundary, and for other purposes. (Nov. 2, 1998; 112 Stat. 3203)

S. 2413/P.L. 105–344
Prohibiting the conveyance of Woodland Lake Park tract in Apache-Sitgreaves National Forest in the State of Arizona unless the conveyance is made to the town of Pinetop-Lakeside or is authorized by Act of Congress. (Nov. 2, 1998; 112 Stat. 3204)

S. 2427/P.L. 105–345
To amend the Omnibus Parks and Public Lands Management Act of 1996 to extend the legislative authority for the Black Patriots Foundation to establish a commemorative work. (Nov. 2, 1998; 112 Stat. 3205)

S. 2505/P.L. 105–346
To direct the Secretary of the Interior to convey title to the Tunnison Lab Hagerman Field Station in Gooding County, Idaho, to the University of Idaho. (Nov. 2, 1998; 112 Stat. 3206)

S. 2561/P.L. 105–347
Consumer Reporting Employment Clarification Act of 1998 (Nov. 2, 1998; 112 Stat. 3208)

S.J. Res. 51/P.L. 105–348
Granting the consent of Congress to the Potomac Highlands Airport Authority Compact entered into between the States of Maryland and West Virginia. (Nov. 2, 1998; 112 Stat. 3212)

S.J. Res. 58/P.L. 105–349
Recognizing the accomplishments of Inspectors General since their creation in 1978 in preventing and detecting waste, fraud, abuse, and mismanagement, and in promoting economy, efficiency, and effectiveness in the Federal Government. (Nov. 2, 1998; 112 Stat. 3216)

H.J. Res. 138/P.L. 105–350
Appointing the day for the convening of the first session of the One Hundred Sixth Congress. (Nov. 3, 1998; 112 Stat. 3218)

S. 538/P.L. 105–351
To authorize the Secretary of the Interior to convey certain facilities of the Minidoka project to the Burley Irrigation District, and for other purposes. (Nov. 3, 1998; 112 Stat. 3219)

S. 744/P.L. 105–352
Fall River Water Users District Rural Water System Act of 1998 (Nov. 3, 1998; 112 Stat. 3222)

Securities Litigation Uniform Standards Act of 1998 (Nov. 3, 1998; 112 Stat. 3227)

S. 2524/P.L. 105–354
To codify without substantive change laws related to Patriotic and National Observances, Ceremonies, and Organizations and to improve the United States Code. (Nov. 3, 1998; 112 Stat. 3238)

Last List November 5, 1998

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, send E-mail to **listproc@lucky.fed.gov** with the text message:

subscribe PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new public laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFR  SMITH212J                DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFRDO  SMITH212J              DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

Public Laws

105th Congress, 2nd Session, 1998

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 105th Congress, 2nd Session, 1998.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara/index.html

Attention: Federal Agencies

Plain Language Tools Are Now Available

The Office of the Federal Register offers Plain Language Tools on its Website to help you comply with the President's Memorandum of June 1, 1998—Plain Language in Government Writing (63 FR 31883, June 10, 1998). Our address is: http://www.nara.gov/fedreg

For more in-depth guidance on the elements of plain language, read "Writing User-Friendly Documents" on the National Partnership for Reinventing Government (NPR) Website at: http://www.plainlanguage.gov

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 63 FR 12345.

Printed on recycled paper.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public breifings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: Tuesday, Nov. 24, 1998 at 9:00 am.
WHERE: Office of the Federal Register
Conference Room
800 North Capitol Street, NW.
Washington, DC

Rules and Regulations

Federal Register
Vol. 63, No. 216
Monday, November 9, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Farm Service Agency

7 CFR Part 737

RIN 0560–AD92

Tobacco Warehouses

AGENCY: Farm Service Agency, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations governing tobacco warehouses under the United States Warehouse Act (USWA). A proposed rule was published in the July 28, 1995, **Federal Register** (60 FR 38766). On June 20, 1997, a final rule covering only administrative changes to various commodity regulations was published in the **Federal Register** (62 FR 33539). Included in that final rule were two administrative changes which had been included in the tobacco warehouse proposed rule. Therefore, this final rule does not address those two administrative changes. In the proposed rule the Farm Service Agency (FSA) proposed excluding tobacco auction warehouses from USWA licensing requirements. This final rule adopts the position taken in the proposed rule and excludes those tobacco auction warehouses from licensure under the USWA. FSA has determined that it is not necessary to define "warehouse" as suggested in the proposed rule. The USWA, as amended (7 U.S.C. 241 *et seq.*), provides the Secretary of Agriculture with the discretion to establish a voluntary licensing program for public warehouses that store agricultural commodities under a bailment relationship with its depositors. Accordingly, the Secretary will exercise this discretion and through FSA will discontinue licensing tobacco auction warehouses under the USWA and all licenses issued to tobacco auction warehouses covered by this rule will be administratively canceled by Secretarial determination on October 31, 1999. October 31, 1999, was selected as the effective date so as to allow the affected tobacco auction warehouses sufficient notice and time to seek a State license or changes in State law to the extent that this rule may have an effect on warehouse rates. In addition, this final rule makes some minor "housekeeping" amendments.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Steve Gill, Director, Warehouse and Inventory Division, Farm Service Agency, STOP 0553, 1400 Independence Avenue, S.W., Washington, DC 20250–0553; telephone 202–720–2121 or FAX 202–690–3123, e-mail: Steve__Gill@wdc.fsa.usda.gov.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule has been determined to be not significant for the purposes of Executive Order 12866 and therefore has not been reviewed by the Office of Management and Budget (OMB).

Executive Order 12988

This final rule has been reviewed in accordance with Executive Order 12988. The provisions of this final rule do not preempt State laws, are not retroactive, and do not involve administrative appeals.

Environmental Evaluation

It has been determined by an environmental evaluation that this action will not have a significant impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Executive Order 12612

It has been determined that this rule is consistent with the Federalism principles espoused in Executive Order 12612, and does not warrant the preparation of a Federalism Assessment.

Executive Order 12372

This program/activity is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

Paperwork Reduction Act

The amendments set forth in this final rule do not affect information collection or recordkeeping requirements.

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule because this rule will not have a significant effect on a substantial number of small businesses. Licensing under the USWA is strictly voluntary on the warehouse operator's part.

Unfunded Mandate Reform Act of 1995

This rule contains no Federal mandates under the regulatory provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) for State, local, and tribal governments or the private sector. Thus, this rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Background

The USWA, as amended (7 U.S.C. § 241 *et seq.*), provides that the Secretary of Agriculture may issue a license for the conduct of public warehouses that store agricultural commodities. The USWA is implemented, as it pertains to tobacco warehouses, by regulations at 7 CFR part 737 and is administered by FSA. Approximately, 1,500 entities hold licenses under the USWA to store one or more of eight different agricultural commodities. Presently, there are six tobacco auction warehouses licensed under the USWA.

Summary of Comments

A proposed rule was published in the **Federal Register** (60 FR 38766) on July 28, 1995. The proposed rule excluded tobacco auction warehouse from licensure under the USWA. Comments from interested parties were due on or before August 28, 1995. A total of 3,242 comments were received from 14 different sectors as follows: 2 Cotton Associations; 1 Chamber of Commerce; 15 Farm Bureaus; 20 Grain Warehouse Associations; 1 High School (FFA Chapter); 60 Interested Parties; 1 Legal Counsel; 3 Law Makers (State or Federal); 3,113 Tobacco Producers; 7 State Agriculture Departments; 3 Stabilization Corporations; 4 Tobacco Producer Associations; 5 Tobacco Warehouse Associations; and 7 Tobacco

Warehouses. Of the above comments 2,964 were against the proposed rule, 275 were in favor of the proposed rule and 3 had no opinion. Of the comments received in opposition to the proposal, 2,236 were in the form of preprinted postcards that were submitted by tobacco producers in Virginia.

Producers not in favor of the proposed rule expressed confidence in the security offered by the USWA and therefore, asked that tobacco warehouses to which they deliver tobacco be allowed to remain licensed under the USWA. Producers in favor of the proposed rule expressed a common concern about the charges assessed by warehouses licensed under the USWA.

The primary functions of tobacco auction warehouses are currently regulated by several USDA agencies. Tobacco auction warehouses approved by the Agricultural Marketing Service (AMS) and FSA may sell producer-owned and dealer-owned tobacco. AMS strictly regulates the manner in which the tobacco must be presented for sale and graded for sale. Further, AMS regulations include detailed recordkeeping requirements. Further, AMS has representatives on-site during all sales of tobacco.

In addition, the Agricultural Adjustment Act of 1938, as amended, and the Agricultural Act of 1949, as amended, strictly regulate the sale of tobacco. The Commodity Credit Corporation (CCC) and FSA regulate auction warehouses through the Tobacco Marketing Quota and Price Support Programs they administer. These regulations are codified at 7 CFR part 723 and 1464. Under these regulations, CCC and FSA require that warehouse operators retain detailed records of all tobacco handled by them. The tobacco and the transactions associated with it must be tracked and recorded from the time the tobacco is brought into the warehouse by producers, to the time it leaves the warehouse.

The type and level of regulation by AMS, CCC, and FSA are unique to tobacco auction warehouses. Producers who believe they have not been treated fairly by the warehouse operator may seek relief directly from the on-site representatives of the various Government Agencies. If such allegations are confirmed, under the provisions of 7 CFR parts 723 and 1464, CCC or FSA has the right to take appropriate actions against the tobacco auction warehouse to protect the interests of producers. Accordingly, because tobacco auction warehouses are sufficiently regulated by other USDA regulations, and involve sales, primarily, rather than storage, FSA will discontinue licensing tobacco auction warehouses under the USWA. Additionally, those licenses currently held by tobacco auction warehouse operators will be administratively canceled by Secretarial determination effective October 31, 1999.

List of Subjects in 7 CFR Part 737

Administrative practice and procedure, Agricultural Commodities, Surety Bonds, Tobacco, Warehouses.

Accordingly, the provisions of 7 CFR part 737 are amended as follows:

PART 737—TOBACCO WAREHOUSES

1. The authority citation for part 737 continues to read as follows:

Authority: 7 U.S.C. 241 *et seq.*

2. Section 737.2 is amended by revising the introductory text and paragraph (j) to read as follows:

§ 737.2 Terms defined.

For the purposes of this part, unless otherwise provided, the following terms shall mean:

* * * * *

(j) *Warehouseman.* Any person lawfully engaged in the business of storing tobacco and holding a warehouse license.

* * * * *

3. Section 737.4 is revised to read as follows:

§ 737.4 Grounds for not issuing license.

A license for the conduct of a warehouse shall not be issued if it be found by the Secretary, or his designated representative, that the warehouse is not suitable for the proper storage of tobacco, that the warehouseman is insolvent or is incompetent to conduct such warehouse in accordance with the act and the regulations in this part, or that there is any other sufficient reason within the purposes of the act for not issuing such license. Further, a license shall not be issued for any place to which tobacco is delivered by the producers or their agents for the purposes of obtaining CCC price support advances and for the display and auction of tobacco.

4. Section 737.34 is revised to read as follows:

§ 737.34 Package arrangement.

(a) Each warehouseman shall arrange the packages of tobacco so that the identification number thereon as required by § 737.33 is visible, readily accessible, and arranged so as to permit an accurate check thereof, unless waived in writing by the Administrator.

(b) If, at any time, a warehouseman shall be offered tobacco in such quantity for storage so as to exceed the capacity of this warehouse, as shown in his license, he shall not accept such tobacco until he has first secured authority through an amended license, and after such authority has been granted the warehouseman shall continue to arrange the tobacco in accordance with paragraph (a) of this section.

Signed at Washington, DC, on November 3, 1998.

Keith Kelly,

Administrator, Farm Service Agency.

[FR Doc. 98–29898 Filed 11–6–98; 8:45 am]

BILLING CODE 3410–05–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 911 and 915

[Docket No. FV98–911–2 FIR]

Limes and Avocados Grown in Florida; Relaxation of Container Dimension, Weight, and Marking Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting, as a final rule, without change, the provisions of an interim final rule changing the container requirements prescribed under the Florida lime and avocado marketing orders. The marketing orders regulate the handling of limes grown in Florida and avocados grown in South Florida and are administered locally by the Florida Lime Administrative Committee and the Avocado Administrative Committee (Committees). This rule continues in effect changes to simplify container marking requirements for both limes and avocados by reducing the number of times the size for limes and the grade for avocados need to appear on a container. This rule also continues in effect the removal of weight limits on lime and avocado containers packed within a master container, and the relaxation of certain minimum weight requirements on containers of avocados. In addition, this rule continues in effect the elimination of specific container dimension requirements for both limes and avocados, but maintains net weight requirements. These changes are needed to reduce handling costs and provide greater flexibility in lime and avocado packing operations.

EFFECTIVE DATE: December 9, 1998.

FOR FURTHER INFORMATION CONTACT: Doris Jamieson, Marketing Specialist, Southeast Marketing Field Office, Marketing Order Administration Branch, F&V, AMS, USDA, P.O. Box 2276, Winter Haven, Florida 33883; telephone: (941) 299–4770, Fax: (941) 299–5169; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, P.O. Box 96456, Washington, DC 20090–5456; telephone: (202) 720–2491, Fax: (202) 205–6632. Small businesses may request information on complying with this regulation, or obtain a guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456; telephone (202) 720–2491, Fax: (202) 205–6632, or E-mail: Jay_N_Guerber@usda.gov. You may view the marketing agreement and order small business compliance guide at the following web site: http://www.ams.usda.gov/fv/moab.html.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 126 and Marketing Order No. 911, both as amended (7 CFR part 911), regulating the handling of limes grown in Florida, and Marketing Agreement No. 121 and Marketing Order No. 915, both as amended (7 CFR part 915), regulating the handling of avocados grown in Florida, hereinafter referred to as the "orders." The marketing agreements and orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after date of the entry of the ruling.

This rule continues in effect several changes to the orders' pack and container rules and regulations. It continues in effect changes in container marking requirements for both limes and avocados that reduce the number of times the size for limes and the grade for avocados need to appear on a container. In addition, this rule continues in effect the removal of net weight limits on lime and avocado containers packed within a master container, and the relaxation of certain minimum net weight requirements on containers of avocados. This rule also continues in effect the elimination of specific container dimension requirements for both limes and avocados. Therefore, this rule reduces handling costs and provides greater flexibility in lime and avocado packing operations. The committees met several times to discuss and recommend changes needed in the container regulations. The committees met and unanimously recommended these changes on July 9, 1997, August 13, 1997, and February 11, 1998.

Sections 911.48 and 915.51 of the orders provide authority to issue regulations establishing specific pack and container requirements for limes and avocados, respectively. These requirements are specified under sections 911.311, 911.329 and 911.344 for limes, and under sections 915.305 and 915.306 for avocados. These sections specify, in part, container size, weight, and marking requirements.

This rule makes several changes to the pack and container provisions under the orders. The first change reduces the number of times the size for limes and the grade for avocados need to appear on a container. Sections 911.311(5)(d) and 915.306(a)(6) of the rules and regulations outline the container marking requirements for limes for size and avocados for grade, respectively. Prior to this change, requirements specified that the size for limes be marked in letters at least one inch in height on two sides of the container. For avocados, the grade was to be stamped in letters at least one inch in height on the top and two sides of the lid. This rule relaxes these requirements by establishing that containers be stamped only once, anywhere except the bottom of the container.

The size and grade information on a container is usually applied automatically by machine, or stamped individually by hand. Each time a container is stamped, there is an associated cost. The committees recommended reducing the number of times a container must be stamped, as well as expanding the possible stamp location, to provide handlers additional flexibility, and to reduce costs.

The committees believe this change will benefit both large and small packing operations. Larger operations use automated stamping. Former stamping requirements meant that each packing line needed to have at least two in-line stamp rollers or ink jet printers. In cases where the line had only one stamping device, the containers had to be reversed and run through the line a second time for limes, and three times for avocados. This could take a considerable amount of time. This change allows containers to move more rapidly through the packing line, reduces the number of stamping machines required, and decreases the costs associated with these activities.

Most smaller operations stamp the containers by hand. To meet the prior requirements, each box had to be rotated and stamped in more than one location. This increased the time and effort needed to pack each box. Reducing the number of times a container must be stamped will decrease the amount of labor needed and the associated stamping costs required to meet these requirements.

The requirement that containers be stamped more than once with size or grade information originated from the way limes and avocados were marketed by retailers in the past. Limes and avocados were, at one time, marketed and sold out of the containers in which the fruit was originally packed. Having the information on the container appear in several locations was done so that the customer could read it. However, the way limes and avocados are marketed has changed. Rather than being presented in the shipping container, retailers move the fruit to display bins.

The stamping of containers with required information benefits the retailer and helps the committees check that the lots (shipments) meet order requirements. Retailers tend to buy in large lots, purchasing a specified size and grade. The number of times an individual box needs to be stamped is less important. The committees anticipate that this change will reduce costs and give handlers additional flexibility under the rules and

regulations. Therefore, the committees recommended relaxing the stamping requirements for both limes and avocados.

The next change this rule makes is to the weight limits on individual containers that are packed inside larger master containers. Prior to this rule, sections 911.329(a)(3) and 915.305(b) specified that individual packages of limes or avocados contained within master containers were not to exceed four pounds in weight. This rule relaxes this weight limit, allowing packaged limes or avocados contained within master containers to exceed four pounds in weight.

The committees are always looking for ways to strengthen and expand the market for limes and avocados. One way they do this is through the approval of experimental containers not currently included under the regulations. This is done for market research purposes. The committees use such research to determine the benefits and acceptance of different containers in the marketplace.

The use of master containers packed with limes and avocados in packages in excess of 4 pounds has been approved on an experimental bases. The approvals were made to allow handlers to meet specific requests from their customers. Consequently, these larger sized packages within a master container have been shown to have a market potential.

The committees both discussed the merits of eliminating the four pound limit on packages within a master container. The committees believe this change will provide handlers with additional marketing flexibility, increased sales potential, and with more opportunities to satisfy customers with special needs. Based on the information collected from the use of the trial containers, the committees recommended that the four pound limit on packages within a master container be removed.

This rule also lowers certain minimum net weight requirements for containers of avocados. Section 915.305 specifies minimum weight requirements for avocados packed under the marketing order for avocados grown in Florida. Prior to this rule, regulations specified that avocados be packed in containers of 8.5, 12½, 25, 32, or 34 pounds designated net weights. This rule reduces the net weight requirements of 12½, 25, 32, and 34 pounds to 12, 24, 31, and 33 pounds, as recommended by the Avocado Administrative Committee (AAC). AAC members agreed that the problems prompting this change were more prevalent in the containers associated with the last four weights. Therefore, no change was recommended for the 8.5 pound designated net weight.

Handlers use containers that are associated by size with the minimum weights listed under the rules and regulations. These weight requirements closely match the capacity of the containers. These containers are inspected by the Federal-State Inspection Service (FSIS). One of the things FSIS checks is whether the packed containers meet the established minimum weight requirements.

An allowable tolerance for variation from the requirements is specified under the rules and regulations. With respect to each lot of containers of minimum weights 12½ and 25 pounds, only 5 percent or less, by count, of the individual containers in the lot may fail to meet the applicable specified weight. The tolerance is 10 percent for minimum weights of 32 and 34 pounds. If the allowable tolerances are exceeded, the lot fails inspection and would need to be reworked and repacked before it could meet inspection.

Failing inspection and having to rework a lot after it has been packed results in a considerable loss of time and money for the individual handler. One AAC member used the example of a 12½ pound net weight container packed with 16 ounce avocados in a single layer with 12 avocados per layer to illustrate the problem. He said that when FSIS found the minimum weight to be 8 ounces short in enough boxes to exceed the tolerance, they would fail the lot, requiring it to be redone. Handlers then are forced to make a choice between adding an additional avocado to each container, or risk the possibility of failing the minimum net weight requirement. AAC members concurred with the problem presented by this particular situation. Several handlers stated that rather than risk being underweight, they would force an additional avocado into the container. The handlers agreed that in many cases, this meant that they were literally giving one avocado per pack away.

In addition, members stated that this practice of over packing the containers was having a negative effect on the avocados during shipment. The AAC discussed that some shipments were being received out of the production area in poor condition due to the over filling of containers to ensure compliance with the minimum net weight requirements. The containers were so tightly packed that the avocados were bruised or damaged in transit.

The AAC understands the benefits of a uniform pack. However, in this case, the requirements were having a negative effect on the condition of the avocados. Changing container sizes to better accommodate the required weights would be difficult and costly. Handlers have containers in inventory, and have their equipment adjusted to those containers. By lowering the minimum net weights, handlers will be able to use the boxes they have. This change will also reduce the need to add additional avocados to meet net weight requirements. In addition, it will help reduce the possibility of containers failing the minimum weight requirement, and save handlers the expense of reworking failed lots of avocados. This change also will benefit growers by providing greater packouts and additional grower revenue. Therefore, the AAC recommended lowering the minimum net weights of 12½, 25, 32, and 34 pounds to 12, 24, 31, and 33 pounds designated net weights. However, this action does not change the established tolerances or the requirement for a fairly tight pack.

The final change made by this rule is the elimination of specific container dimension requirements from both orders' rules and regulations. Prior to this rule, requirements included dimensions for all authorized containers of limes and avocados, specifying specific measurements for height, width, and depth. This rule eliminates the specific dimension constraints, but maintains the container net weight requirements.

Sections 911.329 and 915.305 of the rules and regulations outlined container dimension requirements for limes and avocados, respectively. These sections established specific interior dimensions in inches for containers approved for use under the orders. The dimensions varied from a small 5.5 pound container with measurements of $7\frac{1}{2} \times 11\frac{7}{8} \times 4\frac{1}{4}$ inches to a large 42 pound container with measurements of $12\frac{3}{4} \times 15\frac{1}{4} \times 10\frac{3}{4}$ inches for limes. Avocados also had similar specific interior dimensions, from a small 8.5 pound container with dimensions of $16\frac{1}{2} \times 13\frac{1}{2} \times 3\frac{1}{4}$ inches to a large 34 pound container with dimensions of $11 \times 16\frac{1}{4} \times 10\frac{3}{4}$ inches.

A recent review of the containers in use throughout the industry revealed that interior dimensions varied from handler to handler, and in many cases, were different than those specified in the rules and regulations. Some of the differences occurred in the box manufacturing process, where tolerances were granted to allow for equipment adjustments.

While the dimensions of containers have varied throughout the industry, the adherence to the net weight requirements has not. Under current inspection procedures, the containers are being weighed and checked for compliance with net weight requirements. This means that even though container dimensions may vary somewhat among individual handlers, the essential volume among like containers is the same. Therefore, rather than revising the rules and regulations to incorporate numerous additional containers with specific dimensions, the committees voted to eliminate the references to set measurements while maintaining the container net weight requirements.

The committees concluded that requiring handlers to use containers with specific dimensions is not necessary as long as the containers used contain a net weight specified in the requirements. The committees believe that even with this change, the rules and regulations continue to promote the shipment of a uniform product. The committees also anticipate that this change will reduce costs by allowing handlers to use boxes in inventory, rather than ordering new containers and making adjustments to equipment. They thought that removing specific container dimension requirements provided handlers with additional packing flexibility under the rules and regulations. They also agreed this change made more sense than trying to add the dimensions of all the containers currently in use to the requirements. Therefore, the committees recommended removing the regulations requiring specific interior dimensions for containers. However, all containers must continue to meet the specific net weight requirements as they appear in the rules and regulations.

Section 8e of the Act provides that when certain domestically produced commodities, including limes and avocados, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, and maturity requirements. This rule changes the container marking and minimum net weight requirements currently issued under these orders. Therefore, no change is necessary in the lime or avocado import regulations.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 111 lime producers and 141 avocado producers in the production area and approximately 33 lime handlers and 49 avocado handlers subject to regulation under the marketing orders. Small agricultural producers have been defined by the Small Business Administration (SBA) as those having annual receipts less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $5,000,000 (13 CFR 121.601).

Based on the Florida Agricultural Statistical Service and committee information, the average on-tree price for fresh limes during the 1996–97 season was $7.10 per 88 pound box equivalent and shipments totaled 398,279 bushels (55 pound bushel). Approximately 20 percent of all handlers handled 86 percent of Florida lime shipments.

The average price for fresh avocados during the 1997–98 season was $14.60 per 55 pound bushel box equivalent for all domestic shipments and the total shipments were 937,568 bushels. Approximately 10 percent of all handlers handled 90 percent of Florida avocado shipments. Many lime and avocado handlers ship other tropical fruit and vegetable products which are not included in the committees' data but would contribute further to handler receipts.

Using these prices, about 90 percent of lime and avocado handlers could be considered small businesses under the SBA definition and about 10 percent of the handlers could be considered large businesses. The majority of Florida lime and avocado producers and handlers may be classified as small entities.

Under § 911.48 and § 915.51 of the marketing orders for limes and avocados grown in Florida, the committees have the authority to establish and modify pack and container requirements for limes and avocados handled under the order. Pack and container requirements outline the types of information and the number of times this information needs to appear on a container. The requirements also list the specific requirements as to container size and weight restrictions the packed container must meet.

This rule makes several changes to §§ 911.311 and 911.329, and §§ 915.305 and 915.306 of the rules and regulations concerning the pack and container requirements for limes and avocados, respectively. This rule simplifies container marking requirements for both limes and avocados by reducing the number of times the size for limes and the grade for avocados need to appear on a container. This rule also removes net weight limits on lime and avocado containers packed within a master container, and relaxes certain minimum net weight requirements on packed avocados. In addition, this rule eliminates specific container dimension requirements for both limes and avocados. These changes will reduce handling costs and provide greater flexibility in lime and avocado packing operations.

This rule will have a positive impact on affected entities. The changes were recommended to reduce costs and provide additional flexibility in packing limes and avocados. None of the changes are expected to increase costs associated with the pack and container requirements.

The change in the stamping requirement will allow containers to move more rapidly through the packing line, reduce the number of stamping machines and labor needed, and decrease costs associated with complying with the marking requirements.

The committees believe this change will benefit both large and small packing operations. Larger operations use automated stamping. The former stamping requirements meant that each packing line needed to have at least two in-line stamp rollers or ink jet printers. In cases where the line had only one stamping device, the containers had to be reversed and run through the line a second time for limes, and three times for avocados. This took a considerable amount of time. This change will allow containers to move more rapidly through the packing line, reduce the number of stamping machines required, and decrease the costs associated with these activities.

Most smaller operations stamp the containers by hand. To meet the prior requirements, each box had to be rotated and stamped in more than one location. This increased the time and effort needed to pack each box. Reducing the number of times a container must be stamped will decrease the amount of labor needed and the associated stamping costs required to meet these requirements.

The change in net weight of a container packed within a master container will provide handlers with more options in how they use a master

container, and provide handlers greater flexibility in addressing the needs of customers.

Lowering certain minimum net weight requirements for avocados will reduce the practice of over filling containers to ensure compliance with the minimum net weight requirements. Some handlers have been packing the containers so tightly that the avocados were bruised or damaged in transit. This change will reduce the need to add additional avocados to meet net weight requirements, thus, saving on costs from adding additional fruit to the containers and damaged fruit. This change also will help reduce the possibility that containers will fail the minimum weight requirement, saving the handler the expense of reworking failed lots of avocados. Growers also might benefit from this change. If less fruit damage results in increased customer satisfaction and higher f.o.b. prices, some additional revenue might be passed on to the growers.

A recent review of the containers in use throughout the industry revealed that the interior dimensions varied with each packer, and in many cases, were different than those specified in the rules and regulations. Absent this change eliminating specific container dimensions, some handlers would need to bear the expense of ordering new boxes, and take a loss on the boxes they have in inventory, or petition the committees to expand the list of approved container dimensions. The elimination of specific container dimension requirements from both orders' rules and regulations will reduce costs to handlers by allowing handlers to use boxes in inventory, rather than having to order new containers.

As long as the containers contain enough limes or avocados to meet net weight requirements, the committees believe that different container dimensions are not necessary. The committees believe that even with this change, the rules and regulations will continue to promote the shipment of uniform product, while providing handlers additional latitude in their choice of containers.

These changes are intended to reduce costs and provide additional flexibility for all those covered under the orders. The opportunities and benefits of this rule are expected to be equally available to all lime and avocado handlers and growers regardless of their size of operation.

Other alternatives to the actions approved were considered by the committees prior to making the recommendations. One alternative discussed by the committees regarding the stamping question was to require containers to continue to be stamped on two sides for limes, and on the top and two sides of the lid for avocados. The committees believed that this is a duplicate effort that provides little benefit and increases associated packing costs. They rejected this alternative.

The committees also considered an alternative to the change recommended regarding the weight of containers packed within a master container. The committees discussed establishing another net weight limitation above the current four pound restriction. However, the committees believed that just increasing the weight limit would still limit flexibility and rejected that option.

The AAC considered several alternatives to relaxing specific minimum net weight requirements. One alternative discussed was increasing the percentage tolerance in terms of the number of containers that could fail to meet the weight requirements before the entire lot would fail. Members were concerned that raising the allowable tolerance would have a negative impact on the uniformity of the pack, allowing for too much variance from the standard. There was also concern that this may not fully address the problem. Even with the increased tolerance, to avoid reaching the limit, there would still be cause to over pack containers. Another alternative considered was to change the way the tolerance was measured, changing from containers per lot to an average of containers packed on a given day. Under this alternative, a handler would not know if they had exceeded the allowable tolerance until the end of the packing day. This would mean that if a handler was found to be out of compliance, they would be out of compliance for the whole day, requiring a rework of all the fruit packed that day rather than only the lots that failed. The AAC also considered changing the container requirements to specify containers that were wider and longer than present containers. Discussion concluded that there were already numerous containers and that adding or changing several containers to cover all the weights, sizes, and varieties would make things more complicated. It would also increase the financial burden by requiring the purchase of new boxes, and the modifying of equipment and pallets to accommodate the change. Therefore, the AAC dismissed these alternatives.

Two alternatives to eliminating specific container dimension requirements were presented for discussion. One alternative was to leave all lime and avocado containers as they are now. A review of the containers in use throughout the industry revealed that interior dimensions varied from handler to handler and in many cases, were different than those specified in the rules and regulations. However, not making this change could result in additional costs for handlers. The second alternative centered on adjusting the regulations to accommodate all the containers currently in use. The committees rejected the idea of adding more containers to the regulations as making things overly complicated with little discernible benefit. The committees believed that the recommended change will continue to promote the shipment of uniform product, require no additional cost, and allow handlers additional flexibility in choice of containers. Based on this discussion, this alternative was rejected.

This rule will not impose any additional reporting or recordkeeping requirements on either small or large lime or avocado handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sectors. In addition, the Department has not identified any relevant Federal rules that duplicate, overlap or conflict with this rule.

Further, the committees' meetings were publicized throughout the lime and avocado industries and all interested persons were invited to attend the meetings and participate in the committees' deliberations. Like all the committees' meetings, the July 9, 1997, August 13, 1997, and February 11, 1998, meetings were public meetings and all entities, both large and small, were able to express their views on these issues. Finally, interested persons were invited to submit information on the regulatory and informational impacts of this action on small businesses.

An interim final rule concerning this action was published in the **Federal Register** on July 13, 1998. Copies of the rule were mailed by the committees' staff to all committee members and lime and avocado handlers. In addition, the rule was made available through the Internet by the Office of the Federal Register. That rule provided for a 60-day comment period which ended September 11, 1998. No comments were received.

After consideration of all relevant material presented, including the committees' recommendations, and other information, it is found that finalizing the interim final rule, without change, as published in the **Federal Register** (63 FR 37475, July 13, 1998) will tend to effectuate the declared policy of the Act.

List of Subjects

7 CFR Part 911

Limes, Marketing agreements, Reporting and recordkeeping requirements.

7 CFR Part 915

Avocados, Marketing agreements, Reporting and recordkeeping requirements.

PART 911—LIMES GROWN IN FLORIDA

Accordingly, the interim final rule amending 7 CFR part 911 which was published at 63 FR 37475 on July 13, 1998, is adopted as a final rule without change.

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

Accordingly, the interim final rule amending 7 CFR part 915 which was published at 53 FR 37475 on July 13, 1998, is adopted as a final rule without change.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 916 and 917

[Docket No. FV98–916–2 FIR]

Nectarines and Peaches Grown in California; Relaxation of Quality Requirements for Fresh Nectarines and Peaches

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (Department) is adopting, as a final rule, without change, the provisions of an interim final rule relaxing "CA Utility" quality requirements for California nectarines and peaches for the remainder of the 1998 season. The "CA Utility" quality requirements are based on minimum quality requirements established under the California Agricultural Code, with a limitation on the amount of fruit meeting U.S. No. 1 or higher grade requirements that may be present in each container marked "CA Utility." The interim final rule increased that percentage to not more than 40 percent except that at least one-quarter of the fruit grading U.S. No. 1 in such containers must have non-scoreable blemishes. A non-scoreable blemish is a defect that does not cause fruit to fail U.S. No. 1 grade requirements. This rule continues in effect this relaxation for the remainder of the 1998 season. This rule allows more U.S. No. 1 nectarines and peaches to be packed in containers marked "CA Utility." The added packing flexibility provided by this rule is expected to benefit growers, handlers, and consumers.

EFFECTIVE DATE: November 10, 1998.

FOR FURTHER INFORMATION CONTACT: Terry Vawter, Marketing Specialist, or Kurt J. Kimmel, Regional Manager, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (209) 487–5901; Fax: (209) 487–5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632. Small businesses may request information on compliance with this regulation, or obtain a guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders by contacting: Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, D.C. 20090–6456; telephone: (202) 720–2491, Fax: (202) 205–6632, or E-mail: Jay_N_Guerber@usda.gov. You may view the marketing agreement and order small business compliance guide at the following web site: http://www.ams.usda.gov/fv/moab.html.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement Nos. 124 and 85, and Marketing Order Nos. 916 and 917 (7 CFR Parts 916 and 917) regulating the handling of nectarines and peaches grown in California, respectively, hereinafter referred to as the "orders." The orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

The Department is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12866, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule continues in effect, for the remainder of the 1998 season, the modification to the orders' administrative rules and regulations relaxing the "CA Utility" quality requirement by allowing more U.S. No. 1 grade nectarines and peaches in containers marked "CA Utility." Prior to the publication of an interim final rule (63 FR 50461, September 22, 1998), the term "CA Utility" meant that not more than 30 percent of the nectarines and peaches in any container could meet or exceed the requirements of the U.S. No. 1 grade, and that the fruit meet other specified requirements. The interim final rule increased that percentage to 40 percent except that at least one-quarter of the fruit grading U.S. No. 1 in such containers must have non-scoreable blemishes. A non-scoreable blemish is a defect that will not cause the fruit to fail to meet the requirements of U.S. No. 1. This relaxation is in effect for the remainder of the 1998 season only, and allows more No. 1 grade fruit to be packed as "CA Utility" quality.

The Nectarine Administrative Committee (NAC) and Peach Commodity Committee (PCC) (committees) met on September 15, 1998, to discuss this relaxation. At that time, the NAC voted without opposition to recommend the increased percentage of U.S. No. 1 nectarines with non-scoreable blemishes. The PCC voted with eight in favor and one opposed to recommend a similar change. The member opposed believed that it was too late in the season to make such a change, that such a change would disadvantage those who had already

shipped "CA Utility" fruit in 1998, and that more study and analysis of the situation was needed.

Sections 916.52 and 917.41 of the orders authorize the establishment of grade and quality requirements for nectarines and peaches, respectively. Prior to the 1996 season, § 916.356 of the order's rules and regulations required nectarines to meet a modified U.S. No. 1 grade. Specifically, nectarines were required to meet U.S. No. 1 grade requirements, except there was a slightly tighter requirement for scarring and a more liberal allowance for misshapen fruit. Under § 917.459 of the order's rules and regulations prior to the 1996 season, peaches were also required to meet the requirements of a U.S. No. 1 grade, except there was a more liberal allowance for open sutures that were not "serious damage."

The minimum grade, size, and maturity requirements in § 916.356 applicable to shipments of California nectarines apply during the period April 1 through October 31 each year. The minimum grade, size, and maturity requirements in § 917.459 applicable to shipments of California peaches apply during the period April 1 through November 23 each year.

Since the 1996 shipping season, the nectarine and peach regulations have allowed "CA Utility" quality to be shipped during the regulatory periods. Utility quality is a lower-quality fruit than U.S. No. 1.

Containers marked as "CA Utility" must be inspected by the Federal or Federal-State Inspection Service and certified as meeting the "CA Utility" quality requirements. Part of the inspection process is to evaluate containers of fruit in accordance with the requirements of the U.S. Standards for Grades of Nectarines, the U.S. Standards for Grades of Peaches, and the orders. In conducting inspections, inspectors are required to evaluate various blemishes. Some blemishes are serious or severe enough to be "scored" as defects which are damaging to the grade of the fruit, while some other blemishes are not serious or severe enough to affect the grade of the fruit. In the first instance, the blemishes are termed "scoreable" defects; and in the second instance, the blemishes are termed "non-scoreable." It was the recommendation of the committees that such non-scoreable blemishes must be present on at least one-quarter of the 40 percent of the fruit grading U.S. No. 1 in boxes marked "CA Utility."

While containers marked "CA Utility" fruit are subject to relaxed quality requirements, all other requirements of the orders must be met.

In addition to the grade requirements, §§ 916.350 and 917.442 require each package or container of nectarines and peaches, respectively, shipped which meets the requirements of "CA Utility," to be conspicuously marked with the words "CA Utility" on a visible display panel.

Through August 31 of the 1998 season, shipments of "CA Utility" quality nectarines and peaches averaged about 4 percent of total shipments. In prior seasons, utility quality shipments have been less than 2 percent. The increase this season has been attributed to quality problems resulting from heavy early season rains. Also, hail storms later during the season damaged some fruit and rendered it unsalable, while some fruit sustained only moderate scarring. This was especially true for nectarines, whose smooth skin does not provide the same protection as the fuzzy exterior of peaches.

Preliminary studies conducted by the NAC and PCC indicate that some consumers, retailers, and foreign buyers found the lower-quality fruit acceptable in some markets. Shipments of "CA Utility" nectarines represented 1.1 percent of all nectarine shipments, or approximately 210,000 boxes in 1996. In 1997, shipments of "CA Utility" nectarines represented 1.1 percent of all nectarine shipments, or approximately 230,000 boxes. Shipments of "CA Utility" peaches represented 1.9 percent of all peach shipments, or 366,000 boxes in 1996. In 1997, shipments of "CA Utility" peaches represented 1.0 percent of all peach shipments, or approximately 217,000 boxes. By contrast, shipments of "CA Utility" nectarines represented 4.0 percent of all nectarine shipments, or approximately 694,881 boxes by August 31 of the 1998 season. Shipments of "CA Utility" peaches represented 4.0 percent of all peach shipments, or approximately 544,065 boxes by August 31 of the 1998 season.

The interim final rule amended §§ 916.356 and 917.459 by revising paragraph (a)(1) under each section to allow not more than 40 percent U.S. No. 1 grade fruit to be packed in containers marked as "CA Utility" except that at least one-quarter of the fruit grading U.S. No. 1 in such container must have non-scoreable blemishes. This final rule continues in effect that revision.

At the September 15, 1998, committee meetings, comments supporting the recommendation were made by handlers who had experienced incidents where the percentage of U.S. No. 1 fruit contained in their "CA Utility" boxes was found to be higher than permitted by the orders' rules and regulations. In those instances, they were forced to repack the boxes, move blemished fruit to boxes containing all U.S. No. 1 fruit, or discard or donate the fruit.

At least one handler complained that the fruit with non-scoreable blemishes was unsightly in the type of U.S. No. 1 box he offered to the marketplace and to his customers. His preference was to place the fruit with non-scoreable blemishes in boxes marked "CA Utility." The limitation of not more than 30 percent U.S. No. 1 fruit in boxes marked "CA Utility" became a greater hindrance as the season progressed. The handler also noted that an unseasonable morning rain in late summer caused dark stains on the skin of nectarines, rendering them unsuitable for inclusion in his U.S. No. 1 boxes. He preferred including such fruit in the "CA Utility" boxes, but doing so caused the "CA Utility" boxes to contain more than the 30 percent U.S. No. 1 fruit permissible.

A niche market exists for utility quality fruit and the relaxation provided by the interim final rule presented an opportunity for handlers to market somewhat better quality "CA Utility" fruit to meet demand. Allowing ten percent more U.S. No. 1 grade fruit to be packed as "CA Utility" quality requirements allowed more fruit to be marketed as "CA Utility" if handlers prefer to do so. "CA Utility" quality fruit is generally made available at lower prices to especially benefit lower-income consumers.

Some committee members initially continued to support limiting the amount of U.S. No. 1 grade fruit that can be included in a utility pack to 30 percent of the total in any container to maintain distinct differences between U.S. No. 1 containers and "CA Utility" containers. However, after further discussion, it was agreed that a greater percentage of U.S. No. 1 in a "CA Utility" container would not be confusing if such fruit were also blemished. It was, therefore, agreed that an additional 10 percent U.S. No. 1 would be permitted except that every piece of fruit in that 10 percent must possess a non-scoreable blemish. This relaxation is in effect for the remainder of the 1998 season. Boxes marked "CA Utility" should be clearly distinct from boxes containing U.S. No. 1 grade. Failure to provide a clear distinction could cause confusion in the marketplace and would not meet the goal of providing low-cost fruit to low-income consumers. It was the opinion of the committees that this relaxation would not cause confusion among buyers.

Data on recent production and shipments of California nectarines and peaches appear to indicate that "CA Utility" quality fruit can be marketed successfully without interfering with sales of higher quality fruit. In fact, some handlers noted that they used the "CA Utility" box as a "safety net." Fruit which was not good enough to meet their own criteria for packing in U.S. No. 1 boxes could be better utilized in boxes of "CA Utility." The advent of "CA Utility" quality requirements has given handlers the increased flexibility to improve the overall appearance of their U.S. No. 1 shipments.

For these reasons, the NAC and PCC recommended, for the remainder of the 1998 season, that the percentage of U.S. No. 1 nectarines and peaches permitted in containers marked as "CA Utility" quality be increased from 30 percent to 40 percent except that at least one-quarter of the fruit grading U.S. No. 1 in such containers must have non-scoreable blemishes. This relaxation remains in effect for the remainder of the 1998 season. The committees also voted to review the percentages during the winter.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 300 California nectarine and peach handlers subject to regulation under the orders covering nectarines and peaches grown in California, and about 1,800 producers of these fruits in California. Small agricultural service firms, which include handlers, are defined by the Small Business Administration [13 CFR 121.601] as those whose annual receipts are less than $5,000,000. Small agricultural producers have been defined as those having annual receipts of less than $500,000. A majority of these handlers and producers may be classified as small entities.

Under §§ 916.356 and 917.459 of the orders, grade and size requirements are established for fresh shipments of California nectarines and peaches, respectively. Such requirements are in effect during the period April 1 through October 31 each year for nectarines, and April 1 through November 23 for peaches. The interim final rule relaxed, for the remainder of the 1998 season only, the definition of "CA Utility" quality for California nectarines and peaches. The "CA Utility" quality requirements are based on minimum quality requirements established under the California Agricultural Code, with a limitation on the amount of fruit meeting U.S. No. 1 or higher grade requirements that may be contained in the utility pack. Prior to the publication of the interim final rule, the "CA Utility" quality requirement permitted not more than 30 percent of the nectarines or peaches in any container to meet or exceed the requirements of a U.S. No. 1. The interim final rule increased that percentage to not more than 40 percent except that at least one-quarter of the fruit grading U.S. No. 1 in such container must have non-scoreable blemishes. A non-scoreable blemish is a defect that does not cause the fruit to fail to meet U.S. No. 1 grade requirements. This rule continues this relaxation and is expected to benefit growers, handlers, and consumers.

Since the 1996 shipping season, the nectarine and peach regulations have allowed "CA Utility" quality fruit to be shipped during the regulatory periods. Prior to the 1996 season, § 916.356 of the order's rules and regulations required nectarines to meet a modified U.S. No. 1 grade. Specifically, nectarines were required to meet U.S. No. 1 grade requirements, except there was a slightly tighter requirement for scarring and a more liberal allowance for misshapen fruit. Under § 917.459 of the order's rules and regulations prior to the 1996 season, peaches were also required to meet the requirements of a U.S. No. 1 grade, except there was a more liberal allowance for open sutures that were not "serious damage." "CA Utility" quality is a lower-quality fruit than U.S. No. 1 and has been regulated since its inception in the 1996 season. Through August 31 of the 1998 season, shipments of utility quality for both nectarines and peaches have averaged about 4 percent of total shipments. In prior seasons, utility quality shipments have been in the 1 to 2 percent range. The increase so far this season is mostly attributed to quality problems resulting from heavy early season rains.

A niche market exists for "CA Utility" quality fruit and the relaxation provided by the interim final rule presented an opportunity for handlers to market somewhat better quality "CA Utility" fruit to meet demand.

According to comments made at the meeting on September 15, 1998, changing the requirements to allow additional U.S. No. 1 fruit to be packed in "CA Utility" containers did not disadvantage those handlers who had already finished for the season. Those handlers were able to put fruit grading U.S. No. 1 into their U.S. No. 1 containers. Since they would have likely wanted to pack such fruit in these containers to receive the higher return anticipated for U.S. No. 1 fruit, they have not been harmed economically. Therefore, no harm was done by implementing this relaxation that late in the season.

Therefore, the NAC and PCC recommended changing the "CA Utility" quality at their September 15, 1998, meetings by modifying the percentage of U.S. No. 1 fruit in each box. The committees also voted to review the percentages during the winter.

In §§ 916.350 and 917.442 of the orders regulating nectarines and peaches, respectively, lower-quality nectarines and peaches were authorized for shipment as "CA Utility" as an experiment for the 1996 season only. Such authorization was continued during the 1997 and 1998 seasons. The interim final rule increased the percentage of U.S. No. 1 nectarines and peaches which could be packed in a container marked "CA Utility" for the remainder of the 1998 season except that the fruit grading U.S. No. 1 must have a specified percentage of non-scoreable blemishes.

During the 1996 season, the Department authorized the shipment of nectarines and peaches which were of a lower quality than the minimum permitted for previous seasons. During 1996, there were approximately 210,000 boxes of nectarines and approximately 366,000 boxes of peaches packed as "CA Utility," or 1.1 percent and 1.9 percent of fresh shipments, respectively. During 1997, there were approximately 230,000 boxes of nectarines and 217,000 boxes of peaches packed as "CA Utility," or 1.1 percent and 1.0 percent of fresh shipments, respectively. By contrast, shipments of "CA Utility" nectarines represented 4.0 percent of all nectarine shipments, or approximately 694,881 boxes by August 31 of the 1998 season. Shipments of "CA Utility" peaches represented 4.0 percent of all peach shipments, or approximately 544,065 boxes by August 31 of the 1998 season. Continued availability of "CA Utility" quality fruit with the increased percentage of non-scoreable defects is expected to have a positive impact on producers, handlers, and consumers by

permitting more nectarines and peaches to be shipped into fresh market channels, without adversely impacting the market for higher quality fruit.

The committees considered several alternatives at the meeting. One alternative was to leave the percentage of U.S. No. 1 nectarines and peaches permitted in "CA Utility" containers unchanged. It was determined that alternative would not address the problem which faced the industry. The NAC and PCC also considered increasing the 30 percent U.S. No. 1 tolerance to not more than 40 percent or to not more than 50 percent, but determined that such a relaxation could render "CA Utility" boxes less distinctive from U.S. No. 1 and create confusion in the marketplace. Another alternative included a requirement that at least 90 percent of the individual fruits in all boxes marked with "CA Utility" possess defects. Such a requirement would create a box of fruit which would be distinct from U.S. No. 1 due to a greater number of defects present. However, this alternative was determined to be unacceptable because it represented too radical a change of "CA Utility" quality given the emergency nature of the recommendation. This alternative failed to offer a sound basis for comparison with the requirement of not more than 30 percent U.S. No. 1 because it did not reference the U.S. No. 1 grade. Such comparison may be necessary as the committees continue to study marketplace reaction to changes in quality requirements of "CA Utility."

This action does not impose any additional reporting and recordkeeping requirements on either small or large handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the information collection requirements that are contained in Parts 916 and 917 have been previously approved by the Office of Management and Budget (OMB) and have been assigned OMB Nos. 0581–0072 and 0581–0080, respectively.

The Department has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule. However, as previously stated, nectarines and peaches under the orders have to meet certain requirements set forth in the standards issued under the Agricultural Marketing Act of 1946 (7 U.S.C. 1621 through 1627). Standards issued under the Agricultural Marketing Act of 1946 are otherwise voluntary.

In addition, the committees' meetings were widely publicized throughout the nectarine and peach industries and all interested parties were invited to attend the meetings and participate in committee deliberations on all issues. Like all committee meetings, the September 15, 1998, meetings were public meetings and all entities, both large and small, were able to express views on these issues. The committees themselves are composed of producers, the majority of whom are small entities.

An interim final rule concerning this action was published in the **Federal Register** on September 22, 1998. Copies of the rule were made available to all committee members and nectarine and peach handlers by the committees' staff. The rule was also made available through the Internet by the Office of the Federal Register. That rule provided for a 15-day comment period which ended October 7, 1998. No comments were received.

After consideration of all relevant matter presented, including the information and recommendations submitted by the committees, and other available information, it is hereby found that finalizing the interim final rule, without change, as published in the **Federal Register** (63 FR 50461, September 22, 1998) will tend to effectuate the declared policy of the Act.

It is further found that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because the changes made to the regulations were to relax the "California Utility" quality requirements for California nectarines and peaches for the remainder of the 1998 season and the season has ended or will end shortly for these commodities. Accordingly, this rule should be made final as soon as possible. Also, a 15-day comment period was provided for in the interim final rule and no comments were received.

Privacy.

PART 318—[AMENDED]

1. The authority citation for part 318 continues to read as follows:

Authority: Pub. L. 93–579, 88 Stat. 1896 (5 U.S.C. 552a).

2. The heading of 32 CFR part 318 is revised to read "Defense Threat Reduction Agency (DTRA)"

3. Sections 318.1(b)(1), 318.4(a), 318.5(a), 318.6(a), 318.9(a), 318.11(a) are amended by revising "Defense Special Weapons Agency" to read "Defense Threat Reduction Agency".

4. Sections 318.1 (b)(1) and (d), 318.2, 318.3 (b), (c), and (d), 318.9 (a), (b) introductory text, (b)(1) and (b)(4), 318.10, 318.11 (b), (d) introductory text, and (d)(3)(1), are amended by revising "DSWA" to read "DTRA".

5. Sections 318.1(c), 318.2, and 318.3(a) are amended by revising "Headquarters, Defense Special Weapons Agency" to read "Defense Threat Reduction Agency".

6. In § 318.3 footnote (1) in paragraph (d) is amended by revising "Headquarters Defense Special Weapons Agency, Washington, DC 20305–1000" to read "Defense Threat Reduction Agency, 45045 Aviation Drive, Dulles, VA 20166–7517".

7. Sections 318.4(d), 318.6(b), 318.8(b) are amended by revising "Defense Special Weapons Agency, 6801 Telegraph Road, Alexandria, VA 22310–3398" to read "Defense Threat Reduction Agency, 45045 Aviation Drive, Dulles, VA 20166–7517".

8. Section 318.2 is amended by removing the acronyms "HQ" and "FC" and the words "Field Command".

Dated: November 2, 1998.

Coast Guard

33 CFR Part 117

[CGD07–97–020]

RIN 2115–AE47

Drawbridge Regulations; Atlantic Intracoastal Waterway, Florida

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the regulations governing the operation of the Flagler Memorial, Royal Park, and Southern Boulevard drawbridges across the Atlantic Intracoastal Waterway at Palm Beach County, Florida. This rule has been established as a result of complaints about extensive highway traffic delays caused by bridge openings. This rule is intended to relieve highway congestion while still meeting the reasonable needs of navigation.

DATES: This rule becomes effective on October 26, 1998.

FOR FURTHER INFORMATION CONTACT: Miss Evelyn Smart, Project Manager, Bridge Section, (305) 536–6546.

SUPPLEMENTARY INFORMATION:

Regulatory History

On August 12, 1997, the Coast Guard published a Notice of Proposed Rulemaking entitled Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Florida, in the **Federal Register** (62 FR 43131). On June 30, 1998, the Coast Guard published a Supplemental Notice of Proposed Rulemaking entitled Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Florida, in the **Federal Register** (63 FR 35552). The Coast Guard received 14 letters commenting on the supplemental proposal. No public hearing was requested, and none was held.

Background and Purpose

The Coast Guard completed an analysis of highway traffic data, traffic analysis and bridge logs provided by the Florida Department of Transportation in 1997. The analysis indicated that the reduced highway level of service and limited number of bridge openings for all three bridges does not warrant additional bridge opening restrictions during the off season summer months. In addition, the analysis and subsequent investigations during 1998 indicate the significant increase in vessel traffic experienced on weekends during the Winter season is beneficial to the local community and should not be unreasonably impacted by bridge opening restrictions which do not provide clearly offsetting benefits to the seasonal traffic across the bridge. The changes to the seasonal weekday opening schedules have been modified to remove the existing 8 a.m. opening on the Flagler Memorial Bridge and the 8 a.m. and 5 p.m. openings on the Royal Park Bridge which will reduce highway traffic delays during commuter periods.

These revised regulations will maintain the existing seasonal weekday 30 minute opening schedules for Flagler Memorial and Royal Park Bridges, and will add a seasonal weekday 30 minute opening schedule to the Southern Boulevard Bridge which now operates on signal. The seasonal restriction for all three bridges will start one month earlier on 1 October to help reduce traffic congestion created by earlier arrival of seasonal visitors to the Palm Beach areas. These changes will relieve seasonal highway congestion while still meeting the reasonable needs of navigation. The amended regulations will still provide an exception to the opening schedules for public vessels of the United States, tugs with tows, and vessels in situations where a delay would endanger life or property.

In accordance with 5 U.S.C. 553, good cause exists for making these regulations effective in less than 30 days from the date of publication. Following normal rulemaking procedures would have been impracticable. The regulations were changed to allow for seasonal bridge schedules to begin on October 1 each year, and there was not sufficient time remaining after the comment period to provide for a delayed effective date.

Discussion of Comments and Changes

Fourteen letters were received in response to the public notice. The National Marine Fisheries Service and the U.S. Fish and Wildlife Service stated in their letters that the proposal would not adversely affect fishery resources and offered neither support nor objection. U.S. Environmental Protection Agency concluded in their letter that this rulemaking would not negatively impact the principal water source in the vicinity of the bridge. The Florida State Historic Preservation Officer stated that the rulemaking would have no effect on any sites listed, or eligible for listing in the National Register. Four letters were in opposition to the proposed rule because they felt that the bridge should not open to the passage of vessels at any time during morning and afternoon rush hours. Although complete closure of 3 bridges over the Intracoastal Waterway for over 3 hours each weekday is considered unreasonable to navigation, two openings during peak traffic periods have been eliminated with this rulemaking. In addition, a 30 minute schedule has been established at the Southern Boulevard Bridge because of increased in-season traffic demands during morning and afternoon rush hour. Four letters were in opposition to the proposed rule because they felt that the existing in-season weekday regulations should be extended to the off-season. However, the lack of highway traffic levels (LOS C) during the off-season and only one opening or less per hour doesn't justify placing additional restrictions on navigation. Two letters were in favor of the rulemaking and recommended that these changes be enforced.

Regulatory Evaluation

This revised rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under Section 6(a)(3) of that order. It has been exempted from review by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation. (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. We conclude this

because this revised rule does not effect the exemptions for tugs with tows and emergency situations already contained in the regulations.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this revised rule will have a significant economic impact on a substantial number of small entities. "Small entities" include small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their field, and governmental jurisdictions with populations of less than 50,000.

Because it expects the impact of this revised rule to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities because of the exemption for tugs with tows.

Collection of Information

This revised rule contains no collection of information requirements under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed this revised rule under the principles and criteria contained in Executive Order 12612, and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard considered the environmental impact of this revised rule and has determined pursuant to Figure 2–1, paragraph 32(e) of Commandant Instruction M16475.1C, that this action is categorically excluded from further environmental documentation. A categorical exclusion determination for this rulemaking is available in the public docket for inspection and copying.

Bridges.

Final Regulations

In consideration of the foregoing, the Coast Guard amends 33 CFR part 117, as follows:

PART 117—[Amended]

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

2. § 117.261 is amended by revising paragraphs (u), (v) and (w) to read as follows:

§ 117.261 Atlantic Intracoastal Waterway from St. Mary's River to Key Largo.

* * * * *

(u) Flagler Memorial (SR A1A) bridge, mile 1021.9 at Palm Beach. The draw shall open on signal, except that from October 1 to May 31, Monday through Friday except Federal holidays, from 7:30 a.m. to 9:30 a.m. and from 4 p.m. to 5:45 p.m., the draw need open only at 8:30 a.m. and 4:45 p.m.; and from 9:30 a.m. to 4 p.m., the draw need open only on the hour and half-hour.

(v) Royal Park (SR 704) bridge, mile 1022.6 at Palm Beach. The draw shall open on signal, except that from October 1 through May 31, Monday through Friday except Federal holidays, from 7:45 a.m. to 9:45 a.m. and from 3:30 p.m. to 5:45 p.m., the draw need open only at 8:45 a.m., 4:30 p.m., and 5:15 p.m. and from (9:30 a.m. to 3:30 p.m., the draw need open only on the quarter-hour and three-quarter hour.

(w) Southern Boulevard (SR 700/80) bridge, mile 1024.7 at Palm Beach. The draw shall open on signal, except that, from October 1 through May 31, Monday through Friday except Federal holidays, from 7:30 a.m. to 9:15 a.m. and from 4:30 p.m. to 6:30 p.m., the draw need open only at 8:15 a.m. and 5:30 p.m. and from 9:15 a.m. to 4:30 p.m., the draw need open only on the quarter-hour and three-quarter hour.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 210–0103a FRL–6185–1]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision, Sacramento Metropolitan Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action on revisions to the California State Implementation Plan. This action is an administrative change which revises the definition of volatile organic compounds (VOC) and updates the Exempt Compound list in rules from the Sacramento Metropolitan Air Quality Management District (SMAQMD). The intended effect of approving this action is to incorporate changes to the definition of VOC and to update the Exempt Compound list in SMAQMD rules to be consistent with the revised federal and state VOC definitions.

DATES: This rule is effective on January 8, 1999, without further notice, unless EPA receives adverse comments by December 9, 1998. If EPA receives such comment, it will publish a timely withdrawal in the **Federal Register** informing the public that this rule will not take effect.

ADDRESSES: Written comments must be submitted to Cynthia G. Allen at the Region IX office listed below. Copies of the rule revisions and EPA's evaluation report for each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rule revisions are available for inspection at the following locations:

Rulemaking Office (AIR–4), Air Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105

Environmental Protection Agency, Air Docket (6102), 401 "M" Street, S.W., Washington, D.C. 20460

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95812

Sacramento Metropolitan Air Quality Management District, 8411 Jackson Rd., Sacramento, CA 95826

FOR FURTHER INFORMATION CONTACT: Cynthia G. Allen, Rulemaking Office, AIR–4, Air Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1189.

SUPPLEMENTARY INFORMATION:

I. Applicability

The rules with definition revisions being approved into the California SIP include the following SMAQMD Rules: Rule 101, General Provisions and Definitions; Rule 442, Architectural Coatings; Rule 443, Leaks From Synthetic Organic Chemical and Polymer Manufacturing; Rule 447, Organic Liquid Loading; Rule 452, Can Coating; Rule 456, Aerospace Assembly and Component Coating Operations; and Rule 458, Large Commercial Bread Bakeries. These rules were submitted by the California Air Resources Board to EPA on May 18, 1998.

II. Background

On June 16, 1995 (60 FR 31633) EPA published a final rule excluding acetone from the definition of VOC. On February 7, 1996 (61 FR 4588) EPA published a final rule excluding perchloroethylene from the definition of VOC. On October 8, 1996 (61 FR 52848) EPA published a final rule excluding HFC 43–10mee and HCFC 225ca and cb from the definition of VOC. These compounds were determined to have negligible photochemical reactivity and thus, were added to the Agency's list of Exempt Compounds.

The State of California submitted many revised rules for incorporation into its SIP on May 18, 1998, including the rules being acted on in this administrative action. This action addresses EPA's direct-final action for SMAQMD Rule 101, General Provisions and Definitions; Rule 442, Architectural Coatings; Rule 443, Leaks From Synthetic Organic Chemical and Polymer Manufacturing; Rule 447, Organic Liquid Loading; Rule 452, Can Coating; Rule 456, Aerospace Assembly and Component Coating Operations; Rule 458, Large Commercial Bread Bakeries. Sacramento Metropolitan AQMD adopted these rules on September 5, 1996. These submitted rules were found to be complete on July 17, 1998, pursuant to EPA's completeness criteria that are set forth in 40 CFR part 51 Appendix V [1] and is being finalized for approval into the SIP.

This administrative revision adds acetone, perchloroethylene, HFC 43–10mee and HCFC 225ca and cb to the list of compounds which make a negligible contribution to tropospheric ozone formulation. Thus, EPA is finalizing the approval of the revised definitions to be incorporated into the California SIP for the attainment of the national ambient air quality standards (NAAQS) for ozone under Title I of the Clean Air Act (CAA or the Act).

III. EPA Evaluation and Action

This administrative action is necessary to make the VOC definition in SMAQMD rules consistent with federal and state definitions of VOC. This action will result in more accurate assessment of ozone formation potential, will remove unnecessary control requirements and will assist States in avoiding exceedences of the ozone health standard by focusing control efforts on compounds which are actual ozone precursors.

[1] EPA adopted the completeness criteria on February 16, 1990 (55 FR 5830) and, pursuant to section 110(k)(1)(A) of the CAA, revised the criteria on August 26, 1991 (56 FR 42216).

The SMAQMD rules being affected by this action to revise the definition of VOC include:

Rule 101—General Provisions and Definitions
Rule 442—Architectural Coatings
Rule 443—Leaks From Synthetic Organic Chemical and Polymer Manufacturing
Rule 447—Organic Liquid Loading
Rule 452—Can Coating
Rule 456—Aerospace Assembly and Component Coating Operations
Rule 458—Large Commercial Bread Bakeries

EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision should adverse comments be filed. This rule will be effective January 8, 1999, without further notice unless the Agency receives adverse comments by December 9, 1998.

If the EPA receives such comments, then EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. The EPA will not institute a second comment period on this rule. Any parties interested in commenting on this rule should do so at this time. If no such comments are received, the public is advised that this rule will be effective on January 8, 1999, and no further action will be taken on the proposed rule.

IV. Administrative Requirements

A. Executive Order 12866

The Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order (E.O.) 12866, entitled "Regulatory Planning and Review."

B. Executive Order 12875

Under E.O. 12875, EPA may not issue a regulation that is not required by statute and that creates a mandate upon a state, local, or tribal government, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by those governments. If the mandate is unfunded, EPA must provide to the Office of Management and Budget a description of the extent of EPA's prior consultation with representatives of affected state, local, and tribal governments, the nature of their concerns, copies of written communications from the governments, and a statement supporting the need to issue the regulation. In addition, E.O. 12875 requires EPA to develop an effective process permitting elected officials and other representatives of state, local, and tribal governments "to provide meaningful and timely input in the development of regulatory proposals containing significant unfunded mandates."

Today's rule does not create a mandate on state, local or tribal governments. The rule does not impose any enforceable duties on these entities. Accordingly, the requirements of section 1(a) of E.O. 12875 do not apply to this rule.

C. Executive Order 13045

Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, April 23, 1997), applies to any rule that: (1) is determined to be "economically significant" as defined under E.O. 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This rule is not subject to E.O. 13045 because it does not involve decisions intended to mitigate environmental health or safety risks.

D. Executive Order 13084

Under E.O. 13084, EPA may not issue a regulation that is not required by statute, that significantly affects or uniquely affects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments. If the mandate is unfunded, EPA must provide to the Office of Management and Budget, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected and

other representatives of Indian tribal governments "to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities."

Today's rule does not significantly or uniquely affect the communities of Indian tribal governments. This action does not involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of section 3(b) of E.O. 13084 do not apply to this rule.

E. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small governmental jurisdictions. This final rule will not have a significant impact on a substantial number of small entities because SIP approvals under section 110 and subchapter I, part D of the Clean Air Act do not create any new requirements but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not create any new requirements, I certify that this action will not have a significant economic impact on a substantial number of small entities. Moreover, due to the nature of the Federal-State relationship under the Clean Air Act, preparation of flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co., v. U.S. EPA*, 427 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

F. Unfunded Mandates

Under Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated annual costs to State, local, or tribal governments in the aggregate; or to private sector, of $100 million or more. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the approval action promulgated does not include a Federal mandate that may result in estimated annual costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

G. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This rule is not a "major" rule as defined by 5 U.S.C. 804(2).

H. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 8, 1999. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Note: Incorporation by reference of the State Implementation Plan for the State of California was approved by the Director of the Federal Register on July 1, 1982.

Dated: October 26, 1998.

Sally Seymour,

Acting Regional Administrator, Region IX.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

2. Section 52.220 is amended by adding paragraph (c)(255)(i)(A)(*2*) to read as follows:

§ 52.220 Identification of plan.

BILLING CODE 6560–50–U

DEPARTMENT OF DEFENSE

48 CFR Part 253

[DFARS Case 98–D018]

Defense Federal Acquisition Regulation Supplement; Contract Action Reporting—Reform of Affirmative Action

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: The Director of Defense Procurement has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to update contract action reporting requirements relating to programs for small business and small disadvantaged business concerns.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Ms. Melissa Rider, Defense Acquisition Regulations Council, PDUSD (A&T) DP (DAR), IMD 3D139, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0131; telefax (703) 602–0350. Please cite DFARS Case 98–D018.

SUPPLEMENTARY INFORMATION:

A. Background

Dod uses DD Form 350, Individual Contracting Action Report, to collect data on contracting actions that obligate or deobligate more than $25,000. This final rule removes certain data collection requirements at DFARS 253.204–70(e) to reflect recent changes to DFARS guidance concerning programs for small disadvantaged business concerns (63 FR 41972, August 6, 1998), and the expiration of statutory provisions that permitted nonprofit agencies employing people who are blind or severely disabled to participate in acquisitions set aside for small business concerns.

B. Regulatory Flexibility Act

The final rule does not constitute a significant revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. However, comments from small entities concerning the affected DFARS subpart will be considered in accordance with 5 U.S.C. 610. Such comments should cite DFARS Case 98–D018.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the final rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 253

Government procurement.

Michele P. Peterson,

Executive Editor, Defense Acquisition Regulations Council.

Therefore, 48 CFR Part 253 is amended as follows:

1. The authority citation for 48 CFR Part 253 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 253—FORMS

2. Section 253.204–70 is amended by revising paragraphs (e)(1), (2), and (3) to read as follows:

253.204–70 DD Form 350, Individual Contracting Action Report.

* * * * *

[DFARS Case 98–D009]

Defense Federal Acquisition Regulation Supplement; Contract Action Reporting—1998

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: The Director of Defense Procurement has issued a final rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to update and clarify contract action reporting requirements relating to awards to Federal Prison Industries and government agencies, use of letter contracts, definitization of contracts, orders under agreements and Federal Supply Schedules, simplified acquisition procedures, and women-owned business status.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Ms. Melissa Rider, Defense Acquisition Regulations Council, PDUSD(A&T)DP(DAR), IMD 3D139, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0131; telefax (703) 602–0350. Please cite DFARS Case 98–D009.

SUPPLEMENTARY INFORMATION:

A. Background

DoD uses DD Form 350, Individual Contracting Action Report, to collect data on contracting actions that obligate or deobligate more than $25,000. This final rule updates and clarifies the DD Form 350 coding instructions at DFARS 253.204–70 (b) and (d).

B. Regulatory Flexibility Act

The final rule does not constitute a significant revision within the meaning of FAR 1.501 and Public Law 98–577 and publication for public comment is not required. However, comments from small entities concerning the affected DFARS subpart will be considered in accordance with 5 U.S.C. 610. Such comments should cite DFARS Case 98–D009.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the final rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

(5) * * *

(ii) * * *

(A) BLOCK B5A, CONTRACTOR IDENTIFICATION NUMBER. Enter the contractor's 9-position Data Universal Numbering System (DUNS) number (see FAR 4.602(d) and 4.603). For all actions with UNICOR/Federal Prison Industries, use DUNS number 62–662–7459.

(B) * * *

(1) Code Y—Yes. Enter code Y when the contractor is a Federal/State/local government agency of the United States and outlying areas (see 204.670–1(d)). Do not use code Y when the government agency is an educational institution.

* * * * *

(13) * * *

(i) * * *

(A) *Code 1—Letter Contract.* Enter code 1 when the contracting action is a letter contract or a modification to a letter contract that has not been definitized.

(B) *Code 3—Definitive Contract.* Enter code 3 when the contracting action is the award or modification of a definitive contract or a modification that definitizes a contract. Code 3 includes the following:

* * * * *

(C) *Code 4—Order under an Agreement.* Enter code 4 when the contracting action is an order or definitization of an order under an agreement other than a blanket purchase agreement. Examples include an order exceeding $25,000 under a basic ordering agreement or a master ship repair agreement and a job order when the contract is created by issuing the order. A call under a blanket purchase

agreement associated with a Federal Supply Schedule, pursuant to FAR 8.404(b)(4), is coded 6. A call under other blanket purchase agreements, pursuant to FAR 13.303, is coded 9. When the contracting action is a modification to an order described in code 4 instructions, enter code 4 in B13A.

* * * * *

(E) *Code 6—Order/Call under Federal Schedule.* Enter code 6 if the contracting action is an order under a GSA or VA Federal Supply Schedule, or a call against a blanket purchase agreement established under a GSA or VA Federal Supply Schedule (see FAR 8.404). Code 6 includes orders under Federal Supply Schedules for items on the Procurement List. When the contracting action is a modification to an order/call described in code 6 instructions, enter code 6 in B13A.

* * * * *

(G) *Code 9—Purchase Order/Call.* Enter code 9 if the contracting action, including an action in a designated industry group under the Small Business Competitiveness Demonstration Program (see FAR Subpart 19.10), is an award pursuant to FAR Part 13, except when the contracting action is a blanket purchase agreement call pursuant to FAR 8.404(b)(4) (see code 6). When the contracting action is a modification to a purchase order/call described in code 9 instructions, enter code 9 in B13A.

* * * * *

(iv) * * *

(I) *Code J—Definitization of a Letter Contract.* Eneter code J if the contracting action is the definitization of a letter contract, and enter code 3 in Block B13A.

(14) * * *

(iii) *Code C—Simplified Acquisition Procedures Other than FAR Subpart 13.5.* Enter code C if the action resulted from use of the procedures in FAR Part 13, other than those in Subpart 13.5.

(iv) *Code D—Simplified Procedures Pursuant to FAR Subpart 13.5.* Enter code D if the action resulted from use of the procedures in FAR Subpart 13.5.

* * * * *

(d) * * *

(5) * * *

(vi) BLOCK D6, WOMEN-OWNED BUSINESS. Enter one of the following codes:

(A) *Code Y—Yes.* Enter code Y if the response to FAR 52.204–5, 52.212–3(c), or 52.219–1(b) indicates that it is a women-owned business.

(B) *Code N—No.* Enter code N if the contractor's response to FAR 52.204–5, 52.212–3(c), or 52.219–1(b) indicates that it is not a women-owned business.

(C) *Code U—Uncertified.* Enter code U if the information is not available because the contractor did not complete the representation under FAR 52.204–5, 52.212–3(c), or 52.219–1(b).

Proposed Rules

Federal Register
Vol. 63, No. 216
Monday, November 9, 1998

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FARM CREDIT ADMINISTRATION

12 CFR Parts 611, 614, and 618

RIN 3052–AB87

Organization; Loan Policies and Operations; General Provisions; Chartered Territories

AGENCY: Farm Credit Administration.

ACTION: Proposed rule.

SUMMARY: This proposed rule will amend Farm Credit Administration (FCA or Agency) regulations to provide customers of the Farm Credit System (FCS, Farm Credit, or System) with the opportunity to do business with the FCS lender of their choice. The rule proposes to amend regulations to permit farmers, ranchers, and other eligible customers to seek financing and related services from any association or FCS bank operating under title I or II of the Farm Credit Act of 1971, as amended (Act). The rule proposes to eliminate geographic barriers that often prevent an FCS lender from serving customers with operations beyond its designated territory. At the same time, the rule proposes to ensure every eligible customer's continued access to FCS credit and services. It also continues to obligate each Farm Credit Bank (FCB), agricultural credit bank (ACB), and association to extend sound, adequate, and constructive credit and offer related services to eligible customers within its chartered territory. An institution that extends credit or offers related services to borrowers beyond its designated territory must adopt a board policy and a business plan that adequately guide these activities. The rule also proposes to make conforming amendments to other regulations.

DATES: Please send your comments to us on or before February 8, 1999.

ADDRESSES: You may mail or deliver written comments to Patricia W. DiMuzio, Director, Regulation and Policy Division, Office of Policy and Analysis, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090 or send them by facsimile transmission to (703) 734–5784. You may also submit comments via electronic mail to "*reg-comm@fca.gov*" or through the Pending Regulations section of our website at "www.fca.gov." You may review copies of all comments we receive in the Office of Policy and Analysis, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT:

S. Robert Coleman, Senior Policy Analyst, Office of Policy and Analysis, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4498, TDD (703) 883–4444;

or

Richard A. Katz, Senior Attorney, Office of General Counsel, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4020, TDD (703) 883–4444.

SUPPLEMENTARY INFORMATION:

I. General

The FCA proposes to repeal the restrictions in several existing regulations so eligible customers can seek financing and related services from the System institution of their choice. This is the first major step to implement the FCA Board's Philosophy Statement on Intra-System Competition adopted July 14, 1998. We believe that the existing notice and consent restrictions on lending and related services have become burdensome to both borrowers and System institutions. This has been heightened by significant changes in agriculture and the financial markets. The removal of these restrictions will allow associations and System banks operating under title I or II of the Act to increase operating efficiencies and offer better service to creditworthy and eligible borrowers. With the removal of these existing restrictions, System lenders must modify their policies and business plans as necessary to ensure that they continue to operate in a safe and sound manner.

We believe that the most efficient and least disruptive way to provide customers greater flexibility in selecting their FCS lender and service provider is through modification of existing regulations. The rule proposes to amend the regulations in parts 611, 614, and 618 to:

- Repeal the existing notification and consent requirements for lending and related services in §§ 614.4070 and 618.8030;
- Allow eligible customers to apply for credit and related services from any association or Farm Credit bank operating under title I or II of the Act;
- Require each association or Farm Credit bank operating under title I or II of the Act to continue to fulfill its obligation to serve all eligible and creditworthy customers within its designated territory; and
- Continue to promote safety and soundness by requiring each System lender to develop appropriate policies and revise its business plans before material amounts of credit or related services are extended beyond its designated territory.

II. History and Background

Section 1.1 of the Act states that the mission of the FCS is to furnish, on an ongoing basis, sound, adequate, and constructive credit and related financial services to America's agricultural and aquatic producers, their cooperatives, and other eligible rural residents. The FCS is organized as a nationwide network of cooperative banks, associations, and service corporations that are owned and controlled by the farmers, ranchers, aquatic producers or harvesters, and cooperatives that borrow from them. The charter of each System bank and association designates a geographic territory in which the institution will exercise its authorities. Although the two System banks that operate under title III of the Act have national charters to furnish credit and related services to cooperatives and rural utilities, all other System banks and associations have designated territories that cover a specified geographic region.

In the past, the FCA has used its broad power to charter, regulate, and examine System institutions in a way that generally promoted exclusive territories. This policy, which worked well for the agricultural sector in earlier times, now unnecessarily restricts customers' choice of lenders and service providers and hinders the System's ability to provide ample, efficient, and high-quality credit and related services. Consolidations in many sectors of the agricultural economy have created fewer, larger, and more vertically integrated producers that operate in several locations and require more diversified financial services.

Additionally, consolidations in the financial services markets and rapidly changing technologies are creating new sources and methods of delivery for credit and related services that transcend geographic boundaries.

The positive aspects of the former policy have eroded over the past decade as agriculture, in general, and the FCS, in particular, have restructured in response to significant economic changes. As a result of this restructuring, a notable amount of geographic competition has come about in the System. Both title III banks now operate nationally, providing cooperative customers with a choice of lender. In over 130 counties across the country more than one FCS association now offers the same type of financing to eligible borrowers. Thus, in many parts of the country we have seen substantial departures from the notion of exclusive territories. Customers have benefited from this change. Furthermore, no safety and soundness concerns have arisen from FCS institutions that jointly serve these shared designated territories.

Existing § 614.4070 is an obstacle to the ability of consumers to transact business with the System lender that best fits their needs. The current rule details a complex and burdensome set of notice and consent requirements that depend on the location of the customer's operations and headquarters. In most instances, the customer may do business only with the FCS lender that serves the territory in which the customer conducts operations. As a general rule, existing § 614.4070 prohibits an FCS lender from serving customers operating beyond the institution's designated territory unless the FCS institution designated to serve that territory consents. The existing regulation requires notice whenever a System lender finances the out-of-territory activities of an existing borrower who also conducts operations and maintains headquarters in its chartered territory. Another provision of existing § 614.4070 specifies that out-of-territory lending should not constitute a significant shift of loan volume away from the institution's designated territory.

Although some System lenders give the necessary consent freely upon a customer's request, others do not. The burden of obtaining consent and, at times not receiving it, impede the System's ability to serve the needs of eligible customers as Congress intended.

III. Customer Choice for Credit and Related Services

We believe that each FCS institution operating under title I or II of the Act needs greater flexibility to serve all eligible customers, without regard to the location of the customer's operations so long as the services are conducted safely and soundly. For this reason, the FCA proposes to amend § 614.4070 so that eligible customers can freely apply for credit and financial services from the FCS institution of their choice. This approach will benefit the public by increasing the sources and availability of credit and improving the quality of services available from System lenders. Additionally, this rule proposes to provide System institutions with a more flexible regulatory environment so they can improve their operating efficiencies and better serve their customers.

Designating service territories through the chartering process has been, and will remain, the principal method of ensuring that every eligible customer has access to an FCS lender, as Congress intended. Proposed § 614.4070(a) reaffirms that each association and FCS bank that operates under title I or II of the Act is obligated to serve eligible and creditworthy farmers, ranchers, aquatic producers or harvesters, farm-related businesses, and rural homeowners in its designated territory. This obligation encompasses the responsibility to offer an appropriate array of loan products and related services to all types of agricultural and aquatic operations within the bounds of safety and soundness. The designated territory also defines each lender's obligation under the Act to be responsive to the needs of young, beginning, and small farmers. Proposed § 614.4070(a) will ensure that every eligible customer will continue to have an FCS lender that is committed to providing credit and related services in that customer's area.

Proposed § 614.4070(b) permits eligible farmers, ranchers, aquatic producers or harvesters, farm-related businesses, and rural homeowners to seek financing and related services from any association or FCS bank operating under title I or II of the Act. The proposed regulation also allows a bank or association to extend credit, participate in loans, and provide related services to any eligible applicant under its respective title I or II authorities. Implementing this authority for loan participations should help strengthen the System's safety and soundness. In particular it will benefit an FCS lender that has a high concentration of loans in only a few agricultural commodities in its designated territory. These institutions are especially vulnerable to fluctuations in commodity prices and downturns in the agricultural economy. Additionally, geographic restrictions raise concerns because institutions face increased risk to their loan portfolios from adverse weather, disease, and pest damage. Buying and selling participations in loans with other FCS institutions and lenders in other regions of the country help institutions diversify their loan portfolios and limit their exposure to risk in a single commodity and in a specific geographic area. This proposal includes conforming amendments that repeal restrictions on loan participations in existing §§ 614.4000(d), 614.4010(e), 614.4030(b), 614.4040(b), and 614.4050(c).

Proposed § 614.4070 also enhances customer choice for related services. Some associations and FCS banks operating under title I or II of the Act offer their customers related services while other institutions offer none. This proposal will repeal § 618.8030, which contains the same consent and notice restrictions applicable to loans. This change will enable FCS customers to obtain related services even if their local FCS association does not offer the service they require.

Sound business principles dictate the importance of developing and adopting a well-reasoned policy and business plan before any company implements a new or expanded program. New programs for FCS institutions, including the offering of credit and related services provided by this proposed rule, present new opportunities and new risks for System lenders. Proposed § 614.4070(c) is designed to ensure that such programs are operated under the appropriate direction and control of each institution's board of directors.

The FCA Board expects that each FCS institution board will adopt a policy, or revise its existing policy, to address any additional risks created by new programs before an institution conducts a material amount of business with customers in new geographic markets. In considering whether the new business is material, an institution should aggregate the volume of its loans, leases, participations and other interests, and related services. Additionally, each institution should integrate the opportunities and risks created by the new programs into its operational and strategic business plans, as discussed in § 618.8040. In general, the policy and business plan should assess the institution's risk-bearing capacity and servicing capabilities to meet the needs of customers who reside in or conduct operations beyond the institution's designated territory. The institution board, in developing its policy and revising its business plan, should specifically:

- Consider how programs for providing credit and related services to a broader customer base will affect organizational efficiency, customer service, risk management, and operational capabilities;
- Establish specific operating objectives and strategies for such programs;
- Direct and control the institution's lending and related service activities conducted beyond its designated territory, ensuring that such activities are conducted in a safe and sound manner;
- Establish the types and amount of loans, loan participations, and related service activity to be permitted in new geographic markets;
- Assess risk associated with providing loans and related services in the new markets, establish risk-tolerance levels in relation to the institution's risk-bearing capacity, and consider loan portfolio concentrations; and
- Ensure existing loan underwriting criteria for loans and related services that will be offered in new geographic markets are appropriate, taking into consideration the institution's management capabilities and credit expertise, and the servicing requirements of loans made outside its designated territory.

We expect the institution's board, as part of its obligations under the Act, to continue to ensure that the institution sufficiently meets the credit and related services needs of eligible customers within its designated territory, as required by proposed § 614.4070(a). At the same time, we also expect each institution to maintain safe and sound operations, including adequate risk-bearing capacity for any new programs. As part of the board's responsibilities to ensure the continued safe and sound operations of its institution, we encourage each board to monitor, through periodic reporting requirements, the amount, quality, risk, and profitability of loans made to customers located in new geographic markets.

FCA examiners will evaluate each program in view of the potential risks and possible effects on the institution's financial condition, its asset quality, capital, and earnings capacity. To help implement these regulatory revisions in the most safe and sound manner, we will issue additional guidance to our examiners and FCS institutions once the rule becomes final.

IV. Conforming Amendments

Two additional FCA regulations, §§ 611.1124 and 614.4525, contain consent requirements that limit the ability of customers to choose their FCS lender. We propose to revise these regulations.

Section 611.1124 addresses loan transfers that occur when the FCA modifies association charters to transfer territory from one association to another. Under existing § 611.1124(f)(6), loans are usually transferred to the association that acquires the territory, unless the associations agree otherwise. With the proposed change to § 614.4070, there is no reason to assume that any territory transfer would necessarily result in the sale of loans in that territory. As amended, proposed § 611.1124(f)(6) simply requires the association to advise its shareholders whether loans will be sold in connection with the transfer of territory and, if so, the terms of the sale.

The FCA also proposes to repeal provisions in § 614.4525(b) so that cooperation may be enhanced on special loan programs between System lenders and dealers and cooperatives that serve different geographical markets. Additionally, we are proposing to eliminate paragraphs (c) and (d) because the permissive provisions of these two paragraphs are unnecessary. FCS lenders do not need regulatory authority to make contracts with others to facilitate loan applications and closings, because this authority is clearly within their express powers under the Act. This proposal would retain existing paragraph (a) and the remainder of paragraph (b), recognizing that institutions developing and implementing special lending programs should have appropriate policies in place providing board direction and control.

Additionally, the FCA is proposing to delete § 614.4080 in its entirety. This regulation originally addressed cross-territory lending by the banks for cooperatives, but is no longer applicable since both banks that have title III authorities now have national charters as authorized by the Act.

The FCA is also aware that System institutions have entered into a wide variety of agreements to serve customers in different geographic markets. Given the proposed changes to § 614.4070 and related regulations, the FCA requests comment on whether such agreements raise issues that should be addressed in the final rule.

List of Subjects

12 CFR Part 611

Agriculture, Banks, banking, Rural areas.

12 CFR Part 614

Agriculture, Banks, banking, Flood insurance, Foreign trade, Reporting and recordkeeping requirements, Rural areas.

12 CFR Part 618

Agriculture, Archives and records, Banks, banking, Insurance, Reporting and recordkeeping requirements, Rural areas, Technical assistance.

For the reasons stated in the preamble, parts 611, 614, and 618 of chapter VI, title 12 of the Code of Federal Regulations are proposed to be amended to read as follows:

PART 611—ORGANIZATION

1. The authority citation for part 611 continues to read as follows:

Authority: Secs. 1.3, 1.13, 2.0, 2.10, 3.0, 3.21, 4.12, 4.15, 4.21, 5.9, 5.10, 5.17, 7.0–7.13, 8.5(e) of the Farm Credit Act (12 U.S.C. 2011, 2021, 2071, 2091, 2121, 2142, 2183, 2203, 2209, 2243, 2244, 2252, 2279a–2279f–1, 2279aa–5(e)); secs. 411 and 412 of Pub. L. 100–233, 101 Stat. 1568, 1638; sec. 409 and 414 of Pub. L. 100–399, 102 Stat. 989, 1003 and 1004.

Subpart G—Mergers, Consolidations, and Charter Amendments of Associations

2. Section 611.1124 is amended by removing the phrase "Each borrower whose real estate or operations is located in a territory that will be transferred" in the first sentence of paragraph (l) and adding in its place, the phrase "Each borrower whose loan is sold as described in paragraph (f)(6) of this section,"; by removing the last sentence of paragraph (l); and by revising paragraph (f)(6) to read as follow:

§ 611.1124 Territorial adjustments.

* * * * *

(f) * * *

(6) A statement of whether loans will be sold in connection with the transfer of territory and, if so, the terms of the sale.

* * * * *

PART 614—LOAN POLICIES AND OPERATIONS

3. The authority citation for part 614 is revised to read as follows:

Authority: 42 U.S.C. 4012a, 4104a, 4104b, 4106, and 4128; secs. 1.3, 1.5, 1.6, 1.7, 1.9, 1.10, 1.11, 2.0, 2.2, 2.3, 2.4, 2.10, 2.12, 2.13, 2.15, 3.0, 3.1, 3.3, 3.7, 3.8, 3.10, 3.20, 3.28, 4.3A, 4.12, 4.12A, 4.13, 4.13B, 4.14, 4.14A, 4.14C, 4.14D, 4.14E, 4.18, 4.18A, 4.19, 4.36, 4.37, 5.9, 5.10, 5.17, 7.0, 7.2, 7.6, 7.8, 7.12, 7.13, 8.0, 8.5, 8.9 of the Farm Credit Act (12 U.S.C. 2011, 2013, 2014, 2015, 2017, 2018,

2019, 2071, 2073, 2074, 2075, 2091, 2093, 2094, 2097, 2121, 2122, 2124, 2128, 2129, 2131, 2141, 2149, 2154a, 2183, 2184, 2199, 2201, 2202, 2202a, 2202c, 2202d, 2202e, 2206, 2206a, 2207, 2219a, 2219b, 2243, 2244, 2252, 2279a, 2279a–2, 2279b, 2279c–1, 2279f, 2279f–1, 2279aa, 2279aa–5, 2279aa–9); sec. 413 of Pub. L. 100–233, 101 Stat. 1568, 1639.

Subpart A—Lending Authorities

§ 614.4000 [Amended]

4. Section 614.4000 is amended by removing paragraph (d)(2); by removing the words "and paragraph (d)(2) of this section" in paragraph (d)(1); and by redesignating paragraphs (d)(1), (d)(1)(i), and (d)(1)(ii) as paragraphs (d) introductory text, (d)(1) and (d)(2), respectively.

§ 614.4010 [Amended]

5. Section 614.4010 is amended by removing paragraph (e)(2); by removing the words "and paragraph (d)(2) of this section" in paragraph (e)(1); and by redesignating paragraphs (e)(1), (e)(1)(i), and (e)(1)(ii) as paragraphs (e) introductory text, (e)(1) and (e)(2), respectively.

§ 614.4030 [Amended]

6. Section 614.4030 is amended by removing paragraph (b)(2); by removing the words "and paragraph (b)(2) of this section" in paragraph (b)(1); and by redesignating paragraphs (b)(1), (b)(1)(i), and (b)(1)(ii) as paragraphs (b) introductory text, (b)(1) and (b)(2), respectively.

§ 614.4040 [Amended]

7. Section 614.4040 is amended by removing paragraph (b)(2); by removing the words "and paragraph (b)(2) of this section" in paragraph (b)(1); and by redesignating paragraphs (b)(1), (b)(1)(i), and (b)(1)(ii) as paragraphs (b) introductory text, (b)(1) and (b)(2), respectively.

§ 614.4050 [Amended]

8. Section 614.4050 is amended by removing paragraph (c)(2); by removing the words "and paragraph (c)(2) of this section" in paragraph (c)(1); and by redesignating paragraphs (c)(1), (c)(1)(i), and (c)(1)(ii) as paragraphs (c) introductory text, (c)(1) and (c)(2), respectively.

9. Subpart B is revised to read as follows:

Subpart B—Credit Extensions, Related Services and Designated Territories

§ 614.4070 Credit extensions, related services, and designated territories—Farm Credit Banks, agricultural credit banks, Federal land bank associations, Federal land credit associations, production credit associations, and agricultural credit associations.

(a) Each association or Farm Credit bank operating under title I or II of the Act must furnish sound, adequate, and constructive credit and related services pursuant to section 1.1(a) of the Act to creditworthy and eligible borrowers who reside in or conduct operations in its designated territory.

(b) Eligible customers may seek financing and related services from any association or Farm Credit bank operating under title I or II of the Act, and the Farm Credit bank or association may exercise its powers under subpart A of this part and part 618 of this chapter to make loans, participate in loans, and provide related services to any eligible borrower.

(c) Each association or Farm Credit bank that conducts a material amount of business beyond its designated territory must adopt a board policy and business plan that address such activities.

Subpart O—Special Lending Programs

§ 614.4525 [Amended]

10. Section 614.4525 is amended by removing paragraphs (c) and (d); and by removing the second sentence in paragraph (b).

PART 618—GENERAL PROVISIONS

11. The authority citation for part 618 continues to read as follows:

Authority: Secs. 1.5, 1.11, 1.12, 2.2, 2.4, 2.5, 2.12, 3.1, 3.7, 4.12, 4.13A, 4.25, 4.29, 5.9, 5.10, 5.17 of the Farm Credit Act (12 U.S.C. 2013, 2019, 2020, 2073, 2075, 2076, 2093, 2122, 2128, 2183, 2200, 2211, 2218, 2243, 2244, 2252).

Subpart A—Related Services

§ 618.8030 [Removed]

12. Section 618.8030 is removed.

Date: November 4, 1998.

Floyd Fithian,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 98–NM–222–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 747–400 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Boeing Model 747–400 series airplanes. This proposal would require installation of strap assemblies on the ceiling panels and rails that support the video monitors. This proposal is prompted by reports of the video monitor ceiling panels falling into the cabin area due to the failure of certain latch assemblies during turbulence. The actions specified by the proposed AD are intended to prevent such failure, which could cause the ceiling panels to fall into the cabin area, and consequent injury to the crew and passengers.

DATES: Comments must be received by December 24, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–222–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Jan Risheim, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–1675; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket Number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 98–NM–222–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 98–NM–222–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has received two reports of video monitor ceiling panels falling into the passenger cabin area; these ceiling panels weigh approximately 80 pounds. In both incidents, the cause of the falling video monitor ceiling panels has been attributed to the failure of certain latch assemblies on the subject ceiling panels during turbulence. This condition, if not corrected, could result in ceiling panels falling into the cabin area, and consequent injury to the crew and passengers.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletins 747–25A3142, dated October 16, 1997, and Revision 1, dated August 6, 1998, which describe procedures for installation of strap assemblies to provide backup support for the ceiling panels with video monitors. Accomplishment of the action specified in the alert service bulletins is intended to adequately address the identified unsafe condition.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require accomplishment of the actions specified in the alert service bulletins described previously, except as discussed below.

Differences Between Proposed Rule and Alert Service Bulletins

Operators should note that, although the alert service bulletins recommend installing the subject strap assemblies at the first maintenance opportunity, the FAA has determined that an unspecified interval would not address the identified unsafe condition in a timely manner. In developing an appropriate compliance time for this AD, the FAA considered not only the manufacturer's recommendation, but the degree of urgency associated with addressing the subject unsafe condition, the average utilization of the affected fleet, and the time necessary to perform the installation (476 hours). In light of all of these factors, the FAA finds a 24-month compliance time for completing the required actions to be warranted, in that it represents an appropriate interval of time allowable for affected airplanes to continue to operate without compromising safety.

Cost Impact

There are approximately 280 airplanes of the affected design in the worldwide fleet. The FAA estimates that 40 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 476 work hours per airplane to accomplish the proposed installation, and that the average labor rate is $60 per work hour. Required parts would cost approximately $9,575 per airplane. Based on these figures, the cost impact of the installation proposed by this AD on U.S. operators is estimated to be $1,525,400, or $38,135 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The FAA recognizes that the proposed installation of strap assemblies would require a large number of work hours to accomplish. However, the 24-month compliance time specified in paragraph (a) of this proposed AD should allow ample time for the installation of strap assemblies to be accomplished simultaneously with scheduled major airplane inspection and maintenance activities, thereby minimizing the costs associated with special airplane scheduling.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 98–NM–222–AD.

Applicability: Model 747–400 series airplanes, as listed in Boeing Alert Service Bulletin 747–25A3142, Revision 1, dated August 6, 1998; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been

modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of certain latch assemblies on the ceiling panels, which could cause the ceiling panels to fall into the cabin area, and consequent injury to the crew and passengers, accomplish the following:

(a) Within 24 months after the effective date of this AD, install strap assemblies on the ceiling panels and rails that support the video monitors, in accordance with Boeing Alert Service Bulletin 747–25A3142, dated October 16, 1997, or Revision 1, dated August 6, 1998.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on November 2, 1998.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 98–CE–52–AD]

RIN 2120–AA64

Airworthiness Directives; Schempp-Hirth K.G. Models Standard-Cirrus, Nimbus-2, JANUS, and Mini-Nimbus HS–7 Sailplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking (NPRM); Reopening of the comment period.

SUMMARY: This document proposes to revise an earlier proposed airworthiness directive (AD) that would have required installing a safety device for the tailplane locking hook on certain Schempp-Hirth K.G. (Schempp-Hirth) Models Standard-Cirrus, Nimbus-2, JANUS, and Mini-Nimbus HS–7 sailplanes. The proposed AD was the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Germany. The actions specified by the proposed AD are intended to prevent the locking hook on the tailplane attachment bracket from disengaging, which could result in the horizontal tailplane coming loose from the fin with possible loss of longitudinal control of the sailplane. Since issuing the NPRM, the Federal Aviation Administration (FAA) realized that it inadvertently omitted serial number 176 of the Schempp-Hirth Model Nimbus-2 sailplanes from the NPRM. The FAA has determined that this sailplane should be incorporated into the proposed AD, and that the comment period for the proposal should be reopened and the public should have additional time to comment.

DATES: Comments must be received on or before December 11, 1998.

ADDRESSES: Submit comments in triplicate to the FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 98–CE–52–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Schempp-Hirth Flugzeugbau GmbH, Postbox 14 43, D–73222 Kirchheim unter Teck, Federal Republic of Germany. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Mike Kiesov, Aerospace Engineer, FAA, Small Airplane Directorate, 1201 Walnut, suite 900, Kansas City, Missouri 64106; telephone: (816) 426–6934; facsimile: (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this supplemental notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this supplemental notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 98–CE–52–AD." The postcard will be date stamped and returned to the commenter.

Availability of Supplemental NPRM's

Any person may obtain a copy of this supplemental NPRM by submitting a request to the FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 98–CE–52–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to certain Schempp-Hirth Models Standard-Cirrus, Nimbus-2, JANUS, and Mini-Nimbus HS–7 sailplanes was published in the **Federal Register** as a notice of proposed rulemaking (NPRM) on June 17, 1998 (63 FR 33014). The NPRM proposed to require installing a safety device for the tailplane locking hook. Accomplishment of the proposed action as specified in the NPRM would be in accordance with Schempp-Hirth Appendix to Technical Note No. 278–36, 286–33, 295–26, 328–11, 798–3, dated November 11, 1994.

The NPRM was the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Germany.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public.

Events Since Issuance of the NPRM

Since issuance of the NPRM, the FAA realized that it inadvertently omitted serial number 176 of the Schempp-Hirth Model Nimbus-2 sailplanes from the NPRM.

The FAA's Determination

After examining all information related to the subject described in this document, the FAA has determined that:

—Serial number 176 of the Schempp-Hirth Model Nimbus-2 sailplanes should be added to the AD; and

—AD action should be taken to incorporate these changes to continue to prevent the locking hook on the tailplane attachment bracket from disengaging, which could result in the horizontal tailplane coming loose from the fin with possible loss of longitudinal control of the sailplane.

The Supplemental NPRM

Since adding this additional serial number sailplane to the NPRM proposes actions that go beyond the scope of what was already proposed, the FAA is reopening the comment period to allow the public additional time to comment on this proposed action.

Cost Impact

The FAA estimates that 91 sailplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 3 workhours per sailplane to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Parts cost approximately $35 per sailplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $19,565, or $215 per sailplane.

The only cost difference between this proposal and the original NPRM is the addition of 1 sailplane, or $215.

Compliance Time of the Proposed AD

Although the unsafe condition identified in this proposed AD occurs during flight and is a direct result of sailplane operation, the FAA has no way of determining how much time will elapse before the tailplane is not securely attached to the fin. For example, the condition could exist on a sailplane with 200 hours time-in-service (TIS), but could be developing on a sailplane with 50 hours TIS and not actually exist on this sailplane until 300 hours TIS. For this reason, the FAA has determined that a compliance based on calendar time should be utilized in the proposed AD in order to assure that the unsafe condition is addressed on all sailplanes in a reasonable time period.

Differences Between the Technical Note, German AD, and This Proposed AD

Both Schempp-Hirth Technical Note No. 278–36, 286–33, 295–26, 328–11, 798–3, dated November 11, 1994, and German AD 95–015, dated December 15, 1994, apply to the Model Nimbus-2M sailplanes. This sailplane model is not type certificated for operation in the United States and therefore is not covered by the applicability of the proposed AD.

The Model Nimbus-2M sailplanes could be operating in the United States with an experimental certificate. The FAA is including a NOTE in the proposed AD to recommend that any person operating a Model Nimbus-2M sailplane in the United States with an experimental certificate accomplish the actions specified in the technical note.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Schempp-Hirth K.G.: Docket No. 98–CE–52–AD.

Applicability: The following sailplane models and serial numbers, certificated in any category:

Models	Serial Nos.
Standard Cirrus.	573, 586, 593, 595, 597 through 599, 601 through 701.
Nimbus-2 ...	86, 93, and 96 through 116, 118 through 129, 131, and 176.
JANUS	1 through 55, and 59.
Mini-Nimbus HS–7.	1 through 60, and 65.

Note 1: Both Schempp-Hirth Technical Note No. 278–36, 286–33, 295–26, 328–11, 798–3, dated November 11, 1994, and German AD 95–015, dated December 15, 1994, apply to the Model Nimbus-2M sailplanes. This sailplane model is not type certificated for operation in the United States, and therefore is not covered by the applicability of this AD. The Model Nimbus-2M sailplanes could be operating in the United States with an experimental certificate. The FAA recommends that any person operating a Model Nimbus-2M sailplane in the United States with an experimental certificate accomplish the actions specified in the technical note.

Note 2: This AD applies to each sailplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For sailplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within the next 6 calendar months after the effective date of this AD, unless already accomplished.

To prevent the locking hook on the tailplane attachment bracket from disengaging, which could result in the horizontal tailplane coming loose from the fin with possible loss of longitudinal control of the sailplane, accomplish the following:

(a) Install a safety device for the tailplane locking hook in accordance with Schempp-Hirth Appendix to Technical Note No. 278–

36, 286–33, 295–26, 328–11, 798–3, dated November 11, 1994.

(b) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the sailplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Small Airplane Directorate, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Aircraft Certification Office.

(d) Questions or technical information related to the service information referenced in this document should be directed to Schempp-Hirth Flugzeugbau GmbH, Postbox 14 43, D–73222 Kirchheim unter Teck, Federal Republic of Germany. This service information may be examined at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Note 4: The subject of this AD is addressed in German AD 95–015, dated December 15, 1994.

Issued in Kansas City, Missouri, on October 30, 1998.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD07–98–054]

RIN 2115–AE47

Drawbridge Operation Regulations; Suwannee River, Florida

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard proposes to amend the regulations governing the operation of the CSX Railroad drawbridge (formerly owned by the Seaboard System Railroad) across the Suwannee River, mile 35.0, at Old Town, Dixie/Levy Counties, Florida, to allow the bridge to remain permanently closed. The railroad Right of Way was sold to the State of Florida in 1997 for development of the Nature Coast Trail, a public facility for non-motorized recreational activities. The bridge has not received an opening request since 1981. This action should accommodate the needs of recreational land traffic and still provide for the reasonable needs of navigation.

DATES: Comments must be received on or before January 8, 1999.

ADDRESSES: Comments may be mailed to Commander (oan) Seventh Coast Guard District, 909 SE 1st Avenue, Miami, Florida 33131–3050, or may be delivered to room 406 at the above address between 7:30 a.m. and 4:00 p.m. Monday through Friday, except federal holidays. The telephone number is (305) 536–4103.

The District Commander maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Walt Paskowsky, Project Manager, Bridge Section, (305) 536–4103.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views or arguments. Persons submitting comments should include their names and addresses, identify the rulemaking [CGD7 98–054] and the specific section of this proposal to which each comment applies, and give the reason for each comment. Persons wanting acknowledgement of receipt of comments should enclose stamped, self-addressed postcards or envelopes.

The Coast Guard will consider all comments received during the comment period. It may change this proposal in view of the comments received. The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the address listed in **ADDRESSES**. The request should include the reasons why a hearing would be beneficial. If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The CSX Railroad bridge is currently governed by 33 CFR 117.333 approved July 20, 1948, which provides for an opening if 5 days advance notice is given. The State of Florida purchased the rail corridor from CSX Transportation, Inc. in December 1997. The bridge was included in this purchase. CSX maintained written records for five years prior to the sale. There is no written evidence of the bridge being opened during this period. Conversations with CSX staff by the State of Florida indicate the bridge has not opened for more than 12 years. Conversations with nearby residents indicate it was last opened in 1981. The State of Florida has requested permission to permanently close the swing bridge due to a continued lack of navigation requiring an opening. Therefore, the Coast Guard has agreed to propose amending the regulations to allow the bridge to remain closed.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of executive order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation. (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary as there has not been a demand for an opening in the last 17 years.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal, if adopted, will have a significant economic impact on a substantial number of small entities. "Small entities" may include, small businesses and not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

Because it expects the impact of the proposal to be minimal, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities because the absence of any vessel traffic in the area of the bridge will not require the bridge to be opened in the future.

Collection of Information

This rule contains no collection-of-information requirements under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*).

Federalism

The Coast Guard has analyzed the rule under the principles and criteria contained in Executive Order 12612, and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard considered the environmental impact of this proposal and has concluded under Figure 2–1, paragraph (32)(e) of Commandant Instruction M16475.1C, that the promulgation of operating requirements or procedures for drawbridges is categorically excluded from further environmental documentation. A "Categorical Exclusion Determination" is available in the docket for inspection and copying.

List of Subjects in 33 CFR Part 117

Bridges.

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—[AMENDED]

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.333 is revised to read as follows:

§ 117.333 Suwannee River.

The draw of the Suwannee River bridge, mile 35, at Old Town, need not be opened for the passage of vessels.

Dated: October 22, 1998.

Norman T. Saunders,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

BILLING CODE 4910–15–M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Parts 17 and 51

RIN 2900–AE87

Per Diem for Nursing Home Care of Veterans in State Homes

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: This document proposes to revise regulations setting forth a mechanism for paying per diem to State homes providing nursing home care to eligible veterans. The intended effect of the proposed regulations is to ensure that veterans receive high quality care in State homes.

DATES: Comments must be received by VA on or before January 8, 1999.

ADDRESSES: Mail or hand-deliver written comments to: Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue, NW, Room 1154, Washington, DC 20420. Comments should indicate that they are submitted in response to "RIN 2900–AE87." All written comments will be available for public inspection in the Office of Regulations Management, Room 1158, between the hours of 8 a.m. and 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: L. Nan Stout, Chief, State Home Per Diem Program (114), Veterans Health Administration, 202–273–8538.

SUPPLEMENTARY INFORMATION: This document proposes to establish a new part 51 setting forth a mechanism for paying per diem to State homes providing nursing home care to eligible veterans. Under the proposal, VA would pay per diem to a State for providing nursing home care to eligible veterans in a facility if the Under Secretary for Health recognizes the facility as a State home based on a current VA certification that the facility meets the standards set forth in proposed subpart D.

This new part would cover material currently in manuals. Also, it would supersede the regulations currently contained in 38 CFR 17.190 through 17.199 that pertain to payment of per diem for nursing home care in State homes.

The standards in proposed subpart D are patterned after the standards of the Department of Health and Human Services that nursing homes must meet to participate in the Medicare and Medicaid programs (see 42 CFR part 483). The standards are intended to set forth minimum requirements necessary to ensure that VA pays per diem for eligible veterans only if the State homes provide high quality care.

The proposed regulations include application and inspection provisions that are designed to ensure that per diem is paid only to facilities that have been inspected and found to meet the proposed standards. Also, in order to ensure continued compliance with the standards, the proposed regulations include an ongoing review and certification program. Further, the proposed regulations contain provisions for withdrawing recognition and stopping payment of per diem if a facility fails to meet the proposed standards.

The proposed rule sets forth the statutory list of veterans for whom per diem may be paid. The proposed rule also contains provisions for determining payment amounts.

The proposed rule would incorporate by reference the 1997 edition of the National Fire Protection Association Life Safety Code entitled "NFPA 101, Life Safety Code" and the 1996 edition of "NFPA 99, Standards for Health Care Facilities." The regulations are designed to ensure that State homes meet the fire and safety provisions of the Life Safety Code.

Regulatory Flexibility Act

The Secretary hereby certifies that the adoption of this proposed rule would not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. All of the entities that would be subject to this proposed rule are State government entities under the control of State governments. Of the 93 State homes, all are operated by State governments except for 16 that are operated by entities under contract with State governments. These contractors are not small entities. Therefore, pursuant to 5 U.S.C. 605(b), this proposed rule is exempt from the initial and final regulatory flexibility analysis requirement of §§ 603 and 604.

Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), proposed collections of information are set forth in the provisions of §§ 51.20, 51.30, 51.40, 51.70, 51.80, 51.90, 51.100, 51.110, 51.120, 51.150, 51.160, 51.180, 51.190 and 51.210 of this proposed rule.

The information collections in this document concern various activities related to the operation of a State home providing nursing home care to eligible veterans. As required under section 3507(d) of the Act, VA has submitted a copy of this proposed rulemaking action to the Office of Management and Budget (OMB) for its review of the collections of information.

OMB assigns control numbers to collections of information it approves. VA may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Comments on the collection of information should be submitted to the Office of Management and Budget, Attention: Desk Officer for the Department of Veterans Affairs, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue,

NW, Washington, DC 20420. Comments should indicate that they are submitted in response to "RIN 2900–AE87."

Title: Aid to States for Care of Veterans in State Homes—Nursing Home Per Diem.

Summary of collection of information: VA is proposing to establish the mechanism for paying per diem to State homes providing nursing home care to eligible veterans. VA proposes to require facilities to supply various kinds of information regarding facilities providing nursing home care to ensure that high quality care is furnished to veterans who are residents in such facilities. The information includes an application for recognition based on certification; appeal information; application and justification for payment; records and reports which facility management must maintain regarding activities of residents; to include information relating to whether the facility meets standards concerning residents' rights and responsibilities prior to admission, during admission, and upon discharge; the records and reports which facility management and health care professionals must maintain regarding residents and employees; various types of documentation pertaining to the management of the facility; food menu planning; pharmaceutical records; and life safety documentation.

Description of need for information and proposed use of information: The collections of information contained in the proposed rule appear to be necessary to ensure that VA per diem payments are limited to facilities providing high quality care. Without access to such information VA would not be able to determine whether high quality care is being provided.

Description of likely respondents: State home officials who receive per diem for nursing home care for veterans.

Estimated number of respondents: 13,136.

Estimated frequency of responses: 52,872.

Estimated average burden per collection: 14 minutes.

Estimated total annual reporting and record keeping burden: 12,467 hours.

The Department considers comments by the public on proposed collections of information in—

- Evaluating whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility;
- Evaluating the accuracy of the Department's estimate of the burden of the proposed collections of information, including the validity of the methodology and assumptions used;
- Enhancing the quality, usefulness, and clarity of the information to be collected; and
- Minimizing the burden of the collections of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

OMB is required to make a decision concerning the proposed collection of information contained in this proposed rule between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment on the proposed regulation.

List of Subjects in 38 CFR Parts 17 and 51

Administrative practice and procedure, Alcohol abuse, Alcoholism, Claims, Day care, Dental health, Drug abuse, Foreign relations, Government contracts, Grant programs-health, Government programs-veterans, Health care, Health facilities, Health professions, Health records, Homeless, Medical and dental schools, Medical devices, Medical research, Mental health programs, Nursing home care, Philippines, Reporting and recordkeeping requirements, Scholarships and fellowships, Travel and transportation expenses, Veterans.

Approved: October 26, 1998.

Togo D. West, Jr.,

Secretary of Veterans Affairs.

For the reason set out in the preamble, 38 CFR Chapter I is proposed to be amended as follows:

PART 17—MEDICAL

1. The authority citation for part 17 continues to read as follows:

Authority: 38 U.S.C. 501, 1721, unless otherwise noted.

§ 17.190 [Amended]

2. In § 17.190, the introductory text is amended by removing "hospital, domiciliary or nursing home" and adding, in its place, "hospital or domiciliary"; paragraph (a) is amended by removing "or nursing home care"; paragraph (b) is amended by removing "nursing home care patients or"; and paragraph (d) is removed.

§ 17.191 [Amended]

3. Section 17.191 is amended by removing "domiciliary, nursing home" and adding, in its place, "domiciliary".

§ 17.192 [Amended]

4. Section 17.192 is amended by removing "nursing home or".

§ 17.193 [Amended]

5. Section 17.193 is amended by removing the second sentence thereof.

§ 17.195 [Removed]

6. Section 17.195 is removed.

§ 17.197 [Amended]

7. Section 17.197 is amended by removing "section 1741(a)(2) for nursing home care".

§ 17.198 [Amended]

8. Section 17.198 is amended by removing "hospital, domiciliary or nursing home" and adding, in its place, "hospital or domiciliary".

9. A "Note" is added immediately following the authority citation for § 17.200 to read as follows:

§ 17.200 Audit of State homes.

* * * * *

Note: Sections 17.190 through 17.200 do not apply to nursing home care in State homes. The provisions for nursing home care in State homes are set forth in 38 CFR part 51.

10. Part 51 is added to read as follows:

PART 51—PER DIEM FOR NURSING HOME CARE OF VETERANS IN STATE HOMES

Subpart A—General

Sec.

51.1 Purpose.
51.2 Definitions.

Subpart B—Obtaining Per Diem for Nursing Home Care in State Homes

51.10 Per diem based on recognition and certification.
51.20 Application for recognition based on certification.
51.30 Recognition and certification.

Subpart C—Per Diem Payments

51.40 Monthly payment.
51.50 Eligible veterans.

Subpart D—Standards

51.60 Standards applicable for payment of per diem.
51.70 Resident rights.
51.80 Admission, transfer and discharge rights.
51.90 Resident behavior and facility practices.
51.100 Quality of life.
51.110 Resident assessment.
51.120 Quality of care.
51.130 Nursing services.
51.140 Dietary services.
51.150 Physician services.
51.160 Specialized rehabilitative services.

51.224 VA Form 10–0143A—Statement of Assurance of Compliance with Section 504 of The Rehabilitation Act of 1973.
51.225 VA Form 10–0143—Department of Veterans Affairs Certification Regarding Drug-Free Workplace Requirements for Grantees Other Than Individuals.
51.226 VA Form 10–0144—Certification Regarding Lobbying.
51.227 VA Form 10–0144A—Statement of Assurance of Compliance with Equal Opportunity Laws.

Authority: 38 U.S.C. 101, 501, 1710, 1741–1743.

Subpart A—General

§ 51.1 Purpose.

This part sets forth the mechanism for paying per diem to State homes providing nursing home care to eligible veterans and is intended to ensure that veterans receive high quality care in State homes.

§ 51.2 Definitions.

For purposes of this part—

Clinical nurse specialist means a licensed professional nurse with a master's degree in nursing with a major in a clinical nursing specialty from an academic program accredited by the National League for Nursing and at least 2 years of successful clinical practice in the specialized area of nursing practice following this academic preparation.

Facility means a building or any part of a building for which a State has submitted an application for recognition as a State home for the provision of nursing home care or a building or any part of a building which VA has recognized as a State home for the provision of nursing home care.

Nurse practitioner means a licensed professional nurse who is currently licensed to practice in the State; who meets the State's requirements governing the qualifications of nurse practitioners; and who is currently certified as an adult, family, or gerontological nurse practitioner by the American Nurses' Association.

Nursing home care means the accommodation of convalescents or other persons who are not acutely ill and not in need of hospital care, but who require skilled nursing care and related medical services.

Physician means a doctor of medicine or osteopathy legally authorized to practice medicine or surgery in the State.

Physician assistant means a person who meets the applicable State requirements for physician assistant, is currently certified by the National Commission on Certification of Physician Assistants (NCCPA) as a physician assistant, and has an individualized written scope of practice that determines the authorization to write medical orders, prescribe medications and other clinical tasks under appropriate physician supervision which is approved by the primary care physician.

Primary physician or primary care physician means a designated generalist physician responsible for providing, directing and coordinating all health care that is indicated for the residents.

State means each of the several States, territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

State home means a home approved by VA which a State established primarily for veterans disabled by age, disease, or otherwise, who by reason of such disability are incapable of earning a living. A State home may provide domiciliary care, nursing home care, adult day health care, and hospital care. Hospital care may be provided only when the State home also provides domiciliary and/or nursing home care.

VA means the U.S. Department of Veterans Affairs.

Subpart B—Obtaining Per Diem for Nursing Home Care in State Homes

§ 51.10 Per diem based on recognition and certification.

VA will pay per diem to a State for providing nursing home care to eligible veterans in a facility if the Under Secretary for Health recognizes the facility as a State home based on a current certification that the facility and facility management meet the standards of subpart D of this part. Also, after recognition has been granted, VA will continue to pay per diem to a State for providing nursing home care to eligible veterans in such a facility for a temporary period based on a certification that the facility and facility management provisionally meet the standards of subpart D of this part.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.20 Application for recognition based on certification.

To apply for recognition and certification of a State home for nursing home care, a State must:

(a) Send a request for recognition and certification to the Under Secretary for Health(10), VA Headquarters, 810 Vermont Avenue, NW, Washington, DC 20420. The request must be in the form of a letter and must be signed by the State official authorized to establish the State home,

(b) Allow VA to survey the facility as set forth in § 51.30(c), and

(c) Upon request from the director of the VA medical center of jurisdiction, submit to the director all documentation required under subpart D of this part.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.30 Recognition and certification.

(a)(1) The Under Secretary for Health will make the determination regarding recognition and the initial determination regarding certification, after receipt of a tentative determination from the director of the VA medical center of jurisdiction regarding whether, based on a VA survey, the facility and facility management meet or do not meet the standards of subpart D of this part. The Under Secretary for Health will notify the official in charge of the facility, the State official authorized to oversee operations of the State home, the VA Network Director (10N 1–22), Chief Network Officer (10N), and the Chief Consultant, Geriatrics and Extended Care Strategic Healthcare Group (114) of the action taken.

(2) For each facility recognized as a State home, the director of the VA medical center of jurisdiction will certify annually whether the facility and facility management meet, provisionally meet, or do not meet the standards of subpart D of this part (this certification should be made every 12 months during the recognition anniversary month or during a month agreed upon by the VA medical care center director and officials of the State home facility). A provisional certification will be issued by the director only upon a determination that the facility or facility management does not meet one or more of the standards in subpart D of this part, that the deficiencies do not jeopardize the health or safety of the residents, and that the facility management and the director have agreed to a plan of correction to remedy the deficiencies in a specified amount of time (not more time than the VA medical center of jurisdiction director determines is reasonable for correcting the specific deficiencies). The director

of the VA medical center of jurisdiction will notify the official in charge of the facility, the State official authorized to oversee the operations of the State home, the VA Network Director (10N 1–22), Chief Network Officer (10N) and the Chief Consultant, Geriatrics and Extended Care Strategic Healthcare Group (114) of the certification, provisional certification, or noncertification.

(b) Once a facility has achieved recognition, the recognition will remain in effect unless the State requests that the recognition be withdrawn or the Under Secretary for Health makes a final decision that the facility or facility management does not meet the standards of subpart D of this part. Recognition of a facility will apply only to the facility as it exists at the time of recognition; any annex, branch, enlargement, expansion, or relocation must be separately recognized.

(c) Both during the application process for recognition and after the Under Secretary for Health has recognized a facility, VA may survey the facility as necessary to determine if the facility and facility management comply with the provisions of this part. Generally, VA will provide advance notice to the State before a survey occurs; however, surveys may be conducted without notice. A survey, as necessary, will cover all parts of the facility, and include a review and audit of all records of the facility that have a bearing on compliance with any of the requirements of this part (including any reports from State or local entities). For purposes of a survey, at the request of the director of the VA medical center of jurisdiction, the State home facility management must submit to the director a completed VA Form 10–3567, Staffing Profile, set forth at § 51.220. The director of the VA medical center of jurisdiction will designate the VA officials to survey the facility. These officials may include physicians; nurses; pharmacists; dietitians; rehabilitation therapists; social workers; representatives from health administration, engineering, environmental management systems, and fiscal officers.

(d) If the director of the VA medical center of jurisdiction determines that the State home facility or facility management does not meet the standards of this part, the director will notify the State home facility in writing of the standards not meet. The director will send a copy of this notice to the State official authorized to oversee operations of the facility, the VA Network Director (10N 1–22), the Chief Network Officer (10N), and the Chief Consultant, Geriatrics and Extended Care Strategic Healthcare Group (114). The letter will include the reasons for the decision and indicate that the State has the right to appeal the decision.

(e) The State must submit the appeal to the Under Secretary for Health in writing, within 30 days of receipt of the notice of failure to meet the standards. In its appeal, the State must explain why the determination is inaccurate or incomplete and provide any new and relevant information not previously considered. Any appeal that does not identify a reason for disagreement will be returned to the sender without further consideration.

(f) After reviewing the matter, including any relevant supporting documentation, the Under Secretary for Health will issue a written determination that affirms or reverses the previous determination. If the Under Secretary for Health decides that the facility does not meet the standards of subpart D of this part, the Under Secretary for Health will withdraw recognition and stop paying per diem for care provided on and after the date of the decision. The decision of Under Secretary for Health will constitute a final VA decision. The Under Secretary for Health will send a copy of this decision to the State home facility and to the State official authorized to oversee the operations of the State home.

(g) In the event that a VA survey team or other VA medical center staff identifies any condition that poses an immediate threat to public or patient safety or other information indicating the existence of such a threat, the director of VA medical center of jurisdiction will immediately report this to the VA Network Director (10N 1–22), Chief Network Officer (10N), Chief Consultant, Geriatrics and Extended Care Strategic Healthcare Group (114) and State official authorized to oversee operations of the State home.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

Subpart C—Per Diem Payments

§ 51.40 Monthly payment.

(a)(1) During Fiscal Year 1999, VA will pay monthly one-half of the cost of each eligible veteran's nursing home care for each day the veteran is in a facility recognized as a State home for nursing home care, not to exceed $43.92 per diem.

(2) Per diem will be paid only for the days that the veteran is a resident at the facility. For purposes of paying per diem, VA will consider a veteran to be a resident at the facility during each full day that the veteran is receiving care at the facility. VA will not deem the veteran to be a resident at the facility if the veteran is receiving care outside the State home facility at VA expense. Otherwise, VA will deem the veteran to be a resident at the facility during any absence from the facility that lasts for no more than 96 consecutive hours. This absence will be considered to have ended when the veteran returns as a resident if the veteran's stay is for at least a continuous 24-hour period.

(3) As a condition for receiving payment of per diem under this part, the State must submit a completed VA form 10–5588, State Home Report and Statement of Federal Aid Claimed. This form is set forth in full at § 51.221 of this part.

(4) Initial payments will not be made until the Under Secretary for Health recognizes the State home. However, payments will be made retroactively for care that was provided on and after the date of the completion of the VA survey of the facility that provided the basis for determining that the facility met the standards of this part.

(5) As a condition for receiving payment of per diem under this part, the State must submit to the VA medical center of jurisdiction for each veteran the following completed VA forms 10–10EZ, Application for Medical Benefits, and 10–10SH, State Home Program Application for Care—Medical Certification, at the time of admission and with any request for a change in the level of care (domiciliary care or hospital care). These forms are set forth in full at § 51.222 and § 51.223, respectively, of this part. If the facility is eligible to receive per diem payments for a veteran, VA will pay per diem under this part from the date of receipt of the completed forms required by this paragraph, except that VA will pay per diem from the day on which the veteran was admitted to the facility if the completed forms are received within 10 days after admission.

(b) Total per diem costs for an eligible veteran's nursing home care consist of those direct and indirect costs attributable to nursing home care at the facility divided by the total number of patients at the nursing home. Relevant cost principles are set forth in the Office of Management and Budget (OMB) Circular number A–87, dated May 4, 1995, "Cost Principles for State, Local, and Indian Tribal Governments."

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.50 Eligible veterans.

A veteran is an eligible veteran under this part if VA determines that the veteran needs nursing home care and the veteran is within one of the following categories:

(a) Veterans with service-connected disabilities;

(b) Veterans who are former prisoners of war;

(c) Veterans who were discharged or released from active military service for a disability incurred or aggravated in the line of duty;

(d) Veterans who receive disability compensation under 38 U.S.C. 1151;

(e) Veterans whose entitlement to disability compensation is suspended because of the receipt of retired pay;

(f) Veterans whose entitlement to disability compensation is suspended pursuant to 38 U.S.C. 1151, but only to the extent that such veterans' continuing eligibility for nursing home care is provided for in the judgment or settlement described in 38 U.S.C. 1151;

(g) Veterans who VA determines are unable to defray the expenses of necessary care as specified under 38 U.S.C. 1722(a);

(h) Veterans of the Mexican border period or of World War I;

(i) Veterans solely seeking care for a disorder associated with exposure to a toxic substance or radiation or for a disorder associated with service in the Southwest Asia theater of operations during the Persian Gulf War, as provided in 38 U.S.C. 1710(e);

(j) Veterans who agree to pay to the United States the applicable co-payment determined under 38 U.S.C. 1710(f) and 1710(g), if they seek VA hospital, nursing home, or outpatient care.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

Subpart D—Standards

§ 51.60 Standards applicable for payment of per diem.

The provisions of this subpart are the standards that a State home and facility management must meet for the State to receive per diem for nursing home care.

§ 51.70 Resident rights.

The resident has a right to a dignified existence, self-determination, and communication with and access to persons and services inside and outside the facility. The facility management must protect and promote the rights of each resident, including each of the following rights:

(a) *Exercise of rights.* (1) The resident has the right to exercise his or her rights as a resident of the facility and as a citizen or resident of the United States.

(2) The resident has the right to be free of interference, coercion, discrimination, and reprisal from the facility management in exercising his or her rights.

(3) The resident has the right to freedom from chemical or physical restraint.

(4) In the case of a resident determined incompetent under the laws of a State by a court of jurisdiction, the rights of the resident are exercised by the person appointed under State law to act on the resident's behalf.

(5) In the case of a resident who has not been determined incompetent by the State court, any legal-surrogate designated in accordance with State law may exercise the resident's rights to the extent provided by State law.

(b) *Notice of rights and services.* (1) The facility management must inform the resident both orally and in writing in a language that the resident understands of his or her rights and all rules and regulations governing resident conduct and responsibilities during the stay in the facility. Such notification must be made prior to or upon admission and periodically during the resident's stay.

(2) The resident or his or her legal representative has the right—

(i) Upon an oral or written request, to access all records pertaining to himself or herself including current clinical records within 24 hours (excluding weekends and holidays); and

(ii) After receipt of his or her records for review, to purchase at a cost not to exceed the community standard photocopies of the records or any portions of them upon request and with 2 working days advance notice to the facility management.

(3) The resident has the right to be fully informed in language that he or she can understand of his or her total health status;

(4) The resident has the right to refuse treatment, to refuse to participate in experimental research, and to formulate an advance directive as specified in paragraph (b)(7) of this section; and

(5) The facility management must inform each resident before, or at the time of admission, and periodically during the resident's stay, of services available in the facility and of charges for those services to be billed to the resident.

(6) The facility management must furnish a written description of legal rights which includes—

(i) A description of the manner of protecting personal funds, under paragraph (c) of this section;

(ii) A statement that the resident may file a complaint with the State (agency) concerning resident abuse, neglect, misappropriation of resident property in the facility, and non-compliance with the advance directives requirements.

(7) The facility management must have written policies and procedures regarding advance directives (e.g., living wills). These requirements include provisions to inform and provide written information to all residents concerning the right to accept or refuse medical or surgical treatment and, at the individual's option, formulate an advance directive. This includes a written description of the facility's policies to implement advance directives and applicable State law. If an individual is incapacitated at the time of admission and is unable to receive information (due to the incapacitating conditions) or articulate whether or not he or she has executed an advance directive, the facility may give advance directive information to the individual's family or surrogate in the same manner that it issues other materials about policies and procedures to the family of the incapacitated individual or to a surrogate or other concerned persons in accordance with State law. The facility management is not relieved of its obligation to provide this information to the individual once he or she is no longer incapacitated or unable to receive such information. Follow-up procedures must be in place to provide the information to the individual directly at the appropriate time.

(8) The facility management must inform each resident of the name and way of contacting the primary physician responsible for his or her care.

(9) Notification of changes. (i) Facility management must immediately inform the resident; consult with the primary physician; and if known, notify the resident's legal representative or an interested family member when there is—

(A) An accident involving the resident which results in injury and has the potential for requiring physician intervention;

(B) A significant change in the resident's physical, mental, or psychosocial status (i.e., a deterioration in health, mental, or psychosocial status in either life-threatening conditions or clinical complications);

(C) A need to alter treatment significantly (i.e., a need to discontinue an existing form of treatment due to adverse consequences, or to commence a new form of treatment); or

(D) A decision to transfer or discharge the resident from the facility as specified in § 51.80(a) of this part.

(ii) The facility management must also promptly notify the resident and, if known, the resident's legal

representative or interested family member when there is—

(A) A change in room or roommate assignment as specified in § 51.100(f)(2); or

(B) A change in resident rights under Federal or State law or regulations as specified in paragraph (b)(1) of this section.

(iii) The facility management must record and periodically update the address and phone number of the resident's legal representative or interested family member.

(c) *Protection of resident funds.* (1) The resident has the right to manage his or her financial affairs, and the facility management may not require residents to deposit their personal funds with the facility.

(2) Management of personal funds. Upon written authorization of a resident, the facility management must hold, safeguard, manage, and account for the personal funds of the resident deposited with the facility, as specified in paragraphs (c)(3)–(6) of this section.

(3) Deposit of funds. (i) Funds in excess of $50. The facility management must deposit any residents' personal funds in excess of $50 in an interest bearing account (or accounts) that is separate from any of the facility's operating accounts, and that credits all interest earned on resident's funds to that account. (In pooled accounts, there must be a separate accounting for each resident's share.)

(ii) Funds less than $50. The facility management must maintain a resident's personal funds that do not exceed $50 in a non-interest bearing account, interest-bearing account, or petty cash fund.

(4) Accounting and records. The facility management must establish and maintain a system that assures a full and complete and separate accounting, according to generally accepted accounting principles, of each resident's personal funds entrusted to the facility on the resident's behalf.

(i) The system must preclude any commingling of resident funds with facility funds or with the funds of any person other than another resident.

(ii) The individual financial record must be available through quarterly statements and on request to the resident or his or her legal representative.

(5) Conveyance upon death. Upon the death of a resident with a personal fund deposited with the facility, the facility management must convey within 30 days the resident's funds, and a final accounting of those funds, to the individual or probate jurisdiction administering the resident's estate.

(6) Assurance of financial security. The facility management must purchase a surety bond, or otherwise provide assurance satisfactory to the Under Secretary for Health, to assure the security of all personal funds of residents deposited with the facility.

(d) *Free choice.* The resident has the right to—

(1) Be fully informed in advance about care and treatment and of any changes in that care or treatment that may affect the resident's well-being; and

(2) Unless determined incompetent or otherwise determined to be incapacitated under the laws of the State, participate in planning care and treatment or changes in care and treatment.

(e) *Privacy and confidentiality.* The resident has the right to personal privacy and confidentiality of his or her personal and clinical records.

(1) Residents have a right to personal privacy in their accommodations, medical treatment, written and telephone communications, personal care, visits, and meetings of family and resident groups. This does not require the facility management to give a private room to each resident.

(2) Except as provided in paragraph (e)(3) of this section, the resident may approve or refuse the release of personal and clinical records to any individual outside the facility;

(3) The resident's right to refuse release of personal and clinical records does not apply when—

(i) The resident is transferred to another health care institution; or

(ii) Record release is required by law.

(f) *Grievances.* A resident has the right to—

(1) Voice grievances without discrimination or reprisal. Residents may voice grievances with respect to treatment received and not received; and

(2) Prompt efforts by the facility to resolve grievances the resident may have, including those with respect to the behavior of other residents.

(g) *Examination of survey results.* A resident has the right to—

(1) Examine the results of the most recent VA survey with respect to the facility. The facility management must make the results available for examination in a place readily accessible to residents, and must post a notice of their availability; and

(2) Receive information from agencies acting as client advocates, and be afforded the opportunity to contact these agencies.

(h) *Work.* The resident has the right to—

(1) Refuse to perform services for the facility;

(2) Perform services for the facility, if he or she chooses, when—

(i) The facility has documented the need or desire for work in the plan of care;

(ii) The plan specifies the nature of the services performed and whether the services are voluntary or paid;

(iii) Compensation for paid services is at or above prevailing rates; and

(iv) The resident agrees to the work arrangement described in the plan of care.

(i) *Mail.* The resident has the right to privacy in written communications, including the right to—

(1) Send and promptly receive mail that is unopened; and

(2) Have access to stationery, postage, and writing implements at the resident's own expense.

(j) *Access and visitation rights.* (1) The resident has the right and the facility management must provide immediate access to any resident by the following:

(i) Any representative of the Under Secretary for Health;

(ii) Any representative of the State;

(iii) Physicians of the resident's choice;

(iv) The State long term care ombudsman;

(v) Immediate family or other relatives of the resident subject to the resident's right to deny or withdraw consent at any time; and

(vi) Others who are visiting subject to reasonable restrictions and the resident's right to deny or withdraw consent at any time.

(2) The facility management must provide reasonable access to any resident by any entity or individual that provides health, social, legal, or other services to the resident, subject to the resident's right to deny or withdraw consent at any time.

(3) The facility management must allow representatives of the State Ombudsman Program, described in paragraph (j)(1)(iv) of this section, to examine a resident's clinical records with the permission of the resident or the resident's legal representative, subject to State law.

(k) *Telephone.* The resident has the right to reasonable access to use a telephone where calls can be made without being overheard.

(l) *Personal property.* The resident has the right to retain and use personal possessions, including some furnishings, and appropriate clothing, as space permits, unless to do so would infringe upon the rights or health and safety of other residents.

(m) *Married couples.* The resident has the right to share a room with his or her spouse when married residents live in the same facility and both spouses consent to the arrangement.

(n) *Self-Administration of drugs.* An individual resident may self-administer drugs if the interdisciplinary team, as defined by § 51.110(d)(2)(ii) of this part, has determined that this practice is safe.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.80 Admission, transfer and discharge rights.

(a) *Transfer and discharge*—(1) *Definition.* Transfer and discharge includes movement of a resident to a bed outside of the facility whether that bed is in the same physical plant or not. Transfer and discharge does not refer to movement of a resident to a bed within the same facility.

(2) *Transfer and discharge requirements.* The facility management must permit each resident to remain in the facility, and not transfer or discharge the resident from the facility unless—

(i) The transfer or discharge is necessary for the resident's welfare and the resident's needs cannot be met in the nursing home;

(ii) The transfer or discharge is appropriate because the resident's health has improved sufficiently so the resident no longer needs the services provided by the nursing home;

(iii) The safety of individuals in the facility is endangered;

(iv) The health of individuals in the facility would otherwise be endangered;

(v) The resident has failed, after reasonable and appropriate notice to pay for a stay at the facility; or

(vi) The nursing home ceases to operate.

(3) *Documentation.* When the facility transfers or discharges a resident under any of the circumstances specified in paragraphs (a)(2)(i) through (a)(2)(vi) of this section, the primary physician must document in the resident's clinical record.

(4) *Notice before transfer.* Before a facility transfers or discharges a resident, the facility must—

(i) Notify the resident and, if known, a family member or legal representative of the resident of the transfer or discharge and the reasons for the move in writing and in a language and manner they understand.

(ii) Record the reasons in the resident's clinical record; and

(iii) Include in the notice the items described in paragraph (a)(6) of this section.

(5) *Timing of the notice.* (i) The notice of transfer or discharge required under paragraph (a)(4) of this section must be made by the facility at least 30 days before the resident is transferred or discharged, except when specified in paragraph (a)(5)(ii) of this section,

(ii) Notice may be made as soon as practicable before transfer or discharge when—

(A) The safety of individuals in the facility would be endangered;

(B) The health of individuals in the facility would be otherwise endangered;

(C) The resident's health improves sufficiently so the resident no longer needs the services provided by the nursing home;

(D) The resident's needs cannot be met in the nursing home;

(6) Contents of the notice. The written notice specified in paragraph (a)(4) of this section must include the following:

(i) The reason for transfer or discharge;

(ii) The effective date of transfer or discharge;

(iii) The location to which the resident is transferred or discharged;

(iv) A statement that the resident has the right to appeal the action to the State official designated by the State; and

(v) The name, address and telephone number of the State long term care ombudsman.

(7) *Orientotion for transfer or discharge.* A facility management must provide sufficient preparation and orientation to residents to ensure safe and orderly transfer or discharge from the facility.

(b) *Notice of bed-hold policy and readmission.*—(1) *Notice before transfer.* Before a facility transfers a resident to a hospital or allows a resident to go on therapeutic leave, the facility management must provide written information to the resident and a family member or legal representative that specifies—

(i) The duration of the facility's bed-hold policy, if any, during which the resident is permitted to return and resume residence in the facility; and

(ii) The facility's policies regarding bed-hold periods, which must be consistent with paragraph (b)(3) of this section, permitting a resident to return.

(2) *Bed-hold notice upon transfer.* At the time of transfer of a resident for hospitalization or therapeutic leave, facility management must provide to the resident and a family member or legal representative written notice which specifies the duration of the bed-hold policy described in paragraph (b)(1) of this section.

(3) *Permitting resident to return to facility.* A nursing facility must establish and follow a written policy under which a resident, whose hospitalization or therapeutic leave exceeds the bed-hold period is readmitted to the facility immediately upon the first availability of a bed in a semi-private room, if the resident requires the services provided by the facility.

(c) *Equal access to quality care.* The facility management must establish and maintain identical policies and practices regarding transfer, discharge, and the provision of services for all individuals regardless of source of payment.

(d) *Admissions policy.* The facility management must not require a third party guarantee of payment to the facility as a condition of admission or expedited admission, or continued stay in the facility. However, the facility may require an individual who has legal access to a resident's income or resources available to pay for facility care to sign a contract to pay the facility from the resident's income or resources.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.90 Resident behavior and facility practices.

(a) *Restraints.* (1) The resident has a right to be free from any chemical or physical restraints imposed for purposes of discipline or convenience. When a restraint is applied or used, the purpose of the restraint is reviewed and is justified as a therapeutic intervention.

(i) Chemical restraint is the inappropriate use of a sedating psychotropic drug to manage or control behavior.

(ii) Physical restraint is any method of physically restricting a person's freedom of movement, physical activity or normal access to his or her body. Bed rails and vest restraints are examples of physical restraints.

(2) The facility management uses a system to achieve a restraint-free environment.

(3) The facility management collects data about the use of restraints.

(4) When alternatives to the use of restraint are ineffective, restraint is safely and appropriately used.

(b) *Abuse.* The resident has the right to be free from mental, physical, sexual, and verbal abuse or neglect, corporal punishment, and involuntary seclusion.

(1) Mental abuse includes humiliation, harassment, and threats of punishment or deprivation.

(2) Physical abuse includes hitting, slapping, pinching, or kicking. Also includes controlling behavior through corporal punishment.

(3) Sexual abuse includes sexual harassment, sexual coercion, and sexual assault.

(4) Neglect is any impaired quality of life for an individual because of the absence of minimal services or

resources to meet basic needs. Includes withholding or inadequately providing food and hydration (without physician, resident, or surrogate approval), clothing, medical care, and good hygiene. May also include placing the individual in unsafe or unsupervised conditions.

(5) Involuntary seclusion is a resident's separation from other residents or from the resident's room against his or her will or the will of his or her legal representative.

(c) *Staff treatment of residents.* The facility management must develop and implement written policies and procedures that prohibit mistreatment, neglect, and abuse of residents and misappropriation of resident property.

The facility management must:

(i) Not employ individuals who —

(A) Have been found guilty of abusing, neglecting, or mistreating individuals by a court of law; or

(B) Have had a finding entered into an applicable State registry or with the applicable licensing authority concerning abuse, neglect, mistreatment of individuals or misappropriation of their property; and

(ii) Report any knowledge it has of actions by a court of law against an employee, which would indicate unfitness for service as a nurse aide or other facility staff to the State nurse aide registry or licensing authorities.

(2) The facility management must ensure that all alleged violations involving mistreatment, neglect, or abuse, including injuries of unknown source, and misappropriation of resident property are reported immediately to the administrator of the facility and to other officials in accordance with State law through established procedures.

(3) The facility management must have evidence that all alleged violations are thoroughly investigated, and must prevent further potential abuse while the investigation is in progress.

(4) The results of all investigations must be reported to the administrator or the designated representative and to other officials in accordance with State law within 5 working days of the incident, and appropriate corrective action must be taken if the alleged violation is verified.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.100 Quality of life.

A facility management must care for its residents in a manner and in an environment that promotes maintenance or enhancement of each resident's quality of life.

(a) *Dignity.* The facility management must promote care for residents in a manner and in an environment that maintains or enhances each resident's dignity and respect in full recognition of his or her individuality.

(b) *Self-determination and participation.* The resident has the right to—

(1) Choose activities, schedules, and health care consistent with his or her interests, assessments, and plans of care;

(2) Interact with members of the community both inside and outside the facility; and

(3) Make choices about aspects of his or her life in the facility that are significant to the resident.

(c) *Resident Council.* The facility management must establish a council of residents that meet at least quarterly. The facility management must document any concerns submitted to the management of the facility by the council.

(d) *Participation in resident and family groups.* (1) A resident has the right to organize and participate in resident groups in the facility;

(2) A resident's family has the right to meet in the facility with the families of other residents in the facility;

(3) The facility management must provide the council and any resident or family group that exists with private space;

(4) Staff or visitors may attend meetings at the group's invitation;

(5) The facility management must provide a designated staff person responsible for providing assistance and responding to written requests that result from group meetings;

(6) The facility management must listen to the views of any resident or family group, including the council established under paragraph (c) of this section, and act upon the concerns of residents, families, and the council regarding policy and operational decisions affecting resident care and life in the facility.

(e) *Participation in other activities.* A resident has the right to participate in social, religious, and community activities that do not interfere with the rights of other residents in the facility. The facility management must arrange for religious counseling by clergy of various faith groups.

(f) *Accommodation of needs.* A resident has the right to—

(1) Reside and receive services in the facility with reasonable accommodation of individual needs and preferences, except when the health or safety of the individual or other residents would be endangered; and

(2) Receive notice before the resident's room or roommate in the facility is changed.

(g) *Potient Activities.* (1) The facility management must provide for an ongoing program of activities designed to meet, in accordance with the comprehensive assessment, the interests and the physical, mental, and psychosocial well-being of each resident.

(2) The activities program must be directed by a qualified professional who—

(i) Is a qualified therapeutic recreation specialist or an activities professional who—

(A) Is licensed or registered, if applicable, by the State in which practicing; and

(B) Is certified as a therapeutic recreation specialist or as an activities professional by a recognized accrediting body.

(h) *Sociol Services.* (1) The facility management must provide medically related social services to attain or maintain the highest practicable mental and psychosocial well being of each resident.

(2) A nursing home with 100 or more beds must employ a qualified social worker on a full-time basis.

(3) Qualifications of social worker. A qualified social worker is an individual with—

(i) A bachelor's degree in social work from a school accredited by the Council of Social Work Education, and

Note: A master's degree social worker with experience in long-term care is preferred.

(ii) A social work license from the State in which the State home is located, if offered by the State, and

(iii) A minimum of one year of supervised social work experience, under the supervision of a social worker with a master's degree, in a health care setting working directly with individuals.

(4) The facility management must have sufficient support staff to meet patients' social services needs.

(5) Facilities for social services must ensure privacy for interviews.

(i) *Environment.* The facility management must provide—

(1) A safe, clean, comfortable, and homelike environment, allowing the resident to use his or her personal belongings to the extent possible;

(2) Housekeeping and maintenance services necessary to maintain a sanitary, orderly, and comfortable interior;

(3) Clean bed and bath linens that are in good condition;

(4) Private closet space in each resident room, as specified in § 51.200(d)(2)(iv) of this part;

(5) Adequate and comfortable lighting levels in all areas;

(6) Comfortable and safe temperature levels. Facilities must maintain a temperature range of 71–81 degrees F.; and

(7) For the maintenance of comfortable sound levels.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.110 Resident assessment.

The facility management must conduct initially, annually and as required by a change in the resident's condition a comprehensive, accurate, standardized, reproducible assessment of each resident's functional capacity.

(a) *Admission orders.* At the time each resident is admitted, the facility management must have physician orders for the resident's immediate care and a medical assessment, including a medical history and physical examination, within a time frame appropriate to the resident's condition, not to exceed 72 hours after admission, except when an examination was performed within five days before admission and the findings were recorded in the medical record on admission.

(b) *Comprehensive assessments.* (1) The facility management must make a comprehensive assessment of a resident's needs:

(i) Using the Health Care Financing Administration Long Term Care Resident Assessment Instrument Version 2.0; and

(ii) Describing the resident's capability to perform daily life functions, strengths, performances, needs as well as significant impairments in functional capacity.

(iii) All nursing homes must be in compliance with this standard by no later than January 1, 2000.

(2) Frequency. Assessments must be conducted—

(i) No later than 14 days after the date of admission;

(ii) Promptly after a significant change in the resident's physical, mental, or social condition; and

(iii) In no case less often than once every 12 months.

(3) Review of assessments. The nursing facility management must examine each resident no less than once every 3 months, and as appropriate, revise the resident's assessment to assure the continued accuracy of the assessment.

(4) Use. The results of the assessment are used to develop, review, and revise the resident's individualized comprehensive plan of care, under paragraph (d) of this section.

(c) *Accuracy of assessments.* (1) Coordination—

(i) Each assessment must be conducted or coordinated with the appropriate participation of health professionals.

(ii) Each assessment must be conducted or coordinated by a registered nurse that signs and certifies the completion of the assessment.

(2) Certification. Each person who completes a portion of the assessment must sign and certify the accuracy of that portion of the assessment.

(d) *Comprehensive care plans.* (1) The facility management must develop an individualized comprehensive care plan for each resident that includes measurable objectives and timetables to meet a resident's physical, mental, and psychosocial needs that are identified in the comprehensive assessment. The care plan must describe the following—

(i) The services that are to be furnished to attain or maintain the resident's highest practicable physical, mental, and psychosocial well-being as required under § 51.120; and

(ii) Any services that would otherwise be required under § 51.120 of this part but are not provided due to the resident's exercise of rights under § 51.70, including the right to refuse treatment under § 51.70(b)(4) of this part.

(2) A comprehensive care plan must be—

(i) Developed within 7 calendar days after completion of the comprehensive assessment;

(ii) Prepared by an interdisciplinary team, that includes the primary physician, a registered nurse with responsibility for the resident, and other appropriate staff in disciplines as determined by the resident's needs, and, to the extent practicable, the participation of the resident, the resident's family or the resident's legal representative; and

(iii) Periodically reviewed and revised by a team of qualified persons after each assessment.

(3) The services provided or arranged by the facility must—

(i) Meet professional standards of quality; and

(ii) Be provided by qualified persons in accordance with each resident's written plan of care.

(e) *Discharge summary.* Prior to discharging a resident, the facility management must prepare a discharge summary that includes—

(1) A recapitulation of the resident's stay;

(2) A summary of the resident's status at the time of the discharge to include items in paragraph (b)(2) of this section; and

(3) A post-discharge plan of care that is developed with the participation of the resident and his or her family, which will assist the resident to adjust to his or her new living environment.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.120 Quality of care.

Each resident must receive and the facility management must provide the necessary care and services to attain or maintain the highest practicable physical, mental, and psychosocial well-being, in accordance with the comprehensive assessment and plan of care.

(a) *Reporting of Sentinel Events.* (1) Definition. A sentinel event is an adverse event that results in the loss of life or limb or permanent loss of function.

(2) Examples of sentinel events are as follows:

(i) Any resident death, paralysis, coma or other major permanent loss of function associated with a medication error; or

(ii) Any suicide of a resident, including suicides following elopement (unauthorized departure) from the facility; or

(iii) Any elopement of a resident from the facility resulting in a death or a major permanent loss of function; or

(iv) Any procedure or clinical intervention, including restraints, that result in death or a major permanent loss of function; or

(v) Assault, homicide or other crime resulting in patient death or major permanent loss of function; or

(vi) A patient fall that results in death or major permanent loss of function as a direct result of the injuries sustained in the fall.

(3) The facility management must report sentinel events to the director of VA medical center of jurisdiction, VA Network Director (10N 1–22), Chief Network Officer (10N), and Chief Consultant, Geriatrics and Extended Care Strategic Healthcare Group (114) within 24 hours of identification.

(4) The facility management must establish a mechanism to review and analyze a sentinel event resulting in a written report no later than 10 working days following the event.

(i) Goal. The purpose of the review and analysis of a sentinel event is to prevent injuries to residents, visitors, and personnel, and to manage those injuries that do occur and to minimize

the negative consequences to the injured individuals and facility.

(b) *Activities of daily living.* Based on the comprehensive assessment of a resident, the facility management must ensure that—

(1) A resident's abilities in activities of daily living do not diminish unless circumstances of the individual's clinical condition demonstrate that diminution was unavoidable. This includes the resident's ability to—

(i) Bathe, dress, and groom;

(ii) Transfer and ambulate;

(iii) Toilet;

(iv) Eat; and

(v) Talk or otherwise communicate.

(2) A resident is given the appropriate treatment and services to maintain or improve his or her abilities specified in paragraph (b)(1) of this section; and

(3) A resident who is unable to carry out activities of daily living receives the necessary services to maintain good nutrition, hydration, grooming, personal and oral hygiene, mobility, and bladder and bowel elimination.

(c) *Vision and hearing.* To ensure that residents receive proper treatment and assistive devices to maintain vision and hearing abilities, the facility must, if necessary, assist the resident—

(1) In making appointments, and

(2) By arranging for transportation to and from the office of a practitioner specializing in the treatment of vision or hearing impairment or the office of a professional specializing in the provision of vision or hearing assistive devices.

(d) *Pressure sores.* Based on the comprehensive assessment of a resident, the facility management must ensure that—

(1) A resident who enters the facility without pressure sores does not develop pressure sores unless the individual's clinical condition demonstrates that they were unavoidable; and

(2) A resident having pressure sores receives necessary treatment and services to promote healing, prevent infection and prevent new sores from developing.

(e) *Urinary and Fecal Incontinence.* Based on the resident's comprehensive assessment, the facility management must ensure that—

(1) A resident who enters the facility without an indwelling catheter is not catheterized unless the resident's clinical condition demonstrates that catheterization was necessary; and

(2) A resident who is incontinent of urine receives appropriate treatment and services to prevent urinary tract infections and to restore as much normal bladder function as possible.

(3) A resident who has persistent fecal incontinence receives appropriate treatment and services to treat reversible causes and to restore as much normal bowel function as possible.

(f) *Range of motion.* Based on the comprehensive assessment of a resident, the facility management must ensure that—

(1) A resident who enters the facility without a limited range of motion does not experience reduction in range of motion unless the resident's clinical condition demonstrates that a reduction in range of motion is unavoidable; and

(2) A resident with a limited range of motion receives appropriate treatment and services to increase range of motion and/or to prevent further decrease in range of motion.

(g) *Mental and Psychosocial functioning.* Based on the comprehensive assessment of a resident, the facility management must ensure that a resident who displays mental or psychosocial adjustment difficulty, receives appropriate treatment and services to correct the assessed problem.

(h) *Enteral Feedings.* Based on the comprehensive assessment of a resident, the facility management must ensure that—

(1) A resident who has been able to adequately eat or take fluids alone or with assistance is not fed by enteral feedings unless the resident's clinical condition demonstrates that use of enteral feedings was unavoidable; and

(2) A resident who is fed by enteral feedings receives the appropriate treatment and services to prevent aspiration pneumonia, diarrhea, vomiting, dehydration, metabolic abnormalities, nasal-pharyngeal ulcers and other skin breakdowns, and to restore, if possible, normal eating skills.

(i) *Accidents.* The facility management must ensure that—

(1) The resident environment remains as free of accident hazards as is possible; and

(2) Each resident receives adequate supervision and assistance devices to prevent accidents.

(j) *Nutrition.* Based on a resident's comprehensive assessment, the facility management must ensure that a resident—

(1) Maintains acceptable parameters of nutritional status, such as body weight and protein levels, unless the resident's clinical condition demonstrates that this is not possible; and

(2) Receives a therapeutic diet when a nutritional deficiency is identified.

(k) *Hydration.* The facility management must provide each resident with sufficient fluid intake to maintain proper hydration and health.

(l) *Special needs.* The facility management must ensure that residents receive proper treatment and care for the following special services:

(1) Injections;

(2) Parenteral and enteral fluids;

(3) Colostomy, ureterostomy, or ileostomy care;

(4) Tracheostomy care;

(5) Tracheal suctioning;

(6) Respiratory care;

(7) Foot care; and

(8) Prostheses.

(m) *Unnecessary drugs*—(1) *General.* Each resident's drug regimen must be free from unnecessary drugs. An unnecessary drug is any drug when used:

(i) In excessive dose (including duplicate drug therapy); or

(ii) For excessive duration; or

(iii) Without adequate monitoring; or

(iv) Without adequate indications for its use; or

(v) In the presence of adverse consequences which indicate the dose should be reduced or discontinued; or

(vi) Any combinations of the reasons above.

(2) *Antipsychotic Drugs.* Based on a comprehensive assessment of a resident, the facility management must ensure that—

(i) Residents who have not used antipsychotic drugs are not given these drugs unless antipsychotic drug therapy is necessary to treat a specific condition as diagnosed and documented in the clinical record; and

(ii) Residents who use antipsychotic drugs receive gradual dose reductions, and behavioral interventions, unless clinically contraindicated, in an effort to discontinue these drugs.

(n) *Medication Errors.* The facility management must ensure that—

(1) Medication errors are identified and reviewed on a timely basis; and

(2) strategies for preventing medication errors and adverse reactions are implemented.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.130 Nursing services.

The facility management must provide an organized nursing service with a sufficient number of qualified nursing personnel to meet the total nursing care needs, as determined by resident assessment and individualized comprehensive plans of care, of all patients within the facility 24 hours a day, 7 days a week.

(a) The nursing service must be under the direction of a full-time registered nurse who is currently licensed by the State and has, in writing, administrative authority, responsibility, and accountability for the functions, activities, and training of the nursing services staff.

(b) The facility management must provide registered nurses 24 hours per day, 7 days per week.

(c) The director of nursing service must designate a registered nurse as a supervising nurse for each tour of duty.

(1) Based on the application and results of the case mix and staffing methodology, the director of nursing may serve in a dual role as director and as an onsite-supervising nurse only when the facility has an average daily occupancy of 60 or fewer residents in nursing home.

(2) Based on the application and results of the case mix and staffing methodology, the evening or night supervising nurse may serve in a dual role as supervising nurse as well as provides direct patient care only when the facility has an average daily occupancy of 60 or fewer residents in nursing home.

(d) The facility management must provide nursing services to ensure that there is a minimum direct care nurse staffing per patient per 24 hours, 7 days per week of no less than 2.5 hours.

(e) Nurse staffing must be based on a staffing methodology that applies case mix and is adequate for meeting the standards of this part.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.140 Dietary services.

The facility management must provide each resident with a nourishing, palatable, well-balanced diet that meets the daily nutritional and special dietary needs of each resident.

(a) *Staffing.* The facility management must employ a qualified dietitian either full-time, part-time, or on a consultant basis.

(1) If a qualified dietitian is not employed full-time, the facility management must designate a person to serve as the director of food service who receives at least a monthly scheduled consultation from a qualified dietitian.

(2) A qualified dietitian is one who is qualified based upon registration by the Commission on Dietetic Registration of the American Dietetic Association.

(b) *Sufficient staff.* The facility management must employ sufficient support personnel competent to carry out the functions of the dietary service.

(c) *Menus and nutritional adequacy.* Menus must—

(1) Meet the nutritional needs of residents in accordance with the recommended dietary allowances of the Food and Nutrition Board of the National Research Council, National Academy of Sciences;

(2) Be prepared in advance; and

(3) Be followed.

(d) *Food.* Each resident receives and the facility provides—

(1) Food prepared by methods that conserve nutritive value, flavor, and appearance;

(2) Food that is palatable, attractive, and at the proper temperature;

(3) Food prepared in a form designed to meet individual needs; and

(4) Substitutes offered of similar nutritive value to residents who refuse food served.

(e) *Therapeutic diets.* Therapeutic diets must be prescribed by the primary care physician.

(f) *Frequency of meals.* (1) Each resident receives and the facility provides at least three meals daily, at regular times comparable to normal mealtimes in the community.

(2) There must be no more than 14 hours between a substantial evening meal and breakfast the following day, except as provided in paragraph (f)(4) of this section.

(3) The facility staff must offer snacks at bedtime daily.

(4) When a nourishing snack is provided at bedtime, up to 16 hours may elapse between a substantial evening meal and breakfast the following day if a resident group agrees to this meal span, and a nourishing snack is served.

(g) *Assistive devices.* The facility management must provide special eating equipment and utensils for residents who need them.

(h) *Sanitary conditions.* The facility must—

(1) Procure food from sources approved or considered satisfactory by Federal, State, or local authorities;

(2) Store, prepare, distribute, and serve food under sanitary conditions; and

(3) Dispose of garbage and refuse properly.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.150 Physician services.

A physician must personally approve in writing a recommendation that an individual be admitted to a facility. Each resident must remain under the care of a physician.

(a) *Physician supervision.* The facility management must ensure that—

(1) The medical care of each resident is supervised by a primary care physician;

(2) Each resident's medical record must list the name of the resident's primary physician, and

(3) Another physician supervises the medical care of residents when their primary physician is unavailable.

(b) *Physician visits.* The physician must—

(1) Review the resident's total program of care, including medications and treatments, at each visit required by paragraph (c) of this section;

(2) Write, sign, and date progress notes at each visit; and

(3) Sign and date all orders.

(c) *Frequency of physician visits.*

(1) The resident must be seen by the primary physician at least once every 30 days for the first 90 days after admission, and at least once every 60 days thereafter, or more frequently based on the condition of the resident.

(2) A physician visit is considered timely if it occurs not later than 10 days after the date the visit was required.

(3) Except as provided in paragraphs (c)(4) of this section, all required physician visits must be made by the physician personally.

(4) At the option of the physician, required visits in the facility after the initial visit may alternate between personal visits by the physician and visits by a physician assistant, nurse practitioner, or clinical nurse specialist in accordance with paragraph (e) of this section.

(d) *Availability of physicians for emergency care.* The facility management must provide or arrange for the provision of physician services 24 hours a day 7 days per week, in case of an emergency.

(e) *Physician delegation of tasks.* (1) Except as specified in paragraph (e)(2) of this section, a primary physician may delegate tasks to:

(i) a certified physician assistant or a certified nurse practitioner, or

(ii) a clinical nurse specialist who—

(A) Is acting within the scope of practice as defined by State law; and

(B) Is under the supervision of the physician.

Note: A certified clinical nurse specialist with experience in long term care is preferred.

(2) The primary physician may not delegate a task when the regulations specify that the primary physician must perform it personally, or when the delegation is prohibited under State law or by the facility's own policies.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.160 Specialized rehabilitative services.

(a) Provision of services: If specialized rehabilitative services such as but not limited to physical therapy, speech

therapy, occupational therapy, and mental health services for mental illness are required in the resident's comprehensive plan of care, facility management must—

(1) Provide the required services; or

(2) Obtain the required services from an outside resource, in accordance with § 51.210(h) of this part, from a provider of specialized rehabilitative services.

(b) Specialized rehabilitative services must be provided under the written order of a physician by qualified personnel.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.170 Dental services.

A facility—

(a) Must provide or obtain from an outside resource, in accordance with § 51.210(h) of this part, routine and emergency dental services to meet the needs of each resident;

(b) May charge a resident an additional amount for routine and emergency dental services;

(c) Must, if necessary, assist the resident—

(1) In making appointments; and

(2) By arranging for transportation to and from the dental services; and

(3) Promptly refer residents with lost or damaged dentures to a dentist.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.180 Pharmacy services.

The facility management must provide routine and emergency drugs and biologicals to its residents, or obtain them under an agreement described in § 51.210(h) of this part. The facility management must have a system for disseminating drug information to medical and nursing staff.

(a) *Procedures.* The facility management must provide pharmaceutical services (including procedures that assure the accurate acquiring, receiving, dispensing, and administering of all drugs and biologicals) to meet the needs of each resident.

(b) *Service consultation.* The facility management must employ or obtain the services of a pharmacist licensed in a State in which the facility is located who—

(1) Provides consultation on all aspects of the provision of pharmacy services in the facility;

(2) Establishes a system of records of receipt and disposition of all controlled drugs in sufficient detail to enable an accurate reconciliation; and

(3) Determines that drug records are in order and that an account of all controlled drugs is maintained and periodically reconciled.

(c) *Drug regimen review.* (1) The drug regimen of each resident must be reviewed at least once a month by a licensed pharmacist.

(2) The pharmacist must report any irregularities to the primary physician and the director of nursing, and these reports must be acted upon.

(d) *Labeling of drugs and biologicals.* Drugs and biologicals used in the facility management must be labeled in accordance with currently accepted professional principles, and include the appropriate accessory and cautionary instructions, and the expiration date when applicable.

(e) *Storage of drugs and biologicals.* (1) In accordance with State and Federal laws, the facility management must store all drugs and biologicals in locked compartments under proper temperature controls, and permit only authorized personnel to have access to the keys.

(2) The facility management must provide separately locked, permanently affixed compartments for storage of controlled drugs listed in Schedule II of the Comprehensive Drug Abuse Prevention and Control Act of 1976 and other drugs subject to abuse.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.190 Infection control.

The facility management must establish and maintain an infection control program designed to provide a safe, sanitary, and comfortable environment and to help prevent the development and transmission of disease and infection.

(a) *Infection control program.* The facility management must establish an infection control program under which it—

(1) Investigates, controls, and prevents infections in the facility;

(2) Decides what procedures, such as isolation, should be applied to an individual resident; and

(3) Maintains a record of incidents and corrective actions related to infections.

(b) *Preventing spread of infection.* (1) When the infection control program determines that a resident needs isolation to prevent the spread of infection, the facility management must isolate the resident.

(2) The facility management must prohibit employees with a communicable disease or infected skin lesions from direct contact with residents or their food, if direct contact will transmit the disease.

(3) The facility management must require staff to wash their hands after each direct resident contact for which hand washing is indicated by accepted professional practice.

(c) *Linens.* Personnel must handle, store, process, and transport linens so as to prevent the spread of infection.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.200 Physical environment.

The facility management must be designed, constructed, equipped, and maintained to protect the health and safety of residents, personnel and the public.

(a) *Life safety from fire.* The facility must meet the applicable provisions of the 1997 edition of the Life Safety Code of the National Fire Protection Association (which is incorporated by reference). Incorporation of the 1997 edition of the National Fire Protection Association's Life Safety Code (published February 7, 1997; ANSI/NFPA) was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51 that govern the use of incorporations by reference.[1]

(b) *Emergency power.* (1) An emergency electrical power system must be provided to supply power adequate for illumination of all exit signs and lighting for the means of egress, fire alarm and medical gas alarms, emergency communication systems, and generator task illumination.

(2) The system must be the appropriate type essential electrical system in accordance with the requirements of NFPA 99, Health Care Facilities.

(3) When electrical life support devices are used, an emergency electrical power system must also be provided for devices in accordance with NFPA 99, Health Care Facilities.

(4) The source of power must be an on-site emergency standby generator of sufficient size to serve the connected load or other approved sources per NFPA 99, Health Care Facilities.

(c) *Space and equipment.* Facility management must—

(1) Provide sufficient space and equipment in dining, health services, recreation, and program areas to enable staff to provide residents with needed services as required by these standards and as identified in each resident's plan of care; and

[1] The Code is available for inspection at the Office of the Federal Register Information Center, room 8301, 1110 L Street NW., Washington, DC. Copies may be obtained from the National Fire Protection Association, Batterymarch Park, Quincy, MA 02200. If any changes in this code are also to be incorporated by reference, a notice to that effect will be published in the **Federal Register**.

(2) Maintain all essential mechanical, electrical, and patient care equipment in safe operating condition.

(d) *Resident rooms.* Resident rooms must be designed and equipped for adequate nursing care, comfort, and privacy of residents (1) Bedrooms must—

(i) Accommodate no more than four residents;

(ii) Measure at least 115 net square feet per resident in multiple resident bedrooms;

(iii) Measure at least 150 net square feet in single resident bedrooms;

(iv) Measure at least 245 net square feet in small double resident bedrooms; and

(v) Measure at least 305 net square feet in large double resident bedrooms used for spinal cord injury residents. It is recommended that the facility have one large double resident bedroom for every 30 resident bedrooms.

(vi) Have direct access to an exit corridor;

(vii) Be designed or equipped to assure full visual privacy for each resident;

(viii) Except in private rooms, each bed must have ceiling suspended curtains, which extend around the bed to provide total visual privacy in combination with adjacent walls and curtains;

(ix) Have at least one window to the outside; and

(x) Have a floor at or above grade level.

(2) The facility management must provide each resident with—

(i) A separate bed of proper size and height for the safety of the resident;

(ii) A clean, comfortable mattress;

(iii) Bedding appropriate to the weather and climate; and

(iv) Functional furniture appropriate to the resident's needs, and individual closet space in the resident's bedroom with clothes racks and shelves accessible to the resident.

(e) *Toilet facilities.* Each resident room must be equipped with or located near toilet and bathing facilities. It is recommended that public toilet facilities be also located near the resident's dining and recreational areas.

(f) *Resident call system.* The nurse's station must be equipped to receive resident calls through a communication system from—

(1) Resident rooms; and

(2) Toilet and bathing facilities.

(g) *Dining and resident activities.* The facility management must provide one or more rooms designated for resident dining and activities. These rooms must—

(1) Be well lighted;

(2) Be well ventilated;

(3) Be adequately furnished; and

(4) Have sufficient space to accommodate all activities.

(h) *Other environmental conditions.* The facility management must provide a safe, functional, sanitary, and comfortable environment for the residents, staff and the public. The facility must—

(1) Establish procedures to ensure that water is available to essential areas when there is a loss of normal water supply;

(2) Have adequate outside ventilation by means of windows, or mechanical ventilation, or a combination of the two;

(3) Equip corridors with firmly secured handrails on each side; and

(4) Maintain an effective pest control program so that the facility is free of pests and rodents.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

§ 51.210 Administration.

A facility must be administered in a manner that enables it to use its resources effectively and efficiently to attain or maintain the highest practicable physical, mental, and psychosocial well being of each resident.

(a) *Governing body.* (1) The State must have a governing body, or designated person functioning as a governing body, that is legally responsible for establishing and implementing policies regarding the management and operation of the facility; and

(2) The governing body or State official with oversight for the facility appoints the administrator who is—

(i) Licensed by the State where licensing is required; and

(ii) Responsible for operation and management of the facility.

(b) *Disclosure of State agency and individual responsible for oversight of facility.* The State must give written notice to the Chief Consultant, Geriatrics and Extended Care Strategic Healthcare Group (114), VA Headquarters, 810 Vermont Avenue, NW, Washington, DC 20420, at the time of the change, if any of the following change:

(1) The State agency and individual responsible for oversight of a State home facility;

(2) The State home administrator;

(3) The State home director of nursing; or

(4) The State employee responsible for oversight of the State home facility if a contractor operates the State home.

(c) *Required Information.* The facility management must submit the following to the director of the VA medical center of jurisdiction as part of the application for recognition and thereafter as often as necessary to be current:

(1) The copy of legal and administrative action establishing the State-operated facility (e.g., State laws);

(2) Site plan of facility and surroundings.

(3) Legal title, lease, or other document establishing right to occupy facility;

(4) Organizational charts and the operational plan of the facility;

(5) The number of the staff by category indicating full-time, part-time and minority designation;

(6) The number of nursing home patients who are veterans and non-veterans, the number of veterans who are minorities and the number of non-veterans who are minorities;

(7) Annual State Fire Marshall's report;

(8) Annual certification from the responsible State Agency showing compliance with Section 504 of the Rehabilitation Act of 1973 (Public Law 93–112) (VA Form 10–0143A set forth at § 51.224);

(9) Annual certification for Drug-Free Workplace Act of 1988 (VA Form 10–0143 set forth at § 51.225);

(10) Annual certification regarding lobbying in compliance with Public Law 101–121 (VA Form 10–0144 set forth at § 51.226);

(11) Annual certification of compliance with Title VI of the Civil Rights Act of 1964 as incorporated in Title 38 CFR 18.1–18.3 (VA Form 27–10–0144A located at § 51.227);

(d) *Percentage of Veterans.* The percent of the facility residents eligible for VA nursing home care must be at least 75 percent veterans except that the veteran percentage need only be more than 50 percent if the facility was constructed or renovated solely with State funds. All non-veteran residents must be spouses of veterans or parents all of whose children died while serving in the armed forces of the United States.

(e) *Management Contract Facility.* If a facility is operated by an entity contracting with the State, the State must assign a State employee to monitor the operations of the facility on a full-time onsite basis.

(f) *Licensure.* The facility and facility management must comply with applicable State and local licensure laws.

(g) *Staff qualifications.* (1) The facility management must employ on a full-time, part-time or consultant basis those professionals necessary to carry out the provisions of these requirements.

(2) Professional staff must be licensed, certified, or registered in accordance with applicable State laws.

(h) *Use of outside resources.* (1) If the facility does not employ a qualified professional person to furnish a specific service to be provided by the facility, the facility management must have that service furnished to residents by a person or agency outside the facility under a written agreement described in paragraph (h)(2) of this section.

(2) Agreements pertaining to services furnished by outside resources must specify in writing that the facility management assumes responsibility for—

(i) Obtaining services that meet professional standards and principles that apply to professionals providing services in such a facility; and

(ii) The timeliness of the services.

(i) *Medicol director.* (1) The facility management must designate a primary care physician to serve as medical director.

(2) The medical director is responsible for—

(i) Participating in establishing policies, procedures, and guidelines to ensure adequate, comprehensive services;

(ii) Directing and coordinating medical care in the facility;

(iii) Helping to arrange for continuous physician coverage to handle medical emergencies;

(iv) Reviewing the credentialing and privileging process;

(v) Participating in managing the environment by reviewing and evaluating incident reports or summaries of incident reports, identifying hazards to health and safety, and making recommendations to the administrator; and

(vi) Monitoring employees' health status and advising the administrator on employee-health policies.

(j) *Credentialing and privileging.* Credentialing is the process of obtaining, verifying, and assessing the qualifications of a health care practitioner, which may include physicians, podiatrists, dentists, psychologists, physician assistants, nurse practitioners, licensed nurses to provide patient care services in or for a health care organization. Privileging is the process whereby a specific scope and content of patient care services are authorized for a health care practitioner by the facility management, based on evaluation of the individual's credentials and performance.

(1) The facility management must uniformly apply credentialing criteria to licensed independent practitioners applying to provide resident care or treatment under the facility's care.

(2) The facility management must verify and uniformly apply the following core criteria: Current licensure; current certification, if applicable, relevant education, training, and experience; current competence; and a statement that the individual is able to perform the services he or she is applying to provide.

(3) The facility management must decide whether to authorize the independent practitioner to provide resident care or treatment, and each credentials file must indicate that these criteria are uniformly and individually applied.

(4) The facility management must maintain documentation of current credentials for each licensed independent practitioner practicing within the facility.

(5) When reappointing a licensed independent practitioner, the facility management must review the individual's track record.

(6) The facility management systematically must assess whether individuals with clinical privileges act within the scope of privileges granted.

(k) *Required training of nursing aides.* (1) Nurse aide means any individual providing nursing or nursing-related services to residents in a facility who is not a licensed health professional, a registered dietitian, or a volunteer who provide such services without pay.

(2) The facility management must not use any individual working in the facility as a nurse aide whether permanent or not unless:

(i) That individual is competent to provide nursing and nursing related services; and

(ii) That individual has completed a training and competency evaluation program, or a competency evaluation program approved by the State.

(3) Registry verification. Before allowing an individual to serve as a nurse aide, facility management must receive registry verification that the individual has met competency evaluation requirements unless the individual can prove that he or she has recently successfully completed a training and competency evaluation program or competency evaluation program approved by the State and has not yet been included in the registry. Facilities must follow up to ensure that such an individual actually becomes registered.

(4) Multi-State registry verification. Before allowing an individual to serve as a nurse aide, facility management must seek information from every State registry established under HHS regulations at 42 CFR 483.156 which the facility believes will include information on the individual.

(5) Required retraining. If, since an individual's most recent completion of a training and competency evaluation program, there has been a continuous period of 24 consecutive months during none of which the individual provided nursing or nursing-related services for monetary compensation, the individual must complete a new training and competency evaluation program or a new competency evaluation program.

(6) Regular in-service education. The facility management must complete a performance review of every nurse aide at least once every 12 months, and must provide regular in-service education based on the outcome of these reviews. The in-service training must—

(i) Be sufficient to ensure the continuing competence of nurse aides, but must be no less than 12 hours per year;

(ii) Address areas of weakness as determined in nurse aides' performance reviews and may address the special needs of residents as determined by the facility staff; and

(iii) For nurse aides providing services to individuals with cognitive impairments, also address the care of the cognitively impaired.

(l) *Proficiency of nurse aides.* The facility management must ensure that nurse aides are able to demonstrate competency in skills and techniques necessary to care for residents' needs, as identified through resident assessments, and described in the plan of care.

(m) *Level B Requirement Laboratory services.* (1) The facility management must provide or obtain laboratory services to meet the needs of its residents. The facility is responsible for the quality and timeliness of the services.

(i) If the facility provides its own laboratory services, the services must meet all applicable certification standards, statutes, and regulations for laboratory services.

(ii) If the facility provides blood bank and transfusion services, it must meet all applicable certification standards, statutes, and regulations.

(iii) If the laboratory chooses to refer specimens for testing to another laboratory, the referral laboratory must be certified in the appropriate specialties and subspecialties of services and meet certification standards, statutes, and regulations.

(iv) The laboratory performing the testing must have a current, valid CLIA number (Clinical Laboratory Improvement Amendments of 1988). The facility management must provide VA surveyors with the CLIA number and a copy of the results of the last CLIA inspection.

(v) Such services must be available to the resident seven days a week, 24 hours a day.

(2) The facility management must—

(i) Provide or obtain laboratory services only when ordered by the primary physician;

(ii) Promptly notify the primary physician of the findings;

(iii) Assist the resident in making transportation arrangements to and from the source of service, if the resident needs assistance; and

(iv) File in the resident's clinical record laboratory reports that are dated and contain the name and address of the testing laboratory.

(n) *Radiology and other diagnostic services.* (1) The facility management must provide or obtain radiology and other diagnostic services to meet the needs of its residents. The facility is responsible for the quality and timeliness of the services.

(i) If the facility provides its own diagnostic services, the services must meet all applicable certification standards, statutes, and regulations.

(ii) If the facility does not provide its own diagnostic services, it must have an agreement to obtain these services. The services must meet all applicable certification standards, statutes, and regulations.

(iii) Radiologic and other diagnostic services must be available 24 hours a day, seven days a week.

(2) The facility must—

(i) Provide or obtain radiology and other diagnostic services only when ordered by the primary physician;

(ii) Promptly notify the primary physician of the findings;

(iii) Assist the resident in making transportation arrangements to and from the source of service, if the resident needs assistance; and

(iv) File in the resident's clinical record signed and dated reports of x-ray and other diagnostic services.

(o) *Clinical records.* (1) The facility management must maintain clinical records on each resident in accordance with accepted professional standards and practices that are—

(i) Complete;

(ii) Accurately documented;

(iii) Readily accessible; and

(iv) Systematically organized.

(2) Clinical records must be retained for—

(i) The period of time required by State law; or

(ii) Five years from the date of discharge when there is no requirement in State law.

(3) The facility management must safeguard clinical record information against loss, destruction, or unauthorized use;

(4) The facility management must keep confidential all information contained in the resident's records, regardless of the form or storage method of the records, except when release is required by—

(i) Transfer to another health care institution;

(ii) Law;

(iii) Third party payment contract; or

(iv) The resident.

(5) The clinical record must contain—

(i) Sufficient information to identify the resident;

(ii) A record of the resident's assessments;

(iii) The plan of care and services provided;

(iv) The results of any pre-admission screening conducted by the State; and

(v) Progress notes.

(p) *Quality assessment and assurance.* (1) Facility management must maintain a quality assessment and assurance committee consisting of—

(i) The director of nursing services;

(ii) A primary physician designated by the facility; and

(iii) At least 3 other members of the facility's staff.

(2) The quality assessment and assurance committee—

(i) Meets at least quarterly to identify issues with respect to which quality assessment and assurance activities are necessary; and

(ii) Develops and implements appropriate plans of action to correct identified quality deficiencies; and

(3) Identified quality deficiencies are corrected within an established time period.

(4) The VA Under Secretary for Health may not require disclosure of the records of such committee unless such disclosure is related to the compliance with requirements of this section.

(q) *Disaster and emergency preparedness.* (1) The facility management must have detailed written plans and procedures to meet all potential emergencies and disasters, such as fire, severe weather, and missing residents.

(2) The facility management must train all employees in emergency procedures when they begin to work in the facility, periodically review the procedures with existing staff, and carry out unannounced staff drills using those procedures.

(r) *Transfer agreement.* (1) The facility management must have in effect a written transfer agreement with one or more hospitals that reasonably assures that—

(i) Residents will be transferred from the nursing home to the hospital, and ensured of timely admission to the hospital when transfer is medically appropriate as determined by the primary physician; and

(ii) Medical and other information needed for care and treatment of residents, and, when the transferring facility deems it appropriate, for determining whether such residents can be adequately cared for in a less expensive setting than either the nursing home or the hospital, will be exchanged between the institutions.

(2) The facility is considered to have a transfer agreement in effect if the facility has an agreement with a hospital sufficiently close to the facility to make transfer feasible.

(s) *Compliance with Federal, State, and local laws and professional standards.* The facility management must operate and provide services in compliance with all applicable Federal, State, and local laws, regulations, and codes, and with accepted professional standards and principles that apply to professionals providing services in such a facility. This includes the Single Audit Act of 1984 (Title 31, Section 7501 et. seq.) and the Cash Management Improvement Acts of 1990 and 1992 (Pub. L. 101–453 and 102–589, see 31 U.S.C. 3335, 3718, 3720A, 6501, 6503)

(t) *Relationship to other Federal regulations.* In addition to compliance with the regulations set forth in this subpart, facilities are obliged to meet the applicable provisions of other Federal laws and regulations, including but not limited to those pertaining to nondiscrimination on the basis of race, color, national origin, handicap, or age (38 CFR part 18); protection of human subjects of research (45 CFR part 46), section 504 of the Rehabilitation Act of 1993, Pub. L. 93–112; Drug-Free Workplace Act of 1988, 38 CFR part 44, §§ 44.100 through 44.420; section 319 of Pub. L. 101–121; Title VI of the Civil Rights Act of 1964, 38 CFR 18.1–18.3. Although these regulations are not in themselves considered requirements under this part, their violation may result in the termination or suspension of, or the refusal to grant or continue payment with Federal funds.

(u) *Intermingling.* A building housing a facility recognized as a State home for providing nursing home care may only provide nursing home care in the areas of the building recognized as a State home for providing nursing home care.

(v) *VA Management of State Veterans Homes.* Except as specifically provided by statute or regulations, VA employees have no authority regarding the management or control of State homes providing nursing home care.

(Authority: 38 U.S.C. 101, 501, 1710, 1741–1743)

SECTION II - FINANCIAL ASSESSMENT

IIA - FINANCIAL DISCLOSURE

You are not required to provide the financial information in this Section. However, current law may require VA to consider your household financial situation to determine your eligibility for enrollment and/or cost-free care of your nonservice-connected (NSC) conditions. If you are 0% SC noncompensable or NSC (and are not an Ex-POW, WWI veteran or VA pensioner) and your annual household income (or combined income and net worth) exceeds the established threshold, you must agree to pay VA co-payments for care of your NSC conditions to be eligible for enrollment. See Section III - Consent and Signature.

☐ **YES,** I WILL PROVIDE SPECIFIC INCOME AND/OR ASSET INFORMATION TO HAVE ELIGIBILITY FOR CARE DETERMINED. *Complete all sections below that apply to you with last calendar year's information. Sign and date the application.*

☐ **NO,** I DO NOT WISH TO PROVIDE MY DETAILED FINANCIAL INFORMATION. *I understand I will be assigned the appropriate enrollment priority based on nondisclosure of my financial information. By checking NO and signing below, I am agreeing to pay the applicable VA co-payment. Sign and date the application.*

IIB - DEPENDENT INFORMATION *(Use a separate sheet for additional dependents)*

1A. SPOUSE'S NAME *(Last, First, MI)*	1B. CHILD'S NAME *(Last, First, MI)*
2A. SPOUSE'S SOCIAL SECURITY NUMBER / 2B. CHILD'S SOCIAL SECURITY NUMBER	3. CHILD'S DATE OF BIRTH *(mm/dd/yyyy)*
4A. SPOUSE'S ADDRESS AND TELEPHONE NUMBER *(Street, City, State, ZIP)*	4B. SPOUSE'S DATE OF BIRTH *(mm/dd/yyyy)*
5A. SPOUSE'S MAIDEN NAME	5B. CHILD'S RELATIONSHIP TO YOU *(Circle one)* Son Daughter Stepson Stepdaughter
6A. DATE OF MARRIAGE *(mm/dd/yyyy)*	6B. DATE CHILD BECAME YOUR DEPENDENT *(mm/dd/yyyy)*
7. IF YOUR SPOUSE OR DEPENDENT CHILD DID NOT LIVE WITH YOU LAST YEAR, ENTER THE AMOUNT YOU CONTRIBUTED TO THEIR SUPPORT SPOUSE $ CHILD $	8. EXPENSES PAID BY YOUR DEPENDENT CHILD FOR COLLEGE, VOCATIONAL REHABILITATION OR TRAINING *(tuition, books, materials, etc.)* $
9. WAS CHILD PERMANENTLY AND TOTALLY DISABLED BEFORE THE AGE OF 18? ☐ YES ☐ NO	10. IF CHILD IS BETWEEN 18 AND 23 YEARS OF AGE, DID CHILD ATTEND SCHOOL LAST CALENDAR YEAR? ☐ YES ☐ NO

IIC - GROSS ANNUAL INCOME OF VETERAN, SPOUSE AND DEPENDENT CHILDREN

	VETERAN	SPOUSE	CHILDREN
1. WHAT WAS YOUR GROSS ANNUAL INCOME FROM EMPLOYMENT *(wages, bonuses, tips, etc.)*, AS WELL AS INCOME FROM YOUR FARM, RANCH, PROPERTY OR BUSINESS	$	$	$
2. LIST OTHER INCOME AMOUNTS *(Social Security, compensation, pension, interest, dividends) Exclude welfare.*	$	$	$
3. WAS INCOME FROM YOUR FARM, RANCH, PROPERTY OR BUSINESS *(If yes, refer to page 2, Section IIC of the instructions.)* ☐ YES ☐ NO			

IID - DEDUCTIBLE EXPENSES

1. NON-REIMBURSED MEDICAL EXPENSES PAID BY YOU OR YOUR SPOUSE *(payments for doctors, dentists, drugs, Medicare, health insurance, hospital and nursing home)*	$
2. AMOUNT YOU PAID LAST CALENDAR YEAR FOR FUNERAL AND BURIAL EXPENSES FOR YOUR DECEASED SPOUSE OR DEPENDENT CHILD *(Also enter spouse or child's information in Section IIB)*	$
3. AMOUNT YOU PAID LAST CALENDAR YEAR FOR YOUR COLLEGE OR VOCATIONAL EDUCATIONAL EXPENSES *(tuition, books, fees, materials, etc.) DO NOT LIST YOUR DEPENDENTS' EDUCATIONAL EXPENSES.*	$

IIE - NET WORTH

	VETERAN	SPOUSE
1. CASH, AMOUNT IN BANK ACCOUNTS *(Checking and savings accounts, certificates of deposit, individual retirement accounts, etc.)*	$	$
2. MARKET VALUE OF LAND AND BUILDINGS MINUS MORTGAGES AND LIENS. *Do not count your primary home. Include value of farm, ranch, or business assets.*	$	$
3. STOCKS AND BONDS AND VALUE OF OTHER PROPERTY OR ASSETS *(art, rare coins, etc.)* MINUS THE AMOUNT YOU OWE ON THESE ITEMS. *Exclude household effects and family vehicles.*	$	$

SECTION III - CONSENT AND SIGNATURE

CO-PAYMENT NOTICE: If you are a 0% service-connected noncompensable or a nonservice-connected veteran (and are not an Ex-POW, WWI veteran or VA pensioner) **and** your household income (or combined income and net worth) exceeds the established threshold, you may be eligible for enrollment only if you agree to pay VA co-payments for treatment of your NSC conditions. By signing this application you are agreeing to pay the applicable VA co-payment if required by law.

§ 51.224 VA Form 10–0143A—Statement of Assurance of Compliance with Section 504 of The Rehabilitation Act of 1973

OMB Number: 2900-0160
Estimated Burden: 5 minutes

Department of Veterans Affairs

STATEMENT OF ASSURANCE OF COMPLIANCE WITH SECTION 504 OF THE REHABILITATION ACT OF 1973

The Paperwork Reduction Act of 1995 requires us to notify you that this information collection is in accordance with the clearance requirements of section 3507 of the Paperwork Reduction Act of 1995. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a valid OMB number. We anticipate that the time expended by all individuals who must complete this form will average 5 minutes. This includes the time it will take to read instructions, gather the necessary facts and fill out the form.

_____ (hereinafter called the "Signatory")
(Name and location of State Veterans Home)

HEREBY AGREES THAT

It will comply with section 504 of the Rehabilitation Act of 1973 (Pub. L. No. 93-112) and all regulations adopted pursuant to such section, for instance, VA Regulations 7800 Series (38 CFR Section 18), to the end that no person in the United States shall, on the ground of handicap, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity of the Signatory receiving Federal financial assistance or other benefits under statues administered by the VA; and HEREBY GIVES ASSURANCE THAT it will immediately take any measures necessary to effectuate the agreement.

If any real property or structure thereon is provided or improved with the aid of the Federal financial assistance extended to the Signatory by the VA, this assurance shall obligate the Signatory, or in the case of transfer of such property, any transferee, for the period during which the real property or structure is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. In all cases this assurance shall obligate the Signatory for the period during which the Federal financial assistance is extended to any of its programs by the VA.

THIS ASSURANCE is given in consideration of and for the purpose of obtaining Federal financial assistance, including facilities furnished or payments made under Section 1741 of Title 38 USC. Federal financial assistance is understood to include benefits paid directly to the Signatory, and/or benefits paid to a beneficiary contingent upon such beneficiary being enrolled in a program offered by the Signatory.

The Signatory recognizes and agrees that such Federal financial assistance or other benefits will be extended in reliance on the representations and agreements made in this assurance, and that the VA will withhold financial assistance, facilities, or other benefits to ensure fulfillment of this assurance of compliance, and that the United States shall have the right to seek judicial enforcement of this assurance. This assurance is binding on the Signatory, its successors, transferees, and assignees. The person or persons whose signatures appear below are authorized to sign this assurance.

CERTIFICATION REGARDING LOBBYING

The Paperwork Reduction Act of 1995 requires us to notify you that this information collection is in accordance with the clearance requirements of section 3507 of the Paperwork Reduction Act of 1995. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a valid OMB number. We anticipate that the time expended by all individuals who must complete this form will average 5 minutes. This includes the time it will take to read instructions, gather the necessary facts and fill out the form.

This certification is made in compliance with Section 319 of Public Law 101-121; and pursuant to the Interim Final guidance published as part VII of the December 20, 1989, Federal Register (Pages 57306-52332).

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certified, to the best of their knowledge and belief, that the grantee certifies that it will provide a drug-free workplace by:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Forms-LLL, "Disclosure Form to Repot Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31 U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each

STATEMENT OF ASSURANCE OF COMPLIANCE WITH EQUAL OPPORTUNITY LAWS

The Paperwork Reduction Act of 1995 requires us to notify you that this information collection is in accordance with the clearance requirements of section 3507 of the Paperwork Reduction Act of 1995. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a valid OMB number. We anticipate that the time expended by all individuals who must complete this form will average 5 minutes. This includes the time it will take to read instructions, gather the necessary facts and fill out the form.

_____ (hereinafter called the "Signatory")
(Name of Organization, Institution, or Individual)

HEREBY AGREES THAT:

It will comply with Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), Title IX of the Education Amendments of 1972, as amended (20 U.S.C. 1681 et seq.), Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), the Age Discrimination Act of 1975 (42 U.S.C. 6101 et seq.), and all Federal regulations adopted to carry out such laws. This assurance is directed to the end that no person in the United States shall, on the ground of race, color, national origin (Title VI), handicap (Section 504), sex (Title IX, in education programs and activities only), or age (Age Discrimination Act) be excluded from participation in , be denied the benefits of, or be subjected to discrimination under any program or activity of the Signatory receiving Federal financial assistance or other benefits under statutes administered by VA (Department of Veteran Affairs), the ED (Department of Education), or any other Federal agency. This assurance applies whether assistance is given directly to the recipient or indirectly through benefits paid to a student, trainee, or other beneficiary because of enrollment or participation in a program of the Signatory.

The Signatory HEREBY GIVES ASSURANCE that it will promptly take measures to effect this agreement.

If any real property or structure thereon is provided or improved with the aid of Federal financial assistance extended to the Signatory or ED, this assurance shall obligate the Signatory, or in the case of transfer of such property any transferee, for the period during which the real property or structure is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. In all cases, this assurance shall obligate the Signatory for the period during which the Federal financial assistance is extended to any of its programs by VA, ED or any other Federal agency.

THIS ASSURANCE is given in consideration of and for the purpose of obtaining Federal financial assistance, including facilities furnished or payments made under sections 104 and 244(1) of Title 38, U.S.C. Also, sections 1713, 1720, 1720A, 1741-1743, 2408, 5902(a)(2), 8131-8137, 8151-8156 (formerly 613, 620, 620A, 641-643, 1008, 3402(a)(2), 5031-5037, 5051-5056 respectively) and 38 U.S.C. chapters 30, 31, 32, 35, 36, 82, and 10 U.S.C. chapter 106. Under the terms of an agreement between VA and ED, this assurance also includes Federal financial assistance given by ED through programs administered by that agency. Federal financial assistance is understood to include benefits paid directly to the Signatory and/or benefits paid to a beneficiary contingent upon the beneficiary's enrollment in a program or using services offered by the Signatory.

The Signatory agrees that Federal financial assistance or other benefits will be extended in reliance on the representations and agreements made in this assurance; that VA or ED will withhold financial assistance, facilities, or other benefits to assure compliance with the equal opportunity laws; and that the United States shall have the right to seek judicial enforcement of this assurance.

THIS ASSURANCE is binding on the Signatory, its successors, transferees, and assignees for the period during which assistance is provided. The Signatory assures that all contractors, subcontractors, subgrantees, or others with whom it arranges to provide services or benefits to its students or trainees in connection with the Signatory's programs or services are not discriminating against those students or trainees in violation of the above statutes.

The person whose signature appears below is authorized to sign this assurance.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA 210–0103b; FRL–6185–2]

Approval and Promulgation of State Implementation Plans; California State Implementation Plan Revision, Sacramento Metropolitan Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is approving revisions to the California State Implementation Plan (SIP). This action is an administrative change which revises the definition of volatile organic compound (VOC) and updates the Exempt Compound list in rules from the Sacramento Metropolitan Air Quality Management District (SMAQMD).

The intended effect of proposing approval of this action is to incorporate changes to the definition of VOC and to update the Exempt Compound list in SMAQMD rules to be consistent with the revised federal and state VOC definitions. EPA is proposing approval of these revisions to be incorporated into the California SIP for the attainment of the national ambient air quality standards (NAAQS) for ozone under title I of the Clean Air Act (CAA or the Act). In the Final Rules Section of this **Federal Register**, the EPA is approving the state's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for this approval is set forth in the direct final rule. If no adverse comments are received, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period. Any parties interested in commenting should do so at this time.

DATES: Written comments must be received by December 9, 1998.

ADDRESSES: Comments should be addressed to: Andrew Steckel, Chief, Rulemaking Office (AIR–4), Air Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Copies of the rule revisions and EPA's evaluation report of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95812

Sacramento Metropolitan Air Quality Management District, 8411 Jackson Rd., Sacramento, CA 95826

FOR FURTHER INFORMATION CONTACT: Cynthia G. Allen, Rulemaking Office (Air-4), Air Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105–3901, Telephone: (415) 744–1189)

SUPPLEMENTARY INFORMATION: This document concerns Sacramento Metropolitan Air Quality Management District Rule 101, General Provisions and Definitions; Rule 442, Architectural Coatings; Rule 443, Leaks From Synthetic Organic Chemical and Polymer Manufacturing; Rule 447, Organic Liquid Loading; Rule 452, Can Coating; Rule 456, Aerospace Assembly and Component Coating Operations; Rule 458, Large Commercial Bread Bakeries. These rules were submitted to EPA on May 18, 1998 by the California Air Resources Board. For further information, please see the information provided in the direct final action that is located in the rules section of this **Federal Register**.

Dated: October 26, 1998.

Sally Seymour,

Acting Regional Administrator, Region IX.

48 CFR Parts 801, 806, 812, 837, 852, and 873

RIN 2900–AI71

VA Acquisition Regulations: Simplified Acquisition Procedures for Health Care Resources

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Department of Veterans Affairs Acquisition Regulations (VAAR) to establish simplified procedures for the competitive acquisition of health-care resources, consisting of commercial services or the use of medical equipment or space, pursuant to 38 U.S.C. 8151–8153. Presently, the VAAR does not contain simplified procedures. In the absence of such procedures, the Department of Veterans Affairs (VA) follows the Federal Acquisition Regulation (FAR) and the current VAAR. Public Law 104–262, the Veterans' Health Care Eligibility Reform Act of 1996, authorized VA to prescribe simplified procedures for the procurement of health-care resources. This proposed rule prescribes those procedures.

DATES: Comments on the proposed rule should be submitted on or before January 8, 1999, to be considered in the formulation of the final rule.

ADDRESSES: Mail or hand-deliver written comments to: Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue, NW, Room 1154, Washington, DC 20420. Comments should indicate that they are submitted in response to "RIN 2900–AI71." All written comments received will be available for public inspection at the above address in the Office of Regulations Management, Room 1158, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays).

FOR FURTHER INFORMATION CONTACT: Dennis Foley, (202) 273–9225, Office of the General Counsel, Professional Staff Group V; or Don Kaliher, (202) 273–8819, Acquisition Resources Service, Office of Acquisition and Materiel Management, Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420.

SUPPLEMENTARY INFORMATION: Currently, the acquisition of health-care resources that consist of commercial services or the use of medical equipment or space is governed by the Department of Veterans Affairs Acquisition Regulations (VAAR) and the Federal Acquisition Regulation (FAR). Statutory provisions at 38 U.S.C. 8153 (Pub. L. 104–262) specifically authorize the Secretary of Veterans Affairs, after consultation with the Administrator for Federal Procurement Policy, to establish simplified procedures for the competitive procurement of such health-care resources. VA has consulted with the Administrator for Federal Procurement Policy and VA proposes to establish simplified procedures as set forth in this document.

Under the provisions of the law, procurements under the simplified procedures may be conducted "without regard to any law or regulation that would otherwise require the use of competitive procedures." Accordingly, the competitive procedures of any laws and regulations (including the competitive procedures of FAR and VAAR and their underlying laws) would be superseded by the simplified procedures. However, under the provisions of the law, with certain exceptions, the simplified procedures are required to "permit all responsible sources, as appropriate, to submit a bid, proposal, or quotation (as appropriate) for the resources to be procured and provide for the consideration by the Department of bids, proposals, or quotations so submitted." This allows VA to limit competition to the extent it determines reasonable for the circumstances of each particular acquisition. Consistent with the principles set forth above, this document proposes to establish a new VAAR Part 873 setting forth such simplified procedures.

Under the provisions of 38 U.S.C. 8153, health-care resources consisting of commercial services, the use of medical equipment or space, or research, acquired from an institution affiliated with VA in accordance with 38 U.S.C. 7302, including medical practice groups and other approved entities associated with affiliated institutions (entities will be approved if determined legally to be associated with affiliated institutions), blood banks, organ banks, or research centers, may be procured without regard to any law or regulation that would otherwise require the use of competitive procedures. The provisions at new VAAR Part 873.104 contain a statement explaining this sole source acquisition authority.

Proposed § 873.101, Policy, would provide that the procedures set forth in Part 873 would apply to the acquisition of health-care resources consisting of commercial services or the use of medical equipment or space. These procedures would be used in conjunction with FAR, but VAAR Part 873 would take precedence over FAR and other Parts of VAAR. Currently, VAAR implements and supplements FAR. However, Public Law 104–262 grants VA authority to procure health-care resources consisting of commercial services or the use of medical equipment or space "without regard to any other law or regulation that would require the use of competitive procedures. * * *" Therefore, it is necessary to have Part 873 of VAAR take precedence over FAR and any other part of VAAR.

Proposed § 873.102 would add definitions for "health-care resource," "commercial service," and "health-care providers." These definitions restate provisions of 38 U.S.C. 8152 and 8153. Previously, because of limitations under 38 U.S.C. 8153, procurements of commercial services or the use of medical equipment or space were limited to "specialized medical resources." Consistent with the new definitions, the simplified procedures would govern procurements of commercial services or the use of medical equipment or space.

FAR 8.001(a)(2) sets forth three levels of priority, above the base level, for the acquisition of services. The base level is Federal Prison Industries or commercial sources. Proposed § 873.103 would exempt VA from the provisions of FAR 8.001(a)(2) regarding two of these levels of priority, mandatory and optional use Federal Supply Schedule (FSS) contracts. FSS contracts ensure prices associated with volume buying and should be used, if determined to provide best value, but would not have a higher priority than any other source. It is not proposed to affect the priority status for the acquisition of services available from the Committee for Purchase from People Who Are Blind or Severely Disabled, as required by the Javits-Wagner-O'Day (JWOD) Act. JWOD Act programs offer a valuable source of services for VA and have proved to be highly beneficial for both VA and program participants. The JWOD Act programs support VA's and other Federal Government agencies' procurement needs, and generate employment and training opportunities for people who are blind or have other severe disabilities. It is in the best interest of the Government to continue to support these valuable programs.

Proposed § 873.104, paragraphs (a) and (b), would restate the authority provided in the Act to acquire commercial services or the use of medical equipment or space from entities affiliated with VA, in accordance with 38 U.S.C. 7302, or approved entities associated with an affiliate (entities will be approved if determined legally to be associated with affiliated institutions), on a sole source basis without public notice and without further justification. Proposed § 873.104, paragraph (c), would provide that, on VA acquisitions of commercial services or the use of medical equipment or space from other sources, contracting officers would be required to seek competition to the maximum extent practicable rather than using full and open competition. This is consistent with provisions of the Act which provide that procurements may be conducted without regard to any law or regulation that would otherwise require use of competitive procedures. Competition to the maximum extent practicable is required to ensure that VA's acquisitions of commercial services or the use of medical equipment or space are conducted in an efficient and expeditious manner.

Proposed § 873.104, paragraph (d), restates the requirements of the Act that sole source acquisitions from sources other than affiliates or approved associates of affiliates (entities will be approved if determined legally to be associated with affiliated institutions) be justified and approved.

Proposed § 873.105 would exempt VA acquisitions of commercial services or the use of medical equipment or space from the acquisition planning procedures in FAR Part 7. However, the section emphasizes the indispensable importance of acquisition planning when acquiring health-care resources and imposes a requirement to form a team to assure a comprehensive plan. The proposed section also would impose a requirement on the team to conduct market research. This proposed section is necessary to simplify and streamline the acquisition process.

Proposed § 873.106 would exempt VA acquisitions of commercial services or the use of medical equipment or space from the market research requirements of FAR Part 10 but would provide optional market research techniques tailored specifically for use in acquiring commercial services or the use of medical equipment or space. This information is necessary to simplify market research while ensuring that contracting officers have a full range of techniques available for use in conducting market research when acquiring commercial services or the use of medical equipment or space.

Proposed paragraph (a) of § 873.107 would require acquisitions of commercial services or the use of medical equipment or space to be set aside for small business concerns if, through market research, the contracting officer determines that there is a reasonable expectation that reasonably priced offers would be received from two or more responsible small business concerns. This proposed section would also provide additional authority, over and above that found at FAR 19.502, for waiving the requirement for small business set-asides. FAR 19.502 currently provides that contracting officers can elect to not set aside a procurement if, generally, the contracting officer determines that there is not a reasonable expectation of obtaining offers from two or more responsible small business concerns at fair market prices. Under this proposed new section, in addition to that authority in FAR, the Head of the Contracting Activity would have the authority to approve a waiver from the requirement to set aside any procurement of commercial services or the use of medical equipment or space

based on a determination that it is in the best interest of the Government. Also, this proposed section provides that acquisitions of commercial services or the use of medical equipment or space valued between $2,500 and $100,000 would be exempt from the automatic reservation of acquisitions for small business concerns. These provisions are necessary to ensure that VA can procure commercial services or the use of medical equipment or space from the highest quality sources while still supporting small business concerns to the maximum practicable extent.

The rule would make certain changes to the administration of VA's small business program as it applies to the acquisition of health-care resources to reflect the fast-moving health-care market. For example, proposed paragraph (b) of § 873.107 would establish a streamlined process for handling disagreements between VA and the Small Business Administration regarding whether a procurement should be set aside for small business. These streamlined procedures would not alter VA's ongoing commitment to strong small business participation in its acquisition of health-care resources. Nor would they affect efforts to mitigate any potential negative impacts of contract consolidations on small businesses' ability to secure work. VA's Office of Small and Disadvantaged Business Utilization and Office of Acquisition and Materiel Management would jointly monitor the impact of the new procedures on small business participation to ensure opportunities are available for competitive small businesses.

Paragraph (c) of § 873.107 restates VA's intent to follow the FAR regarding the SBA 8(a) program. Paragraph (d) provides that VA's Office of Small and Disadvantaged Business Utilization and SBA's Office of Industrial Assistance shall serve as ombudsmen to assist VA contracting officers on any issues relating to Certificates of Competency.

FAR 5.101 currently requires, with certain exceptions, that acquisitions with values exceeding $25,000 be announced in the Commerce Business Daily (CBD) for specified periods of time and states what must be included in the announcement. Proposed § 873.108 would exempt VA acquisitions of commercial services or the use of medical equipment or space below $100,000 from this requirement; would modify the requirement for publication of acquisitions above $100,000 to only require public announcement, utilizing a medium designed to obtain competition to the maximum extent practicable; would sat the time requirements for announcement to be a "reasonable time"; and would modify what must be included in the announcement. The medium to be used for announcements could be the CBD, the Internet, or any other means, as appropriate, depending on the complexity of the acquisition. This section also proposes, in accordance with authority provided in the Act, to conduct procurements for commercial services or the use of medical equipment or space without regard to any law or regulation that would otherwise require the use of competitive procedures and to exempt acquisitions from affiliates and entities associated with affiliates and sole source acquisitions from other sources from the requirement for publication of notice in the CBD. These provisions would streamline and simplify VA's acquisitions of commercial services or the use of medical equipment or space.

Proposed paragraphs (a) and (b) of § 873.109 would emphasize that the contracting officer (rather than the team) is the selecting official and would provide simplified guidance to contracting officers on statements of work and specifications. FAR requires certain documentation in contract files. Proposed paragraph (c) would provide simplified documentation requirements to be used in lieu of the FAR requirements. FAR requires specific time frames for announcing solicitations and procurement opportunities to the public and provides, for commercial solicitations, that quotations, bids, or proposals received late shall not be considered. Proposed paragraph (d)(1) would replace FAR announcement time requirements with a "reasonable" time requirement and paragraph (d)(2) would allow the contracting officer to accept late quotations or proposals if late receipt is determined by the contracting officer to be in the best interest of the Government. Late bids received in response to an Invitation for Bid (IFB) would not be considered. FAR provides certain minimum requirements that a contracting officer must meet before a solicitation can be canceled. Proposed paragraph (e) would exempt VA acquisitions of commercial services or the use of medical equipment or space from those minimum requirements and would provide that a contracting officer can cancel a solicitation if cancellation is determined to be in the best interest of the Government. All of these changes are proposed for the purpose of streamlining and simplifying VA's acquisitions of commercial services or the use of medical equipment or space.

Proposed § 873.110, paragraphs (a) through (e), would provide guidance to contracting officers on when to use the provisions and clauses in Part 852 of VAAR in VA acquisitions for commercial services or the use of medical equipment or space. Paragraph (f) would propose to require use of FAR clause 52.207–3, Right of First Refusal, in a solicitation in which current VA employees might be displaced as a result of contract award. This FAR clause ensures that those employees have a right of first refusal to any employment openings created with the contractor as a result of the contract award. This requirement is necessary to protect VA employees and to reduce the cost of contract award by reducing or avoiding unemployment compensation costs.

FAR places certain restrictions on when each type of acquisition procedure can be used. For instance, a request for quotation (RFQ) can be used for non-commercial service acquisitions costing up to $100,000 or for commercial service acquisitions costing up to $5 million. Proposed § 873.111 would remove all such restrictions, allowing use of the RFQ process for any acquisition of commercial services or the use of medical equipment or space, regardless of dollar value. This change is necessary to simplify VA's acquisition of commercial services or the use of medical equipment or space and to provide maximum flexibility to contracting officers.

For non-commercial service acquisitions exceeding the simplified acquisition threshold (SAT) (currently $100,000) or for commercial service acquisitions exceeding $5 million, FAR requires the use of full and open competition unless other statutory authority exists to limit competition. Paragraph (a)(1) of § 873.111 would provide, for acquisitions of commercial services or the use of medical equipment or space using the RFQ process, regardless of the dollar value of the acquisition, that competition to the maximum extent practicable may be used in lieu of full and open competition. FAR provides, for acquisitions below $25,000, that three quotations are considered sufficient to promote competition to the maximum extent practicable. Proposed paragraph (a)(2) would provide, for acquisitions of commercial services or the use of medical equipment or space below the SAT, that two quotations would be considered sufficient to promote competition to the maximum extent practicable. Proposed paragraph (a)(2) would also exempt VA acquisitions of commercial services or the use of medical equipment or space from any dollar value restrictions in FAR on the use of RFQs, allowing VA to use the RFQ process for all acquisitions of commercial services or the use of medical equipment or space, regardless of the dollar value of the procurement. These changes are necessary to simplify and streamline VA's acquisition of commercial services or the use of medical equipment or space by allowing use of the RFQ process in any circumstance.

Proposed paragraph (b) of § 873.111 would provide that the procedures of FAR Part 14 would be used for VA sealed bid acquisitions of commercial services or the use of medical equipment or space. Proposed paragraph (c) of § 873.111 would provide that the negotiation procedures of FAR Parts 12, 13, and 15 would be used for negotiated acquisitions of commercial services or the use of medical equipment or space, except as modified in VAAR Part 873. These two paragraphs are informational only.

Proposed paragraph (d) of § 873.111 would provide an alternative negotiation procedure using a multiphase negotiation technique. This will supersede current FAR provisions for an advisory multi-step process that does not allow the Government to exclude offerors that are unlikely to be viable competitors. Multiphase acquisitions may be appropriate when the submission of full proposals at the beginning of an acquisition would be burdensome for offerors to prepare and for Government personnel to evaluate. Under a multiphase acquisition, VA would seek limited information on vendors' first submissions, make one or more down-selects based on the initial information, and request full proposals from the offerors remaining. This technique would ensure that only those firms most likely to receive awards would be required to expend the time and effort to prepare a full proposal. It would simplify and streamline the acquisition process and would save both vendors and the Government time and money.

Proposed paragraph (e) of § 873.111 would provide two additional alternative negotiation techniques, neither of which are currently provided for in FAR, for use by VA in acquiring commercial services or the use of medical equipment or space. The first technique would allow the contracting officer to indicate to all offerors, or to one or more offerors, a price, contract term or condition, commercially available feature, or other requirement that the offeror or offerors will have to improve upon or meet, as appropriate, in order to remain competitive. The second technique would allow contracting officers to post prices received on offers electronically or otherwise, without disclosing the identity of the offerors, and allow offerors to revise their prices based on the posted information. These procedures are necessary to assist contracting officers in procuring the highest quality health-care services at best value prices.

Proposed § 873.112 sets forth the evaluation requirements that VA contracting officers must place in solicitations. Currently, FAR has rigid requirements that evaluation factors and subfactors, as appropriate, be spelled out in a solicitation. In particular, there is a requirement, over certain dollar thresholds, to include vendor past performance as an evaluation factor. The contracting officer must document the reasons why past performance would not be included in an evaluation. This proposed section relieves contracting officers from these rigid requirements and allows them the flexibility to fashion their own acquisition-specific evaluation scheme with whatever information they deem to be in the best interest of the Government. However, this proposed section retains the requirement from FAR that price or cost to the Government still must be included in any evaluation.

Proposed § 873.113 sets forth a new standard for exchanges with offerors in negotiated acquisitions. Currently, under FAR, any contact with a vendor about the vendor's proposal that goes to the substance of the offer constitutes "discussions." This causes a set of rules to go into effect, including a requirement that the Government hold "discussions" with every offeror, even if there is no need for discussions with those other offerors. Less important contact is referred to as "clarification" under existing rules. Moreover, there is another category called "communications" which goes to establishment of a competitive range. Under proposed § 873.113, the Government can have contact, called "exchanges," at any time with any vendor, as required. However, as with the current regulations, the Government cannot improperly disclose information contained in another offeror's proposal (except see proposed at § 873.111(e), Alternative negotiation techniques).

Proposed § 873.114 sets forth a new concept of the "best value pool." This is the "pool" of offeror(s) that, after initial evaluation, have the most highly rated proposals with the greatest likelihood of award. Although this is similar in concept to the "competitive range" of current regulation, the differences are that the contracting officer may limit the best value pool to a specific number of offerors among which an efficient competition can be conducted. Under the existing rules, the Government must consider every offeror that is acceptable or capable of being made acceptable. Therefore, the Government is forced to keep any number of marginal proposals in the competition even though they may have little real chance of securing an award. This proposed rule would eliminate this requirement and simplify the procurement process for both VA and vendors.

Proposed § 873.115 sets forth new procedures governing proposal revisions. Currently, once a "competitive range" has been developed, all offerors therein must be given a chance to revise their proposals. All revisions must be requested and received at the same time. Finally, at the close of "discussions," all offerors remaining in the competition must be requested to submit a "best and final offer." Under this proposed section, contracting officers may request proposal revisions as often as needed during the acquisition process. There is no need to have a common cutoff for submission of these revisions. Moreover, there is no need for a requirement to request a "best and final offer" from each and every offeror in every acquisition. The proposed section ensures that proposal submissions will be safeguarded against improper disclosures.

Proposed § 873.116 would provide guidance to contracting officers on source selection. FAR 15.308 contains specific requirements for documenting the source selection decision. This proposed section provides a less onerous procedure for documenting source selection than is described in FAR at 15.308.

Proposed § 873.117 would provide additional guidance to contracting officers on contract award, over and above that contained in FAR at 15.504, specifically on the differences between awarding RFQs and requests for proposals.

FAR 15.505 currently requires the contracting officer to provide a preaward debriefing if a written request for a debriefing is received from the offeror no later than 3 days after receipt by the offeror of notice of exclusion from the competitive range. Proposed § 873.118 would make preaward debriefings optional on the part of the contracting officer when determined to be in the best interest of the Government. This is necessary to

simplify and streamline the acquisition process.

Miscellaneous Changes

Currently, VAAR 801.602–70(a)(4) provides that proposed contracts for the mutual use or exchange of use of "specialized medical resources" above specified dollar thresholds be submitted to VA Central Office for review. This proposed rule would revise the term "specialized medical resources" to "health-care resources" pursuant to 38 U.S.C. 8152. The review threshold levels specified in VAAR have been changed by class deviation in accordance with 801.404. This document proposes to incorporate that class deviation and to raise the review thresholds. This is necessary to allow streamlined and expedited processing of proposed contracts and to reduce the administrative burden on contracting officers.

This proposed rule would make minor editorial changes to 801.602–71 and 801.601–72 to correspond with the new language used in this proposed rule.

VAAR 806.302–5(b) currently provides that contracts for the mutual use or exchange of use of specialized medical resources to be acquired from health-care facilities are approved for other than full and open competition, but requires justification and approval in accordance with FAR 6.303 and VAAR 806.303. Section 301 of Public Law 104–262 revised 38 U.S.C. 8153(a)(3)(A), restricting and modifying this authority. Under this new authority, only those acquisitions of health-care resources consisting of commercial services, the use of medical equipment or space, or research, to be acquired from institutions affiliated with the Department in accordance with 38 U.S.C. 7302, from medical practice groups and other approved entities associated with affiliated institutions (entities will be approved if determined legally to be associated with affiliated institutions), or from blood banks, organ banks, or research centers, are approved for other than full and open competition. However, justification and approval is not required for contracts with these entities. This rule proposes to revise 806.302–5, paragraph (b), to incorporate this new authority into VAAR.

In addition, § 301 of Public Law 104–262 revised 38 U.S.C. 8153(a)(3)(B)(i) to provide that contracts for the acquisition of commercial services or the use of medical equipment or space, not procured from affiliated institutions or approved entities associated with affiliated institutions (entities will be approved if determined legally to be associated with affiliated institutions), may be procured without regard to any law or regulation that would otherwise require the use of competitive procedures, provided the procurement is conducted in accordance with the simplified procedures proposed in this rule. Public Law 104–262 revised 38 U.S.C. 8153(a)(3)(B)(ii) to require that such acquisitions permit all responsible sources, as appropriate, to submit a bid, proposal, or quotation (as appropriate) and revised 38 U.S.C. 8153(a)(3)(D) to require that such acquisitions, if conducted on a sole source basis, shall be justified and approved. This rule proposes to renumber current 806.302–5, paragraph (c), as paragraph (d) and to add new paragraph (c) to incorporate these new authorities into VAAR.

Currently, VAAR Part 812 addresses the acquisition of commercial services. This rule proposes to list the Part 52.273 clauses contained herein in Part 812 for use in commercial service acquisitions, as authorized by FAR 12.301(f). This action is necessary, and is proposed based on the reasons set forth below, to permit use of these Part 52.873 clauses in VA's commercial service acquisitions.

This rule proposes to add VAAR clause 852.237–7, Indemnification and Medical Liability Insurance, as shown below in full text, to § 812.302(f) for use in VA commercial service solicitations and contracts issued under the authority of 38 U.S.C. 8151–8153. VAAR clause 852.237–7 is currently set forth in 48 CFR Part 852. VA acquisitions under the authority of 38 U.S.C. 8151–8153 are considered to be for commercial services and clause 852.237–7 is necessary for use in such acquisitions to ensure that VA contractors providing nonpersonal health-care services have adequate medical liability insurance. This insurance is required to protect both VA and veterans from medical malpractice.

Indemnification and Medical Liability Insurance (Oct 1996)

(a) It is expressly agreed and understood that this is a nonpersonal services contract, as defined in Federal Acquisition Regulation (FAR) 37.101, under which the professional services rendered by the Contractor or its health-care providers are rendered in its capacity as an independent contractor. The Government may evaluate the quality of professional and administrative services provided but retains no control over professional aspects of the services rendered, including by example, the Contractor's or its health-care providers' professional medical judgment, diagnosis, or specific medical treatments. The Contractor and its health-care providers shall be liable for their liability-producing acts or omissions. The Contractor shall maintain or require all health-care providers performing under this contract to maintain, during the term of this contract, professional liability insurance issued by a responsible insurance carrier of not less than the following amount(s) per specialty per occurrence: [*Contracting Officer insert the dollar amount value(s) of standard coverage(s) prevailing within the local community as to the specific medical specialty, or specialties, concerned, or such higher amount as the Contracting Officer deems necessary to protect the Government's interests*].

However, if the Contractor is an entity or a subdivision of a State that either provides for self-insurance or limits the liability or the amount of insurance purchased by State entities, then the insurance requirement of this contract shall be fulfilled by incorporating the provisions of the applicable State law.

(b) An apparently successful offeror, upon request of the Contracting Officer, shall, prior to contract award, furnish evidence of the insurability of the offeror and/or of all health-care providers who will perform under this contract. The submission shall provide evidence of insurability concerning the medical liability insurance required by paragraph (a) of this clause or the provisions of State law as to self-insurance, or limitations on liability or insurance.

(c) The Contractor shall, prior to commencement of services under the contract, provide to the Contracting Officer Certificates of Insurance or insurance policies evidencing the required insurance coverage and an endorsement stating that any cancellation or material change adversely affecting the Government's interest shall not be effective until 30 days after the insurer or the Contractor gives written notice to the Contracting Officer. Certificates or policies shall be provided for the Contractor and/or each health-care provider who will perform under this contract.

(d) The Contractor shall notify the Contracting Officer if it, or any of the health-care providers performing under this contract, change insurance providers during the performance period of this contract. The notification shall provide evidence that the Contractor and/or health-care providers will meet all the requirements of this clause, including those concerning liability insurance and endorsements. These requirements may be met either under the new policy, or a combination of old and new policies, if applicable.

(e) The Contractor shall insert the substance of this clause, including this paragraph (e), in all subcontracts for health-care services under this contract. The Contractor shall be responsible for compliance by any subcontractor or lower-tier subcontractor with the provisions set forth in paragraph (a) of this clause.

(End of Clause)

VAAR 837.403 currently requires the use of the above clause 852.237–7, Indemnification and Medical Liability Insurance, in lieu of FAR clause 52.237–7, in solicitations and contracts for nonpersonal health-care services. This rule proposes to clarify at 837.403 that this same VAAR clause must also be used in solicitations and contracts for nonpersonal health-care services awarded under the authority of 38 U.S.C. 8151–8153 and VAAR Part 873. The clause is necessary for use in VA solicitations and contracts to ensure that VA contractors providing nonpersonal health-care services have adequate medical liability insurance. This insurance is required to protect both VA and veterans from medical malpractice.

VAAR Part 852 does not currently contain any provisions specifically relating to the acquisition of commercial services under the simplified acquisition authority of 38 U.S.C. 8151–8153. This rule proposed to add four provisions to the VAAR, as set forth herein in Part 852. The following is an explanation of these proposed provisions.

The proposed provision at 852.273–70, Late offers, would replace paragraph (f) of FAR provision 52.212–1 in acquisitions for commercial services conducted in accordance with VAAR Part 873. Paragraph (f) of FAR provision 52.212–1 currently provides that offers or modifications of offers received after the exact time specified in the solicitation for receipt of offers will not be considered. VAAR provision 852.273–70 proposes to allow consideration of quotations, proposals, or modifications of proposals received after the time set forth in the request for quotations or request for proposals at the discretion of the contracting officer, if determined to be in the best interest of the Government. This will ensure that VA will be able to accept the best offer submitted on a solicitation, even if that offer is received after the time set forth in the solicitation.

Neither FAR nor VAAR currently contains provisions allowing alternative negotiation techniques. The provision at 852.273–71, Alternative negotiation techniques, proposes to allow the use of the alternative negotiation techniques set forth at 873.111(e). The techniques listed therein include (1) allowing the contracting officer to indicate to an offeror how the offeror must improve its offer in order to be considered for award and (2) allowing the contracting officer to post prices and permit revisions of offers based on that information. We believe these alternative negotiation techniques will allow VA to conduct acquisitions on a basis more in line with commercial practices and will result in the acquisition of improved services at reduced prices.

The proposed provision at 852.273–72, Alternative evaluation, would implement the provision at 852.273–71, Alternative negotiation techniques, by advising offerors how prices would be posted and by providing guidance to offerors on how to submit offers. In addition, this proposed provision would advise offerors on how options would be evaluated, i.e., by adding the total price of all options to the total price for the basic requirement. It would also advise offerors that the Government is not obligated to exercise the options. The "options" paragraph is included in this proposed provision because this provision might be used alone, without a separate "options" provision.

The proposed provision at 852.273–73, Evaluation—health-care resources, would replace FAR provision 52.212–2 in acquisitions for commercial services conducted in accordance with VAAR Part 873. FAR provision 52.212–2 provides guidance to offerors on what factors the Government will use to evaluate offers and on how those factors are weighted. Under proposed VAAR 873, VA would not be required to use factors to evaluate offers. Rather, VA would include information in the solicitation on how offers will be evaluated. In addition, VA would not be required to state how the evaluation information is weighted. This proposed provision is written to replace FAR 52.212–2 with these authorities in mind. Also, paragraph (c) has been drafted to clarify that notice of acceptance of an offer will create a binding contract if the solicitation is a request for proposals. If the solicitation is a request for quotations, that would not be the case, as notice of acceptance would not create a binding contract.

Provision at 852.273–74, Award without exchanges, is proposed to be added to VAAR to advise offerors that VA intends to evaluate proposals and award a contract without exchanges with offerors. This provision is necessary in order to avoid any misunderstanding regarding award and to help ensure that offerors provide their best prices and terms with their initial offer.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), collections of information are contained in clause 852.237–7, Indemnification and Medical Liability Insurance, as set forth in the Supplementary Information portion of this proposed rule. Although this document proposes to add this clause for commercial item solicitations and contracts, this Paperwork Reduction Act notice of this document seeks approval for collections of information for both commercial and non-commercial item and service contracts for this clause. The clause can be used in both commercial and non-commercial item and service solicitations and contracts. As required under § 3507(d) of the Act, VA has submitted a copy of this proposed rulemaking action to the Office of Management and Budget (OMB) for its review of the collection of information.

OMB assigns control numbers to collections of information it approves. VA may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Comments on the collection of information should be submitted to the Office of Management and Budget, Attention: Desk Officer for the Department of Veterans Affairs, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Director, Office of Regulations Management (02D), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. Comments should indicate that they are submitted in response to "RIN 2900–AI71."

Title and Provision/Clause Number: Clause 852.237–7, Indemnification and Medical Liability Insurance.

Summary of collection of information: This clause is used in solicitations for nonpersonal health-care services in lieu of FAR clause 52.237–7. It requires the apparent successful bidder/offeror, prior to contract award, to furnish evidence that the firm possesses the types and amounts of insurance required by the solicitation and to notify the contracting officer if there are any changes in the firm's insurance coverage during the contract period. Prior to award, this evidence is in the form of a certificate from the firm's insurance company. After award, it is in the form of a letter or other correspondence, plus additional certificates.

Description of need for information and proposed use of information: The information is required to protect VA by ensuring that the firm to which award will be made possesses the types and amounts of insurance required by the solicitation. It helps ensure that VA will not be held liable for any negligent acts of the contractor and ensures that VA beneficiaries and the public are protected by adequate insurance coverage.

Description of likely respondents: Apparent successful bidders/offerors on solicitations for nonpersonal health-care services.

Estimated number of respondents: 10,000.

Estimated frequency of responses: Once for each contract awarded, plus once each time a contractor changes its insurance coverage.

Estimated average burden per collection: 30 minutes.

Estimated total annual reporting and recordkeeping burden: 5000 hours.

The Department considers comments by the public on proposed collections of information in—

- Evaluating whether the proposed collections of information are necessary for the proper performance of the functions of the Department, including whether the information will have practical utility;
- Evaluating the accuracy of the Department's estimate of the burden of the proposed collections of information, including the validity of the methodology and assumptions used;
- Enhancing the quality, usefulness, and clarity of the information to be collected; and
- Minimizing the burden of the collections of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

OMB is required to make a decision concerning the proposed collection of information contained in this proposed rule between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment on the proposed regulation.

Regulatory Flexibility Act

The Secretary hereby certifies that the adoption of this proposed rule would not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. This proposed rule would establish simplified procedures for the acquisition of health-care resources by VA. Costs, if any, to comply with the provisions of the proposed rule would be minimal. Therefore, pursuant to 5 U.S.C. 605(b), this proposed rule is exempt from the initial and final regulatory flexibility analysis requirements of §§ 603 and 604.

List of Subjects

48 CFR Parts 801 and 852

Government Procurement, Reporting and recordkeeping requirements.

48 CFR Parts 806, 812, 837, and 873

Government Procurement.

Approved: November 2, 1998.

Togo D. West, Jr.,

Secretary of Veterans Affairs.

For the reasons set forth in the preamble, 48 CFR chapter 8 is proposed to be amended as follows:

PART 801—VETERANS AFFAIRS ACQUISITION REGULATIONS SYSTEM

1. The authority citations for Part 801 continues to read as follows:

Authority: 38 U.S.C. 501 and 40 U.S.C. 486(c).

801.602–70 [Amended]

2. In § 801.602–70, paragraphs (a)(4)(vi) and (a)(4)(vii) are proposed to be revised to read as follows:

801.602–70 Legal/technical review requirements to be met prior to contract execution.

(a) * * *

(4) * * *

(vi) Except as specified in paragraph (a)(4)(vii), competitive contracts exceeding $1.5 million and noncompetitive contracts exceeding $500,000 for scarce medical specialist services negotiated under the authority of 38 U.S.C. 7409 or for health-care resources acquired under the authority of Part 873 and 38 U.S.C. 8151–8153.

(vii) Any contract or agreement negotiated under the authority of 38 U.S.C. 8151–8153 for VA to provide inpatient services, administrative resources, the use of medical equipment or space, prosthetics, supplies, or laundry services.

* * * * *

3. In § 801.602–71, paragraph (b)(2) is proposed to be revised to read as follows:

801.602–71 Processing contracts for legal/technical review.

* * * * *

(b) * * *

(2) Proposed contracts and agreements for scarce medical specialist services or for the mutual use or exchange of use of health-care resources, as specified in 801.602–70(a)(4)(vi) and (a)(4)(vii), will be forwarded to Central Office in accordance with VHA Directive 97–015 and VA Manual M–1, Part 1, Chapter 34, for review and submission to the Office of the General Counsel (025).

* * * * *

4. In § 801.602–72, paragraph (b) is proposed to be revised to read as follows:

801.602–72 Documents to be submitted for legal review.

* * * * *

(b) For proposed contracts and agreements for scarce medical specialist services or for the mutual use or exchange of use of health-care resources, as specified in 801.602–70(a)(4)(vi) and (a)(4)(vii), the documents referred to in VA Manual M–1, Part 1, Chapter 34.

* * * * *

PART 806—COMPETITION REQUIREMENTS

5. The authority citations for Part 806 continues to read as follows:

Authority: 38 U.S.C. 501 and 40 U.S.C. 486(c).

6. In § 806.302–5, paragraph (b) is proposed to be revised to read as follows:

806.302–5 Authorized or required by statute.

* * * * *

(b) Contracts or agreements for the mutual use or exchange of use of health-care resources, consisting of commercial services, the use of medical equipment or space, or research, negotiated under the authority of 38 U.S.C. 8151–8153, are approved for other than full and open competition only when such contracts or agreements are with institutions affiliated with the Department of Veterans Affairs, pursuant to 38 U.S.C. 7302, with medical practice groups or other approved entities associated with affiliated institutions (entities will be approved if determined legally to be associated with affiliated institutions), or with blood banks, organ banks, or research centers. The justification and approval requirements of FAR 6.303 and VAAR 806.304 do not apply to such contracts or agreements.

* * * * *

7. In § 806.302–5, paragraph (c) is proposed to be redesignated as paragraph (d) and a new paragraph (c) is proposed to be added to read as follows:

806.302–5 Authorized or required by statute.

* * * * *

(c) Contracts or agreements for the mutual use or exchange of use of health-care resources, consisting of commercial services or the use of medical equipment or space, negotiated under the authority of 38 U.S.C. 8151–8153, and not acquired under the authority of paragraph (b) of this section, may be conducted without regard to any law or regulation that would otherwise require the use of competitive procedures for procuring resources, provided the procurement is conducted in accordance with the simplified procedures contained in part 873. The justification and approval requirements of FAR 6.303 and VAAR 806.304 shall apply to such contracts or agreements conducted on a sole source basis.

* * * * *

PART 812—ACQUISITION OF COMMERCIAL ITEMS

8. The authority citations for Part 812 continues to read as follows:

Authority: 38 U.S.C. 501 and 40 U.S.C. 486(c).

812.301 [Amended]

9. In § 812.301, paragraph (g) is proposed to be added to read as follows:

812.301 Solicitation provisions and contract clauses for the acquisition of commercial items.

* * * * *

(g) When soliciting for commercial services or the use of medical equipment or space under the authority of part 873 and 38 U.S.C. 8151–8153, the provisions and clauses in the following VAAR sections may be used in accordance with the prescriptions contained in parts 837 and 873:

(1) 852.237–7, Indemnification and Medical Liability Insurance.

(2) 852.273–70, Late offers.

(3) 852.273–71, Alternative negotiation techniques.

(4) 852.273–72, Alternative evaluation.

(5) 852.273–73, Evaluation—health-care resources.

(6) 852.273–74, Award without exchanges.

PART 837—SERVICE CONTRACTING

10. The authority citations for Part 837 continues to read as follows:

Authority: 38 U.S.C. 501 and 40 U.S.C. 486(c).

837.403 [Amended]

11. Section 837.403 is proposed to be amended by adding, at the end of the first sentence, ", including solicitations and contracts for nonpersonal health-care services awarded under the authority of 38 U.S.C. 8151–8153 and VAAR Part 873".

PART 852—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

12. The authority citations for Part 852 continues to read as follows:

Authority: 38 U.S.C. 501 and 40 U.S.C. 486(c).

13. Section 852.273–70 is proposed to be added to read as follows:

852.273–70 Late offers.

As prescribed in 873.110(a), insert the following provision:

Late Offers (Date)

This provision replaces paragraph (f) of FAR Provision 52.212–1. Offers or modifications of offers received after the time set forth in a request for quotations or request for proposals may be considered, at the discretion of the contracting officer, if determined to be in the best interest of the Government. Late bids submitted in response to an Invitation for Bid (IFB) will not be considered.

(End of provision)

14. Section 852.273–71 is added to read as follows:

852.273–71 Alternative negotiation techniques.

As prescribed in 873.110(b), insert the following provision:

Alternative Negotiation Techniques (Date)

The contracting officer may elect to use the alternative negotiation techniques described in section 873.111(e) in conducting this procurement. If used, offerors may respond by maintaining offers as originally submitted, revising offers, or submitting an alternative offer. The Government may consider initial offers unless revised or withdrawn, revised offers, and alternative offers in making the award. Revising an offer does not guarantee an offeror an award.

(End of provision)

15. Section 852.273–72 is added to read as follows:

852.273–72 Alternative evaluation.

As prescribed in 873.110(c), insert the following provision:

Alternative Evaluation (Date)

(a) The Government will award a contract resulting from this solicitation to the responsible offeror submitting the lowest priced offer that conforms to the solicitation. During the specified period for receipt of offers, the amount of the lowest offer will be posted and may be viewed by—[*Contracting officer insert description of how the information may be viewed electronically or otherwise*]. Offerors may revise offers anytime during the specified period. At the end of the specified time period for receipt of offers, the responsible offeror submitting the lowest priced offer will be in line for award.

(b) Except when it is determined not to be in the Government's best interest, the Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are materially unbalanced. Evaluation of options shall not obligate the Government to exercise the option(s).

(End of provision)

16. Section 852.273–73 is added to read as follows:

852.273–73 Evaluation—health-care resources.

As prescribed in 873.110(d), in lieu of FAR provision 52.212–2, the contracting officer may insert a provision substantially as follows:

Evaluation—Health-Care Resources (Date)

(a) The Government will award a contract resulting from this solicitation to the responsible offeror whose offer, conforming to the solicitation, will be most advantageous to the Government, price and other factors considered. The following information or factors shall be used to evaluate offers: [*Contracting officer insert evaluation information or factors, such as technical capability to meet the Government's requirements, past performance, or such other evaluation information or factors as the contracting officer deems necessary to evaluate offers. Price shall be evaluated in every acquisition. The contracting officer may include the evaluation information or factors in their relative order of importance, such as in descending order of importance.*]

(b) Except when it is determined not to be in the Government's best interest, the Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are materially unbalanced. Evaluation of options shall not obligate the Government to exercise the option(s).

(c) If this solicitation is a Request for Proposals (RFP), a written notice of award or acceptance of an offer, mailed or otherwise furnished to the successful offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.

(End of Provision)

17. Section 852.273–74 is added to read as follows:

852.273–74 Award without exchanges.

As prescribed in 873.110(e), insert the following provision:

Award Without Exchanges (Date)

The Government intends to evaluate proposals and award a contract without exchanges with offerors. Therefore, each initial offer should contain the offeror's best terms from a cost or price and technical standpoint. However, the Government reserves the right to conduct exchanges if later determined by the contracting officer to be necessary.

(End of provision)

18. Part 873 is added to read as follows:

PART 873—SIMPLIFIED ACQUISITION PROCEDURES FOR HEALTH-CARE RESOURCES

Sec.

873.101 Policy.
873.102 Definitions.
873.103 Priority sources.
873.104 Competition requirements.
873.105 Acquisition planning.
873.106 Presolicitation exchanges with industry.
873.107 Socioeconomic programs.
873.108 Publicizing contract actions.
873.109 General requirements for acquisition of health-care resources.
873.110 Solicitation provisions.
873.111 Acquisition strategies for health-care resources.
873.112 Evaluation information.
873.113 Exchanges with offerors.
873.114 Best value pool.
873.115 Proposal revisions.
873.116 Source selection decision.
873.117 Award to successful offeror.
873.118 Debriefings.

Authority: 38 U.S.C. 8151–8153.

873.101 Policy.

The simplified acquisition procedures set forth in this VAAR part apply to the acquisition of health-care resources consisting of commercial services or the use of medical equipment or space. These procedures shall be used in conjunction with the Federal Acquisition Regulation (FAR). However, when a policy or procedure in FAR or another part of VAAR is inconsistent with the procedures contained in this part, this part shall take precedence. These procedures contain more flexibility than provided in FAR or elsewhere in VAAR.

873.102 Definitions.

Commercial service means a service, except construction exceeding $2,000, that is offered and sold competitively in the commercial marketplace, is performed under standard commercial terms and conditions, and is procured using firm-fixed price contracts.

Health-care providers includes health-care plans and insurers and any organizations, institutions, or other entities or individuals who furnish health-care resources.

Health-care resource includes hospital care and medical services (as those terms are defined in § 1701 of title 38 United States Code (U.S.C.)), any other health-care service, and any health-care support or administrative resource, including the use of medical equipment or space.

873.103 Priority sources.

Without regard to FAR 8.001(a)(2), except for the acquisition of services available from the Committee for Purchase From People Who Are Blind or Severely Disabled, pursuant to the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) and FAR Subpart 8.7, there are no priority sources for the acquisition of health-care resources consisting of commercial services or the use of medical equipment or space.

873.104 Competition requirements.

(a) Without regard to FAR Part 6, if the health-care resource required is a commercial service, the use of medical equipment or space, or research, and is to be acquired from an institution affiliated with the Department in accordance with § 7302 of title 38 U.S.C., including medical practice groups and other approved entities associated with affiliated institutions (entities will be approved if determined legally to be associated with affiliated institutions), or from blood banks, organ banks, or research centers, the resource may be acquired on a sole source basis.

(b) Acquisition of health-care resources identified in paragraph (a) are not required to be publicized as otherwise required by § 873.108 or FAR 5.101. In addition, written justification, as otherwise set forth in § 303(f) of the Federal Property and Administration Services Act of 1949 (41 U.S.C. 253(f)) and FAR Part 6, is not required.

(c) Without regard to FAR 6.101, if the health-care resource required is a commercial service or the use of medical equipment or space, and is to be acquired from an entity not described in paragraph (a) of this section, contracting officers shall seek competition to the maximum extent practicable and shall permit all responsible sources, as appropriate under the provisions of this part, to submit a bid, proposal or quotation (as appropriate) for the resources to be procured and provide for the consideration by the Department of bids, proposals, or quotations so submitted.

(d) Without regard to FAR 5.101, acquisition of health-care resources identified in paragraph (c) of this section shall be publicized as otherwise required by § 873.108. Moreover, for any such acquisition described in paragraph (c) of this section to be conducted on a sole source basis, the contracting officer must prepare a justification that includes the information and is approved at the levels prescribed in § 303(f) of the Federal Property and Administration Services Act of 1949 (41 U.S.C. 253(f)) and FAR Part 6.

873.105 Acquisition planning.

(a) This section shall be used in lieu of FAR Part 7. Acquisition planning is an indispensable component of the total acquisition process. Acquisition planning may involve identifying requirements, available funding, and sources, and development of a statement or description of work, a Government estimate, and/or evaluation information.

(b) Within VA and for the acquisition of health-care resources consisting of commercial services or the use of medical equipment or space, an acquisition team shall be assembled. The team shall be tailored by the contracting officer for each particular acquisition and include the appropriate mix of contracting, fiscal, legal, administrative, and technical personnel, the small business advocate representing the contracting activity or a higher level designee, an SBA Procurement Center Representative, if available, and such other expertise to assure a comprehensive acquisition plan.

(c) Prior to determining whether a requirement is suitable for acquisition using these simplified acquisition procedures, the acquisition team shall conduct market research to identify interested businesses. It is the responsibility of the contracting officer to ensure the requirement is appropriately publicized and information about the procurement opportunity is adequately disseminated as set forth in § 873.108.

873.106 Presolicitation exchanges with industry.

(a) This section shall be used in lieu of FAR Part 10. In conducting market research, exchange of information by all interested parties involved in an acquisition, from the earliest identification of a requirement through release of the solicitation, is encouraged. Interested parties include potential offerors, end users, Government acquisition and support personnel, and

others involved in the conduct or outcome of the acquisition. The nature and extent of presolicitation exchanges between the Government and industry shall be a matter of the acquisition team's discretion, as coordinated by the contracting officer.

(b) Techniques to promote early exchange of information include—

(1) Industry or small business conferences;

(2) Public hearings;

(3) Market research;

(4) One-on-one meetings with potential offerors;

(5) Presolicitation notices;

(6) Draft Requests for Proposals (RFPs);

(7) Requests for Information (RFIs);

(8) Presolicitation or preproposal conferences;

(9) Site visits;

(10) Electronic notices (e.g., Internet); and

(11) Use of the Procurement Marketing and Access Network (PRO–NET).

873.107 Socioeconomic programs.

(a) *Implementation.* This paragraph provides additional authority, over and above that found at FAR 19.502, to waive small business set-asides. If, through market research, there is reasonable expectation that reasonably priced bids, proposals, or quotations will be received from two or more responsible small businesses, a requirement for health-care resources shall be reserved for small business participation. The Head of the Contracting Activity may approve a waiver from the requirement for any set-aside for small business participation when it is determined to be in the best interest of the Government. For acquisitions between $2,500 and $100,000, the automatic reservation for small business concerns, as provided in FAR 19.502–2(a), is not applicable.

(b) *Rejecting Small Business Administration (SBA) Recommendations.* (1) HCA's shall consider and respond to a recommendation from an SBA representative to set a procurement aside for small business within 5 working days. If the recommendation is rejected by the HCA and if SBA intends to appeal that determination, SBA shall, within 1 working day after receipt of the HCA's determination, notify the contracting officer of SBA's intention to appeal.

(2) Upon receipt of the notification of SBA's intention to appeal and pending issuance of a final appeal decision to SBA, the contracting officer shall suspend action on the acquisition unless a determination is made in writing by the contracting officer that proceeding to contract award and performance is in the public interest. The contracting officer shall promptly notify SBA of the determination to proceed with the solicitation and/or contract award and shall provide a copy of the written determination to SBA.

(3) SBA shall be allowed 10 working days after receiving the rejection notice from the HCA for acquisitions not exceeding $5 million, or 15 working days after receiving the rejection notice for acquisitions exceeding $5 million, to file an appeal. SBA shall notify the contracting officer within this 10 or 15 day period whether an appeal has, in fact, been taken. If notification is not received by the contracting officer within the applicable period, it shall be deemed that an appeal was not taken.

(4) SBA shall submit appeals to the Secretary. Decisions shall be made by the Procurement Executive, whose decisions shall be final.

(c) *Contracting with the Small Business Administration (the 8(a) Program).* The procedures of FAR Part 19.8 shall be followed where a responsible 8(a) contractor has been identified.

(d) *Determinations of Responsibility and Small Business.* The Director, Office of Small and Disadvantaged Business Utilization (OSDBU), Department of Veterans Affairs (VA), and Director, Office of Industrial Assistance, Small Business Administration (SBA) shall serve as ombudsmen to assist VA contracting officers on any issues relating to Certificates of Competency (COC). Copies of all COC referrals to SBA shall be submitted to the Director, OSDBU.

873.108 Publicizing contract actions.

(a) Without regard to FAR 5.101, all acquisitions under this Part 873 for dollar amounts in excess of the simplified acquisition threshold (SAT), as set forth in FAR Part 13, shall be publicly announced utilizing a medium designed to obtain competition to the maximum extent practicable and to permit all responsible sources, as appropriate under the provisions of this Part, to submit a bid, proposal, or quotation (as appropriate).

(1) The publication medium may include the Commerce Business Daily; the Internet; and local, regional or national publications or journals, as appropriate, at the discretion of the contracting officer, depending on the complexity of the acquisition.

(2) Without regard to FAR 5.101 or 14.202–1, notice shall be published for a reasonable time prior to issuance of a request for quotations (RFQ) or a solicitation, depending on the complexity or urgency of the acquisition, in order to afford potential offerors a reasonable opportunity to respond. If the notice includes a complete copy of the RFQ or solicitation, a prior notice is not required, and the RFQ or solicitation shall be considered to be announced and issued at the same time.

(3) The notice may include contractor qualification parameters, such as time for delivery of service, credentialing or medical certification requirements, small business or other socio-economic preferences, the appropriate small business size standard, and such other qualifications as the contracting officer deems necessary to meet the needs of the Government.

(b) The requirement for public announcement does not apply to sole source acquisitions, described in 873.104(a), from institutions affiliated with the Department in accordance with § 7302 of title 38 U.S.C., including medical practice groups and other approved entities associated with affiliated institutions (entities will be approved if determined legally to be associated with affiliated institutions), or from blood banks, organ banks, or research centers, or to sole source acquisitions of hospital care and medical services (as those terms are defined in § 1701 of title 38 U.S.C.) or any other health-care services.

(c) For acquisitions below the SAT, a public announcement is optional.

(d) Each solicitation issued under these procedures shall prominently identify that the requirement is being solicited under the authority of 38 U.S.C. 8153 and VAAR Part 873.

873.109 General requirements for acquisition of health-care resources.

(a) *Source Selection Authority.* Contracting officers shall be the source selection authority for acquisitions of health-care resources, consisting of commercial services or the use of medical equipment or space, utilizing the guidance contained in this VAAR Part 873.

(b) *Statement of work/Specifications.* Statements of work or specifications may define the requirement and include qualifications or limitations such as time limits for delivery of service, medical certification or credentialing restrictions, small business or other socio-economic preferences, or any other such terms as the contracting officer deems appropriate for each specific acquisition.

(c) *Documentation.* Without regard to FAR 13.106–3(b), 13.501(b), or 14.408–

7(a) and (b), the contract file shall include:

(1) A brief written description of the procedures used in awarding the contract;

(2) The market research, including the determination that the acquisition involves health-care resources;

(3) The number of offers received; and

(4) An explanation, tailored to the size and complexity of the acquisition, of the basis for the contract award decision.

(d) *Time for receipt of quotations or offers.* (1) Without regard to FAR 5.203, contracting officers shall set a reasonable time for receipt of quotations or proposals in requests for quotations (RFQs) and solicitations.

(2) Without regard to FAR 15.208 or 52.212–1(f), quotations or proposals received after the time set forth in a RFQ or request for proposals (RFP) may be considered at the discretion of the contracting officer if determined to be in the best interest of the Government. Contracting officers shall document the rationale for accepting quotations or proposals received after the time specified in the RFQ or RFP. This paragraph (d)(2) shall not apply to RFQs or RFPs if alternative evaluation techniques described in VAAR 873.111(e)(ii) are used. This paragraph (d)(2) does not apply to invitations for bid (IFBs).

(e) *Cancellation of procurements.* Any acquisition may be canceled by the contracting officer at any time during the acquisition process if cancellation is determined to be in the best interest of the Government.

873.110 Solicitation provisions.

(a) As provided in 873.109(d), contracting officers shall insert the provision at 852.273–70, Late offers, in all requests for quotations (RFQs) and requests for proposals (RFPs) exceeding the micro-purchase threshold.

(b) The contracting officer shall insert a provision in RFQs and solicitations, substantially the same as the provision at 852.273–71, Alternative negotiation techniques, when either of the alternative negotiation techniques described in 873.111(e)(1) will be used.

(c) The contracting officer shall insert the provision at 852.273–72, Alternative evaluation, in lieu of the provision at 52.212–2, Evaluation—Commercial Items, when the alternative negotiation technique described in 873.111(e)(1)(ii) will be used.

(d) When evaluation information, as described in 873.112, is to be used to select a contractor under an RFQ or RFP for health-care resources consisting of commercial services or the use of medical equipment or space, the contracting officer may insert the provision at 852.273–73, Evaluation—health-care resources, in the RFQ or RFP in lieu of FAR provision 52.212–2.

(e) As provided at 873.113(f), if award may be made without exchange with vendors, the contracting officer shall include the provision at 852.273–74, Award without exchanges, in the RFQ or RFP.

(f) The contracting officer shall insert the clauses at FAR 52.207–3, Right of First Refusal of Employment, and at VAAR 852.207–70, Report of employment under commercial activities, in all RFQs, solicitations, and contracts issued under the authority of 38 U.S.C. 8151–8153 which may result in a conversion, from in-house performance to contract performance, of work currently being performed by Department of Veterans Affairs employees.

873.111 Acquisition strategies for health-care resources.

Without regard to FAR 13.003 or 13.500(a), the following acquisition processes and techniques may be used, singly or in combination with others, as appropriate, to design acquisition strategies suitable for the complexity of the requirement and the amount of resources available to conduct the acquisition. These strategies should be considered during acquisition planning. The contracting officer shall select the process most appropriate to the particular acquisition. There is no preference for sealed bid acquisitions.

(a) *Request for quotations.* (1) Without regard to FAR 6.1 or 6.2, contracting officers should solicit a sufficient number of sources to promote competition to the maximum extent practicable and to ensure that the purchase is advantageous to the Government, based, as appropriate, on either price alone or price and other factors (e.g., past performance and quality). RFQs should notify vendors of the basis upon which the award is to be made.

(2) Without regard to FAR 13.104(b), for acquisitions under the simplified acquisition threshold (SAT), two quotes meet the requirement for competition to the maximum extent practicable. For acquisitions in excess of the SAT, procedures set forth in FAR Part 13 concerning RFQs may be utilized without regard to the dollar thresholds contained therein.

(b) *Sealed bidding.* FAR Part 14 provides procedures for sealed bidding.

(c) *Negotiated acquisitions.* The procedures of FAR Parts 12, 13, and 15 shall be used for negotiated acquisitions, except as modified in this VAAR part.

(d) *Multiphase acquisition technique*—(1) *General.* Without regard to FAR 15.202, multiphase acquisitions may be appropriate when the submission of full proposals at the beginning of an acquisition would be burdensome for offerors to prepare and for Government personnel to evaluate. Using multiphase techniques, the Government may seek limited information initially, make one or more down-selects, and request a full proposal from an individual offeror or limited number of offerors. Provided that the notice notifies offerors, the contracting officer may limit the number of proposals during any phase to the number that will permit an efficient competition among proposals offering the greatest likelihood of award. The contracting officer may indicate in the notice an estimate of the greatest number of proposals that will be included in the down-select phase. The contracting officer may down-select to a single offeror.

(2) *First phase notice.* In the first phase, the Government shall publish a notice (see 873.108) that solicits responses and that may provide, as appropriate, a general description of the scope or purpose of the acquisition and the criteria that will be used to make the initial down-select decision. The notice may also inform offerors of the evaluation criteria or process that will be used in subsequent down-select decisions. The notice shall contain sufficient information to allow potential offerors to make an informed decision about whether to participate in the acquisition. The notice shall advise offerors that failure to participate in the first phase will make them ineligible to participate in subsequent phases. The notice may be in the form of a Commerce Business Daily notice or a narrative letter or other appropriate method that contains the information required by this paragraph.

(3) *First phase responses.* Offerors shall submit the information requested in the notice described in paragraph (d)(2) of this section. Information sought in the first phase may be limited to a statement of qualifications and other appropriate information (e.g., proposed technical concept, past performance information, limited pricing information).

(4) *First phase evaluation and down-select.* The Government shall evaluate all offerors' submissions in accordance with the notice and make a down-select decision.

(5) *Subsequent phases.* Additional information shall be sought in the second phase so that a down-select can be performed or an award made without exchanges, if necessary. The contracting officer may conduct exchanges with remaining offeror(s), request proposal revisions, or request best and final offers, as determined necessary by the contracting officer, in order to make an award decision.

(6) *Debriefing.* Without regard to FAR 15.505, contracting officers shall debrief offerors as required by 873.118 when they have been excluded from the competition.

(e) *Alternative negotiation techniques*—(1) Contracting officers may utilize alternative negotiation techniques for the acquisition of health-care resources. Alternative negotiation techniques may be used when award will be based on either price or price and other factors. Alternative negotiation techniques include but are not limited to:

(i) Indicating to offerors a price, contract term or condition, commercially available feature, and/or requirement (beyond any requirement or target specified in the solicitation) that offerors will have to improve upon or meet, as appropriate, in order to remain competitive.

(ii) Posting offered prices electronically or otherwise (without disclosing the identity of the offerors) and permitting revisions of offers based on this information.

(2) Except as otherwise permitted by law, contracting officers shall not conduct acquisitions under this section in a manner that reveals the identities of offerors, releases proprietary information, or otherwise gives any offeror a competitive advantage (see FAR 3.104).

873.112 Evaluation information.

(a) Without regard to FAR 15.304, the criteria, factors, or other evaluation information that apply to an acquisition, and their relative importance, are within the broad discretion of agency acquisition officials as long as the evaluation information is determined to be in the best interest of the Government.

(b) Price or cost to the Government shall be evaluated in every source selection.

(c) The quality of the product or service may be addressed in source selection through consideration of information such as past performance, compliance with solicitation requirements, technical excellence, management capability, personnel qualifications, and prior experience. The information required from quoters, bidders, or offerors shall be included in notices or solicitations, as appropriate.

(d) The relative importance of any evaluation information included in a solicitation shall be set forth therein.

873.113 Exchanges with offerors.

(a) Without regard to FAR 15.201 or 15.306, negotiated acquisitions generally involve exchanges between the Government and competing offerors. Open exchanges support the goal of efficiency in Government by providing the Government with relevant information (in addition to that submitted in the offeror's initial proposal) needed to understand and evaluate the offeror's proposal. The nature and extent of exchanges between the Government and offerors is a matter of contracting officer judgment. Clarifications, communications, and discussions, as provided for in the FAR, are concepts not applicable to acquisitions under this VAAR part 873.

(b) Exchanges with all potential offerors may take place throughout the source selection process. Exchanges may start in the planning stages and continue through contract award. Exchanges should occur most often with offerors determined to be in the best value pool (see 873.114). The purpose of exchanges is to ensure there is mutual understanding between the Government and the offerors on all aspects of the acquisition, including offerors' submittals/proposals. Information disclosed as a result of oral or written exchanges with an offeror may be considered in the evaluation of an offeror's proposal.

(c) Exchanges may be conducted, in part, to obtain information that explains or resolves ambiguities or other concerns (e.g., perceived errors, perceived omissions, or perceived deficiencies) in an offeror's proposal.

(d) Exchanges shall only be initiated if authorized by the contracting officer and need not be conducted with all offerors.

(e) *Improper exchanges.* Except for acquisitions based on alternative negotiation techniques contained in 873.111(e)(1), the contracting officer and other Government personnel involved in the acquisition shall not disclose information regarding one offeror's proposal to other offerors without consent of the offeror in accordance with FAR Parts 3 and 24.

(f) Award may be made on initial proposals without exchanges if the solicitation states that the Government intends to evaluate proposals and make award without exchanges, unless the contracting officer determines that exchanges are considered necessary.

873.114 Best value pool.

(a) Without regard to FAR 15.306(c), the contracting officer may determine the most highly rated proposals having the greatest likelihood of award based on the information or factors and subfactors in the solicitation. These vendors constitute the best value pool. This determination is within the sole discretion of the contracting officer. Competitive range determinations, as provided for in the FAR, are not applicable to acquisitions under this VAAR part 873.

(b) In planning an acquisition, the contracting officer may determine that the number of proposals that would otherwise be included in the best value pool is expected to exceed the number at which an efficient, timely, and economical competition can be conducted. In reaching such a conclusion, the contracting officer may consider such factors as the results of market research, historical data from previous acquisitions for similar supplies and services, and the resources available to conduct the source selection. Provided the solicitation notifies offerors that the best value pool can be limited for purposes of making an efficient, timely, and economical award, the contracting officer may limit the number of proposals in the best value pool to the greatest number that will permit an efficient competition among the proposals offering the greatest likelihood of award. The contracting officer may indicate in the solicitation the estimate of the greatest number of proposals that will be included in the best value pool. The contracting officer may limit the best value pool to a single offeror.

(c) If the contracting officer determines that an offeror's proposal is no longer in the best value pool, the proposal shall no longer be considered for award. Written notice of this decision shall be provided to unsuccessful offerors at the earliest practicable time.

873.115 Proposal revisions.

(a) Without regard to FAR 15.307, the contracting officer may request proposal revisions as often as needed during the proposal evaluation process at any time prior to award from vendors remaining in the best value pool. Proposal revisions shall be submitted in writing. The contracting officer may establish a common cutoff date for receipt of proposal revisions. Contracting officers may request best and final offers. In any case, contracting officers and acquisition team members shall safeguard proposals, and revisions

thereto, to avoid unfair dissemination of an offeror's proposal.

(b) If an offeror initially included in the best value pool is no longer considered to be among those most likely to receive award after submission of proposal revisions and subsequent evaluation thereof, the offeror may be eliminated from the best value pool without being afforded an opportunity to submit further proposal revisions.

(c) Requesting and/or receiving proposal revisions do not necessarily conclude exchanges. However, requests for proposal revisions should advise offerors that the Government may make award without obtaining further revisions.

873.116 Source select decision.

(a) An integrated comparative assessment of proposals should be performed before source selection is made. The contracting officer shall independently determine: which proposal(s) represents the best value, consistent with the evaluation information or factors and subfactors in the solicitation; and that the prices are fair and reasonable. The contracting officer may determine that all proposals should be rejected if it is in the best interest of the Government.

(b) The source selection team, or advisory boards or panels, may conduct comparative analysis(es) of proposals and make award recommendations, if the contracting officer requests such assistance.

(c) The basis for the source selection decision shall be documented and shall reflect the rationale for any cost/technical tradeoffs. Specific tradeoffs that cannot be reasonably quantified need not be described in terms of cost/price impacts.

873.117 Award to successful offeror.

(a) The contracting officer shall award a contract to the successful offeror by furnishing the contract or other notice of the award to that offeror.

(b) If a request for proposal (RFP) process was used for the solicitation and if award is to be made without exchanges, the contracting officer may award a contract without obtaining the offeror's signature a second time. The offeror's signature on the offer constitutes the offeror's agreement to be bound by the offer. If a request for quotation (RFQ) process was used for the solicitation, the contracting officer must obtain the offeror's acceptance signature on the contract to ensure formation of a binding contract.

(c) If the award document includes information that is different than the latest signed offer, both the offeror and the contracting officer shall sign the contract award.

(d) When an award is made to an offeror for less than all of the items that may be awarded and additional items are being withheld for subsequent award, each notice shall state that the Government may make subsequent awards on those additional items within the offer acceptance period.

873.118 Debriefings.

Offerors excluded from multiphase acquisitions or best value pools may make a written request for a debriefing. Without regard to FAR 15.505, preaward debriefings will be conducted by the contracting officer when determined to be in the best interest of the Government. Post-award debriefings shall be conducted in accordance with FAR Part 15.506.

BILLING CODE 8320-01-P

DEPARTMENT OF ENERGY

48 CFR Parts 909 and 970

RIN: 1991-AB44

Acquisition Regulations; Performance Guarantees

AGENCY: Department of Energy.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Department of Energy (DOE) is proposing to amend its acquisition regulations to formally require a performance guarantee under circumstances where a prospective awardee has been created solely for the performance of the instant contract and lacks sufficient financial or other resources to fulfill its obligations under the prospective contract. In circumstances where the newly created entity likely will be dependent upon the resources of the parent organization, this proposal would allow Contracting Officers to consider the resources of the parent in a determination of the newly created entity's responsibility only when the parent provides a performance guarantee or other undertaking satisfactory to the Contracting Officer. While this situation occurs most often in the award of contracts for the management and operation of DOE facilities, this proposal would make a form of performance guarantee necessary whenever these circumstances are encountered.

DATES: Written comments on the proposed rulemaking must be received on or before close of business December 9, 1998.

ADDRESSES: Comments (3 copies) should be addressed to: Robert M. Webb at the address indicated below.

FOR FURTHER INFORMATION CONTACT: Robert M. Webb, U.S. Department of Energy, Office of Procurement and Assistance Management, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 586-8264.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Section by Section Analysis.
III. Procedural Requirements.
A. Review Under Executive Order 12866.
B. Review Under Executive Order 12988.
C. Review Under the Regulatory Flexibility Act.
D. Review Under the Paperwork Reduction Act.
E. Review Under the National Environmental Policy Act.
F. Review Under Executive Order 12612.
G. Review Under Small Business Regulatory Enforcement Fairness Act of 1996.
H. Review Under the Unfunded Mandates Reform Act of 1995.

I. Background

The Department of Energy in certain cases requires that the contractor be a corporate entity organized specifically for the performance of the contract at a specific DOE site. This requirement occurs regularly in the award of management and operating contracts and is intended (1) to assure the dedication of the contractor to the performance of the contract; (2) to limit involvement of the Department with the corporate parent; (3) to isolate the contractor from the parent for purposes of security and classification matters; (4) to limit the flow of information between the contractor and its parent, limiting a potential source of organizational conflict of interest; (5) to isolate the accounting system of the contractor, since often the budget and accounting systems of such contractors are integrated into DOE's budget and accounting systems; and (6) to limit the necessity of corporate support thereby reducing or negating a basis for charging general and administrative expense to the contract.

Such dedicated contractors, however, generally have limited assets. In most cases, without consideration of the corporate assets of the parent entity(ies), the DOE Contracting Officer would not be able to make a determination that the contractor was financially responsible and had sufficient resources available to assure successful performance of the contract.

It has been a common practice of the Department in such instances for the parent entity(ies) to provide some form of guarantee of performance. While there are other means for the parent to guarantee the subsidiary's fulfillment of all its contractual obligations, such as an unconditional letter of credit, the most appropriate means under these circumstances is a contractually binding performance guarantee. Recently, the Department issued Acquisition Letter 98-05R to assure a uniform process for dealing with this circumstance. This rulemaking proposes to incorporate the requirement for a performance guarantee into the Department of Energy Acquisition Regulation.

II. Section-by-Section Analysis

This rulemaking proposes to add a subsection 909.104-3(e) to the DEAR to supplement the coverage in the Federal Acquisition Regulation at 48 CFR 9.104-3. The proposed subsection would require some binding form of performance guarantee in contracts other than management and operating contracts where the contractor has been formed specifically for performance of the contract and lacks sufficient resources to carry out performance of the prospective contract.

It further proposes to add a section 970.0902 to treat this matter in the context of the award of DOE management and operating contracts. Since this situation will occur predominately in the award of management and operating contracts, the proposed 970 coverage includes a solicitation provision for use when DOE's solicitation requires a dedicated performing entity.

III. Procedural Requirements

A. Review Under Executive Order 12866

Today's regulatory action has been determined not to be a "significant regulatory action" under Executive Order 12866, "Regulatory Planning and Review," (58 FR 51735, October 4, 1993). Accordingly, this proposed rule was not subject to review under that Executive Order by the Office of Information and Regulatory Affairs of the Office of Management and Budget (OMB).

B. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, "Civil Justice Reform," 61 FR 4729 (February 7, 1996), imposes on Executive agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. With regard to the review required by section 3(a), section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, these proposed regulations meet the relevant standards of Executive Order 12988.

C. Review Under the Regulatory Flexibility Act

This proposed rule has been reviewed under the Regulatory Flexibility Act of 1980, Public Law 96-354, that requires preparation of an initial regulatory flexibility analysis for any rule that must be proposed for public comment and that is likely to have significant economic impact on a substantial number of small entities. The contracts to which this rulemaking would apply involve awards to newly formed subsidiaries organized by a parent corporations to perform specific DOE contracts. In such instances, the parent would be required to guarantee the performance of the subsidiary. There would not be an adverse economic impact on contractors or subcontractors. Accordingly, DOE certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities, and, therefore, no regulatory flexibility analysis has been prepared.

D. Review Under the Paperwork Reduction Act

No additional information or record keeping requirements are imposed by this rulemaking. Accordingly, no OMB clearance is required under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

E. Review Under the National Environmental Policy Act

DOE has concluded that promulgation of this proposed rule falls into a class of actions which would not individually or cumulatively have significant impact on the human environment, as determined by DOE's regulations (10 CFR part 1021, subpart D) implementing the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*). Specifically, this proposed rule is categorically excluded from NEPA review because the amendments to the DEAR would be strictly procedural (categorical exclusion A6). Therefore, this proposed rule does not require an environmental impact statement or environmental assessment pursuant to NEPA.

F. Review Under Executive Order 12612

Executive Order 12612, (52 FR 41685, October 30, 1987), requires that regulations, rules, legislation, and any other policy actions be reviewed for any substantial direct effects on States, on the relationship between the Federal Government and the States, or in the distribution of power and responsibilities among the various levels of Government. If there are sufficient substantial direct effects, then the Executive Order requires the preparation of a federalism assessment to be used in all decisions involved in promulgating and implementing a policy action. This proposed rule merely reflects current practice relating to determinations of responsibility. States which contract with DOE will be subject to this rule. However, DOE has determined that this proposed rule would not have a substantial direct effect on the institutional interests or traditional functions of the States.

G. Review Under Small Business Regulatory Enforcement Fairness Act of 1996

As required by 5 U.S.C. 801, DOE will report to Congress promulgation of the rule prior to its effective date. The report will state that it has been determined that this proposed rule is not a "major rule" as defined by 5 U.S.C. 804(3).

H. Review Under the Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4) generally requires a Federal agency to perform a detailed assessment of costs and benefits of any rule imposing a Federal Mandate with costs to State, local or tribal governments, or to the private sector, of $100 million or more. This proposed rulemaking would only affect

private sector entities, and the impact is less than $100 million.

List of Subjects in 48 CFR Parts 909 and 970

Government procurement.

Issued in Washington, D.C. on November 2, 1998.

Richard H. Hopf,

Deputy Assistant Secretary for Procurement and Assistance Management.

For the reasons set out in the preamble, Chapter 9 of Title 48 of the Code of Federal Regulations is proposed to be amended as set forth below.

PART 909—[AMENDED]

1. The authority citation for Part 909 continues to read as follows:

Authority: 42 U.S.C. 7254; 40 U.S.C. 486(c).

2. Subsection 909.104–3 is added as follows:

909.104–3 Application of standards. (DOE coverage-paragraph (e))

(e) DOE may select an entity which was newly created to perform the prospective contract, including, but not limited to, a joint venture or other similarly binding corporate partnership. In such instances when making the determination of responsibility pursuant to 48 CFR 9.103, the contracting officer may evaluate the financial resources of other entities only to the extent that those entities are legally bound, jointly and severally if more than one, by means of a performance guarantee or other equivalent enforceable commitment to supply the necessary resources to the prospective contractor and to assume all contractual obligations of the prospective contractor. The guaranteeing corporate entity(ies) must be found to have sufficient resources in order to satisfy its guarantee.

PART 970—[AMENDED]

3. The authority citation for Part 970 continues to read:

Authority: Sec. 161 of the Atomic Energy Act of 1954 (42 U.S.C. 2201), sec. 644 of the Department of Energy Organization Act, Pub.L. 95–91 (42 U.S.C. 7254).

4. Section 970.0902 is added as follows:

970.0902 Determination of responsibility.

(a) In the award of a management and operating contract, the contracting officer shall determine that the prospective contractor is a responsible contractor and is capable of providing all necessary financial, personnel, and other resources in performance of the contract.

(b) DOE contracts with entities that have been created solely for the purpose of performing a specific management and operating contract. Such a newly created entity generally will have very limited financial and other resources. In such instances, when making the determination of responsibility required under this section, the contracting officer may evaluate the financial resources of other entities only to the extent that those entities are legally bound, jointly and severally if more than one, by means of a performance guarantee or other equivalent enforceable commitment to supply the necessary resources to the prospective contractor and to assume all contractual obligations of the prospective contractor. A performance guarantee should be the means used unless an equivalent degree of commitment can be obtained by an alternative means.

(c) The guaranteeing corporate entity(ies) must be found to have sufficient resources in order to satisfy its guarantee.

(d) Contracting officers shall insert the provision at 970.5204-XX in solicitations where the awardee is required to be organized solely for performance of the requirement.

5. Section 970.5204-XX is added as follows:

§ 970.5204-XX Requirement for guarantee of performance.

In accordance with 970.0902(d), insert the following provision in appropriate solicitations.

Requirement for Guarantee of Performance (XXX 1998)

The successful proposer is required by other provisions of this solicitation to organize a dedicated corporate entity to carry out the work under the contract to be awarded as a result of this solicitation. The successful proposer will be required, as part of the determination of responsibility of the newly organized, dedicated corporate entity and as a condition of the award of the contract to that entity, to furnish a guarantee of that entity's performance. That guarantee of performance must be satisfactory in all respects to the Department of Energy.

In order to consider the financial or other resources of the parent corporate entity(ies) or other guarantors, each of those entities must be legally bound, jointly and severally if more than one, to provide the necessary resources to the prospective contractor and to assume all contractual obligations of the prospective contractor.

BILLING CODE 6450–01–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. NHTSA 98–4672]

Federal Motor Vehicle Safety Standards

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petition for rulemaking.

SUMMARY: This document denies a petition for rulemaking submitted by Price T. Bingham, a private individual. The petitioner requested that the agency initiate rulemaking to require air bag sensors to be designed so that data is recorded during a crash and can be read by crash investigators. The agency agrees that the recording of crash data from air bag sensors, as well as other vehicle sensors, can provide information that is very valuable in understanding crashes. This information can then be used in a variety of ways to improve motor vehicle safety. The agency is denying the petition because the auto industry is already voluntarily moving in the direction recommended by the petitioner. Further, the agency believes this area presents some issues that are, at least for the present time, best addressed in a non-regulatory context.

FOR FURTHER INFORMATION CONTACT: For non-legal issues: Mr. Clarke Harper, Chief, Light Duty Vehicle Division, NPS–11, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590. Telephone: (202) 366–2264. Fax: (202) 366–4329.

For legal issues: J. Edward Glancy, Office of Chief Counsel, NCC–20, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590. Telephone: (202) 366–2992. Fax: (202) 366–3820.

SUPPLEMENTARY INFORMATION: NHTSA received a petition for rulemaking from Price T. Bingham, a private individual. Mr. Bingham stated that air bag sensors are capable of collecting and recording data that could be extremely valuable to crash investigators. He stated his concern in light of air bag deployments that might be "spontaneous," but did not limit his petition to that issue. The petitioner asked the agency to initiate rulemaking to require manufacturers to design their air bag sensors so that data are collected and recorded during a crash so that they can be read by crash investigators.

NHTSA notes that the safety community in recent years has had considerable interest in the concept of crash event recorders. Such recorders can, in conjunction with the air bag and other sensors already provided on many vehicles, collect and record a variety of relevant crash data. These data include such things as vehicle speed, belt use, and crash pulse.

The additional and more accurate data about crashes that could be provided by crash event recorders would enable investigators to develop a significantly better understanding of how and why crashes occur. This information could then be used in a variety of ways to improve motor vehicle safety, e.g., the information could be used to improve vehicle designs, improve safety standards, and develop improved public education campaigns.

A more immediate safety benefit can occur if the occurrence of a crash is immediately and automatically communicated to local emergency services, thereby shortening the response time of the correct emergency services. NHTSA's Office of Vehicle Safety Research is currently testing, in the Buffalo, New York area, an Automated Collision Notification system that uses single point electronic crash sensors, a global positioning system receiver and a cellular phone to facilitate emergency services dispatch. This program has been the subject of recent press articles, copies of which are being placed in the docket.

The agency notes that on June 10, 1997, the National Transportation Safety Board (NTSB) adopted a series of recommendations concerning air bag safety and occupant restraint use which, among other things, called on NHTSA and the vehicle manufacturers "to develop and implement * * * a plan to gather better information on crash pulses and other crash parameters in actual crashes, utilizing current or augmented crash sensing and recording devices." The recommendations followed a public forum convened by the NTSB in March 1997.

Also, the Jet Propulsion Laboratory, in its April 1998 Advanced Air Bag Technology Assessment, included a recommendation that NHTSA study the feasibility of installing and obtaining crash data for safety analyses from crash recorders on vehicles.

The auto industry is already beginning to voluntarily install crash event recorders on some vehicles. For example, General Motors (GM) has had crash event recorders on some of its vehicles for several years and is planning to install more advanced systems in the future. NHTSA notes that, as part of a recent investigation carried out by its Special Crash Investigations program, it was able to use information obtained from a GM vehicle equipped with a crash event recorder.

Persons who are interested in knowing more about GM's program for crash event recorders may wish to read a recent article on that subject that was published in the Detroit News. The agency is placing a copy of that article in the docket. Also, at the agency's invitation, GM made a presentation concerning its crash event recorders at NHTSA's September 17, 1998 quarterly meeting held to answer questions from the public and the regulated industries regarding the agency's vehicle regulatory and research program. Information presented by GM at this meeting is being placed in the docket.

While NHTSA believes that crash event recorders have the potential to provide valuable information for its vehicle regulatory program, the agency believes that a rulemaking to require such recorders is not now appropriate. First, as discussed above, the industry is already moving to voluntarily provide such recorders. Second, as the development and installation of these recorders, and decisions about what data should be recorded and how they should be retrieved, are in their infancy, NHTSA believes it is premature to consider regulating such devices. Given this context, such a rulemaking would not appear to be a good use of limited agency resources.

Moreover, there are a variety of issues related to the implementation of crash event recorders that may be better addressed, at least initially, outside the rulemaking context. In addition to deciding what specific crash data to record, other issues include, among other things, possible standardization of the means for retrieving the data, access to the data by the agency and crash investigators, and privacy issues.

The agency notes that the means for retrieving data from crash event recorders is currently proprietary. This means that the involvement of the vehicle manufacturer is necessary to retrieve the data. NHTSA has not had any difficulty obtaining cooperation from vehicle manufacturers to obtain data from crash event recorders. While the retrieval of such data would be facilitated if the means for retrieving it were standardized, a number of issues may need to be addressed in order to achieve such standardization, e.g., analysis of available alternative means for retrieval and consideration of privacy and related issues.

NHTSA introduced the topic of crash event recorders (these devices are also called event data recorders or EDRs) for action to the Motor Vehicle Safety Research Advisory Committee (MVSRAC) during its April 29, 1998 meeting. MVSRAC consists of 16 members representing governments, industry, academia, the medical community and public interest groups and functions to advise NHTSA about complex technical topics. MVSRAC approved setting up a working group on EDRs under the Crashworthiness Subcommittee. The agency solicited names from the full committee and subcommittee for nomination to work on the working group. The first meeting of the working group took place in October, and others are planned for next year.

NHTSA believes that the approach of relying on the efforts of individual manufacturers to voluntarily introduce crash event recorders, coupled by the work of the MVSRAC working group on this subject, is the best way to proceed at this time. The involvement of the MVSRAC working group will ensure that issues relating to the implementation and use of crash event recorders receive the attention of a wide variety of experts, and that the agency obtains the benefit of hearing the views of those experts. Moreover, NHTSA will ensure that MVSRAC considers topics of particular interest to the agency, including access to the data by the agency.

For the reasons discussed above, the agency is denying Mr. Bingham's petition for rulemaking.

Authority: 49 U.S.C. 30162; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: November 3, 1998.

James R. Hackney,

Acting Associate Administrator for Safety Performance Standards.

BILLING CODE 4910–59–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018–AF25

Migratory Bird Hunting; Regulations to Increase Harvest of Mid-Continent Light Geese

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Mid-continent lesser snow goose and Ross' goose population

has nearly quadrupled in the last 30 years. The Western Central Flyway lesser snow and Ross' goose population also has quadrupled in the last 23 years. Collectively, these central and eastern arctic and subarctic-nesting light goose populations are referred to as Mid-continent light geese (MCLG)

Due to high population growth rates, a decline in adult mortality, and an increase in winter survival, MCLG are now seriously injurious to their habitat and habitat important to other migratory birds which poses a serious threat to the short and long-term health and status of migratory bird populations. The U.S. Fish and Wildlife Service (Service or "we") believes that MCLG populations exceed long-term sustainable levels for their arctic and subarctic breeding habitats and the populations must be reduced. This proposed rule will authorize the use of additional hunting methods (electronic callers and unplugged shotguns) during a normal open light-goose hunting season when all other migratory bird hunting seasons are closed. We designed the program to increase MCLG harvest and to provide a biologically sound and cost effective and efficient method for the reduction and management of overabundant MCLG populations.

DATES: The comment period for this proposed rule closes January 8, 1999.

ADDRESSES: Comments should be mailed to Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of Interior, ms 634—ARLSQ, 1849 C Street NW., Washington, D.C. 20240. The public may inspect comments during normal business hours in room 634—Arlington Square Building, 4401 N. Fairfax Drive, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Bob Blohm, Acting Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, (703) 358–1714.

SUPPLEMENTARY INFORMATION:

Background

Lesser snow and Ross' geese that primarily migrate through North Dakota, South Dakota, Nebraska, Kansas, Iowa, and Missouri, and winter in Arkansas, Louisiana, Mississippi, and eastern, central, and southern Texas and other Gulf Coast States are referred to as the Mid-continent population of light geese (MCP). Lesser snow and Ross' geese that primarily migrate through Montana, Wyoming, and Colorado and winter in New Mexico, northwestern Texas, and Chihuahua, Mexico are referred to as the Western Central Flyway population of light geese (WCFP). Ross' geese are often mistaken for lesser snow geese due to their similar appearance. Ross' geese occur in both the MCP and the WCFP and mix extensively with lesser snow geese on both the breeding and wintering grounds. MCP and WCFP lesser snow and Ross' geese are collectively referred to as Mid-continent light geese (MCLG) because they breed, migrate, and winter in the "Mid-continent" or central portions of North America primarily in the Central and Mississippi Flyways. They are referred to as "light" geese due to their light coloration as opposed to "dark" geese such as the white-fronted or Canada goose.

MCLG breed in the central and eastern arctic and subarctic regions of Northern Canada. MCLG populations are experiencing high population growth rates and have substantially increased in numbers within the last 30 years. MCP light geese have more than tripled within 30 years from an estimated 800,000 birds in 1969 to approximately three million birds in 1998 and have grown an average of 5% per year for the last ten years (Abraham et al. 1996, USFWS 1998b). WCFP light geese have quadrupled in 23 years from 52,000 in 1974 to 216,000 in 1997 (USFWS 1997b), and have increased an average of 9% per year for the last ten years (USFWS 1998b). The above population estimates are not true population counts and likely underestimate the true population sizes. They were derived from an index which is used to detect population growth trends by sampling a portion of a population. Breeding colony estimates, actual population counts estimated from spring and summer surveys, suggest that the actual population sizes of MCLG may be in excess of five million breeding birds (D. Caswell pers. comm. 1998). For example, in one area northwest of Hudson Bay alone, the Queen Maud Gulf, estimates for breeding and non-breeding (failed to successfully nest) adult Ross' and lesser snow geese for 1998 are 1.29 million and 1.82 million birds, respectively (Alisauskas et al. 1998). These geese are in addition to the millions of geese estimated to be nesting along west Hudson and James Bays where the geese have precipitated severe habitat degradation and on Southampton and Baffin Islands where signs of habitat degradation are becoming evident. MCLG populations have exceeded the North American Waterfowl Management Plan (NAWMP) population objective levels in both the United States and Canada. NAWMP population objective levels are used to demonstrate that MCLG populations have increased substantially over what is considered to be a healthy population level, not to suggest that MCLG be reduced to NAWMP population objective levels. Population management thresholds, however, are management thresholds that specify both an upper and lower population level objective.

Ross' geese (WCFP and MCP) currently exceed 200,000 birds (December index) and breeding colony estimates (actual counts of nesting birds) approached 400,000 birds in 1996 (Batt 1997) and exceeded 1 million birds in1998; both estimates well exceed the recommended minimum population objective level for Ross' geese of 100,000 birds (USDOI et al. 1998). MCP lesser snow geese estimates currently exceed 2.8 million birds (December index); the lower and upper population management thresholds are 800,000 and 1.2 million birds, respectively (Central and Mississippi Flyway Councils 1982) with a recommended minimum population objective level of 1 million birds (USDOI et al. 1998). WCFP lesser snow goose estimates currently exceed 200,000 birds (December index) which exceeds the recommended minimum population objective level of 110,000 birds (USDOI et al. 1998). Although our intention is to significantly reduce these populations to relieve pressures on the breeding habitats, we feel that these efforts will not threaten the long-term status of these populations as we are confident reduction efforts will not result in the populations falling below the population goal and management objective levels indicated above. Evaluation and assessment mechanisms are in place to estimate population sizes and will be used to prevent the over-harvest of these populations.

The rapid rise of MCLG populations has been influenced heavily by human activities (Sparrowe, 1998, Batt 1997). The greatest attributable factors are:

(1) The expansion of agricultural areas in the United States and prairie Canada that provide abundant food resources during migration and winter;

(2) The establishment of sanctuaries along the Flyways specifically to increase bird populations;

(3) A decline in harvest rate; and

(4) An increase in adult survival rates.

Although all of these factors contributed to the rapid rise in MCLG populations, the expansion of agriculture in prairie Canada and the United States is considered to be the primary attributable factor (Sparrowe 1998, Abraham and Jefferies 1997). Today, MCLG continue to exploit soybean, rice, and other crops during the winter primarily in the Gulf Coast States and are observed less frequently

in the natural coastal marshes they historically utilized. Similarly, MCLG migrating through the Mid-latitude and northern United States and prairie Canada during spring migration exploit cereal grain crops consisting of corn, wheat, barley, oats and rye (Alisauskas et al. 1988). For example, an estimated 1 to 2 million MCLG stage in the Rainwater Basin in Nebraska from mid-February to mid-March and primarily feed on corn left over from harvesting (USFWS 1998a). These crops provide MCLG with additional nutrients during spring migration assuring that MCLG arrive on the breeding grounds in prime condition to breed. Increased food subsidies during spring migration over the last 30 years has resulted in higher reproductive potential and breeding success (Ankney and McInnes 1978, Abraham and Jefferies 1997). Consequently, more geese survived the winter and migration and were healthier as they returned to their breeding grounds in Canada.

This is not intended to criticize the conservation efforts accomplished by the implementation of conservation-oriented agricultural practices. Such efforts have benefitted numerous wildlife species. It is merely to point out that MCLG have exploited these artificial resources which has resulted in an increase in survival.

Foraging Behavior of MCLG

The feeding behavior of MCLG is characterized by three foraging methods. Where spring thawing has occurred and above-ground plant growth has not begun, lesser snow geese dig into and break open the turf (grub) consuming the highly nutritious below-ground biomass, or roots, of plants. Grubbing continues into late spring. Lesser snow geese also engage in shoot-pulling where the geese pull the shoots of large sedges, consume the highly nutritious basal portion, and discard the rest, leaving behind large unproductive, and potentially unrecoverable areas (Abraham and Jefferies 1997). A third feeding strategy utilized by many species is grazing which in some cases, stimulates plant growth. Both lesser snow geese and Ross' geese graze. Due to their shorter bill size, Ross' geese are able to graze shorter stands of grass.

Grubbing, grazing, and shoot-pulling are natural feeding behaviors and at lower population levels have had positive effects on the ecosystem. For example, at lower numbers, geese fed on the tundra grasses and actually stimulated growth of plant communities resulting in a positive feedback loop between the geese and the vegetation. However, the rapidly expanding numbers of geese, coupled with the short tundra growing season, disrupted the balance and has resulted in severe habitat degradation in sensitive ecosystems. The Hudson Bay Lowlands salt-marsh ecosystem, for example, consists of a 1,200 mile strip of coastline along west Hudson and James Bays, Canada. It contains approximately 135,000 acres of coastal salt-marsh habitat. Vast hypersaline areas devoid of vegetation degraded by rapidly increasing populations of MCLG have been observed and documented extensively throughout the Hudson Bay Lowlands (Abraham and Jefferies 1997). Rockwell et al. (1997a) observed the decline of more than 30 avian populations in the La Pérouse Bay area due to severe habitat degradation. These declines and other ecological changes represent a decline in biological diversity and indicate the beginning of collapse of the current Hudson Bay Lowlands salt-marsh ecosystem. Much of the degraded habitat is unlikely to recover (Abraham and Jefferies 1997). In badly degraded areas, less than 20% of the vegetation within an exclosure has recovered after 15 years of protection from MCLG (Abraham and Jefferies 1997). Recovery rates of degraded areas are further slowed by the short tundra growing season and the high salinity levels in the exposed and unprotected soil.

Long-term research efforts have indicated signs of "trophic cascade" in La Pérouse Bay, Cape Henrietta Maria, and Akimiski Island (R. Rockwell pers. comm. 1998). Trophic cascade is essentially the collapse of an existing food chain indicating that the ecosystem is unable to support its inhabitants. Impacts associated with trophic cascade are indicative that MCLG populations have exceeded the carrying capacity of much of their breeding habitat. Impacts such as a decline in biological diversity and physiological stress, malnutrition, and disease in goslings have been documented and observations of such impacts are increasing. Additional observations in areas north of Hudson Bay on Southampton and Baffin Islands, northwest in the Queen Maud Gulf region, and south off the west coast of James Bay on Akimiski Island also suggest similar habitat degradation patterns from expanding colonies of MCLG. Batt (1997) reported the rapid expansion of existing colonies and the establishment of new colonies in the central and eastern arctic. In 1973, for example, Canadian Wildlife Service data indicated that approximately 400,000 light geese nested on West Baffin Island. In 1997, approximately 1.8 million breeding adults were counted. Similar colony expansions have been reported for the Queen Maud Gulf region and Southampton Island. Rapid colony expansion must be halted and the populations must be reduced to prevent further habitat degradation and to protect the remaining habitat upon which numerous wildlife species depend.

Breeding Habitat Status

MCLG breeding colonies occur over a large area encompassing eastern and central portions of Northern Canada. Habitat degradation by MCLG has been most extensively studied in specific areas where colonies have expanded exponentially and exhibit severe habitat degradation. The Hudson Bay Lowlands salt-marsh ecosystem, for example, lies within a 135,000 acre narrow strip of coastline along west Hudson and James Bays and provides important stopover sites for numerous migratory bird species. Of the 135,000 acres of habitat in the Hudson Bay Lowlands, 35% is considered to be destroyed, 30% is damaged, and 35% is overgrazed (Batt 1997). Habitats currently categorized as "damaged" or "overgrazed" are moving and will continue to move into the "destroyed" category if goose populations continue to expand. Accelerated habitat degradation has occurred on Southampton and Baffin Islands and appear to be following the same pattern as documented in the Hudson Bay Lowlands. Current research efforts are underway to confirm observations of habitat degradation by MCLG in other areas.

Migration and Wintering Habitat Conditions and Degradation

There is no evidence to suggest that wintering habitat for MCLG is threatened or that it may limit population growth. Presently, there are approximately 2.25 million acres of rice fields in Texas, Louisiana, and Arkansas, in addition to the millions of acres of cereal grain crops in the Midwest. Consequently, food availability and suitable wintering habitat are not limiting MCLG during the migration and wintering portions of the annual cycle.

Summary of Environmental Consequences of Taking No Action

At each site they occupy, MCLG will continue to degrade the plant communities until food and other resources are exhausted, forcing yet more expansion. The pattern has been, and will continue to be, that as existing nesting colonies expand, they exploit successively poorer quality habitats,

which are less able to accommodate them and which become degraded more quickly. Eventually, the coastal salt-marsh communities surrounding Hudson Bay and James Bay will become remnant with little chance of recovery as long as MCLG populations remain high and for some time after it declines from natural causes, if they do. The functioning of the whole coastal ecosystem, from consolidation of sediments by colonizing plants to provision of suitable habitats for invertebrate and vertebrate fauna, will be detrimentally and possibly irrevocably altered. Similar conditions will likely come to prevail at selected non-coastal areas where MCLG have occupied most of the suitable nesting habitats. As many as 30 other avian species, including American wigeon, Northern shoveler, stilt sandpiper, Hudsonian godwit, and others, that utilize those habitats have declined locally, presumably due to habitat degradation by MCLG. Other species, such as Southern James Bay Canada geese, a species of management concern, that breed on nearby Akimiski Island and numerous other waterfowl species that migrate and stage with MCLG, have been and will continue to be negatively impacted. Arctic mammalian herbivores will also be impacted as the vegetative communities upon which they depend become depleted.

We expect that MCLG populations will continue to grow at least 5% annually, resulting in more severe and widespread ecological impacts. Although several factors influence population dynamics, the greatest single factor in the populations' increase is high and increasing adult survival rates (Rockwell et al. 1997b). Therefore, removing adults from the populations is the most effective and efficient approach in reducing the populations. Experts feel that breaking eggs and other non-lethal techniques have been determined to be ineffective in significantly reducing the populations within a reasonable time to preserve and protect habitat (Batt 1997).

We have attempted to curb the growth of MCLG populations by increasing bag and possession limits and extending the open hunting season length for light geese to 107 days, the maximum allowed by the Migratory Bird Treaty. However, due to the rapid rise in MCLG numbers, low hunter success, and low hunter interest, harvest rate (the percentage of the population that is harvested), has declined despite evidence that the number of geese harvested has increased (USFWS 1997). The decline in harvest rate indicates that the current management strategies are not sufficient to stabilize or reduce population growth rates.

We realize that current MCLG management policies need to be re-examined and believe that alternative regulatory strategies designed to increase MCLG harvest, implemented concurrently with habitat management and other non-lethal control measures, have the potential to be effective in reducing MCLG populations to levels that the remaining breeding habitat can sustain. We prefer to implement alternative regulatory strategies designed to increase MCLG harvest afforded by the Migratory Bird Treaty and avoid the use of more drastic population control measures. More direct population control measures such as trapping and culling programs may be necessary if the current proposed action is not successful. Should the proposed action be unsuccessful in five years, we will consider more direct population control measures to reduce MCLG.

We restrict the scope of this proposed rule to Mid-continent populations of light geese (MCLG): Mid-continent and Western Central Flyway lesser snow geese *(Chen caerulescens caerulescens)* and Ross' geese *(C. rossi)* and the United States portions of the Central and Mississippi Flyways (primarily Alabama, Arkansas, Colorado, Illinois, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming) where they migrate, stage, or winter. Evidence exists to support the conclusion that MCLG migrate, stage, and winter in these areas and breed in the arctic and subarctic areas that are experiencing severe habitat degradation.

We are concurrently proposing an additional but separate population reduction strategy. In addition to this proposed rule to amend 50 CFR part 20, we are also proposing to amend 50 CFR part 21 to authorize the use of a conservation order to increase take of MCLG. The conservation order will be in the nature of an order authorizing States to implement actions to harvest MCLG, by shooting in a hunting manner, inside or outside of the regular open migratory bird hunting season frameworks when all migratory bird hunting seasons are closed. This proposal is also in the nature of a proposed rule and the notice and request for comments appears in this issue of the **Federal Register**.

We do not expect this proposed action (amendment to 50 CFR part 20) implemented alone to achieve our management objective which is to reduce MCLG populations such that the December index falls within 800,000 and 1.2 million birds. The success of this strategy will hinge upon State participation, hunter participation, and hunter effectiveness. If a State does not participate, then its hunters will not be able to participate decreasing the program's potential. We do not expect some States to participate in this proposed action due to the infeasibility of implementing the action when all other migratory bird hunting seasons are closed. MCLG migrate through northern and Mid-latitude States in the fall, however, the geese typically do not reach some of those States prior to 10 March during spring migration. For those States to be able to utilize this proposed action, they would have to close all other migratory bird hunting seasons in the fall, which is highly unlikely. Conversely, many migratory bird hunting seasons in the southern States close prior to 10 March. Therefore, it is much more feasible for southern States to implement this proposed action by establishing a light-goose only season when all other migratory bird seasons are closed. We are proposing the second action (conservation order) referred to above in order to maximize the program's potential and obtain our management objective within a reasonable time-frame to avoid the use of more direct population control programs. The second proposed action, a conservation order, will allow northern States to participate in this effort and enable them to harvest MCLG during spring migration, particularly after 10 March. Harvest projections for this proposed action (amendment to 50 CFR part 20) are rolled into the harvest projections for the second proposed action (conservation order) and are not in addition to the harvest projections for the second proposed action.

Proposed Revision to 50 CFR 20

We propose to revise 50 CFR part 20.21 with the intent to increase harvest of Mid-continent light geese during the open hunting season (MCLG) by authorizing the use of electronic callers and unplugged shotguns during a light goose only season when all other migratory bird hunting seasons are closed. This is in an effort to reduce overabundant MCLG populations that have become seriously injurious to other migratory bird populations and to habitat essential to migratory bird populations. Conditions under the proposed regulation require that participating States inform all hunters acting under the authority of the proposed amendment of the conditions that apply to the utilization of this proposed amendment.

Under the authority of this proposed rule, States could develop and initiate aggressive harvest management strategies by offering hunters additional hunting methods to harvest MCLG with the intent to increase harvest of MCLG. By operating under an existing program, a regular light-goose only season, affected States would not have to create a new program to implement the proposed action, which would significantly reduce administrative burden to the State and Federal governments. In order to minimize or avoid negative impacts to non-target species and to eliminate confusion regarding enforcement of the restrictions associated with this proposed action, States may only implement this proposed action when all other migratory bird hunting seasons are closed. Although we expect this proposed action to facilitate other protection and recovery efforts,, we do not expect this proposed action (amendment to 50 CFR part 20) implemented alone to achieve our management objective. Therefore, we are concurrently proposing an additional but separate population reduction strategy (discussed above) to work in concert with this proposed action to obtain our management objective. We feel the overall strategy will result in biologically sound and more cost-effective and efficient overabundant MCLG population management and could preclude the use of more drastic, direct population control measures such as trapping and culling programs. Although the desired goal is to significantly reduce overabundant MCLG populations, we believe that this proposed action will not threaten the long-term health and status of MCLG populations or threaten the status of other species that could be impacted through the implementation of this proposed action. Evaluation and monitoring strategies are in place to assess the overall impacts of this proposed action on MCLG harvest and impacts to non-target species that may be affected by the implementation of this proposed action.

Summary of Environmental Consequences of Proposed Action

MCLG Populations and Associated Habitats

We project that we will harvest two million MCLG over the next three years without the use of this proposed action based on current MCLG harvest trends. Under certain assumptions, our most liberal estimate indicates that we can expect to harvest an additional one million MCLG within three years of implementation of this proposed action bringing the total harvest to three million MCLG within three years of implementation of this proposed action. Once the December index falls within 800,000 to 1.2 million birds, the proposed amendments to 50 CFR part 20 will be revoked. The impact is expected to be regional within the Central and western Mississippi Flyway States. MCLG winter in the southern States in the Flyways substantially longer than northern or Mid-latitude States. Therefore, the opportunity to harvest more MCLG is greatest in those States. Additional hunting methods authorized by a State under the authority of this proposed rule, will facilitate a hunter's ability to harvest more MCLG and will facilitate other efforts to increase adult mortality and therefore decrease numbers of MCLG.

Although we can expect the additional hunting methods to be effective, there is no precedent to guide us in determining to what degree they will be effective. It is equally difficult to ascertain to what degree the public will utilize the new methods, which will influence its effectiveness. However, with certain assumptions, we may project an increase in harvest using existing harvest data.

Several assumptions must be established before projecting the effect of the proposed action on harvest. We are assuming that all affected States will act under the authority of this proposed rule and allow the additional methods authorized in this proposed action, that current MCLG hunter numbers will not decrease, and that the new hunting methods authorized in this proposed action, if used, will increase hunter effectiveness and overall harvest. We do not assume that all MCLG hunters will use the new hunting methods and of those that do, we do not assume that all will increase their effectiveness. We are assuming that 25% of the current MCLG hunters will use the new hunting methods and increase his/her effectiveness in harvesting MCLG.

We determined, based on a linear regression analysis of historical harvest data, that harvest number has increased approximately 31,600 MCLG per year for the last ten years. A simple linear regression of the harvest data represents our most conservative estimate because the analysis does not take into account other factors that influence harvest such as the recent regulation changes for light geese. A more complex analysis demonstrates that harvest number has actually increased at a faster rate since the bag and possession limits for light geese have been increased (USFWS 1998c). Today, more MCLG are harvested with fewer hunters and hunter participation and light goose hunting is increasing. Therefore, conservatively, we projected that harvest will increase 31,600 per year for the next 5 years.

In 1997–98, 602,800 MCLG were harvested in the affected States (AR, CO, IL, IA, KS, LA, MS, MO, MT, NE, NM, ND, OK, SD, TX, and WY). Combined with our projection that harvest will increase by 31,600 per year without any changes to hunting regulations, we can expect to harvest 634,400 MCLG in the 1998–1999 regular light goose season in those affected States. Under the assumptions stated above, we can expect to harvest an additional 301,300 MCLG through the implementation of this proposed action during a light-goose only season bringing the total projected harvest to 935,700 MCLG in the first year of implementation of this proposed action. These figures are based on increasing harvest number. Therefore, we expect this projected harvest to increase annually. We expect to harvest 1.1 million MCLG in the second year of implementation and 1.2 million in the third year of implementation.

Central and Mississippi Flyway Council management guidelines suggest that MCLG populations should rest between approximately 800,000 and 1.2 million birds based on the December index (USFWS 1998b, Central and Mississippi Flyway Councils 1982). Batt (1997) estimate that the populations should be reduced by 50% by 2005. Based on the December index, that would suggest a reduction from approximately three million birds to approximately 1.5 million birds in the December index; a figure which coincides with the management guidelines determined by the Central and Mississippi Flyway Council. Therefore, our efforts will focus on a goal similar to those documented. It is important to understand that the December index is not a population count. It is simply used to detect population growth trends by sampling a portion of a population. The reduction of MCLG will be carefully analyzed and assessed on an annual basis using the December index and other surveys to ensure that the populations are not over-harvested.

We expect an increase in harvest to facilitate other efforts, such as habitat management on the wintering grounds and increased harvest of MCLG by Canadian aboriginals, to decrease MCLG numbers and relieve pressures on the breeding grounds. There is no evidence

to suggest that the use of additional hunting methods during a light-goose only season will result in an over-harvest of MCLG. Once the December index reflects a number within the management guidelines mentioned above (approximately 800,000–1.2 million), the proposed action will be revoked and the methods authorized will no longer be allowed. It is improbable that the use of the additional methods will threaten the long-term status of MCLG populations because we will monitor the MCLG populations and act accordingly to avoid it by modifying or revoking the proposed action.

Other Species

An increase in harvest, and subsequently a decrease in MCLG numbers, is expected to relieve pressures on other migratory bird populations that utilize MCLG breeding and wintering grounds and other areas along the migration routes. It is expected to reduce the possibility that other species will be forced to seek habitat elsewhere or abandon unsuitable degraded habitat altogether, which could potentially result in decreased reproductive success of affected populations. We expect a decrease in MCLG populations to contribute to increased reproductive success of adversely impacted populations. Further, we expect that by decreasing the numbers of MCLG on wintering and migration stopover areas, the risk of transmitting avian cholera to other species will be reduced which will reduce the threat of a widespread avian cholera outbreak. We do not expect the proposed action to result in an increased intake of non-target species. The proposed action will only be allowed when all other migratory bird hunting seasons are closed.

Socioeconomic

Any action taken has economic consequences. Continued inaction is likely to result in ecosystem failure of the Hudson Bay Lowlands salt-marsh ecosystem and potentially other ecosystems as MCLG populations expand and exploit new habitats. Without more effective population control measures to curb the populations, the populations of MCLG are expected to continue increasing and become more and more unstable as suitable breeding habitat diminishes. As population densities increase, the incidence of avian cholera among MCLG and other species is likely to increase throughout the Flyways, particularly at migration stopover sites. Losses of other species such as pintails, white-fronted geese, sandhill cranes, and whooping cranes, from avian cholera may be great. This may result in reduced hunting, birdwatching, and other opportunities. It may also result in the season closures of adversely impacted migratory game birds such as white-fronted geese, sandhill cranes, and pintails. Goose damage to winter wheat and other agricultural crops will continue and worsen. Habitat damage in the Arctic will eventually trigger density-dependent regulation of the population which likely will result in increased gosling mortality and may cause the population to decline precipitously. However, it is not clear when such population regulation will occur and what habitat, if any, will remain to support the survivors. Such a decline may result in a population too low to permit any hunting, effectively closing MCLG hunting seasons. The length of the closures will largely depend on the recovery rate of the breeding habitat which likely will take decades. Although the overall impact of closures of light-goose seasons in the Central and Mississippi Flyways that could result from continued degradation of the breeding habitat is small on a national scale, it would be concentrated where large flocks of geese stage and winter. As hunter services tend to be performed by people with low incomes, the impact of a closure would fall disproportionately on low income groups near goose concentrations. We expect the proposed action to reduce the risk of light-goose season closures in the Central and Mississippi Flyways and avoid a $70 million loss in output and reduce the possibility of increased agricultural loss. We expect special MCLG population control efforts to create additional take opportunities which is expected to add $18 million in output to local economies.

Public Comment Received

On April 6, 1998, we issued in the **Federal Register** (63 FR 16819) a notice of intent announcing that we would develop a draft Environmental Assessment to examine alternative regulatory strategies to reduce MCLG populations. This notice invited public comment on possible regulatory alternatives. The notice also advised the public that the draft Environmental Assessment along with a proposed rule would be published in the **Federal Register** later this year for public review and comment.

As a result of this invitation for public comment, 247 comments consisting of 1 from a Federal agency, 8 from State wildlife agencies, 7 from private organizations, 1 from a Flyway Council, 115 from private citizens, and 115 from people who signed a petition were received. Comments were generally dichotomized by two key points of concern.

To summarize, 186 comments were supportive of our intent to examine alternative regulatory strategies designed to increase MCLG harvest to reduce the MCLG population. These commenters agreed that there was a problem and that the resolution should entail reduction by lethal means and supported the use of additional hunting methods to increase harvest of MCLG. Comments in support of such action were received from 1 Federal agency, 8 State wildlife agencies, 1 Flyway Council, 5 private conservation agencies, 94 private citizens, and 77 from people who signed a petition. Conversely, 59 comments received were in opposition to the Service's intent to reduce MCLG populations by use of lethal means either because they believe it is not scientifically justified to reduce the populations or attempts to do so would be inhumane. Instead, these commenters offered two non-lethal recommendations to reduce the populations: (1) Hazing adults off nests and (2) egging (destroying nests) on the breeding grounds. Comments in support of no action or non-lethal action were received from 2 private animal welfare agencies, 19 private citizens, and 38 from people who signed a petition. Additionally, 2 comments were received in support of reducing the populations by use of lethal means, however, recommended use of Federal and State wildlife agency programs such as trapping and culling.

Service Response: We are also opposed to the inhumane treatment of any birds and we do not believe that authorizing additional hunting methods or by providing additional opportunities to increase harvest of MCLG is inhumane. We also prefer non-lethal control activities, such as habitat modification, as the first means of resolving this issue. However, habitat modification and other harassment tactics do not always work satisfactorily and lethal methods are sometimes necessary to increase the effectiveness of non-lethal management methods. Further, MCLG breed in remote locations in the arctic and subarctic regions of Northern Canada. Implementing control activities in those areas is cost-prohibitive and dangerous. Instead, we feel that providing States with additional opportunity and means to increase MCLG harvest while implementing non-lethal control measures concurrently is the most efficient and feasible short-term solution. We will continue to work jointly with the Canadian Wildlife Service to reduce MCLG in both the United States and in Canada.

NEPA Considerations

We have prepared a draft Environmental Assessment (EA), as defined under the authority of the National Environmental Policy Act of 1969, in connection with this proposed regulation. The EA is available for public review at the above address.

Endangered Species Act Consideration

Section 7(a)(2) of the Endangered Species Act (ESA), as amended (16 U.S.C. 1531–1543; 87 Stat. 884) provides that " Each Federal agency shall, in consultation with the Secretary, insure that any action authorized, funded, or carried out * * * is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of (critical) habitat * * *" Consequently, we initiated Section 7 consultation under the ESA for this proposed rulemaking. Completed results of our consultation under Section 7 of the ESA may be inspected by the public in, and will be available to the public from, the Office of Migratory Bird Management at the above address.

Regulatory Flexibility Act, Executive Order 12866, and Executive Order 12630

The economic impacts of this proposed rulemaking will fall disproportionately on small businesses because of the structure of the waterfowl hunting related industries. The proposed regulation benefits small businesses by avoiding ecosystem failure to an ecosystem that produces migratory bird resources important to American citizens. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities. Data are not available to estimate the number of small entities affected, but it is unlikely to be a substantial number on a national scale. We expect the proposed action to reduce the risk of light-goose season closures in the Central and Mississippi Flyways subsequently avoiding a $70 million loss in output and reducing the possibility of increased agricultural loss. We expect special MCLG population control efforts to create additional take opportunities which is expected to add $18 million in output to local economies. We have determined that a Regulatory Flexibility Act Analysis is not required. Migratory bird regulations are recognized as exempt from takings implication assessment under E.O. 12630. This rule was not subject to review by the Office of Management and Budget under E.O. 12866.

Paperwork Reduction Act and Information Collection

This regulation does not require any additional information collection under the Paperwork Reduction Act. The information collection is covered by an existing Office of Management and Budget approval number. The information collections contained in § 20.20 have been approved by OMB under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1018–0015 for the administration of the Migratory Bird Harvest Information Survey (50 CFR 20.20). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Unfunded Mandates

We have determined and certify, in compliance with the requirements of the Unfunded Mandates Act (2 U.S.C. 1502 *et seq.*) that this proposed rulemaking will not impose a cost of $100 million or more in any given year on local or State government or private entities. This rule will not "significantly or uniquely" affect small governments. No governments below the State level will be affected by this rule. A Small Government Agency Plan is not required. This rule will not produce a Federal mandate of $100 million or

greater in any year, i.e., it is not a "significant regulatory action" under the Unfunded Mandates Reform Act.

Civil Justice Reform—Executive Order 12988

The Department, in promulgating this proposed rule, has determined that these regulations meet the applicable standards provided in sections 3(a) and 3(b)(2) of Executive Order 12988. This rule has been reviewed by the Office of the Solicitor. Specifically, this rule has been reviewed to eliminate errors and ambiguity, has been written to minimize litigation, provides a clear legal standard for affected conduct, and specifies in clear language the effect on existing Federal law or regulation. It is not anticipated that this rule will require any additional involvement of the justice system beyond enforcement of provisions of the Migratory Bird Treaty Act of 1918 that have already been implemented through previous rulemakings.

Public Comment Invited

The policy of the Department of the Interior is, whenever practical, to afford you the opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding this proposal to the location identified in the address section above. Comments must be received on or before (Insert 60 days from the date of publication of this notice). Following review and consideration of the comments, we intend to issue a final rule.

Executive Order 12866 requires each agency to write regulations that are easy to understand. We invite your comments on how to make this rule easier to understand including answers to questions such as the following: (1) Are the requirements in the rule clearly stated? (2) Does the rule contain technical language or jargon that interferes with its clarity? (3) Does the format of the rule (grouping and order of sections, use of headings, paragraphing, etc.) aid in or reduce its clarity? (4) Would the rule be easier to understand if it were divided into more (but shorter) sections? (A "section" appears in bold type and is preceded by the symbol "§ " (50 CFR 21.60) (5) Is the description of the rule in the SUPPLEMENTARY INFORMATION section of the preamble helpful in understanding the rule? What else could we do to make the rule easier to understand?

Send a copy of any comments that concern how we could make this rule easier to understand to " Office of Regulatory Affairs, Department of the Interior, room 7229, 1849 C Street, NW, Washington, DC 20240. You may also e-mail the comments to this address: Exsec@ios.doi.gov.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

For the reasons given in the preamble, we hereby propose to amend part 20 of subchapter B, chapter I, title 50 of the Code of Federal Regulations, as set forth below:

The authority citation for part 20 continues to read as follows:

Authority: 16 U.S.C 703–712; and 16 U.S.C. 742 a–j.

PART 20—[AMENDED]

§ 20.21 [Amended]

1. Revise paragraphs (b) and (g) of § 20.21 *Hunting methods* to read as follows:

* * * * *

(b) With a shotgun of any description capable of holding more than three shells, unless it is plugged with a one-piece filler, incapable of removal without disassembling the gun, so its total capacity does not exceed three shells. *Provided that* during a light-goose only season when all other migratory bird hunting seasons are closed, nothing in this paragraph (b) prohibits the taking of lesser snow and Ross' geese in Alabama, Arkansas, Colorado, Illinois, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas and Wyoming with a shotgun that is capable of holding more than three shells. This exception is subject to an annual assessment by the Service based on harvest data collected from the previous year to determine the effectiveness of this section in meeting the management goals and objectives associated with the reduction of Mid-continent light goose (lesser snow and Ross' geese) populations. The Service will annually publish the determination of that assessment in the **Federal Register**.

* * * * *

(g) By the use or aid of recorded or electrically amplified bird calls or sounds, or recorded or electrically amplified imitations of bird calls or sounds. *Provided that* during a light goose only season when all other migratory bird hunting seasons are closed, nothing in this paragraph (g) prohibits the taking of lesser snow and Ross' geese in Alabama, Arkansas, Colorado, Illinois, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, Texas, South Dakota, and Wyoming with recorded or electrically amplified bird calls or sounds or recorded or electrically amplified imitations of bird calls or sounds. This exception is subject to an annual assessment by the Service based on harvest data collected from the previous year to determine the effectiveness of this regulation in meeting the management goals and objectives associated with the reduction of Mid-continent light goose (Mid-continent lesser snow and Ross' geese) populations. The Service will annually publish the determination of that assessment in the **Federal Register**.

* * * * *

Dated: October 30, 1998.

Donald J. Barry,

Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 98–29953 Filed 11–5–98; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 20 and 21

RIN 1018–AF05

Migratory Bird Permits; Establishment of a Conservation Order for the Reduction of Mid-Continent Light Goose Populations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Mid-continent lesser snow goose and Ross' goose population has nearly quadrupled in the last 30 years. The Western Central Flyway lesser snow and Ross' goose population also has quadrupled in the last 23 years. Collectively, these central and eastern arctic and subarctic-nesting light goose populations are referred to as Mid-continent light geese (MCLG)

Due to high population growth rates, a decline in adult mortality, and an increase in winter survival, MCLG are now seriously injurious to their habitat and habitat important to other migratory birds which poses a serious threat to the short and long-term health and status of migratory bird populations. The U.S. Fish and Wildlife Service (Service or "we") believes that MCLG populations exceed long-term sustainable levels for their arctic and subarctic breeding habitats and the populations must be reduced. This proposed rule proposes the addition of a new subpart to 50 CFR part 21 for the management of overabundant MCLG populations. We, in cooperation with State wildlife agencies, are further proposing to implement a population control program by establishing a conservation order for MCLG under the authority of the proposed subpart. This proposed rule will increase the use and availability of additional hunting methods and will authorize take of MCLG outside of the normal open light-goose hunting season. We designed the program to increase MCLG harvest and to provide a biologically sound and cost effective and efficient method for the reduction and management of overabundant MCLG populations.

DATES: The comment period for this proposed rule closes January 8, 1999.

ADDRESSES: Comments should be mailed to Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of Interior, ms 634—ARLSQ, 1849 C Street NW, Washington, D.C. 20240. The public may inspect comments during normal business hours in room 634—Arlington Square Building, 4401 N. Fairfax Drive, Arlington, Virginia. Comments and suggestions on the requirements should be sent directly to the Office of Information and Regulatory Affairs; Office of Management and Budget; Attention: Interior Desk Officer, Washington, DC 20503; and a copy of the comments should be sent to the Information Collection Clearance Officer, U.S. Fish and Wildlife Service, ms 224—ARLSQ, 1849 C Street NW, Washington DC 20204.

FOR FURTHER INFORMATION CONTACT: Bob Blohm, Acting Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, (703) 358–1714.

SUPPLEMENTARY INFORMATION:

Background

Lesser snow and Ross' geese that primarily migrate through North Dakota, South Dakota, Nebraska, Kansas, Iowa, and Missouri, and winter in Arkansas, Louisiana, Mississippi, and eastern, central, and southern Texas and other Gulf Coast States are referred to as the Mid-continent population of light geese (MCP). Lesser snow and Ross' geese that primarily migrate through Montana, Wyoming, and Colorado and winter in New Mexico, northwestern Texas, and Chihuahua, Mexico are referred to as the Western Central Flyway population of light geese (WCFP). Ross' geese are often mistaken for lesser snow geese due to their similar appearance. Ross' geese occur in both the MCP and the WCFP and mix extensively with lesser snow geese on both the breeding and wintering grounds. MCP and WCFP lesser snow and Ross' geese are collectively referred to as Mid-continent light geese (MCLG) because they breed, migrate, and winter in the "Mid-continent" or central portions of North America primarily in the Central and Mississippi Flyways. They are referred to as "light" geese due to their light coloration as opposed to "dark" geese such as the white-fronted or Canada goose.

MCLG breed in the central and eastern arctic and subarctic regions of Northern Canada. MCLG populations are experiencing high population growth rates and have substantially increased in numbers within the last 30 years. MCP light geese have more than tripled within 30 years from an estimated 800,000 birds in 1969 to approximately three million birds in 1998 and have grown an average of 5% per year for the last ten years (Abraham et al. 1996, USFWS 1998b). WCFP light geese have quadrupled in 23 years from 52,000 in 1974 to 216,000 in 1997 (USFWS 1997b), and have increased an average of 9% per year for the last ten years (USFWS 1998b). The above population estimates are not true population counts and likely underestimate the true population sizes. They were derived from an index which is used to detect population growth trends by sampling a portion of a population. Breeding colony estimates, actual population counts estimated from spring and summer surveys, suggest that the actual population sizes of MCLG may be in excess of five million breeding birds (D. Caswell pers. comm. 1998). In an area northwest of Hudson Bay alone, the Queen Maud Gulf, estimates for breeding and non-breeding (failed to successfully nest) adult Ross' and lesser snow geese for 1998 are 1.29 million and 1.82 million birds, respectively (Alisauskas et al. 1998). These geese are in addition to the millions of geese estimated to be nesting along west Hudson and James Bays where the geese have precipitated severe habitat degradation and on Southampton and Baffin Islands where signs of habitat degradation are becoming evident. MCLG populations have exceeded the North American Waterfowl Management Plan (NAWMP) population objective levels in both the United States and Canada. NAWMP population objective levels are used to demonstrate that MCLG populations have increased substantially over what is considered to be a healthy population level, not to suggest that MCLG be reduced to NAWMP population objective levels. Population management thresholds, however, are management thresholds that specify both an upper and lower population level objective.

Ross' goose estimates (WCFP and MCP) currently exceed 200,000 birds (December index) and breeding colony estimates (actual counts of nesting birds) approached 400,000 birds in 1996 (Batt 1997), and exceeded 1 million birds 1998; both estimates well exceed the recommended minimum population objective level for Ross' geese of 100,000 birds (USDOI et al. 1998d). MCP lesser snow geese estimates currently exceed 2.9 million birds (December index); the lower and upper population management thresholds are 800,000 and 1.2 million birds, respectively (Central and Mississippi Flyway Councils 1982) with a recommended minimum population objective level of 1 million birds (USDOI et al. 1998d). WCFP lesser snow goose estimates currently exceed 200,000 birds (December index) which exceeds the recommended minimum population objective level of 110,000 birds (USDOI et al. 1998d). Although our intention is to significantly reduce these populations to relieve pressures on the breeding habitats, we feel that these efforts will not threaten the long-term status of these populations as we are confident reduction efforts will not result in the populations falling below the population goal and management objective levels indicated above. Evaluation and assessment mechanisms are in place to estimate population sizes and will be used to prevent the over-harvest of these populations.

The rapid rise of MCLG populations has been influenced heavily by human activities (Sparrowe, 1998, Batt 1997). The greatest attributable factors are:

(1) The expansion of agricultural areas in the United States and prairie Canada that provide abundant food resources during migration and winter;

(2) The establishment of sanctuaries along the Flyways specifically to increase bird populations;

(3) A decline in harvest rate; and

(4) An increase in adult survival rates.

Although all of these factors contributed to the rapid rise in MCLG populations, the expansion of agriculture in prairie Canada and the United States is considered to be the primary attributable factor (Sparrowe 1998, Abraham and Jefferies 1997). Today, MCLG continue to exploit soybean, rice, and other crops during the winter primarily in the Gulf Coast States and are observed less frequently in the natural coastal marshes they historically utilized. Similarly, MCLG migrating through the Mid-latitude and northern United States and prairie

Canada during spring migration exploit cereal grain crops consisting of corn, wheat, barley, oats and rye (Alisauskas et al. 1988). For example, an estimated 1 to 2 million MCLG stage in the Rainwater Basin in Nebraska from mid-February to mid-March and primarily feed on corn left over from harvesting (USFWS 1998a). These crops provide MCLG with additional nutrients during spring migration assuring that MCLG arrive on the breeding grounds in prime condition to breed. Increased food subsidies during spring migration over the last 30 years has resulted in higher reproductive potential and breeding success (Ankney and McInnes 1978, Abraham and Jefferies 1997). Consequently, more geese survived the winter and migration and were healthier as they returned to their breeding grounds in Canada.

This is not intended to criticize the conservation efforts accomplished by the implementation of conservation-oriented agricultural practices. Such efforts have benefitted numerous wildlife species. It is merely to point out that MCLG have exploited these artificial resources which has resulted in an increase in survival.

Foraging Behavior of MCLG

The feeding behavior of MCLG is characterized by three foraging methods. Where spring thawing has occurred and above-ground plant growth has not begun, lesser snow geese dig into and break open the turf (grub) consuming the highly nutritious below-ground biomass, or roots, of plants. Grubbing continues into late spring. Lesser snow geese also engage in shoot-pulling where the geese pull the shoots of large sedges, consume the highly nutritious basal portion, and discard the rest, leaving behind large unproductive, and potentially unrecoverable areas (Abraham and Jefferies 1997). A third feeding strategy utilized by many species is grazing which in some cases, stimulates plant growth. Both lesser snow geese and Ross' geese graze. Due to their shorter bill size, Ross' geese are able to graze shorter stands of grass.

Grubbing, grazing, and shoot-pulling are natural feeding behaviors and at lower population levels have had positive effects on the ecosystem. For example, at lower numbers, geese fed on the tundra grasses and actually stimulated growth of plant communities resulting in a positive feedback loop between the geese and the vegetation. However, the rapidly expanding numbers of geese, coupled with the short tundra growing season, disrupted the balance and has resulted in severe habitat degradation in sensitive ecosystems. The Hudson Bay Lowlands salt-marsh ecosystem, for example, consists of a 1,200 mile strip of coastline along west Hudson and James Bays, Canada. It contains approximately 135,000 acres of coastal salt-marsh habitat. Vast hypersaline areas devoid of vegetation degraded by rapidly increasing populations of MCLG have been observed and documented extensively throughout the Hudson Bay Lowlands (Abraham and Jefferies 1997). Rockwell et al. (1997a) observed the decline of more than 30 avian populations in the La Pérouse Bay area due to severe habitat degradation. These declines and other ecological changes represent a decline in biological diversity and indicate the beginning of collapse of the current Hudson Bay Lowlands salt-marsh ecosystem. Experts fear that some badly degraded habitat will not recover (Abraham and Jefferies 1997). For example, in a badly degraded area, less than 20% of the vegetation within an exclosure (fenced in area where geese cannot feed) has recovered after 15 years of protection from MCLG (Abraham and Jefferies 1997). Recovery rates of degraded areas are further slowed by the short tundra growing season and the high salinity levels in the exposed and unprotected soil.

Long-term research efforts have indicated signs of "trophic cascade" in La Pérouse Bay, Cape Henrietta Maria, and Akimiski Island (R. Rockwell pers. comm. 1998). Trophic cascade is essentially the collapse of an existing food chain indicating that the ecosystem is unable to support its inhabitants. Impacts associated with trophic cascade are indicative that MCLG populations have exceeded the carrying capacity of much of their breeding habitat. Impacts such as a decline in biological diversity and physiological stress, malnutrition, and disease in goslings have been documented and observations of such impacts are increasing. Additional observations in areas north of Hudson Bay on Southampton and Baffin Islands, northwest in the Queen Maud Gulf region, and south off the west coast of James Bay on Akimiski Island also suggest similar habitat degradation patterns from expanding colonies of MCLG. Batt (1997) reported the rapid expansion of existing colonies and the establishment of new colonies in the central and eastern arctic. In 1973, for example, Canadian Wildlife Service data indicated that approximately 400,000 light geese nested on West Baffin Island. In 1997, approximately 1.8 million breeding adults were counted. Similar colony expansions have been reported for the Queen Maud Gulf region and Southampton Island. Rapid colony expansion must be halted and the populations must be reduced to prevent further habitat degradation and to protect the remaining habitat upon which numerous wildlife species depend.

Breeding Habitat Status

MCLG breeding colonies occur over a large area encompassing eastern and central portions of Northern Canada. Habitat degradation by MCLG has been most extensively studied in specific areas where colonies have expanded exponentially and exhibit severe habitat degradation. The Hudson Bay Lowlands salt-marsh ecosystem, for example, lies within a 135,000 acre narrow strip of coastline along west Hudson and James Bays and provides important stopover sites for numerous migratory bird species. Of the 135,000 acres of habitat in the Hudson Bay Lowlands, 35% is considered to be destroyed, 30% is damaged, and 35% is overgrazed (Batt 1997). Habitats currently categorized as "damaged" or "overgrazed" are moving and will continue to move into the "destroyed" category if goose populations continue to expand. Accelerated habitat degradation has been observed on Southampton and Baffin Islands and appear to be following the same pattern as documented in the Hudson Bay Lowlands. Current research efforts are underway to confirm observations of habitat degradation by MCLG in other areas.

Migration and Wintering Habitat Conditions and Degradation

There is no evidence to support that wintering habitat for MCLG is threatened or that it may limit population growth. Presently, there are approximately 2.25 million acres of rice fields in Texas, Louisiana, and Arkansas, in addition to the millions of acres of cereal grain crops in the Midwest. Consequently, food availability and suitable wintering habitat are not limiting MCLG during the migration and wintering portions of the annual cycle.

Summary of Environmental Consequences of Taking No Action

At each site they occupy, MCLG will continue to degrade the plant communities until food and other resources are exhausted, forcing yet more expansion. The pattern has been, and will continue to be, that as existing nesting colonies expand, they exploit successively poorer quality habitats, which are less able to accommodate them and which become degraded more quickly. Eventually, the coastal salt-marsh communities surrounding Hudson Bay and James Bay will become remnant with little chance of recovery as long as MCLG populations remain high and for some time after it declines from natural causes, if they do. The functioning of the whole coastal ecosystem, from consolidation of sediments by colonizing plants to provision of suitable habitats for invertebrate and vertebrate fauna, will be detrimentally and possibly irrevocably altered. Similar conditions will likely come to prevail at selected non-coastal areas where MCLG have occupied most of the suitable nesting habitats. As many as 30 other avian species, including American wigeon, Northern shoveler, stilt sandpiper, Hudsonian godwit, and others, that utilize those habitats have declined locally, presumably due to habitat degradation by MCLG. Other species, such as Southern James Bay Canada geese, a species of management concern, that breed on nearby Akimiski Island and numerous other waterfowl species that migrate and stage with MCLG, have been and will continue to be negatively impacted. Arctic mammalian herbivores will also be impacted as the vegetative communities upon which they depend become depleted. Due to the rapidly expanding populations and the associated ecological impacts identified, we have concluded that MCLG populations have become seriously injurious to themselves and other migratory birds, their habitat and habitat of other migratory birds.

We expect that MCLG populations will continue to grow at least 5% annually, resulting in more severe and widespread ecological impacts. Although several factors influence population dynamics, the greatest single factor in the populations' increase is high and increasing adult survival rates (Rockwell et al. 1997b). Therefore, removing adults from the populations is the most effective and efficient approach in reducing the populations. Experts feel that breaking eggs and other non-lethal techniques have been determined to be ineffective in significantly reducing the populations within a reasonable time to preserve and protect habitat (Batt 1997).

We have attempted to curb the growth of MCLG populations by increasing bag and possession limits and extending the open hunting season length for light geese to 107 days, the maximum allowed by the Treaty. However, due to the rapid rise in MCLG numbers, low hunter success, and low hunter interest, harvest rate (the percentage of the population that is harvested), has declined despite evidence that the number of geese harvested has increased (USFWS 1997b). The decline in harvest rate indicates that the current management strategies are not sufficient to stabilize or reduce population growth rates.

We realize that current MCLG management policies need to be re-examined and believe that alternative regulatory strategies designed to increase MCLG harvest, implemented concurrently with habitat management and other non-lethal control measures, have the potential to be effective in reducing MCLG populations to levels that the remaining breeding habitat can sustain. We prefer to implement alternative regulatory strategies designed to increase MCLG harvest afforded by the Migratory Bird Treaty and avoid the use of more drastic population control measures. More direct population control measures such as trapping and culling programs may be necessary if the current proposed action is not successful. Should the proposed action be unsuccessful in five years, we will consider more direct population control measures to reduce MCLG.

We restrict the scope of this proposed rule to Mid-continent populations of light geese (MCLG): Mid-continent and Western Central Flyway lesser snow geese (*Chen caerulescens caerulescens*) and Ross' geese (*C. rossi*) and the United States portions of the Central and Mississippi Flyways (primarily Alabama, Arkansas, Colorado, Illinois, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming) where they migrate, stage, or winter. Evidence exists to support the conclusion that MCLG migrate, stage, and winter in these areas and breed in the arctic and subarctic areas that are experiencing severe habitat degradation.

We are concurrently proposing an additional but separate population reduction strategy. In addition to this proposed rule to amend 50 CFR part 21, we are also proposing to amend 50 CFR part 20 to authorize the use of new hunting methods to harvest MCLG. That proposed rule would authorize States to allow the use of new hunting methods to harvest MCLG during a light-goose only season when all other migratory bird hunting seasons are closed. The proposal is also in the nature of a proposed rule and the notice and request for comments is published in this issue of the **Federal Register**.

We do not expect the second proposed action (amendment to 50 CFR part 20) implemented alone to achieve our overall management objective which is to reduce MCLG populations such that the December index falls within 800,000 and 1.2 million birds. The success of that strategy will hinge upon State participation, hunter participation, and hunter effectiveness. If a State does not participate, then its hunters will not be able to participate, decreasing the program's potential. We do not expect some States to participate in that proposed action due to the infeasibility of implementing the action when all other migratory bird hunting seasons are closed. MCLG migrate through northern and Mid-latitude States in the fall, however, the geese typically do not reach some of those States prior to 10 March during spring migration. For those States to be able to utilize the second proposed action, they would have to close all other migratory bird hunting seasons in the fall, which is highly unlikely. Conversely, many migratory bird hunting seasons in the southern States close prior to 10 March. Therefore, it is much more feasible for southern States to implement that proposed action by establishing a light-goose only season when all other migratory bird seasons are closed. We are proposing this proposed action (conservation order) in order to maximize the overall program's potential and obtain our management objective within a reasonable time-frame to avoid the use of more direct population control programs. This proposed action, conservation order, will allow northern States to participate in this effort and enable them to harvest MCLG during spring migration, particularly after 10 March. Harvest projections for the second proposed action (amendment 50 CFR part 20) are rolled into the harvest projections for this proposed action (conservation order). Harvest projections for the second proposed action would not be in addition to the harvest projections for this proposed action.

Proposed Conservation Order for MCLG

We propose to establish a new subpart in 50 CFR part 21 for the management of overabundant MCLG populations. Under this new subpart, we propose to establish a conservation order specifically for the control and management of MCLG. Conditions under the conservation order require that participating States inform all participants acting under the authority of the conservation order of the conditions that apply to the proposed amendment.

Under the authority of this proposed rule, States could initiate aggressive

harvest management strategies with the intent to increase MCLG harvest without having to obtain an individual permit, which will significantly reduce administrative burden to the State and Federal governments. A permit process would slow efforts to reduce the populations and prolong habitat degradation on the breeding grounds. This proposed rule will enable States to use hunters to harvest MCLG, by shooting in a hunting manner, inside or outside of the regular open migratory bird hunting season frameworks. States could maximize the opportunity to increase harvest of MCLG by implementing this proposed action beyond 10 March, where historically States have been limited by hunting season framework closing dates to take migratory birds. In order to minimize or avoid take of non-target species; States may implement this proposed action only when all migratory bird hunting seasons are closed. It is expected that this proposed action will facilitate other protection and recovery efforts. This proposed rule would further result in biologically sound and more cost-effective and efficient overabundant MCLG management and could preclude the use of more drastic, direct population control measures such as trapping and culling programs. Although the desired goal is to significantly reduce overabundant MCLG populations, we believe that this proposed rule will not threaten the long-term status of MCLG populations or threaten the status of other species that could be impacted through the implementation of this proposed rule. Evaluation and monitoring strategies are in place to assess the overall impacts of this proposed action on MCLG harvest and impacts to non-target species that may be affected by the implementation of this proposed action.

Summary of Environmental Consequences of Proposed Action

MCLG Populations and Associated Habitats

We project that we will harvest two million MCLG within three years without the use of this proposed action based on current MCLG harvest trends. Under certain assumptions, our most liberal estimate projects that we can expect to harvest an additional three million MCLG within three years of implementation of this proposed action bringing the total harvest to five million MCLG within three years of implementation of this proposed action. Once the December index falls within recommended management guidelines (800,000 to 1.2 million birds), then the proposed amendment to 50 CFR part 21 will be revoked.

The impact is expected to be regional within the Central and western Mississippi Flyway States that choose to utilize the proposed action. Since the proposed action may take place between 11 March and 31 August, we expect MCLG take to increase among Mid-latitude and northern States according to migration chronology. Increased harvest will be further facilitated by the use of additional hunting methods (electronic callers and unplugged shotguns) authorized by a State under the authority of this proposed rule. Although we can expect the additional hunting methods to be effective in increasing harvest per hunter, there is no precedent to guide us in determining to what degree they will be effective. It is equally difficult to ascertain to what degree the public will participate in the implementation of this proposed action, which will influence its effectiveness. However, with certain assumptions, we may project an increase in harvest using existing harvest data.

Several assumptions must be established before projecting the effect of the proposed action on harvest. We are assuming that all affected States will act under the authority of this proposed action and will allow all new hunting methods authorized in this proposed rule (electronic callers and unplugged shotguns), including the utilization of the maximum number of days available after the regular light-goose season. We are also assuming that current MCLG hunter numbers will not decrease and that the new methods authorized in this proposed rule, if used, will increase hunter effectiveness and overall harvest. We do not assume that all MCLG hunters will participate in the implementation of this proposed action and of those that do, we do not assume that all will increase their effectiveness by using new hunting methods. We are assuming that 25% of the MCLG hunters will use the new methods and will increase his/her effectiveness in harvesting MCLG.

States that have MCLG after 10 March may choose not to harvest MCLG after 10 March. Of those that do, the number of days each State may harvest outside of their regular open light-goose season likely will vary. For purposes of this exercise, we are assuming MCLG harvest is consistent throughout the entire light-goose season and that all affected States will use the proposed action. It is important to note that the issue of just how additional days influences harvest of migratory birds continues to be extensively analyzed. In that respect, our projections regarding MCLG harvest are our best estimates based on the data that we have and represent a liberal estimate.

We determined, based on a linear regression analysis of historical harvest data, that harvest number of MCLG has increased approximately 31,600 MCLG per year for the last ten years. A simple linear regression of the harvest data represents our most conservative estimate because the analysis does not take into account other factors that may have influenced harvest such as the recent regulation changes for light geese. A more complex analysis will demonstrate that harvest number has actually increased at a faster rate since the bag and possession limits for light geese have been increased (USFWS 1998c). Today, more MCLG are harvested with fewer hunters and hunter participation in light goose hunting is increasing. Therefore, conservatively, we projected that harvest will increase 31,600 per year for the next 5 years.

In 1997–98, 602,800 MCLG were harvested in the affected States (AR, CO, IL, IA, KS, LA, MS, MO, MT, NE, NM, ND, OK, SD, TX, and WY). Combined with our projection that harvest will increase by 31,600 per year without any changes to hunting regulations, we can expect to harvest 634,400 MCLG in the 1998–1999 regular light goose season in those affected States. Under the assumptions stated above, we expect to harvest an additional 576,300 MCLG through the implementation of this proposed action (authorize electronic callers, unplugged shotguns, and additional days to harvest) bringing the total projected harvest to 1.2 million MCLG in the first year of implementation of this proposed action. These figures are based on increasing harvest number. Therefore, we expect this projected harvest to increase annually. We expect to harvest 1.8 million MCLG in the second year of implementation and 2.4 million in the third year of implementation.

Central and Mississippi Flyway Council management guidelines suggest that MCLG populations should rest between 800,000 and 1.2 million birds based on the December index (USFWS 1998b, Central and Mississippi Flyway Councils 1982). Batt (1997) estimate that the populations should be reduced by 50% by 2005. Based on the December index, that would suggest a reduction from approximately 3 million birds to approximately 1.5 million birds in the December index; a figure which coincides with the management guidelines determined by the Central and Mississippi Flyway Council. Therefore, our efforts will focus on a goal similar to those documented. It is important to understand that the December index is not a population count. It is simply used to detect population growth trends by sampling a portion of a population. The reduction of MCLG will be carefully analyzed and assessed on an annual basis using the December index and other surveys to ensure that the populations are not over-harvested.

We expect an increase in MCLG harvest to facilitate other efforts, such as habitat management on the wintering grounds and increased harvest by Canadian aboriginals, to decrease MCLG numbers and relieve pressures on the breeding grounds. There is no evidence to suggest that the implementation of this proposed action will result in an over-harvest of MCLG. Once the December index reflects a number within the management guidelines mentioned above (800,000—1.2 million), the proposed action will be revoked and the methods authorized will no longer be used. It is improbable that the implementation of this proposed action will threaten the long-term status of MCLG populations because we will monitor the MCLG populations and act accordingly to avoid it by modifying or revoking the proposed action.

Other Species

An increase in harvest, and subsequently a decrease in MCLG numbers, is expected to relieve pressures on other migratory bird populations that utilize MCLG breeding and wintering grounds and other areas along the migration routes. It is expected to reduce the possibility that other species will be forced to seek habitat elsewhere or abandon unsuitable degraded habitat altogether, which could potentially result in decreased reproductive success of affected populations. We expect a significant decrease in MCLG populations to contribute to increased reproductive success of adversely impacted populations. Further, we expect that by decreasing the numbers of MCLG on wintering and migration stopover areas, the risk of transmitting avian cholera to other species will be reduced which will reduce the threat of a widespread avian cholera outbreak.

Socio-economic

Any action taken has economic consequences. Continued inaction is likely to result in ecosystem failure of the Hudson Bay Lowlands salt-marsh ecosystem and potentially other ecosystems as MCLG populations expand and exploit new habitats. Without more effective population control measures to curb the populations, the populations of MCLG are expected to continue increasing and become more and more unstable as suitable breeding habitat diminishes. As population densities increase, the incidence of avian cholera among MCLG and other species is likely to increase throughout the Flyways, particularly at migration stopover sites. Losses of other species such as pintails, white-fronted geese, sandhill cranes, and whooping cranes, from avian cholera may be great. This may result in reduced hunting, birdwatching, and other opportunities. It may also result in the season closures of adversely impacted migratory game birds such as white-fronted geese, sandhill cranes, and pintails. Goose damage to winter wheat and other agricultural crops will continue and worsen. Habitat damage in the Arctic will eventually trigger density-dependent regulation of the population which likely will result in increased gosling mortality and may cause the population to decline precipitously.

However, it is not clear when such population regulation will occur and what habitat, if any, will remain to support the survivors. Such a decline may result in a population too low to permit any hunting, effectively closing MCLG hunting seasons. The length of the closures will largely depend on the recovery rate of the breeding habitat which likely will take decades. Although the overall impact of closures of light-goose seasons in the Central and Mississippi Flyways that could result from continued degradation of the breeding habitat is small on a national scale, it would be concentrated where large flocks of geese stage and winter. As hunter services tend to be performed by people with low incomes, the impact of a closure would fall disproportionately on low income groups near goose concentrations. We expect the proposed action to reduce the risk of light-goose season closures in the Central and Mississippi Flyways and avoid a $70 million loss in output and reduce the possibility of increased agricultural loss. We expect special MCLG population control efforts to create additional take opportunities which is expected to add $18 million in output to local economies.

Public Comments Received

On April 6, 1998, we issued in the **Federal Register** (63 FR 16819) a notice of intent announcing that we would develop a draft Environmental Assessment to examine alternative regulatory strategies to reduce MCLG populations. This notice invited public comment on possible regulatory alternatives. The notice also advised the public that the draft Environmental Assessment along with a proposed rule would be published in the **Federal Register** later this year for public review and comment. As a result of this invitation for public comment, 247 comments consisting of 1 from a Federal agency, 8 from State wildlife agencies, 7 from private organizations, 1 from a Flyway Council, 115 from private citizens, and 115 from people who signed a petition were received. Comments were generally dichotomized by two key points of concern.

To summarize, 186 comments were supportive of our intent to examine alternative regulatory strategies to reduce the MCLG population. These commenters agreed that there was a problem and that the resolution should entail reduction by lethal means and supported the use of additional methods to increase take of MCLG. Comments in support of such action were received from 1 Federal agency, 8 State wildlife agencies, 1 Flyway Council, 5 private conservation agencies, 94 private citizens, and 77 from people who signed a petition. Conversely, 59 comments received were in opposition to the Service's intent to reduce MCLG populations by use of lethal means either because they believe it is not scientifically justified to reduce the populations or attempts to do so would be inhumane. Instead, these commenters offered two non-lethal recommendations to reduce the populations: (1) Hazing adults off nests and (2) egging (destroying nests) on the breeding grounds. Comments in support of no action or non-lethal action were received from 2 private animal welfare agencies, 19 private citizens, and 38 from people who signed a petition. Additionally, 2 comments were received in support of reducing the population by use of lethal means, however, recommended use of Federal wildlife agency programs such as trapping and culling.

Service Response: We are also opposed to the inhumane treatment of any birds and we do not believe that increasing take of MCLG by providing additional opportunities or methods for take of MCLG is inhumane. We also prefer non-lethal control activities, such as habitat modification, as the first means of resolving this issue. However, habitat modification and other harassment tactics do not always work satisfactorily and lethal methods are sometimes necessary to increase the effectiveness of non-lethal management methods. Further, MCLG breed in remote locations in the arctic and

subarctic regions of Northern Canada. Implementing control activities in those areas is cost-prohibitive and dangerous. Instead, we feel that providing States with additional opportunity and means to increase take of MCLG while implementing non-lethal control measures concurrently is the most efficient and feasible short-term solution. We will continue to work jointly with the Canadian Wildlife Service to reduce MCLG in both the United States and in Canada.

NEPA Considerations

We have prepared a draft Environmental Assessment (EA), as defined under the authority of the National Environmental Policy Act of 1969, in connection with this proposed regulation. The EA is available for public review at the above address.

Endangered Species Act Consideration

Section 7(a)(2) of the Endangered Species Act (ESA), as amended (16 U.S.C. 1531–1543; 87 Stat. 884) provides that "Each Federal agency shall, in consultation with the Secretary, insure that any action authorized, funded, or carried out . . . is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of (critical) habitat . . ." Consequently, we initiated Section 7 consultation under the ESA for this proposed rulemaking. Completed results of our consultation under Section 7 of the ESA may be inspected by the public in, and will be available to the public from, the Office of Migratory Bird Management at the above address.

Regulatory Flexibility Act, Executive Order 12866, and Executive Order 12630

The economic impacts of this proposed rulemaking will fall disproportionately on small businesses because of the structure of the waterfowl hunting related industries. The proposed regulation benefits small businesses by avoiding ecosystem failure to an ecosystem that produces migratory bird resources important to American citizens. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.) requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities. Data are not available to estimate the number of small entities affected, but it is unlikely to be a substantial number on a national scale. We expect the proposed action to reduce the risk of light-goose season closures in the Central and Mississippi Flyways subsequently avoiding a $70 million loss in output and reducing the possibility of increased agricultural loss. We expect special MCLG population control efforts to create additional take opportunities which is expected to add $18 million in output to local economies. We have determined that a Regulatory Flexibility Act Analysis is not required. Migratory bird regulations are recognized as exempt from takings implication assessment under E.O. 12630. This rule was not subject to review by the Office of Management and Budget under E.O. 12866.

Paperwork Reduction Act and Information Collection

The collection of information described below will be submitted to OMB for approval under the provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13). We will not conduct or sponsor any information collection until approved by OMB and a final regulation is published, and a person is not required to respond to a collection of information unless it displays a current valid OMB control number. The proposed information collection will be used to administer this program and, particularly in the assessment of impacts alternative regulatory strategies may have on MCLG and other migratory bird populations. The information collected will be required to authorize State wildlife management agencies responsible for migratory bird management to take MCLG within the guidelines provided by the Service. The annual number of State participants is expected to be 17. The reporting burden for this collection of information is estimated to average 30 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the collection of information, yielding an annual burden of 510 hours.

BURDEN ESTIMATES FOR REPORTING REQUIREMENTS FOR THE CONSERVATION ORDER TO REDUCE MID-CONTINENT POPULATIONS OF LIGHT GEESE

Type of report	Number of reports annually	Avg. time required per report (minutes)	Burden hours
General Take or Removal*	17	1,800	510

*General take or removal includes authorized human-related mortality.

We expect a maximum of 17 annual reports per year from all participating States. We estimate that each annual report will require about 6 hours to complete, therefore, the burden assumed by the participants is 102 hours or less.

Comments are invited from you on: (1) Whether the collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate, automated, electronic, mechanical, or other technological collection techniques or other forms of information collection technology. Comments and suggestions on the requirements should be sent directly to the Office of Information and Regulatory Affairs; Office of Management and Budget; Attention: Interior Desk Officer, Washington, DC 20503; and a copy of the comments should be sent to the Information Collection Clearance Officer, US Fish and Wildlife Service, ms 224—ARLSQ, 1849 C Street NW., Washington DC 20204. A copy should also be sent directly to the Information Collection Clearance Officer, U.S. Fish and Wildlife Service, ms 224—ARLSQ, 1849 C Street NW., Washington, DC 20204 or electronically to mullinR@fws.gov.

Unfunded Mandates

We have determined and certify, in compliance with the requirements of the Unfunded Mandates Act (2 U.S.C. 1502 et seq) that this proposed rulemaking will not impose a cost of $100 million or more in any given year on local or State government or private entities. This rule will not "significantly or uniquely" affect small governments. No governments below the State level will be affected by this rule. A Small Government Agency Plan is not required. This rule will not produce a Federal mandate of $100 million or greater in any year, i.e., it is not a "significant regulatory action" under the Unfunded Mandates Reform Act.

Civil Justice Reform—Executive Order 12988

The Department, in promulgating this proposed rule, has determined that these regulations meet the applicable standards provided in Sections 3(a) and 3(b)(2) of Executive Order 12988. This rule has been reviewed by the Office of the Solicitor. Specifically, this rule has been reviewed to eliminate errors and ambiguity, has been written to minimize litigation, provides a clear legal standard for affected conduct, and specifies in clear language the effect on existing Federal law or regulation. It is not anticipated that this rule will require any additional involvement of the justice system beyond enforcement of provisions of the Migratory Bird Treaty Act of 1918 that have already been implemented through previous rulemakings.

Public Comment Invited

The policy of the Department of the Interior is, whenever practical, to afford you the opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding this proposal to the location identified in the address section above. Specifically, we invite comment from affected States regarding the feasibility in implementing the proposed rule within the conditions provided. Comments must be received on or before January 8, 1998. Following review and consideration of the comments, we will issue a final rule.

Executive Order 12866 requires each agency to write regulations that are easy to understand. We invite your comments on how to make this rule easier to understand including answers to questions such as the following: (1) Are the requirements in the rule clearly stated? (2) Does the rule contain technical language or jargon that interferes with its clarity? (3) Does the format of the rule (grouping and order of sections, use of headings, paragraphing, etc.) aid in or reduce its clarity? (4) Would the rule be easier to understand if it were divided into more (but shorter) sections? (A "section" appears in bold type and is preceded by the symbol "§ " (50 CFR 21.60) (5) Is the description of the rule in the "Supplementary Information" section of the preamble helpful in understanding the rule? What else could we do to make the rule easier to understand?

Send a copy of any comments that concern how we could make this rule easier to understand to " Office of Regulatory Affairs, Department of the Interior, room 7229, 1849 C Street, NW, Washington, DC 20240. You may also e-mail the comments to this address: Exsec@ios.doi.gov.

List of Subjects in 50 CFR Parts 20 and 21

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

For the reasons stated in the preamble, we hereby propose to amend parts 20 and 21, of the subchapter B, chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 20—[AMENDED]

The authority citation for part 20 continues to read as follows:

Authority: 16 U.S.C. 703–712; and 16 U.S.C. 742a–j.

§ 20.22 [Amended]

2. In Section 20.22, the phrase "except as provided in part 21" is added following the word "season".

PART 21—[AMENDED]

1. The authority citation for part 21 continues to read as follows:

Authority: Pub. L. 95–616, 92 Stat. 3112 (16 U.S.C. 712(2)).

2. Subpart E, consisting of Section 21.60, is added to read as follows:

Subpart E—Control of Overabundant Migratory Bird Populations

§ 21.60 Conservation Order for Mid-continent light geese.

Any State agency responsible for the management of wildlife and migratory birds may, without permit, kill or cause to be killed under its general supervision, lesser snow and Ross' geese (Mid-continent light geese) in Alabama, Arkansas, Colorado, Illinois, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming: Provided that:

(a) Persons who take Mid-continent light geese under this section may not sell or offer for sale those birds nor their plumage, but may possess, transport, and otherwise properly use them.

(b) Persons acting under the authority of this section must permit at all reasonable times including during actual operations, any Federal or State game or deputy game agent, warden, protector, or other game law enforcement officer free and unrestricted access over the premises on which such operations have been or are being conducted; and must promptly furnish whatever information an officer requires concerning the operation.

(c) Nothing in this section authorizes the take of Mid-continent light geese contrary to any State laws or regulations; and none of the privileges granted under this section may be exercised unless persons acting under the authority of the conservation order possesses whatever permit or other authorization(s) as may be required for such activities by the State concerned.

(d) Activities conducted under this section may not affect endangered or threatened species as designated under the Endangered Species Act.

(e) Control activities must be conducted clearly as such and are intended to relieve pressures on migratory birds and habitat essential to migratory bird populations only and are not to be construed as opening, re-opening, or extending any open hunting season contrary to any regulations promulgated under section 3 of the Migratory Bird Treaty Act.

(f) Control activities may be conducted only when all migratory bird hunting seasons are closed.

(g) Control measures employed through this section may be implemented only between the hours of ½ hour before sunrise to ½ hour after sunset.

(h) Nothing in this section may limit or initiate management actions on Federal land without concurrence of the Federal Agency with jurisdiction.

(i) States must designate participants who must operate under the conditions of this section.

(j) States must inform all participants of the requirements/conditions of this section that apply.

(k) States must keep records of activities carried out under the authority of this section, including the number of Mid-continent light geese taken under this section, the methods by which they were taken, and the dates they were taken. The State must submit an annual report summarizing activities conducted under this section on or before August 1 of each year, to the appropriate Assistant Regional Director—Refuges and Wildlife (see § 10.22).

(l) Persons acting under the authority of this section may take Mid-continent light geese by any method except those prohibited in this section. No persons may take Mid-continent light geese:

(1) With a trap, snare, net, rifle, pistol, swivel gun, shotgun larger than 10 gauge, punt gun, battery gun, machine gun, fish hook, poison, drug, explosive, or stupefying substance;

(2) From or by means, aid, or use of a sinkbox or any other type of low floating device, having a depression affording the person a means of concealment beneath the surface of the water;

(3) From or by means, aid, or use of any motor vehicle, motor-driven land conveyance, or aircraft of any kind, except that paraplegics and persons missing one or both legs may take from any stationary motor vehicle or stationary motor-driven land conveyance;

(4) From or by means of any motorboat or other craft having a motor attached, or any sailboat, unless the motor has been completely shut off and the sails furled, and its progress therefrom has ceased: Provided, That a craft under power may be used to retrieve dead or crippled birds; however, crippled birds may not be shot from such craft under power;

(5) By the use or aid of live birds as decoys; although not limited to, it shall be a violation of this paragraph for any person to take migratory waterfowl on an area where tame or captive live ducks or geese are present unless such birds are and have been for a period of 10 consecutive days before the taking, confined within an enclosure that substantially reduces the audibility of their calls and totally conceals the birds from the sight of wild migratory waterfowl;

(6) By means or aid of any motordriven land, water, or air conveyance, or any sailboat used for the purpose of or resulting in the concentrating, driving, rallying, or stirring up of any migratory bird;

(7) By the aid of baiting, or on or over any baited area. As used in this paragraph, "baiting" means the placing, exposing, depositing, distributing, or scattering of shelled, shucked, or unshucked corn, wheat or other grain, salt, or other feed so as to constitute for such birds a lure, attraction or enticement to, on, or over any areas where hunters are attempting to take them; and "baited area" means any area where shelled, shucked, or unshucked corn, wheat or other grain, salt, or other feed capable of luring, attracting, or enticing such birds is directly or indirectly placed, exposed, deposited, distributed, or scattered; and such area shall remain a baited area for 10 days following complete removal of all such corn, wheat or other grain, salt, or other feed. However, nothing in this paragraph prohibits the taking of Mid-continent light geese on or over standing crops, flooded standing crops (including aquatics), flooded harvested croplands, grain crops properly shocked on the field where grown, or grains found scattered solely as the result of normal agricultural planting or harvesting; or

(8) While possessing shot (either in shotshells or as loose shot for muzzleloading) other than steel shot, or bismuth-tin (97 parts bismuth: 3 parts tin with 1 percent residual lead) shot, or such shot approved as nontoxic by the Director and identified in 50 CFR 20.21(j).

(m) The Service will annually assess the overall impact and effectiveness of the conservation order to ensure compatibility with long-term conservation of this resource. If at any time evidence is presented that clearly demonstrates that there no longer exists a serious threat of injury to the area or areas involved, we will publish immediately a notice of intent to revoke the conservation order in the **Federal Register**.

Dated: October 30, 1998.

Donald J. Barry,

Assistant Secretary for Fish and Wildlife and Parks.

[I.D. 103098C]

RIN 0648–AJ17

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Amendment to the Fishery Management Plans of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of an amendment to fishery management plans; request for comments.

SUMMARY: NMFS announces that the Gulf of Mexico Fishery Management Council (Council) has submitted for review and approval a generic amendment to the fishery management plans of the Gulf of Mexico that designates essential fish habitat (EFH). Written comments are requested from the public.

DATES: Written comments must be received on or before January 8, 1999.

ADDRESSES: Comments must be mailed to the Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702.

Requests for copies of the generic amendment, which includes an environmental assessment, should be sent to the Gulf of Mexico Fishery Management Council, 3018 U.S. Highway 301 North, Suite 1000, Tampa, FL 33619–2266; Phone: 727–228–2815; Fax: 727-225-7015.

FOR FURTHER INFORMATION CONTACT: Robert Sadler, 813-570-5305.

SUPPLEMENTARY INFORMATION: The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, 16 U.S.C. 1801 et seq.) requires each regional fishery management council to submit any fishery management plan (FMP) or amendment to the Secretary of Commerce for review and approval, disapproval, or partial approval. The Magnuson-Stevens Act also requires that NMFS, upon receiving an amendment, immediately publish a document in the **Federal Register** stating that the amendment is available for public review and comment. Therefore, NMFS solicits comments on the approval, disapproval, or partial approval of this generic amendment designating EFH in the Gulf of Mexico.

Section 303(a)(7) of the Magnuson-Stevens Act requires that any FMP describe and identify EFH for the fishery, minimize to the extent practicable adverse effects on such habitat caused by fishing, and identify other actions to encourage the conservation and enhancement of such habitat. Section 305(b)(1)(A) and (B) of the Magnuson-Stevens Act require that the regional fishery management councils submit, by October 11, 1998, FMP amendments to identify and describe EFH for species under management.

NMFS published guidelines to assist regional fishery management councils in the description and identification of EFH, the identification of adverse impacts on EFH, and the identification of actions required to conserve and enhance EFH (62 FR 66531, December 19, 1997). The NMFS guidelines encourage ecosystem approaches to protecting and conserving EFH. Ecological roles of the managed species (i.e., prey, competitors, trophic links within foodwebs, and nutrient transfer between ecosystems) should be considered when identifying EFH. The guidelines also specify that sufficient EFH be protected and conserved to support sustainable fisheries and managed species' contribution to a healthy ecosystem.

The generic amendment designates EFH for species included in all seven of the Council's FMPs. EFH is identified and described based on areas where various life stages of 26 selected managed species and the coral complex commonly occur. The Council selected these 26 species because they are considered to be ecologically representative of the remaining species in the FMPs. The selected species are: Shrimp (brown shrimp, white shrimp, pink shrimp, royal red shrimp); red drum; reef fish (red grouper, gag grouper, scamp grouper, black grouper, red snapper, vermilion snapper, gray snapper, yellowtail snapper, lane snapper, greater amberjack, lesser amberjack, tilefish, and gray triggerfish); coastal migratory pelagic species (king mackerel, Spanish mackerel, cobia, dolphin, bluefish, little tunny); stone crab; spiny lobster; and the coral complex.

The selected species represent about a third of the species under management by the Council. EFH for the remaining managed species will be addressed in future FMP amendments, as appropriate.

EFH is identified based on where the individual managed species commonly occur. Collectively, these species commonly occur throughout all of the marine and estuarine waters of the Gulf of Mexico. For purposes of this generic EFH amendment, EFH is separated into estuarine and marine components. Collectively, EFH for the estuarine component includes all estuarine waters and substrates (mud, sand, shell, rock, and associated biological communities), including subtidal vegetation (seagrasses and algae) and adjacent intertidal vegetation (marshes and mangroves). Collectively, EFH in marine waters of the Gulf of Mexico includes all marine waters and substrates (mud, sand, shell, rock, and associated biological communities) from the shoreline to the seaward limit of the exclusive economic zone.

The amendment also identifies: Threats to EFH from fishing and nonfishing activities; options to conserve and enhance EFH; and research needs. No management measures and, therefore, no regulations are proposed at this time. Fishing-related management measures to minimize any identified impacts are deferred to future amendments when the Council has adequate information to decide whether measures are practicable.

Comments received by January 8, 1999 will be considered in the approval/disapproval decision on the amendment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 3, 1998.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[RIN 0648–AL29]

Fisheries of the Exclusive Economic Zone Off Alaska; Season and Area Apportionment of Atka Mackerel Total Allowable Catch

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes regulations that would divide the Atka mackerel total allowable catch (TAC) specified for the Aleutian Islands Subarea into two seasonal allowances; reduce the percentage of Atka mackerel TAC taken from Steller sea lion critical habitat over a 4-year period in the Western and Central Districts of the Aleutian Islands Subarea; and extend the seaward 20 nautical miles (nm) no-trawl zone around the Seguam and Agligadak rookeries in the Eastern District of the Aleutian Islands into a year round closure. The purpose of this action is to avoid significant fishery-induced localized depletions of Atka mackerel, a primary prey species for Steller sea lions in the Aleutian Islands and to avoid potential jeopardy to the continued existence of Steller sea lion populations and their critical habitat through excessive removal of prey. This action is intended to further the conservation goals and objectives of the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP).

DATES: Comments on the proposed rule must be received no later than December 9, 1998.

ADDRESSES: Comments may be sent to Sue Salveson, Assistant Regional Administrator for Sustainable Fisheries, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802, Attn: Lori J. Gravel, or delivered to the Federal Building, 709 West 9th Street, Juneau, AK. Copies of the Environmental Assessment/ Regulatory Impact Review (EA/RIR) prepared for this action are available from NMFS at the same address, or by calling the Alaska Region, NMFS, at 907–586–7228.

FOR FURTHER INFORMATION CONTACT: Kent Lind, 907–586–7228, or kent.lind@noaa.gov.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fisheries of the Bering Sea and Aleutian Islands Management Area (BSAI) pursuant to the FMP. The North Pacific Fishery Management Council (Council) prepared the FMP under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The FMP is implemented by regulations appearing at 50 CFR part 679 issued under the authority of the Magnuson-Stevens Act. General regulations governing U.S. fisheries also appear at 50 CFR part 600.

Purpose and Need for Action

In 1990, NMFS designated the Steller sea lion (Eumetopias jubatus) as a threatened species under the Endangered Species Act of 1973 (ESA). The designation followed severe declines throughout much of the Gulf of Alaska and Aleutian Islands region. In 1993, NMFS defined critical habitat for the species to include the marine areas within 20 nm of major rookeries and haulouts of the species west of 144° W. long., as well as major foraging areas. In 1997, NMFS recognized two separate populations and reclassified the western population (west of 144° W. long.) as endangered. The estimated number of Steller sea lions in the western population has declined by more than 80 percent since the mid-1960s. The ultimate cause or causes of the decline are unknown, but lack of available prey is believed to be an important contributing factor.

NMFS is the lead agency responsible for the recovery and conservation of the Steller sea lion. As such, it has periodically consulted with itself on the FMP and on the potential effects of the various groundfish fisheries on Steller sea lions. Since listing the Steller sea lion as threatened in 1990, NMFS has expressed concern in three subsequent biological opinions (the products of ESA section 7 consultations) that fisheries may reduce sea lion foraging success by causing changes in prey composition, age/size composition of available prey species, or localized depletions of prey.

Atka mackerel are an important prey species for Steller sea lions. In a recent study, NMFS researchers found that Atka mackerel were the most common prey item (based on split-sample frequency of occurrence) for Steller sea lions in portions of the Central and Western Districts of the Aleutian Islands Subarea. These results were based on scats collected in summer months and assumed to be primarily from adult females. Atka mackerel were also found in 84 percent of 241 Steller sea lion scats collected in 1989–92 in the Aleutian Islands (92 percent in the Central Aleutian Islands).

Recent statistical evaluations of catch per unit effort (CPUE) at various sites in the 1990s have indicated that the Atka mackerel fishery has led to localized depletions of Steller sea lion prey, thereby increasing evidence of competition. Thus, the first of two main objectives of this proposed rule is to modify the management of the Atka mackerel fishery to avoid such depletions.

The second objective is based on the statutory requirement of the ESA that Federal actions within the critical habitat of a listed species not jeopardize the continued existence of populations of those species or adversely modify their critical habitat. The single most important feature of critical habitat for the Steller sea lion is its prey base. Areas designated as critical habitat for this species must include sufficient food to meet the energetic demands of a stable and healthy sea lion population. Thus, the availability of prey in critical habitat is a matter of considerable concern, particularly because lack of available prey may have contributed to the decline of the western population or may be impeding its recovery.

Since 1977, the portion of Atka mackerel catch taken annually within Steller sea lion critical habitat has varied from 15 percent to 98 percent, with an average of 71 percent. A marked increase in the annual catch in the 1990s and the high percent of the catch generally taken within Steller sea lion critical habitat have resulted in a marked increase in the tonnage of Atka mackerel taken from areas considered essential to the recovery and conservation of the Steller sea lion, again increasing concerns that the fishery competes with Steller sea lions. The point at which fishery removals of prey from critical habitat jeopardize the continued existence of Steller sea lion populations or result in adverse modification of critical habitat is not clear. In spite of such uncertainty, the ESA requires that a judgment be made on the basis of the best available scientific and commercial data. To prevent potential jeopardy to the continued existence of Steller sea lion populations and adverse modification of their critical habitat, this proposed rule seeks to reduce the proportion of the annual Atka mackerel catch taken from within designated critical habitat.

The ultimate cause or causes of the decline of the western population of Steller sea lions remain uncertain.

However, NMFS believes that an important contributing factor may be the lack of available prey of which Atka mackerel are an important component. NMFS is responsible for ensuring that the Atka mackerel fishery does not jeopardize the continued existence of Steller sea lion populations or adversely modify their critical habitat. Given the apparent importance of Atka mackerel in the diet of Steller sea lions, particularly in the central and western Aleutian Islands, careful management of the Atka mackerel fishery is essential to ameliorate potential impacts of the fishery on Steller sea lions and their critical habitat.

At its June 1998 meeting, the Council considered this information and the analysis prepared by NMFS in support of this action and recommended that NMFS proceed with the development of regulations to reduce competition between the Atka mackerel fishery and Steller sea lions. Six alternatives were presented to the Council for consideration. The alternative adopted by the Council and set out in this proposed rule would (1) divide the Atka mackerel TACs specified for each subarea and district of the BSAI into two equal seasonal allowances, (2) reduce the percentage of Atka mackerel TAC taken from Steller sea lion critical habitat over a 4-year period in the Western and Central Districts of the Aleutian Islands Subarea, and (3) extend the seasonal 20 nm no-trawl zone around the Seguam and Agligadak rookeries in the Eastern District of the Aleutian Islands into a year-round closure.

Elements of the Proposed Rule

Atka Mackerel Season Split

To address the issue of localized depletions of Steller sea lion prey, this action would establish two Atka mackerel fishing seasons: The A season would run from 0001 hours, Alaska local time (A.l.t.), January 1 through 1200 hours, A.l.t., April 15 and the B season would run from 1200 hours, A.l.t., September 1 through 1200 hours, A.l.t., November 1. The TAC specified for the Atka mackerel fishery after subtraction of the jig gear allocation and reserves would be divided equally into A and B season allowances during the annual specification process. This split is proposed as an effective means to ameliorate concerns about localized depletion while still providing reasonable opportunity to the fishing industry to harvest Atka mackerel without significantly increased operational costs. The jig gear allocation and Community Development Quota (CDQ) would not be divided into seasonal allowances because jig gear and CDQ fishing occur outside the time period of the open access trawl fishery, and the jig gear and CDQ fisheries are too small, widely dispersed, and slowly paced to lead to localized depletions of Atka mackerel.

Progressive Reduction of Catch Within Critical Habitat

This action would prohibit trawling for groundfish within areas designated as Steller sea lion critical habitat in the Western or Central Districts of the Aleutian Islands when NMFS determines that the harvest of a seasonal allowance of Atka mackerel within a district reaches the following percentage identified for each year and district:

Year	Western (543)	Central (542)
1999	65	80
2000	57	67
2001	48	46
2002 and after	40	40

A critical habitat trawl closure within a district would remain in effect until NMFS closes Atka mackerel to directed fishing within the same district. Steller sea lion critical habitat areas in the Aleutian Islands are defined in Table 1, Table 2, and Figure 4 of 50 CFR part 226. The purpose of this action is to ensure that the percentage of Atka mackerel catch taken inside critical habitat does not exceed the percentages identified above. CDQ groups would be limited to the same percentages of Atka mackerel catch taken inside critical habitat. However, critical habitat closures would be imposed on CDQ groups individually when their percentage of Atka mackerel CDQ harvest reaches the limit for each year and district.

Extension of 20 nm No-Trawl Zones

This action also would extend the 20 nm no-trawl zones around the Seguam and Agligadak rookeries in the Eastern District of the Aleutian Islands into a year round closure. At present, these rookeries are protected year-round by a 10 nm no-trawl zone, and from January 1 through April 15 by a 20 nm no-trawl zone. The current 10 and 20 nm no-trawl zones are set out in Table 5 to part 679.

Additional Actions To Be Taken in the Future

Vessel Monitoring System (VMS)

The Council recommended that NMFS establish a VMS requirement to monitor the activity of vessels fishing with trawl gear after critical habitat areas are closed. NMFS hopes to implement VMS requirements for the Atka mackerel fishery prior to the start of the 1999 Atka mackerel B season, which would open on September 1, 1999. Until then, enforcement of the critical habitat closures contained in this rule would be accomplished through traditional methods, such as Coast Guard overflights and reports from vessels and on board observers.

The Council also requested that NMFS conduct an annual review of the impact and effectiveness of the management measures outlined above, i.e., the Atka mackerel season split, the progressive reduction of catch within critical habitat, the extension of 20 nm no-trawl zones, and the VMS, and develop a research plan to determine the effects of these management measures by area. NMFS intends to report annually to the Council on the impact and effectiveness of these management measures. Ongoing research on the effectiveness of these and other Steller sea lion protection measures is a critical element of NMFS' recovery program for Steller sea lions.

Classification

This proposed rule has been determined to be not significant for purposes of E.O. 12866.

NMFS prepared an initial regulatory flexibility analysis that describes the impact this proposed rule, if adopted, would have on small entities. A copy of this analysis is available from NMFS (see **ADDRESSES**). The analysis made the following conclusions with respect to impacts on small entities:

Business entities affected directly. The actions being considered for the BSAI Atka mackerel fishery would have direct effects on fewer than 15 fishing vessels all of which are expected to be factory trawlers. In 1997, 12 factory trawlers participated in the BSAI Atka mackerel fishery and eight of these vessels accounted for 81 percent of the retained catch in that fishery. All of the factory trawlers in the Atka mackerel fishery are owned by seafood companies with annual receipts that exceed the $3 million small entity threshold by the Small Business Administration for fish harvesting businesses. The combined annual receipts for the companies involved in the Atka mackerel fishery are not known. However, based on the value of fish these companies harvest in Alaska, and the annual reports of the publically held companies, the annual worldwide receipts for the companies involved in the Atka mackerel fishery is estimated to range from $5 million to over $3 billion. In 1998, 1 percent of the Atka mackerel TAC in Area 541 (127 mt) was allocated to vessels using jig gear. However, as of September 12, 1998, NMFS has not received any Atka mackerel catch reports by

vessels using jig gear in Area 541 and the entire 127 mt TAC allocation remains unharvested. Up to 10 vessels using jig gear had expressed interest in fishing for Atka mackerel in Area 541 and all of these vessels are small entities. However, the preferred alternative would exempt vessels using jig gear from the A-B season split, critical habitat restrictions, and VMS requirements. Therefore, all small entities using jig gear to fish for Atka mackerel would be unaffected by the proposed action.

Small communities and groups affected directly. Because, very little BSAI Atka mackerel is delivered to on-shore processors and because the principal participants in this fishery are not residents of Alaska fishing communities, with the exception of the CDQ communities, few small communities would be affected directly. With the expansion of the CDQ program to include all BSAI groundfish and crab, the 50 plus CDQ communities would be affected by actions that affect the Atka mackerel CDQ. However, the effects on these communities are not expected to be significant because Atka mackerel is expected to account for less than 5% of the value of the CDQs to these communities, none of the actions would eliminate all of the value of the Atka mackerel CDQs, and the CDQs are but one source of income for these communities. To further reduce the potential impacts of this action on CDQ groups, the Council's preferred alternative would exempt CDQ groups from the A-B season split so that CDQ groups are not forced to fish small amounts of Atka mackerel CDQ during two separate time periods.

Business entities affected indirectly. A much larger number of entities would be affected indirectly if the proposed actions result in the factory trawlers, that have dominated the Atka mackerel fishery, switching effort from the Atka mackerel fishery to other groundfish fisheries. If the fishing capacity of the eight factory trawlers that were the core of the Atka mackerel fleet in 1997 were diverted to other fisheries, these vessels could take substantially larger shares of the catch in the BSAI rock sole, Pacific cod, flathead sole, or other flatfish fishery or the GOA flatfish fisheries. Much of any such increase in catch by the core Atka mackerel fleet would be at the expense of other factory trawlers in the BSAI and both catcher vessels and other factory trawlers in the GOA. In 1996, 67 factory trawlers participated in BSAI and GOA Pacific cod fisheries and 42 factory trawlers participated in the various BSAI and GOA flatfish fisheries. In 1996, 180 trawl catcher vessels participated in the Pacific cod fisheries of the BSAI and GOA and 62 trawl catcher vessels participated in the various flatfish fisheries of the BSAI and GOA. Due to inshore/offshore TAC allocations for Pacific cod in the GOA and TAC splits between catcher vessels and catcher processors in the BSAI, catcher vessels participating in the Pacific cod fishery will be unaffected if Atka mackerel factory trawlers shift into the Pacific cod fishery. However, catcher vessels fishing for flatfish in the BSAI and GOA could face impacts if effort shifts away from Atka mackerel as a result of this action. The extent to which these shifts may occur is impossible to quantify or predict.

Most of the factory trawlers operating in the BSAI and GOA Pacific cod and flatfish fisheries are owned by or affiliated with "large" entities. In addition, up to half of the catcher vessels fishing in the BSAI are believed to be owned by or affiliated with large entities. However, in a written comment to the Council submitted for this action, an industry representative for flatfish and Pacific cod factory trawlers indicated that more than 30 percent of the factory trawlers in the BSAI flatfish and Pacific cod fisheries expected 1998 annual gross revenues to be less than $3 million. NMFS does not have information to confirm or refute this figure. Furthermore, the ownership characteristics of these vessels has not been analyzed to determine if they are independently owned and operated or affiliated with a larger parent company. Because NMFS cannot quantify the number of small entities that may be indirectly affected by this action, or quantify the magnitude of those effects, NMFS concludes that it is possible that this action could have a significant economic impact on a substantial number of small entities.

Measures taken to reduce impacts on small entities. The Council considered and adopted a series of exemptions to reduce the impacts of this action on small entities. The preferred alternative contains the following elements to reduce impacts on small entities: (1) Vessels using jig gear would be exempted from all aspects of the proposed action, (2) CDQ groups would be exempted from the A–B season split to prevent having to fish for small Atka mackerel CDQ amounts during two times of the year, and (3) vessels using hook-and-line gear would be exempt from the closure to fishing inside critical habitat. The critical habitat closures would affect vessels using trawl gear only, (4) both jig and hook and line vessels would be exempted from future VMS requirements for the Atka mackerel fishery.

As stated in the preceding paragraph and in the section entitled, "Business entities affected directly," all small entities in the Atka mackerel fishery (jig boats) are exempt from all aspects of this proposed action. NMFS is not aware of additional alternatives that could further mitigate this action's economic impact on small entities.

NMFS initiated a formal section 7 consultation under the ESA for this action. A biological opinion is under preparation that will determine whether the fishing activities conducted under this rule are likely to jeopardize the continued existence of any endangered or threatened species under the jurisdiction of NMFS or to result in the destruction or adverse modification of critical habitat.

List of Subjects in 50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Dated: November 3, 1998.

Andrew A. Rosenberg,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 679 is proposed to be amended as follows:

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

1. The authority citation for part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.*, 1801 *et seq.*, and 3631 *et seq.*

2. In § 679.20, paragraphs (a)(8) and (c)(2)(ii)(A) are revised to read as follows:

§ 679.20 General limitations.

* * * * *

(a) * * *

(8) *BSAI Atka mackerel*—(i) *Jig gear.* Vessels using jig gear will be allocated up to 2 percent of the TAC of Atka mackerel specified for the Eastern Aleutian Islands District and Bering Sea subarea, after subtraction of reserves, based on the following criteria:

(A) The amount of Atka mackerel harvested by vessels using jig gear during recent fishing years;

(B) The anticipated harvest of Atka mackerel by vessels using jig gear during the upcoming fishing year; and

(C) The extent to which the jig-gear allocation will support the development of a jig-gear fishery for Atka mackerel while minimizing the amount of Atka mackerel TAC annually allocated to vessels using jig gear that remains unharvested at the end of the fishing year.

(ii) *Other geors.* The remainder of the Atka mackerel TAC, after subtraction of the jig gear allocation and reserves, will be allocated to vessels using other authorized gear types.

(A) *Seasonal allowances.* The Atka mackerel TAC specified for each subarea or district of the BSAI will be divided equally, after subtraction of the jig gear allocation and reserves, into two seasonal allowances corresponding to the A and B seasons defined at § 679.23(e)(3).

(B) *Overages and underages.* Within any fishing year, unharvested amounts of the A season allowance will be added to the B season allowance and harvests in excess of the A season allowance will be deducted from the B season allowance.

* * * * *

(c) * * *

(2) * * *

(ii) * * *

(A) The interim specifications for pollock and Atka mackerel will be equal to the first seasonal allowance for pollock and Atka mackerel that is published in the proposed specifications under paragraph (c)(1) of this section.

* * * * *

3. In § 679.22, paragraphs (a)(7) and (a)(8) are revised to read as follows:

§ 679.22 Closures.

(a) * * *

(7) *Steller sea lion protection areas, Bering Sea Subarea and Bogoslof District*—(i) *Year-round closures.* Trawling is prohibited within 10 nm of each of the eight Steller sea lion rookeries shown in Table 4a of this part.

(ii) *Seasonal closures.* During January 1 through April 15, or a date earlier than April 15, if adjusted under § 679.20, trawling is prohibited within 20 nm of each of the six Steller sea lion rookeries shown in Table 4b of this part.

(8) *Steller sea lion protection areas, Aleutian Islands Subarea*—(i) *10-nm closures.* Trawling is prohibited within 10 nm of each of the 17 Steller sea lion rookeries shown in Table 5a of this part.

(ii) *20-nm closures.* Trawling is prohibited within 20 nm of each of the two Steller sea lion rookeries shown in Table 5b of this part.

(iii) *Western and Central Aleutian Islands critical habitat closures*—(A) *General.* Trawling is prohibited within areas designated as Steller sea lion critical habitat in the Western or Central Districts of the AI (see Table 1, Table 2, and Figure 4 of 50 CFR part 226) when the Regional Administrator announces by notification in the **Federal Register** that the criteria for a trawl closure in a district set out in paragraph (a)(8)(iii)(B) of this section has been met.

(B) *Criteria for closure.* The trawl closures identified in paragraph (a)(8)(iii)(A) of this section will take effect when the Regional Administrator determines that the harvest of a seasonal allowance of Atka mackerel specified under § 679.20(a)(8)(ii)(A) reaches the following percentage identified for each year and district:

Year	Western (543) (percent)	Central (542) (percent)
1999	65	80
2000	57	67
2001	48	46
2002 and after	40	40

(C) *Duration of closure.* A Steller sea lion critical habitat area trawl closure within a district will remain in effect until NMFS closes Atka mackerel to directed fishing within the same district.

(D) *CDQ fishing.* Harvesting groundfish CDQ with trawl gear is prohibited within areas designated as Steller sea lion critical habitat in the Western and/or Central Districts of the AI (see Table 1, Table 2, and Figure 4 of 50 CFR part 226) for an eligible vessel listed on an approved CDP after the CDQ group has harvested the percent of the annual Atka mackerel CDQ specified for the year and district at paragraph (a)(8)(iii)(B) of this section.

* * * * *

4. In § 679.23, paragraph (e)(3) is redesignated as paragraph (e)(4) and a new paragraph (e)(3) is added to read as follows:

§ 679.23 Seasons.

* * * * *

(e) * * *

(3) *Directed fishing for Atka mackerel with trawl gear.* Subject to other provisions of this part, directed fishing for Atka mackerel with trawl gear in the Aleutian Islands Subarea is authorized only during the following two seasons:

(i) *A season.* From 0001 hours, A.l.t., January 1, through 1200 hours, A.l.t., April 15;

(ii) *B season.* From 1200 hours, A.l.t., September 1, through 1200 hours, A.l.t., November 1.

* * * * *

5. In part 679, Table 5 is revised to read as follows: Table 5 to Part 679—Aleutian Islands Subarea Steller Sea Lion Protection Areas

Name of Island	From		To	
	Latitude	Longitude	Latitude	Longitude
3–nm NO TRANSIT ZONES described at part 227.12(a)(2) of this title				
a. Trawling Prohibited Year-Round Within 10 nm:

Notices

Federal Register
Vol. 63, No. 216
Monday, November 9, 1998

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Docket No. TB–99–01]

Flue-Cured Tobacco Advisory Committee; Meeting

In accordance with the Federal Advisory Committee Act (5 U.S.C. App.) announcement is made of the following committee meeting:

Name: Flue-Cured Tobacco Advisory Committee.

Date: December 30, 1998.

Time: 9:30 a.m.

Place: United States Department of Agriculture (USDA), Agricultural Marketing Service (AMS), Tobacco Programs, Flue-Cured Tobacco Cooperative Stabilization Corporation Building, Room 223, 1306 Annapolis Drive, Raleigh, North Carolina 27608.

Purpose: To elect officers, discuss the status of the flue-cured bale experiment, and other related matters for the 1999 flue-cured tobacco marketing season.

The meeting is open to the public. Persons, other than members, who wish to address the Committee at the meeting should contact John P. Duncan III, Deputy Administrator, Tobacco Programs, AMS, USDA, Room 502 Annex Building, P.O. Box 96456, Washington, D.C. 20090–6456, (202) 205–0567, prior to the meeting. Written statements may be submitted to the Committee before, at, or after the meeting. If you need any accommodations to participate in the meeting, please contact the Tobacco Programs at (202) 205–0567 by December 21, 1998, and inform us of your needs.

Dated: November 3, 1998.

John P. Duncan III,

Deputy Administrator, Tobacco Programs.

DEPARTMENT OF AGRICULTURE

Grain Inspection, Packers and Stockyards Administration

Proposed Posting of Stockyards

The Grain Inspection, Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in Section 302 of the Packers and Stockyards Act (7 U.S.C. 202) and should be made subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*).

AR–174
Crawford County Livestock Auction, Mountainburg, Arkansas

CA–188
Martella Livestock Market, Inc., Tipton, California

MT–122
Montana Livestock Company, Ramsey, Montana

MO–282
The Cow Palace, Inc., Sedgewickville, Missouri

SC–157
Rocking R, Inc., Laurens, South Carolina

TN–192
Morris Brothers Auction, Pikeville, Tennessee

Pursuant to the authority under Section 302 of the Packers and Stockyards Act, notice is hereby given that it is proposed to designate the stockyards named above as posted stockyards subject to the provisions of said Act. Any person who wishes to submit written data, views or arguments concerning the proposed designation may do so by filing them with the Director, Office of Policy/Litigation Support, Packers and Stockyards Programs, Grain Inspection, Packers and Stockyards Administration, U.S. Department of Agriculture, 1400 Independence Avenue, SW, Stop 3646, Room 3418–S, Washington, D.C. 20250, by November 24, 1998.

All written submissions made pursuant to this notice will be made available for public inspection in the office of the Director of the Office of Policy/Litigation Support during normal business hours.

Done at Washington, D.C. this 2nd day of November 1998.

Michael J. Caughlin, Jr.,

Director, Office of Policy/Litigation Support, Packers and Stockyards Programs.

BILLING CODE 3410–EN–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce (DOC) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). It has been submitted to OMB under the emergency clearance procedures. The Department is requesting OMB approval by no later than November 16, 1998.

Agency: Office of the Secretary.

Title: Survey of Business Leaders Accompanying the Secretary on Trade Missions.

Agency Form Number(s): None.

OMB Approval Number: None.

Type of Request: New collection—Emergency Submission.

Burden: 5 hours.

Number of Respondents: 100.

Avg. Hours Per Response: 3 minutes.

Needs and Uses: On every trade mission the Secretary of Commerce leads, a brief survey will be conducted assessing the participants' opinions and opportunities they see for the markets where the trade mission will be taken. This information will help the Secretary to communicate the participant's concerns and views as they look to increase business opportunities.

Affected Public: Businesses or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance Officer, (202) 482–3272, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, 725 17th Street, NW, Washington, DC 20503 by no later than November 16, 1998.

Dated: November 2, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of the Chief Information Officer.

[FR Doc. 98–29917 Filed 11–6–98; 8:45 am]

BILLING CODE 3510–65–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce (DOC) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Office of the Inspector General/Department of Commerce.

Title: Applicant for Funding Assistance.

Agency Form Number(s): CD–346.

OMB Approval Number: 0605–0001.

Type of Request: Extension of a currently approved collection.

Burden: 500 hours.

Number of Respondents: 400 (multiple responses).

Avg. Hours Per Response: 15 minutes.

Needs and Uses: This collection is used to assist program and grants administration officials in determining the responsibility, financial integrity and management principles of principal officers and employees of organizations, firms, or recipients which will be receiving grants, loan guarantees, etc. Through the "name check" process, the Office of Inspector General collects background information on key individuals and is used to determine if they have been convicted of, or are presently facing, criminal charges for fraud, theft, perjury, etc. This information is used in making funding decisions.

Affected Public: Businesses or other for-profit organizations, individuals, not-for-profit institutions, federal government, state, local or tribal government.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: David Rostker, (202) 395–3897.

Copies of the above information collection proposal can be obtained by calling or writing Linda Engelmeier, DOC Forms Clearance Officer, (202) 482–3272, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, 725 17th Street, NW, Washington, DC 20503.

Dated: November 3, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 47–98]

Foreign-Trade Zone 41—Milwaukee, WI, Application for Subzone Status; Mercury Marine (Inc.) (Marine Propulsion Products) Fond du Lac and Oshkosh, WI

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Foreign Trade Zone of Wisconsin, Ltd., grantee of FTZ 41, requesting special-purpose subzone status for the marine propulsion products manufacturing facilities of Mercury Marine (Inc.), located in Fond du Lac and Oshkosh, Wisconsin. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on October 30, 1998.

The proposed subzone would consist of 11 total sites, 10 (totaling 2.5 million sq.ft., manufacturing/warehousing) of which are in Fond du Lac (Fond du Lac County): Site 1 (12 acres)—Plant 95, 325 Larsen Drive; Site 2 (9 acres)—Plant 4,98, 660 South Hickory Street; Sites 3 and 4 (29 acres)—Plant 4, 660 South Hickory Street; Site 5 (21 acres)—Plant 17, W6207 Pioneer Road, Site 6 (11 acres)—Plant 17A, 771 South Military Road; Site 7 (79 acres)—Plants 3, 10, 12, 15, 52/"Main Plant", W6250 Pioneer Road; Site 8 (1 acre)—Adjacent south to Site 3 at Pioneer Road; Site 9 (2 acres)—Water Street Plant, along Fond du Lac River at Water Street; Site 10 (13 acres)—Plant 36, N7480 County Road UU. Site 11 (10 acres/100,000 sq.ft., warehouses)—Plants 33 and 64, located at 445–505 Marion Road in Oshkosh (Winnebago County), Wisconsin. The facilities (2,500 employees) are used to produce marine outboard and jet pump engines (up to 450 horsepower) for the U.S. market and export. The application indicates that foreign-sourced parts and materials comprise some 20 percent of the finished marine engines' material value, including: oil, alcohols, adhesives, plastic casings, adhesive sheets/plates, ethylene bags, packaging materials, rubber profiles/tubes/hoses/gaskets, belts, valves, ball/roller bearings, oil seals, antifreeze, articles of wood, paper books and labels, decals, twine, textile fabrics with PVC, fiberglass, iron or non alloy tubes/pipes/profiles/fittings, chain, fasteners, springs, wire/cable, base metal mountings, internal parts of marine engines, gears, ignition systems, electrical subcomponents, compasses, gauges, measuring and controlling instruments, starters, flywheels, pulleys, shafts, electric motors, propellers, electromagnetic couplings, electronic components, pumps, and filters (duty rates: free—9.8%).

FTZ procedures would exempt Mercury Marine from Customs duty payments on the foreign items used in production for export. On domestic shipments, the company would be able to choose the duty rates during Customs entry procedures that apply to finished marine engines (free, 2.7%) for the foreign inputs noted above. The application indicates that the savings from FTZ procedures would help

improve the facilities' international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is January 8, 1999. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to January 25, 1999).

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce Export Assistance Center, Room 596, 517 E. Wisconsin Avenue, Milwaukee, WI 53202.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th Street & Pennsylvania Avenue, NW, Washington, DC 20230.

Dated: October 30, 1998.

Dennis Puccinelli,

Acting Executive Secretary, Foreign-Trade Zones Board.

[Docket 48–98]

Foreign-Trade Subzone 167B—Polaris Industries, Inc.; Expansion of Manufacturing Authority (Internal-Combustion Engines) Osceola, Wisconsin

An application has been submitted to the Foreign-Trade Zones Board (the Board) by Polaris Industries, Inc. (Polaris), operator of FTZ Subzone 167B, at the Polaris plant, Osceola, Wisconsin, requesting an expansion of the scope of manufacturing authority to include a new end product (motorcycle engines) and additional internal-combustion engine manufacturing capacity under FTZ procedures within Subzone 167B. It was formally filed on November 3, 1998.

Subzone 167B was approved by the Board in 1997 with activity granted for the manufacture of small internal-combustion engines for snowmobiles, personal water craft, all-terrain vehicles (Board Order 940, 62 FR 66601, 12–19–97).

Polaris has installed new manufacturing capacity at the Osceola plant (84 employees) used to produce a new model motorcycle engine (V-twin, 1,507 cc) and now requests that its FTZ manufacturing authority be extended to include the increased motorcycle engine capacity. The company plans to produce up to 20,000 motorcycle engines annually, which would be shipped to Polaris' Spirit Lake, Iowa, plant to equip motorcycles assembled there. The new engine manufacturing activity will involve casting, machining, finishing, and assembly using domestic and foreign materials and components.

The motorcycle engine production will utilize foreign-sourced pistons and cylinders (2.6% duty rate) (representing 5% of the finished engines' ex-plant value) and all other components from domestic sources.

FTZ procedures would exempt Polaris from Customs duty payments on the foreign components used in export activity (less than 5% of shipments). On its domestic sales, the company would be able to elect the duty rate that applies to finished engines (duty free) for the foreign components noted above. The application indicates that the savings from FTZ procedures help improve Polaris' international competitiveness.

The application has requested review under § 400.32(b)(1) of the FTZ Board regulations based on the previous Board approvals.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is December 24, 1998. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to January 8, 1999.)

A copy of the application will be available for public inspection at the following location: Office of the Executive Secretary, Foreign-Trade Zones Board, Room 3716, U.S. Department of Commerce, 14th Street & Pennsylvania Avenue, NW, Washington, DC 20230.

Dated: November 3, 1998.

Dennis Puccinelli,

Acting Executive Secretary.

Certain Corrosion-Resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate From Canada: Notice of Extension of Final Results of Antidumping Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time limits for final results of antidumping duty administrative review.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Rebecca Trainor or Thomas Gilgunn, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482–0666 and (202) 482–0648 respectively.

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act) are to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to 19 CFR part 351 (1998).

Extension of Time Limits for Final Results

The Department of Commerce has received a request to conduct an administrative review of the antidumping duty order on certain corrosion-resistant carbon steel flat products and certain cut-to-length carbon steel plate from Canada. On September 25, 1997 (62 FR 50292), the Department initiated this antidumping administrative review covering the period August 1, 1996 through July 31, 1997.

Because of the complexity of certain issues, it is not practicable to complete this review within the time limits mandated by section 751(a)(3)(A) of the Act. Therefore, in accordance with that section, the Department is extending the time limits for the final results to December 17, 1998. This extension of time limits is in accordance with section 751(a)(3)(A) of the Act.

Dated: November 3, 1998.

Roland L. MacDonald,

Acting Deputy Assistant Secretary for AD/CVD Enforcement III.

Extruded Rubber Thread From Malaysia; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: In response to a request by the petitioner and three producers/exporters of the subject merchandise, the Department of Commerce is conducting an administrative review of the antidumping duty order on extruded rubber thread from Malaysia. This review covers four manufacturers/exporters of the subject merchandise to the United States (Filati Lastex Sdn. Bhd., Heveafil Sdn. Bhd./Filmax Sdn. Bhd., Rubberflex Sdn. Bhd., and Rubfil Sdn. Bhd.). The period of review is October 1, 1996, through September 30, 1997.

We have preliminarily determined that sales have been made below the normal value by each of the companies subject to this review. If these preliminary results are adopted in the final results of this administrative review, we will instruct the Customs Service to assess antidumping duties on all appropriate entries.

We invite interested parties to comment on these preliminary results. Parties who wish to submit comments in this proceeding are requested to submit with each argument (1) a statement of the issue and (2) a brief summary of the argument.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Shawn Thompson or Irina Itkin, Office of AD/CVD Enforcement, Office 5, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone (202) 482–1776 or (202) 482–0656, respectively.

SUPPLEMENTARY INFORMATION:

Background

On October 2, 1997, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request an Administrative Review" of the antidumping duty order on extruded rubber thread from Malaysia (62 FR 51628).

In accordance with 19 CFR 351.213(b)(1), on October 20, 1997, the petitioner, North American Rubber Thread, requested an administrative review of the antidumping order covering the period October 1, 1996, through September 30, 1997, for the following producers and exporters of extruded rubber thread: Filati Lastex Sdn. Bhd. (Filati), Heveafil Sdn. Bhd./Filmax Sdn. Bhd. (Heveafil), Rubberflex Sdn. Bhd. (Rubberflex), and Rubfil Sdn. Bhd. (Rubfil). On October 31, 1997, Filati, Heveafil, and Rubberflex also requested an administrative review.

In November 1997, the Department initiated an administrative review for Filati, Heveafil, Rubberflex, and Rubfil (62 FR 63069 (Nov. 26, 1997)) and issued questionnaires to each of these companies.

In February 1998, we received responses from Filati, Heveafil, and Rubberflex. We received no response from Rubfil. Because Rubfil did not respond to the questionnaire, we have assigned a margin to Rubfil based on facts available. For further discussion, see the "Facts Available" section, below.

In June and July 1998, we issued supplemental questionnaires to Filati, Heveafil, and Rubberflex. We received responses to these questionnaires in July, August, and September 1998.

From September through November 1998, the Department conducted verifications of the data submitted by Filati, Heveafil, and Rubberflex, in accordance with 19 CFR 351.307(b)(iv).

Scope of the Review

The product covered by this review is extruded rubber thread. Extruded rubber thread is defined as vulcanized rubber thread obtained by extrusion of stable or concentrated natural rubber latex of any cross sectional shape, measuring from 0.18 mm, which is 0.007 inch or 140 gauge, to 1.42 mm, which is 0.056 inch or 18 gauge, in diameter. Extruded rubber thread is currently classifiable under subheading 4007.00.00 of the Harmonized Tariff Schedule of the United States (HTSUS). The HTSUS subheadings are provided for convenience and customs purposes. The written description of the scope of this review is dispositive.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations at 19 CFR part 351, 62 FR 27296 (May 19, 1997).

Facts Available

A. Use of Facts Available for Rubfil

In accordance with section 776(a)(2)(A) of the Act, we preliminarily determine that the use of facts available is appropriate as the basis for Rubfil's dumping margin. Section 776(a)(2) of the Act provides that if an interested party: (1) Withholds information that has been requested by the Department; (2) fails to provide such information in a timely manner or in the form or manner requested, subject to subsections 782(c)(1) and (e); (3) significantly impedes a determination under the antidumping statute; or (4) provides such information but the information cannot be verified, the Department shall, subject to subsection 782(d) of the Act, use facts otherwise available in reaching the applicable determination. Specifically, Rubfil failed to respond to the Department's questionnaire, issued in November 1997. Because Rubfil did not respond to the Department's questionnaire, we must use facts otherwise available to determine Rubfil's dumping margin.

Section 776(b) of the Act provides that adverse inferences may be used with respect to a party that has failed to cooperate by not acting to the best of its ability to comply with requests for information. *See* Statement of Administrative Action accompanying the URAA, H.R. Rep. No. 316, 103rd Cong., 2d Sess. 870 (SAA). The failure of Rubfil to reply to the Department's questionnaire demonstrates that it has failed to act to the best of its ability in this review and, therefore, an adverse inference is warranted.

As adverse facts available for Rubfil, we have used the highest rate calculated for any respondent in any segment of this proceeding. This rate is 54.31 percent. We find that the rate of 54.31 percent, which was assigned in the prior administrative review, is sufficiently high as to effectuate the purpose of the facts available rule.

B. Corroboration of Secondary Information

As facts available in this case, the Department has used information derived from a prior administrative review, which constitutes secondary information within the meaning of the SAA. *See* SAA at 870. Section 776(c) of the Act provides that the Department shall, to the extent practicable, corroborate secondary information from independent sources reasonably at its disposal. The SAA provides that "corroborate" means that the Department will satisfy itself that the secondary information to be used has probative value. *See* SAA at 870.

To corroborate secondary information, the Department will, to the extent practicable, examine the reliability and relevance of the information to be used. However, unlike for other types of information, such as input costs or selling expenses, there are no independent sources for calculated dumping margins. Thus, in an administrative review, if the Department chooses as total adverse facts available a calculated dumping margin from the same or a prior segment of this proceeding, it is not necessary to question the reliability of the margin for that time period. With respect to the relevance aspect of corroboration, however, the Department will consider information reasonably at its disposal as to whether there are circumstances that would render a margin not relevant. Where circumstances indicate that the selected margin may not be appropriate, the Department will attempt to find a more appropriate basis for facts available. *See, e.g., Fresh Cut Flowers from Mexico; Final Results of Antidumping Duty Administrative Review*, 61 FR 6812, 6814 (February 22, 1996) (*Fresh Cut Flowers*) (where the Department disregarded the highest margin as adverse best information available because the margin was based on another company's uncharacteristic business expense resulting in an unusually high margin).

For Rubfil, we examined the rate applicable to extruded rubber thread from Malaysia throughout the course of the proceeding. With regard to its probative value, the rate specified above is reliable and relevant because it is a calculated rate from the 1994–1995 administrative review. There is no information on the record that demonstrates that the rate selected is not an appropriate total adverse facts available rate for Rubfil. Thus, the Department considers this rate to be appropriate adverse facts available.

Normal Value Comparisons

To determine whether sales of extruded rubber thread from Malaysia to the United States were made at less than normal value (NV), we compared the constructed export price (CEP) to the NV for Filati, Heveafil and Rubberflex, as specified in the "Constructed Export Price" and "Normal Value" sections of this notice.

When making comparisons in accordance with section 771(16) of the Act, we considered all products sold in the home market as described in the "Scope of the Review" section of this notice, above, that were in the ordinary course of trade for purposes of determining appropriate product comparisons to U.S. sales. Where there were no sales of identical merchandise in the home market made in the ordinary course of trade to compare to U.S. sales, we compared U.S. sales to sales of the most similar foreign like product made in the ordinary course of trade, based on the characteristics listed in sections B and C of our antidumping questionnaire.

Level of Trade and CEP Offset

In accordance with section 773(a)(1)(B) of the Act, to the extent practicable, we determine NV based on sales in the comparison market at the same level of trade as export price (EP) or CEP. The NV level of trade is that of the starting-price sales in the comparison market or, when NV is based on CV, that of the sales from which we derive selling, general and administrative expenses (SG&A) and profit. For EP, the U.S. level of trade is also the level of the starting-price sale, which is usually from the exporter to importer. For CEP, it is the level of the constructed sale from the exporter to the importer.

To determine whether NV sales are at a different level of trade than EP or CEP sales, we examine stages in the marketing process and selling functions along the chain of distribution between the producer and the unaffiliated customer. If the comparison-market sales are at a different level of trade and the difference affects price comparability, as manifested in a pattern of consistent price differences between the sales on which NV is based and comparison-market sales at the level of trade of the export transaction, we make a level-of-trade adjustment under section 773(a)(7)(A) of the Act. Finally, for CEP sales, if the NV level is more remote from the factory than the CEP level and there is no basis for determining whether the difference in the levels between NV and CEP affects price comparability, we adjust NV under section 773(a)(7)(B) of the Act (the CEP offset provision). *See Notice of Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate from South Africa*, 62 FR 61731 (Nov. 19, 1997).

Filati, Heveafil, and Rubberflex claimed that they made home market sales at only one level of trade (*i.e.*, sales to original equipment manufacturers). Based on the information on the record, no level of trade adjustment was warranted for any respondent. Although Filati claimed that the home market level was different, and more remote, than the level of trade of the CEP, we have found the levels of trade to be the same.

In order to determine whether NV was established at a level of trade which constituted a more advanced stage of distribution than the level of trade of the CEP, we compared the selling functions performed for home market sales with those performed with respect to the CEP transaction, which excludes economic activities occurring in the United States. We found that Filati, Heveafil, and Rubberflex performed essentially the same selling functions in its sales offices in Malaysia for both home market and U.S. sales. Therefore, the respondents' sales in Malaysia were not at a more advanced stage of marketing and distribution than the constructed U.S. level of trade, which represents an F.O.B. foreign port price after the deduction of expenses associated with U.S. selling activities. Because we find that no difference in level of trade exists between markets, we have not granted a CEP offset to any of the respondents. For a detailed explanation of this analysis, see the concurrence memorandum

issued for the preliminary results of this review, dated November 2, 1998.

Constructed Export Price

For all U.S. sales by Filati, Heveafil, and Rubberflex, we used CEP, in accordance with section 772(b) of the Act. For Filati, we have treated sales shipped directly to the U.S. customer as CEP sales because we find that the extent of the affiliate's activities performed in the United States in connection with these sales is significant. *See* the Filati USA verification report at 4.

A. Filati

We calculated CEP based on the starting price to the first unaffiliated purchaser in the United States. In accordance with section 772(c)(1)(B) of the Act, we added an amount for uncollected import duties in Malaysia. We made deductions from the starting price, where appropriate, for rebates. In addition, where appropriate, we made deductions for foreign inland freight, foreign brokerage and handling expenses, ocean freight, marine insurance, U.S. customs duty, U.S. brokerage and handling expenses, and U.S. inland freight, and U.S. warehousing expenses, in accordance with section 772(c)(2)(A) of the Act.

We made additional deductions from CEP, where appropriate, for commissions, credit expenses, U.S. indirect selling expenses, and U.S. inventory carrying costs, in accordance with section 772(d)(1) of the Act. We disallowed an offset claimed by Filati relating to imputed costs associated with financing antidumping and countervailing duty deposits, in accordance with the Department's practice. *See Extruded Rubber Thread from Malaysia; Final Results of Antidumping Duty Administrative Review*, 63 FR 12752,12758 (March 16, 1998) (*Thread Fourth Review*); and *Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof from France, Germany, Italy, Japan, Romania, Singapore, Sweden and the United Kingdom; Final Results of Antidumping Duty Administrative Reviews*, 62 FR 54043, 54079 (Oct. 17, 1997) (*AFBs*).

Pursuant to section 772(d)(3) of the Act, we further reduced the starting price by an amount for profit, to arrive at CEP. In accordance with section 772(f) of the Act, we calculated the CEP profit rate using the expenses incurred by Filati and its affiliate on their sales of the subject merchandise in the United States and the foreign like product in the home market and the profit associated with those sales.

B. Heveafil

In cases where Heveafil shipped merchandise directly from Malaysia to U.S. customers, we used the bill of lading date as the date of sale for these shipments, rather than the date of the U.S. invoice as reported. For these shipments, we find that there is a long lag time between the date of shipment to the customer and the date of invoice.

We calculated CEP based on the starting price to the first unaffiliated customer in the United States. In accordance with section 772(c)(1)(B) of the Act, we added an amount for uncollected import duties in Malaysia. We made deductions from the starting price, where appropriate, for rebates. We also made deductions for foreign inland freight, foreign brokerage and handling expenses, ocean freight, marine insurance, U.S. customs duty, U.S. brokerage and handling expenses, U.S. inland freight, and U.S. warehousing expenses, in accordance with section 772(c)(2)(A) of the Act.

We made additional deductions to CEP, where appropriate, for credit expenses, repacking expenses, U.S. indirect selling expenses, and U.S. inventory carrying costs, in accordance with section 772(d)(1) of the Act. Regarding indirect selling expenses, we disallowed an offset claimed by Heveafil relating to imputed costs associated with financing antidumping and countervailing duty deposits, in accordance the Department's practice. *See Thread Fourth Review* (63 FR 12758) and *AFBs* (62 FR 54079).

Pursuant to section 772(d)(3) of the Act, we further reduced the starting price by an amount for profit, to arrive at CEP. In accordance with section 772(f) of the Act, we calculated the CEP profit rate using the expenses incurred by Heveafil and its affiliate on their sales of the subject merchandise in the United States and the foreign like product in the home market and the profit associated with those sales.

C. Rubberflex

We calculated CEP based on the starting price to the first unaffiliated customer in the United States. We made deductions from the starting price, where appropriate, for rebates. We also made deductions for foreign inland freight, foreign brokerage and handling expenses, ocean freight, marine insurance, U.S. customs duty, U.S. inland freight, and U.S. warehousing expenses, in accordance with section 772(c)(2)(A) of the Act.

We made additional deductions to CEP, where appropriate, for credit expenses, U.S. indirect selling expenses, and U.S. inventory carrying costs, in accordance with section 772(d)(1) of the Act.

Pursuant to section 772(d)(3) of the Act, we further reduced the starting price by an amount for profit, to arrive at CEP. In accordance with section 772(f) of the Act, we calculated the CEP profit rate using the expenses incurred by Rubberflex and its affiliate on their sales of the subject merchandise in the United States and the foreign like product in the home market and the profit associated with those sales.

Normal Value

In order to determine whether there is a sufficient volume of sales in the home market to serve as a viable basis for calculating NV (*i.e.*, the aggregate volume of home market sales of the foreign like product is greater than five percent of the aggregate volume of U.S. sales), we compared the volume of each respondent's home market sales of the foreign like product to the volume of U.S. sales of subject merchandise, in accordance with section 773(a)(1)(C) of the Act. Based on this comparison, we determined that each respondent had a viable home market during the period of review (POR). Consequently, we based NV on home market sales.

Pursuant to section 773(b)(2)(A)(ii) of the Act, there were reasonable grounds to believe or suspect that Filati, Heveafil, and Rubberflex had made home market sales at prices below their costs of production (COP)s in this review because the Department had disregarded sales below the COP for these companies in a previous administrative review. *See Thread Fourth Review*. As a result, the Department initiated an investigation to determine whether the respondents made home market sales during the POR at prices below their respective COPs.

We calculated the COP based on the sum of each respondent's cost of materials and fabrication for the foreign like product, plus amounts for SG&A and packing costs, in accordance with section 773(b)(3) of the Act.

Except as follows, we used the respondents' reported COP amounts to compute weighted-average COPs during the POR. Regarding the COP data reported by Filati, we found that, in certain instances, Filati reported multiple costs for a single control number. In those cases, we used the higher of the costs for purposes of the preliminary results.

We compared the COP figures to home market prices of the foreign like product, as required under section 773(b) of the Act, in order to determine whether these sales had been made at

prices below the COP. On a product-specific basis, we compared the COP to home market prices, less any applicable movement charges and discounts.

In determining whether to disregard home market sales made at prices below the COP, we examined whether such sales were made: (1) In substantial quantities within an extended period of time; and (2) at prices which permitted the recovery of all costs within a reasonable period of time in the normal course of trade. *See* § 773(b)(1) of the Act.

Pursuant to section 773(b)(2)(c)(i) of the Act, where less than 20 percent of a respondent's sales of a given product were at prices less than the COP, we did not disregard any below-cost sales of that product because we determined that the below-cost sales were not made in "substantial quantities." Where 20 percent or more of a respondent's sales of a given product were at prices below the COP, we found that sales of that model were made in "substantial quantities" within an extended period of time (as defined in section 773(b)(2)(B) of the Act), in accordance with section 773(b)(2)(C)(i) of the Act. In such cases, we also determined that such sales were not made at prices which would permit recovery of all costs within a reasonable period of time, in accordance with section 773(b)(2)(D) of the Act. Therefore, we disregarded the below-cost sales. Where all sales of a specific product were at prices below the COP, we disregarded all sales of that product.

We found that, for certain models of extruded rubber thread, more than 20 percent of each respondent's home market sales within an extended period of time were at prices less than COP. Further, the prices did not provide for the recovery of costs within a reasonable period of time. We therefore disregarded the below-cost sales and used the remaining above-cost sales as the basis for determining NV, in accordance with section 773(b)(1) of the Act. For those U.S. sales of extruded rubber thread for which there were no comparable home market sales in the ordinary course of trade, we compared CEP to CV, in accordance with section 773(a)(4) of the Act.

In accordance with section 773(e) of the Act, we calculated CV based on the sum of each respondent's cost of materials, fabrication, SG&A, profit, and U.S. packing costs. In accordance with section 773(e)(2)(A) of the Act, we based SG&A and profit on the amounts incurred and realized by each respondent in connection with the production and sale of the foreign like product in the ordinary course of trade, for consumption in the foreign country.

Company-specific calculations are discussed below.

A. Filati

In all instances, NV for Filati was based on home market sales. Accordingly, we based NV on the starting price to unaffiliated customers. For all price-to-price comparisons, we made deductions from the starting price for rebates, where appropriate. We also made deductions, where appropriate, for foreign inland freight, pursuant to section 773(a)(6)(B) of the Act. Pursuant to section 773(a)(6)(C)(iii) of the Act, we also made deductions for home market credit expenses and bank charges. Where applicable, in accordance with 19 CFR 351.410(e), we offset any commission paid on a U.S. sale by reducing the NV by the amount of home market indirect selling expenses and inventory carrying costs, up to the amount of the U.S. commission.

In addition, we deducted home market packing costs and added U.S. packing costs, in accordance with section 773(a)(6) of the Act. Where appropriate, we made adjustments to NV to account for differences in physical characteristics of the merchandise, in accordance with section 773(a)(6)(C)(ii) of the Act and 19 CFR 351.411.

B. Heveafil

Where NV was based on home market sales, we based NV on the starting price to unaffiliated customers. We made deductions from the starting price for discounts. We also made deductions for foreign inland freight and foreign inland insurance, pursuant to section 773(a)(6)(B) of the Act. Pursuant to section 773(a)(6)(C)(iii) of the Act, we also made deductions for home market credit expenses and bank charges.

In addition, we deducted home market packing costs and added U.S. packing costs, in accordance with section 773(a)(6) of the Act. Where appropriate, we made adjustments to NV to account for differences in physical characteristics of the merchandise, in accordance with section 773(a)(6)(c)(ii) of the Act and 19 CFR 351.411.

For CV-to-CEP comparisons, we made circumstance-of-sale adjustments, where appropriate, for differences in credit expenses and bank charges, in accordance with sections 773(a)(6)(C)(iii) and 773(a)(8) of the Act.

C. Rubberflex

In all instances, NV for Rubberflex was based on home market sales. Accordingly, we based NV on the starting price to unaffiliated customers. We made deductions from the starting price for foreign inland freight and foreign inland insurance, pursuant to section 773(a)(6)(B) of the Act. Pursuant to section 773(a)(6)(C)(iii) of the Act, we also made deductions for home market credit expenses.

In addition, we deducted home market packing costs and added U.S. packing costs, in accordance with section 773(a)(6) of the Act. Where appropriate, we made adjustments to NV to account for differences in physical characteristics of the merchandise, in accordance with section 773(a)(6)(c)(ii) of the Act and 19 CFR 351.411.

Currency Conversion

We made currency conversions into U.S. dollars based on the exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Section 773A of the Act directs the Department to use a daily exchange rate in order to convert foreign currencies into U.S. dollars unless the daily rate involves a fluctuation. It is the Department's practice to find that a fluctuation exists when the daily exchange rate differs from the benchmark rate by 2.25 percent. The benchmark is defined as the moving average of rates for the past 40 business days. When we determine a fluctuation to have existed, we substitute the benchmark for the daily rate, in accordance with established practice.

Preliminary Results of Review

As a result of our review, we preliminarily determine that the following margins exist for the period October 1, 1996, through September 30, 1997:

Manufacturer/exporter	Percent margin
Filati Lastex Sdn. Bhd.	8.31
Heveafil Sdn. Bhd.	
Filmax Sdn. Bhd.	3.91
Rubberflex Sdn. Bhd	1.15
Rubfil Sdn. Bhd	54.31

Interested parties may request a hearing within 30 days of the publication of this notice. Any hearing, if requested, will be held 37 days after the date of publication, or the first workday thereafter. Interested parties may submit case briefs within 30 days of publication. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than 35 days after the date of publication. The Department will publish a notice of the final results of this administrative review, which will include the results of its analysis of issues raised in any such case briefs.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. We have calculated an importer-specific assessment rate based on the ratio of the total amount of antidumping duties calculated for the examined sales made during the POR to the total entered value of the examined sales. This rate will be assessed uniformly on all entries of that particular importer made during the POR. The Department will issue appraisement instructions directly to the Customs Service.

Further, the following deposit requirements will be effective for all shipments of extruded rubber thread from Malaysia entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided for by section 751(a)(1) of the Act: (1) The cash deposit rates for Filati, Heveafil, Rubberflex, and Rubfil will be the rates established in the final results of this review, except if the rate is less than 0.50 percent and, therefore, de minimis within the meaning of 19 CFR 351.106, the cash deposit will be zero; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the less-than-fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 15.16 percent, the all others rate established in the LTFV investigation.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 351.213.

Dated: November 2, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

[A–201–802]

Notice of Postponement of Final Results of Antidumping Administrative Review: Gray Portland Cement and Clinker from Mexico

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Diane Krawczun, William Zapf or Richard Rimlinger, Office of AD/CVD Enforcement III, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone (202) 482–0198, (202) 482–0180 or (202) 482–4477, respectively.

Postponement of Final Results of Review

On September 25, 1997, the Department of Commerce (the Department) initiated an antidumping administrative review of the antidumping duty order on gray portland cement and clinker from Mexico (62 FR 50292). On September 10, 1998, we issued our preliminary results of review (63 FR 48471). The final results of review are currently due January 8, 1998. Due to an increase in case assignments, we transferred this case, on October 1, 1998, to another team of Department personnel for calculation of the final results. This transfer requires time for the newly assigned team to become familiar with the case. Also, the current final due date conflicts with several existing deadlines of the new team. For these reasons, we have determined that completion of the review within 120 days from the publication of our preliminary results of review is not currently practicable and, therefore, we are postponing the deadline for issuing these final results of review until no later than March 9, 1999.

This extension is in accordance with section 751(a)(2)(C) of the Tariff Act of 1930, as amended, and 19 CFR 351.213(h)(2).

Dated: November 2, 1998.

Susan Kuhbach,

Acting Deputy Assistant Secretary for Import Administration.

Certain Helical Spring Lock Washers From the People's Republic of China; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: We preliminarily determine that sales of certain helical spring lock washers from the People's Republic of China were made below normal value during the period October 1, 1996 through September 30, 1997. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Sally Hastings or Vincent Kane, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–3464 or 482–2815, respectively.

Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930, as amended (the Act) by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 et. seq. *Antidumping Duties; Countervailing Duties; Final Rule*, 62 FR 27296 (May 19, 1997).

Background

On October 19, 1993, the Department published the antidumping duty order on certain helical spring lock washers (HSLWs) from the People's Republic of China (PRC) (58 FR 53914). The Department notified interested parties of the opportunity to request an administrative review of this order on October 2, 1997 (62 FR 51628). The

petitioner, Shakeproof Industrial Products Division of Illinois Tool Works, Inc., and the respondent, Zhejiang Wanxin Group Co. (ZWG) (also known as Hangzhou Spring Washer Plant), requested that the Department conduct an administrative review of ZWG. These requests were received on October 24 and 27, 1997, respectively. The notice of initiation of this administrative review was published on November 26, 1997 (62 FR 63069). On July 10, 1998, the Department extended the time limits for completion of the preliminary results in this proceeding until October 31, 1998 (*See* 63 FR 37328).

The Department is conducting this administrative review in accordance with Section 751 of the Act.

Scope of Review

The products covered by this review are HSLWs of carbon steel, of carbon alloy steel, or of stainless steel, heat-treated or non-heat-treated, plated or non-plated, with ends that are off-line. HSLWs are designed to: (1) Function as a spring to compensate for developed looseness between the component parts of a fastened assembly; (2) distribute the load over a larger area for screws or bolts; and, (3) provide a hardened bearing surface. The scope does not include internal or external tooth washers, nor does it include spring lock washers made of other metals, such as copper.

HSLWs subject to this review are currently classifiable under subheading 7318.21.0030 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the scope of this proceeding is dispositive.

This review covers the period from October 1, 1996 through September 30, 1997.

Verification

As provided in section 782(i) of the Act, we verified sales and factor information provided by ZWG in Xiaoshan, PRC, using standard verification procedures, including on-site inspection of its facilities, the examination of relevant sales and financial records, and selection of original documentation containing relevant information. The findings at verification are detailed in the verification report dated October 15, 1998, the public version of which is on file in the Central Records Unit, Room B099 of the Main Commerce building (CRU-Public File).

Separate Rates Determination

To establish whether a company operating in a state-controlled economy is sufficiently independent to be entitled to a separate rate, the Department analyzes each exporting entity under the test established in the *Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China*, 56 FR 20588 (May 6, 1991) (*Sparklers*), as amplified by the *Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China*, 59 FR 22585 (May 2, 1994) (*Silicon Carbide*). Under this policy, exporters in non-market economies (NMEs) are entitled to separate, company-specific margins when they can demonstrate an absence of government control, both in law and in fact, with respect to export activities. Evidence supporting, though not requiring, a finding of *de jure* absence of government control over export activities includes: (1) An absence of restrictive stipulations associated with the individual exporter's business and export licenses; (2) any legislative enactments decentralizing control of companies; and, (3) any other formal measures by the government decentralizing control of companies. *De facto* absence of government control over exports is based on four factors: (1) Whether each exporter sets its own export prices independently of the government and without the approval of a government authority; (2) whether each exporter retains the proceeds from its sales and makes independent decisions regarding the disposition of profits or financing of losses; (3) whether each exporter has the authority to negotiate and sign contracts and other agreements; and, (4) whether each exporter has autonomy from the government regarding the selection of management. (*See Silicon Carbide*, 59 FR at 22587 and *Sparklers*, 56 FR at 20589.)

In each of the previous administrative reviews of the antidumping duty order on HSLWs from the PRC, covering successive review periods from October 1, 1993 through September 30, 1996, we determined that ZWG merited a separate rate. We have found that the evidence on the record of this review also demonstrates an absence of government control, both in law and in fact, with respect to ZWG's export activities according to the criteria identified in *Sparklers*, and an absence of government control with respect to the additional criteria identified in *Silicon Carbide*. Therefore, we have continued to assign ZWG a separate rate.

Export Price

Because ZWG sold the subject merchandise to unaffiliated purchasers in the United States prior to importation into the United States and Constructed Export Price methodology is not otherwise indicated, we have used export price in accordance with section 772(a) of the Act.

We calculated export price based on the f.o.b. price to unaffiliated purchasers. From this price, we deducted amounts for foreign inland freight and brokerage and handling. We valued these deductions using surrogate country cost data. We selected India as the surrogate country for the reasons explained in the "Normal Value" section of this notice.

Normal Value

Section 773(c)(1) of the Act provides that the Department shall determine normal value (NV) using a factors-of-production methodology if: (1) The merchandise is exported from an NME, and (2) the information does not permit the calculation of NV using home-market prices, third-country prices, or constructed value under section 773(a) of the Act. The Department has treated the PRC as an NME in all previous antidumping cases. In accordance with section 771(18)(C)(i) of the Act, any determination that a foreign country is an NME shall remain in effect until revoked by the administering authority. None of the parties to this proceeding has contested such treatment in this review. Moreover, parties to this proceeding have not argued that the PRC HSLWs industry is a market-oriented industry (MOI) and, consequently, we have no basis to determine that the information would permit the calculation of NV using PRC prices or costs. Therefore, we calculated NV based on factors of production (FOP) in accordance with sections 773(c)(3) and (4) of the Act and 19 CFR 351.408(c).

Under the FOP methodology, we are required to value the NME producer's inputs in a comparable market economy country that is a significant producer of comparable merchandise. We determined that India is at a comparable level of economic development to that of the PRC. Also, India is a significant producer of comparable merchandise. Therefore, for this review, we have used Indian prices to value the FOP except where the factor was purchased from a market economy supplier and paid for in a market economy currency. (*See* Memorandum to Susan Kuhbach from Jeff May, dated March 5, 1998, "Certain Helical Spring Lock Washers from the PRC: Nonmarket Economy Status and Surrogate Country Selection," which is on file in the CRU-Public File.)

We selected, where possible, publicly available values from India which were: (1) Average non-export values; (2) representative of a range of prices within the POR or most contemporaneous with the POR; (3) product-specific; and, (4) tax-exclusive. We valued the factors of production as follows:

- A meaningful amount of the input carbon steel wire rod was purchased from the United Kingdom, a market economy supplier, and paid for in a market economy currency. Pursuant to 19 CFR 351.408(c)(1), we valued this factor using the price paid to the market economy supplier. Thus, for carbon steel wire rod values, we used the average cost per metric ton of carbon steel wire rod imported from the United Kingdom by ZWG during the period of review. We made further deductions to account for the freight costs incurred between the port and ZWG.
- For the value of chemicals used in the production and plating process of HSLWs, we used per kilogram values obtained from the Indian publication *Chemical Weekly* and from the *Monthly Statistics of the Foreign Trade of India-Imports (MFTI)*. We adjusted these values, where appropriate, to reflect inflation through the POR using the Wholesale Price Index (WPI) as reported in the *International Financial Statistics* published by the International Monetary Fund (IMF). We also adjusted these values to account for freight costs incurred between the supplier and ZWG.
- For labor, we used the regression-based wage rate for the PRC in "Expected Wages of Selected NME Countries," located on the Internet at http://www.ita.doc.gov/import_admin/records/wages/. Because of the variability of wage rates in countries with similar per capita GDP's, 19 CFR 351.408(c)(3) of the Department's regulations requires the use of a regression-based wage rate. The source for the regression based-wage rates is "Expected Wages of Selected NME Countries—1995 Income Data," *1996 Year Book of Labour Statistics*, International Labour Office, (Geneva: 1996) Chapter 5B: Wages in Manufacturing.
- For factory overhead, selling, general, and administrative expenses (SG&A), and profit values, we used information from the January, 1997 *Reserve Bank of India Bulletin* for the Indian industry group "Processing and Manufacturing: Metals, Chemicals, and Products Thereof." From this information, we were able to determine factory overhead as a percentage of the total cost of manufacturing, SG&A as a percentage of the total cost of manufacturing, and the profit rate as a percentage of the cost of manufacturing plus SG&A.
- For packing materials, we used the per kilogram values obtained from the *MFTI*. Where necessary, we adjusted these values to reflect inflation through the POR using the WPI published by the IMF. We also adjusted them to account for freight costs incurred between the PRC supplier and ZWG.
- To value coal, we used a per kilogram value obtained from the *MFTI*. We adjusted this value to reflect inflation through the POR using the WPI published by the IMF. We also adjusted this amount to account for freight costs incurred between the supplier and ZWG.
- To value electricity, we used the price of electricity for 1995 reported in the *1995 Confederation of Indian Industries Handbook of Statistics*. We adjusted the value to reflect inflation through the POR using the WPI published by the IMF.
- To value water, we used the November, 1993 *Water Utilities Data Book for the Asian and Pacific Region* published by the Asian Development Bank. We adjusted the value to reflect inflation through the POR using the WPI published by the IMF.
- To value foreign brokerage and handling, we used information reported in the *Less Than Fair Value Investigation of Stoinless Steel Bar from Indio* in a document dated April 22, 1994.
- To value truck freight, we used a rate derived from the April 20, 1994 issue of *The Times of India*. We adjusted the rate to reflect inflation through the POR using the WPI published by the IMF.
- To value rail freight, we used rate information published by the Indian Railway Conference Association for rates in force from April 1, 1995. We adjusted the rate to reflect inflation through the POR using the WPI published by the IMF.
- To value shipping freight, we used a rate reported to the Department in the August, 1993 cable from the U.S. Embassy in India which was submitted for and used in the *Final Determination of Sales at Less Than Fair Value: Certain Helical Spring Lock Washers from the People's Republic of China*, 58 FR 48833 (September 20, 1993). We adjusted the rate to reflect inflation through the POR using the WPI published by the IMF.

For a complete description of the factor values used, *see* "Memorandum to File: Factor Values Used for the Preliminary Results of the Fourth Administrative Review," dated November 2, 1998 (Factors Memorandum) a public version of which is available in the Public File.

Additionally, we adjusted the reported figure for indirect labor based on our findings at verification, *see* "Memorandum to File: Calculation Notes for Preliminary Results," dated November 2, 1998, a public version of which is available in the Public File.

Preliminary Results of Review

We preliminarily determine that the following dumping margin exists:

Manufacturer/exporter	Time period	Margin (percent)
Zhejiang Wanxin Group Co., Ltd	10/01/96–09/30/97	4.29

Parties to the proceeding may request disclosure within 5 days of the date of publication of this notice, in accordance with 19 CFR 351.224. Any interested party may request a hearing within 10 days of publication of this notice. Any hearing, if requested, will be held approximately 44 days after the publication of this notice. Interested parties may submit written comments (case briefs) within 30 days of the date of publication of this notice. Rebuttal comments (rebuttal briefs), which must be limited to issues raised in the case briefs, may be filed not later than 37 days after the date of publication. The Department will publish a notice of the final results of this administrative review, which will include the results of its analysis of issues raised by the parties, within 120 days of publication of these preliminary results.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Pursuant to 19 CFR 351.212(b)(1), we have calculated an importer-

specific *ad valorem* duty assessment rate based on the ratio of the total amount of antidumping duties calculated for the examined sales made during the POR to the total value of the subject merchandise entered during the POR. In order to estimate the entered value, we subtracted international movement expenses from the gross sales value. This rate will be assessed uniformly on all entries of that specific importer made during the POR. The Department will issue appraisement instructions directly to the U.S. Customs Service.

Furthermore, the following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of HSLWs from the PRC entered, or withdrawn from warehouse for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) For ZWG, which has a separate rate, the cash deposit rate will be the company-specific rate established in the final results of this administrative review; (2) for all other PRC exporters, the cash deposit rate will be the PRC rate, which is 128.63 percent, which is the All Other PRC Manufacturers, Producers and Exporters rate from the *Final Determination of Sales at Less Than Fair Value: Certain Helical Spring Lock Washers from the PRC*, 58 FR 48833 (September 20, 1993); and (3) for non-PRC exporters of subject merchandise from the PRC, the cash deposit rate will be the rate applicable to the PRC supplier of that exporter.

These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

This administrative review and notice are in accordance with sections 751(a)(1) and 771(i)(1) of the Act.

Dated: November 3, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

Industrial Nitrocellulose From the Republic of Korea; Notice of Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of Antidumping Duty Administrative Review.

SUMMARY: On July 10, 1998, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping duty order on industrial nitrocellulose (INC) from the Republic of Korea (Korea). This review covers one manufacturer/exporter of the subject merchandise to the United States during the period July 1, 1996, through June 30, 1997.

We gave interested parties an opportunity to comment on our preliminary results. Based on our analysis of the comments received, we have changed the final results from those presented in the preliminary results.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Todd Peterson or Thomas Futtner, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–4195 or 482–3814, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to 19 CFR Part 351 (62 FR 27296, May 19, 1997).

SUPPLEMENTARY INFORMATION:

Background

On July 10, 1998, the Department published in the **Federal Register** (63 FR 37329) the preliminary results of the administrative review of the antidumping order on industrial nitrocellulose (INC) from Korea, 55 FR 28267 (July 10, 1990). On August 10, 1998, we received a case brief from Daesang Corporation (respondent) as well as comments from Hercules Incorporated (petitioner). Based on our analysis of the comments received, we changed the final results from those presented in the preliminary results.

Scope of Review

Imports covered by this review are shipments of INC from Korea. INC is a dry, white amorphous synthetic chemical with a nitrogen content between 10.8 and 12.2 percent, and is produced from the reaction of cellulose with nitric acid. INC is used as a film-former in coatings, lacquers, furniture finishes, and printing inks. The scope of this order does not include explosive grade nitrocellulose, which has a nitrogen content of greater than 12.2 percent.

INC is currently classified under Harmonized Tariff System (HTS) subheading 3912.20.00. While the HTS item number is provided for convenience and Customs purposes, the written description remains dispositive as to the scope of the product coverage. This review covers one manufacturer/exporter of industrial nitrocellulose, Daesang Corporation, and period July 1, 1996, through June 30, 1997.

Analysis of Comments Received

Comment 1

Daesang states that the Department made a clerical error in its preliminary results computer programming by erroneously adding both the commission offset (OFFSETU) and U.S. indirect selling expenses (INDEXUS) in its calculation of foreign net price expressed in dollars (FUPDOL). Daesang states that OFFSETU correctly accounted for home market commissions on two of the three matching control numbers (CONNUMs) for the U.S. sales, which had no commissions. Adding the variable INDEXUS in the calculation of FUPDOL would lead to a double counting of the commission offset. While petitioner did not comment on this specific issue, petitioner supports the Department's Preliminary Determination.

Department's Position

We agree with Daesang Corporation that home market commissions or U.S. indirect selling expenses, whichever is less, have been accounted for in U.S. offsets (OFFSETU) applied to FUPDOL, and have revised our programming language accordingly for these final results.

Final Results of the Review

As a result of our review, we determine that the following margin exists:

Manufacturer/Exporter	Margin (percent)
Daesang Corporation	2.1

The Department shall determine, and the Customs Services shall assess, antidumping duties on all appropriate entires. Individual differences between export price and normal value may vary from the percentage stated above. We have calculated an importer-specific duty assessment rate based on the ratio of the total amount of antidumping duties calculated for the examined sales to the total entered value of the same sales. The rates will be assessed uniformly on all entries of that particular company made during the POR. The Department will issue appraisement instructions directly to the Customs Service.

The following deposit requirements will be effective upon publication of this notice of final results of review for all shipments of industrial nitrocellulose from Korea entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for the reviewed company will be the rate listed above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than fair-value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) for all other producers and/or exporters of this merchandise, the cash deposit rate shall be 66.30 percent, the "all others" rate established in the LTFV investigation (55 FR 21055, May 22, 1990). These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a final reminder to importers of their reponsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 353.32 of the Department's regulations. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This administrative review and notice are in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: October 30, 1998.

Robert S. LaRussa,

Assistant Secretary, Import Administration.

Industrial Nitrocellulose From the United Kingdom; Extension of Time Limit for Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Extension of time limit for final results of antidumping duty administrative review of industrial nitrocellulose from the United Kingdom.

SUMMARY: The Department of Commerce ("the Department") is extending the time limit for the final results of the antidumping duty administrative review of the antidumping order on industrial nitrocellulose from the United Kingdom. This review covers one producer/exporter of industrial nitrocellulose. The period of review is July 1, 1996 through June 30, 1997.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Todd Peterson or Thomas Futtner, AD/CVD Enforcement Group II, Office 4, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington D.C. 20230, telephone (202) 482–4195 or 482–3814, respectively.

SUPPLEMENTARY INFORMATION:

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("the Act") are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are references to the provisions codified at 19 CFR 351.101, et seq. (62 FR 27296—May 19, 1997).

Extension of Final Results

The Department initiated this administrative review on August 28, 1997 (62 FR 45621). Under section 751(a)(3)(A) of the Act, the Department may extend the deadline for completion of an administrative review if it determines that it is not practicable to complete the review within the statutory time limit of 365 days. Because of the complexity of an issue in this case, it is not practicable to complete this review within the statutory time limit of 365 days. The Department, therefore, is extending the time limit for the final results of the aforementioned review to February 3, 1999. *See* memorandum from Holly A. Kuga to Robert S. LaRussa, which is on file in Room B–099 at the Department's headquarters.

This extension of time limit is in accordance with section 751(a)(3)(A) of the Act and § 351.213(h)(2) of the Department's regulations.

Dated: November 3, 1998.

Holly A. Kuga,

Acting Deputy Assistant Secretary, AD/CVD Enforcement Group II.

Manganese Metal from the People's Republic of China; Notice of Extension of Time Limit for Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Extension of Time Limit.

SUMMARY: The Department of Commerce is extending the time limit for the preliminary results of the second review of the antidumping duty order on manganese metal from the People's Republic of China. The period of review is February 1, 1997 through January 31, 1998. This extension is made pursuant to section 751(a)(3)(A) of the Tariff Act of 1930, as amended by the Uruguay Round Agreement Act.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Greg Campbell, Office 1, Import

Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone (202) 482–2239.

SUPPLEMENTARY INFORMATION: Because it is not practicable to complete this review within the time limit mandated by section 751(a)(3)(A) of the Tariff Act of 1930, as amended ("the Act") (*i.e.*, November 2, 1998), the Department of Commerce ("the Department") is extending the time limit for completion of the preliminary results to not later than March 2, 1999. *See* November 2, 1998, Memorandum from Acting Deputy Assistant Secretary for AD/CVD Enforcement Susan H. Kuhbach to Assistant Secretary for Import Administration Robert LaRussa on file in the public file of the Central Records Unit, B–099 of the Department.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 351.213(h)(2).

Dated: November 2, 1998.

Susan H. Kuhbach,

Acting Deputy Assistant Secretary for AD/CVD Enforcement.

BILLING CODE 3510–DS–M

DEPARTMENT OF COMMERCE

International Trade Administration

[A–351–806]

Silicon Metal From Brazil; Antidumping Duty Administrative Review; Time Limits

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of extension of time Limits of final results of review.

SUMMARY: The Department of Commerce is extending the time limits of the final results of the sixth antidumping duty administrative review of the antidumping duty order on silicon metal from Brazil. The review covers five manufacturer/exporters of the subject merchandise to the United States for the period July 1, 1996, through June 30, 1997.

EFFECTIVE DATE: November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Howard Smith or Cameron Werker, Office 4, Office of AD/CVD Enforcement, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 482–5193, or (202) 482–3874, respectively.

SUPPLEMENTARY INFORMATION: Because it is not practicable to complete this review within the initial time limits established by the Uruguay Round Agreements Act (245 days from the last day of the anniversary month for preliminary results, 120 additional days for final results), pursuant to section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), the Department is extending the time limit for completion of the final results until February 2, 1999. *See Memorandum to Robert S. LaRussa*, dated October 28, 1998.

This extension is in accordance with section 751(a)(3)(A) of the Act (19 U.S.C. 1675(a)(3)(A)).

Dated: November 1, 1998.

Holly A. Kuga,

Acting Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

DEPARTMENT OF COMMERCE

International Trade Administration

Export Trade Certificate of Review

ACTION: Notice of issuance of an amended Export Trade Certificate of Review, Application No. 84–9A012.

SUMMARY: The Department of Commerce has issued an amendment to the Export Trade Certificate of Review ("Certificate") granted to Northwest Fruit Exporters ("NFE") on June 11, 1984. Notice of issuance of the original Certificate was published in the **Federal Register** on June 14, 1984 (49 FR 24581).

FOR FURTHER INFORMATION CONTACT: Morton Schnabel, Director, Office of Export Trading Company Affairs, International Trade Administration, (202) 482–5131. This is not a toll free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001–21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing Title III are found at 15 CFR part 325 (1998). The Office of Export Trading Company Affairs ("OETCA") is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a Certificate in the **Federal Register**. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Amended Certificate

Northwest Fruit Exporters' ("NFE") original certificate was issued on June 11, 1984 (49 FR 24581, June 14, 1984) and previously amended on May 2, 1988 (53 FR 16303, May 6, 1988); September 21, 1988 (53 FR 37628, September 27, 1988); September 20, 1989 (54 FR 39454, September 26, 1989); November 19, 1992 (57 FR 55510, November 25, 1992); August 16, 1994 (59 FR 43093, August 22, 1994); November 4, 1996 (61 FR 57850, November 8, 1996); and October 22, 1997 (62 FR 55783, October 28, 1997).

NFE's Certificate has been amended to:

1. Add the following companies as a new "Member" of the Certificate within the meaning of § 325.2 (1) of the regulations (15 CFR 325.2(1)): E. Brown & Sons Inc., Milton Freewater, Oregon; E.W. Brandt & Sons, Inc., Parker, Washington; Domex Marketing Co., Yakima, Washington; Dovex Export Co., Wenatchee, Washington; Henggeler Packing Co., Inc, Fruitland, Idaho; Rainier Fruit Sales, Selah, Washington; and

2. Delete the following companies as "Members" of the Certificate: Diamond Fruit Growers, Hood River, Oregon; Haas Fruit Co., Inc., Yakima, Washington; J.C. Watson Co., Parma, Idaho; Jenks Bros. Cold Storage Inc., Royal City, Washington; Jones Orchards, Yakima, Washington; Naumes, Inc., Medford, Oregon; Oro Fruit Co., Oroville, Washington; Perham Fruit Corp., Wapato, Washington; Squaw Creek Ranch, Inc., Pateros, Washington; The Apple House, Inc., Brewster, Washington; and

3. Change the listing of the company name for each current "Member" cited in this paragraph to the new listing cited in this paragraph in parenthesis as follows: Cascadian Fruit Shippers, Inc. (Custom Fruit Packers); Cubberly Packing Co., Inc. (CPC International Apple Co.); Barbee Orchards/Obert Cold Storage (Obert Cold Storage).

A copy of the amended certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

Dated: November 3, 1998.

Morton Schnabel,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510–DR–P

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits and Guaranteed Access Levels for Certain Cotton, Wool, Man-Made Fiber and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Jamaica

November 3, 1998.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits and guaranteed access levels.

EFFECTIVE DATE: January 1, 1999.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.ustreas.gov. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The import restraint limits and Guaranteed Access Levels (GALs) for textile products, produced or manufactured in Jamaica and exported during the period January 1, 1999 through December 31, 1999 are based on limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits and guaranteed access levels for the period January 1, 1999 through December 31, 1999.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 62 FR 66057, published on December 17, 1997). Information regarding the 1999 CORRELATION will be published in the **Federal Register** at a later date.

Requirements for participation in the Special Access Program are available in **Federal Register** notice 63 FR 16474, published on April 3, 1998.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 3, 1998.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 1999, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Jamaica and exported during the twelve-month period beginning on January 1, 1999 and extending through December 31, 1999, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
331/631	745,113 dozen pairs.
338/339/638/639.	1,469,168 dozen.
340/640	687,021 dozen of which not more than 581,326 dozen shall be in shirts made from fabrics with two or more colors in the warp and/or the filling in Categories 340–Y/640–Y[1].
341/641	862,688 dozen.
345/845	212,872 dozen.
347/348/647/648.	1,585,783 dozen.
352/652	2,369,458 dozen.
445/446	53,978 dozen.

[1] Category 340–Y: only HTS numbers 6205.20.2015, 6205.20.2020, 6205.20.2046, 6205.20.2050 and 6205.20.2060; Category 640–Y: only HTS numbers 6205.30.2010, 6205.30.2020, 6205.30.2050 and 6205.30.2060.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 1998 shall be charged to the applicable category limits for that year (see directive dated November 24, 1997) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

Also pursuant to the ATC; and under the terms of the Special Access Program, as set forth in 63 FR 16474 (April 3, 1998), you are directed to establish guaranteed access levels for properly certified cotton, wool, man-made fiber and other vegetable fiber textile products in the following categories which are assembled in Jamaica from fabric formed and cut in the United States and re-exported to the United States from Jamaica during the twelve-month period which begins on January 1, 1999 and extends through December 31, 1999:

Category	Guaranteed Access Level
331/631	1,320,000 dozen pairs.
336/636	125,000 dozen.
338/339/638/639.	1,500,000 dozen.
340/640	300,000 dozen.
341/641	375,000 dozen.
342/642	200,000 dozen.
345/845	50,000 dozen.
347/348/647/648.	2,000,000 dozen.
352/652	10,500,000 dozen.
447	30,000 dozen.

Any shipment for entry under the Special Access Program which is not accompanied by a valid and correct certification in accordance with the provisions of the certification requirements established in the directive of February 19, 1987 shall be denied entry unless the Government of Jamaica authorizes the entry and any charges to the appropriate specific limits. Any shipment which is declared for entry under the Special Access Program but found not to qualify shall be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of U.S.C.553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 3, 1998

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 1999, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in Mauritius and exported during the twelve-month period beginning on January 1, 1999 and extending through December 31, 1999, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
Knit Group 345, 438, 445, 446, 645 and 646, as a group.	199,072 dozen.
Levels not in a group	
237	256,715 dozen.
335/835	102,046 dozen.
336	120,083 dozen.
338/339	458,792 dozen.
340/640	782,369 dozen of which not more than 476,248 dozen shall be in Categories 340–Y/640–Y [1].
341/641	541,965 dozen.
347/348	965,737 dozen.
351/651	237,995 dozen.
352/652	2,018,188 dozen of which not more than 1,715,462 dozen shall be in Category 352.
442	12,177 dozen.
604–A [2]	427,959 kilograms.
638/639	552,852 dozen.
647/648/847	745,486 dozen.

[1] Category 340–Y: only HTS numbers 6205.20.2015, 6205.20.2020, 6205.20.2046, 6205.20.2050 and 6205.20.2060; Category 640–Y: only HTS numbers 6205.30.2010, 6205.30.2020, 6205.30.2050 and 6205.30.2060.

[2] Category 604–A: only HTS number 5509.32.0000.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 1998 shall be charged to the applicable category limits for that year (see directive dated December 19, 1997) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

COMMITTEE FOR THE IMPLEMENTATIONS OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Products Produced or Manufactured in Oman

November 3, 1998.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 1, 1999.

FOR FURTHER INFORMATION CONTACT: Roy Unger, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port, call (202) 927–5850, or refer to the U.S. Customs website at http://www.customs.ustreas.gov. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The Bilateral Textile Agreement, effected by exchange of notes dated December 13, 1993 and January 15, 1994, as amended and extended, between the Governments of the United States and the Sultanate of Oman establishes limits for textile products, produced or manufactured in Oman and exported during the period January 1, 1999 and through December 31, 1999.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits for the 1999 period. The limit for Categories 347/348 has been reduced for carryforward applied in 1998.

These limits may be revised if Oman becomes a member of the World Trade Organization (WTO) and the United States applies the WTO agreement to Oman.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 62 FR 66057, published on December 17, 1997). Information regarding the 1999 CORRELATION will be published in the **Federal Register** at a later date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 3, 1998.

Commissioner of Customs
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; the Bilateral Textile Agreement, effected by exchange of notes dated December 13, 1993 and January 15, 1994, as amended and extended, between the Governments of the United States and the Sultanate of Oman, you are directed to prohibit, effective on January 1, 1999, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, man-made fiber, silk blend and other vegetable fiber textile products in the following categories, produced or manufactured in Oman and exported during the twelve-month period beginning on January 1, 1999 and extending through December 31, 1999, in excess of the following levels of restraint:

Category	Twelve-month restraint limit
334/634	154,500 dozen.
335/635	267,645 dozen.
338/339	555,364 dozen.
340/640	267,645 dozen.
341/641	200,733 dozen.
347/348	902,671 dozen.
647/648/847	410,305 dozen.

The limits set forth above are subject to adjustment pursuant to the current bilateral agreement between the Governments of the United States and the Sultanate of Oman.

Products in the above categories exported during 1998 shall be charged to the applicable category limits for that year (see directive dated December 19, 1997) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

These limits may be revised if Oman becomes a member of the World Trade Organization (WTO) and the United States applies the WTO agreement to Oman.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended.

The import restraint limits for textile products, produced or manufactured in the United Arab Emirates and exported during the period January 1, 1999 through December 31, 1999 are based on limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreement on Textiles and Clothing (ATC).

Effective on January 1, 1999, a visa will no longer be required for products integrated in the second stage of the integration of textiles and clothing into GATT 1994 from WTO member countries (see 63 FR 53881, published on October 7, 1998). A visa will continue to be required for non-integrated products. For quota purposes only, products remaining in categories partially integrated will continue to be designated by the designator "pt."

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits for the 1999 period. The 1999 levels for Categories 315 and 361 are zero. The limits for certain categories have been reduced for carryforward applied in 1998.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notices 62 FR 66057, published on December 17, 1997). Information regarding the 1999 CORRELATION will be published in the **Federal Register** at a later date.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 3, 1998.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Executive Order 11651 of March 3, 1972, as amended; and the Uruguay Round Agreement on Textiles and Clothing (ATC), you are directed to prohibit, effective on January 1, 1999, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products in the following categories, produced or manufactured in the United Arab Emirates and exported during the twelve-month period beginning on January 1, 1999 and extending through December 31, 1999 in excess of the following levels of restraint:

Category	Twelve-month restraint limit
219	1,365,418 square meters.
226/313	2,334,898 square meters.
315	–0–.
317	37,666,652 square meters.
326	2,204,148 square meters.
334/634	263,024 dozen.
335/635/835	180,561 dozen.
336/636	227,953 dozen.
338/339	688,251 dozen of which not more than 433,697 dozen shall be in Categories 338–S/339–S [1].
340/640	403,305 dozen.
341/641	373,623 dozen.
342/642	296,822 dozen.
347/348	483,264 dozen of which not more than 241,632 dozen shall be in Categories 347–T/348–T [2].
351/651	201,652 dozen.
352	393,287 dozen.
361	–0–.
363	6,944,665 numbers.
369–S [3]	102,273 kilograms.
369–O [4]	725,451 kilograms.
638/639	278,268 dozen.
647/648	398,852 dozen.
847	250,442 dozen.

[1] Category 338–S: only HTS numbers 6103.22.0050, 6105.10.0010, 6105.10.0030, 6105.90.8010, 6109.10.0027, 6110.20.1025, 6110.20.2040, 6110.20.2065, 6110.90.9068, 6112.11.0030 and 6114.20.0005; Category 339–S: only HTS numbers 6104.22.0060, 6104.29.2049, 6106.10.0010, 6106.10.0030, 6106.90.2510, 6106.90.3010, 6109.10.0070, 6110.20.1030, 6110.20.2045, 6110.20.2075, 6110.90.9070, 6112.11.0040, 6114.20.0010 and 6117.90.9020.

[2] Category 347–T: only HTS numbers 6103.19.2015, 6103.19.9020, 6103.22.0030, 6103.42.1020, 6103.42.1040, 6103.49.8010, 6112.11.0050, 6113.00.9038, 6203.19.1020, 6203.19.9020, 6203.22.3020, 6203.42.4005, 6203.42.4010, 6203.42.4015, 6203.42.4025, 6203.42.4035, 6203.42.4045, 6203.49.8020, 6210.40.9033, 6211.20.1520, 6211.20.3810 and 6211.32.0040; Category 348–T: only HTS numbers 6104.12.0030, 6104.19.8030, 6104.22.0040, 6104.29.2034, 6104.62.2006, 6104.62.2011, 6104.62.2026, 6104.62.2028, 6104.69.8022, 6112.11.0060, 6113.00.9042, 6117.90.9060, 6204.12.0030, 6204.19.8030, 6204.22.3040, 6204.29.4034, 6204.62.3000, 6204.62.4005, 6204.62.4010, 6204.62.4020, 6204.62.4030, 6204.62.4040, 6204.62.4050, 6204.69.6010, 6304.69.9010. 6210.50.9060, 6211.20.1550, 6211.20.6810, 6211.42.0030 and 6217.90.9050.

[3] Category 369–S: only HTS number 6307.10.2005.

[4] Category 369–O: all HTS numbers except 6307.10.2005 (Category 369–S); 5601.10.1000, 5601.21.0090, 5701.90.1020, 5701.90.2020, 5702.10.9020, 5702.39.2010, 5702.49.1020, 5702.49.1080, 5702.59.1000, 5702.99.1010, 5702.99.1090, 5705.00.2020 and 6406.10.7700.

The limits set forth above are subject to adjustment pursuant to the provisions of the ATC and administrative arrangements notified to the Textiles Monitoring Body.

Products in the above categories exported during 1998 shall be charged to the applicable category limits for that year (see directive dated November 25, 1997) to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such products shall be charged to the limits set forth in this directive.

Effective on January 1, 1999, a visa will no longer be required for products integrated in the second stage of the integration of textiles and clothing into GATT 1994 from WTO member countries (see directive dated September 30, 1998). A visa will continue to be required for non-integrated products. For quota purposes only, products remaining in categories partially integrated will continue to be designated by the designator "pt."

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Nevada Test Site

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Committee meeting: Environmental Management Site-Specific Advisory Board (EM SSAB), Nevada Test Site.

DATES: Wednesday, December 2, 1998: 5:30 p.m.–9:00 p.m.

ADDRESSES: U.S. Department of Energy, Nevada Support Facility, Great Basin Room, 232 Energy Way, North Las Vegas, Nevada.

FOR FURTHER INFORMATION CONTACT: Kevin Rohrer, U.S. Department of Energy, Office of Environmental Management, P.O. Box 98518, Las Vegas, Nevada 89193–8513, phone: 702–295–0197.

SUPPLEMENTARY INFORMATION:

Purpose of the Boord: The purpose of the Advisory Board is to make recommendations to DOE and its regulators in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

5:30 p.m. Call to Order
5:40 p.m. Presentations
7:00 p.m. Public Comment/Questions
7:30 p.m. Break
7:45 p.m. Review Action Items
8:00 p.m. Approve Meeting Minutes
8:10 p.m. Committee Reports
8:45 p.m. Public Comment
9:00 p.m. Adjourn

Copies of the final agenda will be available at the meeting.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Kevin Rohrer, at the telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 between 9:00 a.m. and 4 p.m., Monday–Friday, except Federal holidays. Minutes will also be available by writing to Kevin Rohrer at the address listed above.

Issued at Washington, DC on November 2, 1998.

Rachel M. Samuel,

Deputy Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Hanford Site

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92–463, 86 Stat. 770) notice is hereby given of the following Advisory Committee meeting: Environmental Management Site-Specific Advisory Board (EM SSAB), Hanford Site.

DATES: Thursday, December 3, 1998: 9:00 a.m.—5:00 p.m. Friday, December 4, 1998: 8:30 a.m.—4:00 p.m.

ADDRESSES: DoubleTree Inn Downtown, 310 SW Lincoln, Portland, OR, ph: 509–221–0450; fax: 509–226–6260.

FOR FURTHER INFORMATION CONTACT: Gail McClure, Public Involvement Program Manager, Department of Energy Richland Operations Office, P.O. Box 550 (A7–75), Richland, WA, 99352; Ph: (509) 373–5647; Fax: (509) 376–1563.

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE and its regulators in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda: The Board will receive information on and discuss issues related to Hanford Waste Management; the Tank Waste Remediation System (TWRS)—board review process (formation of TWRS committee), status of proposed tri-party negotiations, discussion of public process related to privatization, and input into 90-day plan on the Office of River Protection; board self-evaluation; recommendations on Openness Panel; spent fuel—revised baseline; and the plutonium finishing plant integrated baseline.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Gail McClure's office at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Each individual wishing to make public comment will be provided a maximum of 5 minutes to present their comments near the beginning of the meeting.

Minutes: The minutes of this meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW, Washington, DC 20585 between 9:00 a.m. and 4:00 p.m., Monday-Friday, except Federal holidays. Minutes will also be available by writing to Gail McClure, Department of Energy Richland Operations Office, P.O. Box 550, Richland, WA 99352, or by calling him at (509) 376–9628.

Issued at Washington, DC on November 3, 1998.

Rachel M. Samuel,

Deputy Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

International Energy Agency Meeting

AGENCY: Department of Energy.

ACTION: Notice of Meetings.

SUMMARY: The Industry Supply Advisory Group (ISAG) to the International Energy Agency (IEA) will conduct meetings November 16–17, at the IEA's headquarters in Paris, France, to permit ISAG representatives to participate in the training phase of an Emergency Response Exercise.

FOR FURTHER INFORMATION CONTACT: Samuel M. Bradley, Acting Assistant General Counsel for International and Legal Policy, Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585, 202–586–6738.

SUPPLEMENTARY INFORMATION: In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272(c)(1)(A)(i)), the following notice of meetings is provided:

Meetings of the Industry Supply Advisory Group (ISAG) to the International Energy Agency (IEA) will be held on November 16–17, 1998, at the headquarters of the IEA , 9 rue de la Federation, Paris, France, beginning at approximately 9:00 a.m. on November 16. The purpose of these meetings is to permit ISAG representatives to participate in the training phase of an Emergency Response Exercise. The agenda for the meetings is as follows:

November 16, 1998

1. Review of the Agenda and Focus of the Training Program
   - Welcome to the IEA
   - Objectives of ISAG Training 1998 and Review of the Agenda
2. IEA Organization and Purpose
   - Basic Objectives of the IEA
   - Emergency Management Organization—the Agreement on an International Program, Industry Advisory Board (IAB), Standing Group on Emergency Questions (SEQ), ISAG, and Emergency Operations Team
3. Legal Issues
4. ISAG's Role, Organization and Responsibilities
   - Background on ISAG
   - General ISAG Responsibilities
5.
   - Introduction to the Emergency Management Manual (EMM) and Reference Guide
   - Introduction to Coordinated Emergency Response Measures (CERM)
6. ISAG Activities
   - Pre-operational Phase
   - Operational Phase—Base Period Final Consumption, Available Supplies, Emergency Response Drawdown Obligation, and Allocation Rights/Allocation Obligations Matrix
7. An Introduction to IEA Information and Communications Systems
   - Communication Services at the IEA and Data Security
   - Data Available at the IEA to ISAG
   - Structure and Contents of Questionnaires A and B, and Reporting Relationships
8. The Balancing Process and Voluntary Offers
   - Definitions of Voluntary Offers and their Role in the EMM Balancing Process
   - Functions of the Emergency Operations Team, National Emergency Sharing Organizations, and Reporting Companies in Generating and Processing Voluntary Offers
   - Creation of a Voluntary Offer
9. Description of Disruption Scenario and Discussion of Major Imbalances

November 17, 1998

Disruption Scenario

1. Work of Day 2
   - Review of the Objectives of Day 2
2. Definition of Main Problem Areas Resulting from Disruption Scenario and ISAG's Monitoring Role
   - Impact of Disruption on:
   - Crude oil and product streams
   - Key countries
   - Refining operations
   - Transport

Emergency Response Strategy

1. Group Discussion of Crisis Scenarios with Participants Using their Expertise to Refine Definitions of Problems and Identify Solutions (N. America, Far East, NW Europe, Mediterranean)
2. Individual Groups Present their Conclusions for General Discussion
3. Final Consideration of Technical Consequences arising from a Disruption and Possible Response Strategies
4. Prepare Summary for ISAG Manager to Present at the Emergency Response Exercise 1998
5. Practical Work on Voluntary Offers Prepared by Secretariat from Disrupted Data Base
6. Critique of Training Program and Summary
7. Further Practical Work on Voluntary Offers as Required

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act (42 U.S.C. 6272(c)(1)(A)(ii)), this meeting is open only to representatives of members of the ISAG and their counsel, representatives of the Departments of Energy, Justice, and State, the Federal Trade Commission, the General Accounting Office, Committees of the Congress, the IEA, and the European Commission, and invitees of the ISAG or the IEA.

Issued in Washington, D.C., November 3, 1998.

Eric J. Fygi,

Acting General Counsel.

DEPARTMENT OF ENERGY

[FE Docket No. 98–85–NG]

Office of Fossil Energy; Renaissance Energy (U.S.) Inc.; Order Granting Long-Term Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Renaissance Energy (U.S.) Inc. (Renaissance U.S.) authorization to import up to 23,404 Mcf of natural gas per day from Canada for a ten-year term beginning on November 1, 1998, through October 31, 2008, under the terms and conditions of its gas supply contract with Renaissance Energy Ltd. The natural gas will be imported at the international border between Canada and the United States at Niagara Falls, New York.

This Order may be found on the FE web site at http://www.fe.doe.gov., or on our electronic bulletin board at (202) 586–7853. It is also available for inspection and copying in the Office of Natural Gas & Petroleum Import and Export Activities Docket Room, 3E–042, FE–34, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., November 2, 1998.

John W. Glynn,

Manager, Natural Gas Regulation, Office of Natural Gas and Petroleum Import and Export Activities, Office of Fossil Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Bonneville Power Administration

Mid-Columbia Coho Restoration Feasibility Project

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Notice of Floodplain and Wetlands Involvement.

SUMMARY: This notice announces BPA's proposal to implement various studies and research projects in the Methow, Wenatchee, and Entiat River watersheds, located in the State of Washington in Chelan and Okanogan Counties. These projects will focus on the feasibility of restoring coho salmon to the mid-Columbia tributaries, including the release of coho fingerlings and smolts into these tributaries and the possible initiation of a local broodstock development program. In accordance with DOE regulations for compliance with floodplain and wetlands environmental review requirements, BPA will prepare a floodplain and wetlands assessment and will perform this proposed action in a manner so as to avoid or minimize potential harm to or within the affected floodplain and wetlands. The assessment will be included in the environmental assessment being prepared for the proposed project in accordance with the requirements of the National Environmental Policy Act. A floodplain statement of findings will be included in any finding of no significant impact that may be issued following the completion of the environmental assessment.

DATES: Comments are due to the address below no later than November 24, 1998.

ADDRESSES: Submit comments to Communications, Bonneville Power Administration—ACS–7, P.O. Box 12999, Portland, Oregon 97212. Internet address: comment@bpa.gov.

FOR FURTHER INFORMATION, CONTACT: Nancy Weintraub—ECN–4, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon, 97208–3621, phone number 503–230–5373, fax number 503–230–4089.

SUPPLEMENTARY INFORMATION: The project would involve work in the Wenatchee, Entiat, and Methow watersheds. The work would include mostly activities with minimal impacts, such as snorkeling, seining, electroshocking, screw trapping, spawning surveys, and placement of fish into these rivers and their tributaries. It may also involve the construction of low-impact, low-technology acclimation ponds or the netting-off of side channels to provide sites for coho acclimation. Placement of temporary weirs into streams may also occur. Exact locations for these activities have not yet been identified, but existing facilities will be used as much as possible. The only alternative identified to date is the no-action alternative.

Maps and further information are available from BPA at the address above.

Issued in Portland, Oregon, on November 2, 1998.

Thomas C. McKinney,

NEPA Compliance Officer.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TM99–1–20–000]

Algonquin Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Algonquin Gas Transmission Company (Algonquin) tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, December 1, 1998.

Algonquin states that, pursuant to Section 32 of the General Terms and Conditions of its FERC Gas Tariff, it is filing to revise the Fuel Reimbursement Percentages (FRPs) for the four calendar periods beginning December 1, 1998. Algonquin states that company use for the actual period decreased by 34% compared to Algonquin's projected requirement from the last FRQ annual filing due primarily to decreased fuel use as a result of lower throughput and decreased unaccounted for gas. Algonquin states that the use of actual data for the latest available 12-month period yields decreased FRPs which, compared to the last FRQ annual filing, consist of a 0.03% decrease in the FRP for the Winter season and seasonal decreases for the Spring, Summer and Fall seasons ranging from 0.36% to 0.54%..Algonquin proposes to levelize the three non-winter periods in response to requests from customers for rate stability.

Algonquin requests any waivers necessary to permit the percentage calculated from the actuals for the entire 8-month period, combining Spring, Summer and Fall, to be applied during each of the three seasonal periods so that for the entire 8-month period the FRP will not change from one season to the next.

Algonquin also states that it is submitting the calculation of the fuel reimbursement quantity (FRQ) deferral allocation, pursuant to Section 32.5(c) which provides that Algonquin will calculate surcharges or refunds designed to amortize the net monetary value of the balance in the FRQ Deferred Account at the end of the previous accumulation period.

Algonquin states that for the period August 1, 1997 through July 31, 1998, the FRQ Deferred Account resulted in a net debit balance that will be surcharged to Algonquin's customers, based on the allocation of the account balance over the actual throughput during the accumulation period, exclusive of backhauls. Algonquin also states that the amounts reflected in the filing are computed on the basis of actual cash transactions, consistent with the Commission's holdings in Koch Gateway Pipeline Co., 76 F.E.R.C. ¶61,296 (1996), and ANR Pipeline Co., 80 F.E.R.C. ¶61,173 (1997), in which the Commission established its currently effective policy of requiring pipelines to use cash transactions, rather than imputed values, for purposes of calculating deferred accounts related to imbalance resolution procedures.

Algonquin states that copies of this filing were mailed to all affected customers of Algonquin and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,

Secretary.

[Docket No. RP99–118–000]

ANR Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that, on October 30, 1998, ANR Pipeline Company (ANR) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets to be effective December 1, 1998:

Second Revised Sheet No. 163
Third Revised Sheet No. 165

ANR states that the purpose of this filing is to comply with Section 1.7 of the Gas Research Institute (GRI) Settlement dated January 21, 1998, in Docket No. RP97–149–003, et al., to provide for a voluntary GRI contribution mechanism in ANR's tariff.

ANR states that copies of the filing have been mailed to all affected customers and state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Columbia Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Columbia Gas Transmission Corporation (Columbia) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following revised tariff sheets to become effective November 1, 1998:

Thirtieth Revised Sheet No. 25
Thirtieth Revised Sheet No. 26
Thirtieth Revised Sheet No. 27
Twelfth Revised Sheet No. 30A

On December 22, 1997 Columbia submitted tariff sheets pursuant to Stipulation I, Article I, Section E, True-up Mechanism, of the Settlement (Settlement) in Docket No. RP95–408 et al., approved by the Commission on April 17, 1997 (79 FERC ¶61,044 (1997)). Pursuant to the true-up provision, Columbia is required to true-up its collections from the Settlement Component for 12-month periods commencing November 1, 1996. The initial 12-month period ended October 31, 1997. In compliance with the Settlement, Columbia filed to return an over-recovered amount of $680,404, including interest, from that initial 12-month period through an adjustment to the Settlement Component of the base rates for the period January 1, 1998 through October 31, 1998. In accordance with the Settlement, the true-up component of the Settlement Component is to be removed effective November 1, of each year. The instant filing is being made to remove such true-up component from the currently effective Settlement Component effective November 1, 1998.

Columbia states that copies of its filing have been mailed to all firm customers, interruptible customers, and affected state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

David P. Boergers,

Secretary.

Columbia Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Columbia Gas Transmission Corporation (Columbia) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following revised tariff sheets to become effective January 1, 1999:

Fourth Revised Sheet No. 443

Columbia states that this filing is being submitted pursuant to the April 29, 1998, order issued by the Federal Energy Regulatory Commission (Commission) in the Gas Research Institute (GRI) proceedings in Docket Nos. RP97–149–003, et al. 83 FERC ¶61,093 (1998) (Order) approving the Stipulation and Agreement dated January 21, 1998 (Settlement). In the Settlement, Columbia agreed to be a voluntary collection agent for shippers who voluntarily choose to contribute to GRI programs through a "check-the-box" mechanism on billing invoices in addition to the settlement charges, beginning January 1, 1999. The settlement provides that, among other things, effective January 1, 2005, GRI surcharges will no longer be in effect and will reflect declining surcharge rates for the period 1998 through 2003, with adjustments in 2004, if needed. Section 1.7 of the Settlement provides for voluntary funding for the years 1998 through 2004 and that, effective no later than January 1, 2005, all GRI funding and membership will be on a voluntary basis.

Columbia agrees to collect these voluntary amounts submitted by its shippers, and states that these amounts will not be part of Columbia's jurisdictional rates. As part of the "check-the box" procedure, the shipper may state the amount of the contribution, as well as the project(s) the shipper wishes to support. Columbia proposes, consistent with the Order, that the Commission will not review or approve the amounts collected by Columbia. Columbia is adjusting Section 33 of the General Terms and Conditions of its tariff to implement the "check-the box" mechanism.

Columbia states further that copies of this filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.W., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Columbia Gulf Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Columbia Gulf Transmission Company (Columbia Gulf), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following revised tariff sheets to become effective January 1, 1999:

Fourth Revised Sheet No. 262

Columbia Gulf states that this filing is being submitted pursuant to the April 29, 1998, order issued by the Federal Energy Regulatory Commission (Commission) in the Gas Research Institute (GRI) proceedings in Docket Nos. RP97–149–003, et al. (83 FERC ¶61,093) (Order) approving the Stipulation and Agreement dated January 21, 1998 (Settlement). In the Settlement, Columbia Gulf agreed to be a voluntary collection agent for shippers who voluntarily choose to contribute to GRI programs through a "check-the-box" mechanism on billing invoices in addition to the settlement charges, beginning January 1, 1999. The settlement provides that, among other things, effective January 1, 2005, GRI surcharges will no longer be in effect and will reflect declining surcharge rates for the period 1998 through 2003, with adjustments in 2004, if needed. Section 1.7 of the Settlement provides for voluntary funding for the years 1998 through 2004 and that, effective no later than January 1, 2005, all GRI funding and membership will be on a voluntary basis.

Columbia Gulf agrees to collect these voluntary amounts submitted by its shippers, and states that these amounts will not be part of Columbia Gulf's jurisdictional rates. As part of the "check-the-box" procedure, the shipper may state the amount of the contribution, as well as the project(s) the shipper wishes to support. Columbia Gulf proposes, consistent with the Order, that the Commission will not review or approve the amounts collected by Columbia Gulf. Columbia Gulf is adjusting Section 33 of the General Terms and Conditions of its tariff to implement the "check-the-box" mechanism.

Columbia Gulf states further that copies of this filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–100–000]

Crossroads Pipeline Company; Notice of Compliance Filing

November 3, 1998.

Take notice that on October 29, 1998, Crossroads Pipeline Company (Crossroads) tendered for a filing as part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets to be effective November 2, 1998:

First Revised Sheet No. 14
First Revised Sheet No. 24
Fourth Revised Sheet No. 39
Original Sheet No. 39A
Original Sheet No. 39B
First Revised Sheet No. 40
First Revised Sheet No. 41
Fifth Revised Sheet No. 76

Crossroads states that the purpose of this filing is to comply with Order No. 587–H, Final Rule Adopting Standards for Intra-day Nominations and Order Establishing Implementation Date issued on July 15, 1998 in Docket No. RM96–1–008. That order, inter alia, required that pipelines modify their tariffs to incorporate certain Gas Industry Standard Board standards regarding intro-day nominations.

Crossroads states that copies of the filing have been mailed to all affected customers and applicable state regulatory agencies and all parties to this proceeding.

Any person desiring to be heard or to protest said filing should file a motion

to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.
